Millers' & Manufacturers' Ins. Co.

ESTABLISHED - 1885.

No. 32 Church Street, Toronto.

The President, James Goldie, Esq., in moving the adoption of the report on the business of 1892, said: I have much pleasure in drawing your attention to the fact that this company has verified, in a marked degree, every expectation set forth in the original prospectus when organized in 1885.

Up to the present time the insurers with this company have made a saving, when compared with the current exacted rates, of $91,004.20. And in addition thereto bonus dividends have been declared to continuing members amounting to $21,522.72.

Besides achieving such result, we now also have, over all liabilities—including a re-insurance reserve (based on the Government standard of 50 per cent. (50%), a cash surplus of 1.93 per cent. to the amount of risk in force.

Such results emphasize more strongly than any words I could add the very gratifying position this company has attained. I therefore, with this concise statement of facts, have much pleasure in moving the adoption of the report.

The report was adopted and the retiring Directors unanimously re-elected. The Board of Directors is now constituted as follows: James Goldie, Guelph, president; W. H. Howland, Toronto, vice-president; H. N. Baird, Toronto; Wm. Bell, Guelph; Hugh McCulloch, Galt; S. Neelon, St. Catharines; George Pattinson, Preston; W. H. Story, Acton; J. L. Spink, Toronto; A. Watts, Brantford; W. Wilson, Toronto.

HUGH SCOTT, Mgr. and Sec'y. **THOS. WALMSLEY,** Treasurer.

MUNICIPAL DEBENTURES.

400 Acres Choice Farm Land for Sale

In the Township of Romney, Co. of Kent, which is the Garden of Canada.

These lots are situated on either side of the main road leading southward from Tilbury Centre toward Lake Erie. A portion of the land is within two miles of the lake and a half mile north of a station on the new Detroit River and Lake Erie Railway. It is also about five miles south of Tilbury Centre on the Canada Southern and Canada Pacific railways. The Grand Trunk is still one mile farther north. On either of these roads a person may reach Detroit in less than one hour. The soil, which is deep and rich, thoroughly drained, is covered with ash, elm, hickory, basswood, etc. Terms to suit purchasers.

THE MONETARY TIMES

Is the best medium in Canada for reaching the investing public and the prominent manufacturers of the Dominion. City, Town, and Village Municipalities having debentures or other securities to dispose of, or wishing to induce the establishment of industries, will do well to consider the advantages of placing such advertisements in the MONETARY TIMES. Write for sample copies and terms.

DECISIONS IN COMMERCIAL LAW.

MORGAN v. DANIELS.—Decided by the Supreme Court of the United States that the decision of the patent office between contesting parties as to priority of invention, is controlling in a subsequent suit between the same parties, on the same question, unless the contrary is established by testimony which carries thorough conviction.

ROBINSON v. CHAPMAN.—The Supreme Court of the United States has held that if an agent effects a sale to himself, under cover of the name of another person, he becomes, in respect to the property, a trustee for the principal, and, at the election of the latter, reasonably made, will be compelled to surrender it, or if he has disposed of it to a *bona fide* purchaser, to account not only for its real value, but for any profit realized by him on such re-sale. An agent will not be permitted to become the purchaser, without the knowledge or consent of his principal, of property committed to him for sale. Where an agent to sell, sells to a purchaser, without any understanding or expectation of the agent that he is to become interested in the purchase with the purchaser or is to take his place in the purchase, he is at liberty afterwards to buy the property of such purchaser.

STEAMSHIP "MARTELLO" v. WILLEY In this case it was decided that the speed of a steamship of six miles an hour in a dense fog is excessive, while she is emerging from the harbor of New York in a neighborhood where she is likely to meet vessels from many points of the compass. It is the duty of a steamship hearing the steam whistle of another vessel in close proximity, in a dense fog, but unable to ascertain her course and position, to stop and reverse her engines so as to reduce her speed to the lowest point consistent with good steerage way. A ship is presumed to be in fault for collision with another ship in a fog by reason of her not having a mechanical fog horn, as required by the revised international regulations. The presumption attends every fault connected with the management of a vessel, and every omission to comply with a statutory requirement, or with any regulation deemed essential to good seamanship, that such fault or omission contributed to the collision. Where a ship has failed to comply with a statutory requirement as to her management, in a collision with another vessel, the burden rests upon her of showing that such fault did not and could not have contributed to the collision.

BRADLEY FERTILIZER COMPANY v. THE "EDWIN I. MORRISON."—Held that where by the charter party it is agreed on the part of the vessel that she shall be tight, staunch, strong, and in every way fitted for the voyage, the charterer is bound to see that his vessel is seaworthy and suitable for the service for which she is to be employed, while no obligation to look after the matter rests upon the owner of the cargo; if there be a defect, although latent and unknown to the charterer, he is not excused. Where perils of the sea are excepted by the charter party, the burden of proof is on the owner to show that the vessel was in good condition, and suitable for the voyage at its inception, and the exception does not exonerate him from liability or loss or damage from one of those perils to which his negligence, or that of his servants, contributed.

An interesting decision is that of the Court of Appeal of New York in the case of Murphy v. Jack, in which it was held that since it was possible to recognize a person's voice at the other end of a telephone an affidavit based upon such a conversation is admissable and is sufficient to justify the court in acting upon such an affidavit, if it is made to appear that the deponent was acquainted with the person at the other end of the telephone and recognized his voice, or if it appeared in some satisfactory way that he knew it was that person that was speaking to him.

In Sutherland v. Webster the Court of Appeal of Ontario recently held that a covenant by an incoming partner to indemnify and save harmless a retiring partner against the liabilities, contracts and agreements of the firm, cannot, after breach of agreement to sell goods but before action or ascertainment of the damages, be assigned to the damnified purchaser so as to enable him to recover the damages by direct action against the covenanter

WEALLEN v. CANADA SOUTHERN RAILWAY CO.—Held in this case by the Ontario Court of Appeal that a railway company incorporated under the laws of this Province cannot, without legislative sanction, confer upon a foreign railway company the immunities and privileges which it possesses, and the railway company in running engines over the line of railway in this Province is subject to the common law liability against a person using a dangerous and fire-emitting machine, and is liable for damages without proof of negligence.

In Greene v. Castleman, it was held by the Queen's Bench Division that where a chattel mortgage was made in favor of an incorporated trading company, and the affidavit of *bona fides* was made by the secretary-treasurer, who was also a shareholder in the company, and had an important share in the management of its affairs, there being, however, a president and vice-president, the affidavit was to be regarded not as made by one of the mortgagees, but as by an agent, and as no written authority to him was registered as required by R. S. O., c. 125, sec. 1, the mortgage was invalid as against creditors.

THE QUEBEC REGISTRARS.

The annual meeting of the registrars of the Province of Quebec was held on Tuesday last in Montreal, and is described as the best attended since the formation of the association Over fifty registrars from different counties of the province were present. Many legal questions relating to the registration laws were submitted and discussed, most of them being of the highest public interest. It appears from the discussion that the registrars attached a great importance to the uniform appliance of their tariff, so as to give satisfaction to the public. The elections which followed resulted in the choice of the following officers: A. Poisson, registrar for Arthabaska, president W H Lambly, registrar for Megantic vice president. J C Augur, registrar for Montreal East secretary. L. N Carrier, registrar for Levis, treasurer. Joseph Stevens, registrar for Soulanges, manager; H. Taschereau Fortier, registrar for Beauce, and H Q de St George, registrar for Portneuf, auditors.

GEO. A. STIMSON

9 Toronto St. Toronto, Ont.

Mercantile Summary.

ALFRED TANGUAY, dry goods dealer, Que., whose stoppage, owing to endorsations for N. Royer & Co., we recorded last week, is offering his creditors 65c. on the dollar.

A. PELOQUIN & Co., general dealers at Sault au Recollet, Que., reported failed several weeks ago, have managed to arrange a compromise at 25 cents on the dollar cash.

IT is proposed to have a convention of the Maritime Boards of Trade in St. John, New Brunswick, on September 25 next, and arrangements to that effect are being made. Merchants' week in St. John will be from September 20th to October 1st.

AN offer of 25 per cent. made to the creditors of W. A. Freeman, of Hamilton, not being acceptable, the stock will be sold next week.——The assets of Merrick & Hurlburt, manufacturers of hosiery at Toronto Junction, have been sold at 80 per cent.

A SPECIAL meeting of the shareholders of the Canada Shipping Company was held last week in Montreal, to receive the report of a committee appointed at the annual meeting to consider the reduction of present capital stock and the issuing of preference shares. The report was adopted, and the directors were authorized to apply for legislation to carry out the scheme.

Mercantile Summary.

REVENUE, both customs and inland, shows a decline for the month of June at Montreal. Last month the customs officials took in $465,339 at that city, but in June, 1893, the amount was $637,589. Last month's inland revenue at Montreal was $159,712, as compared with $200,976 in the same month of 1893.

HERMAN VON ENDE, cigar maker, at Preston, gave a chattel mortgage a year ago. Now we hear of his assignment.——An assignment has also been made by Cardinal & Sharron, dealers in fancy goods at Rat Portage. They owe Winnipeg firms principally.

A GENERAL dealer of some prominence at Edmundston, N.B., named N. Marquis, has assigned somewhat unexpectedly. His liabilities are about $6,000, and assets are stated at about $1,500. In the schedule of assets, stock is put down at about $1,500, while it is the impression that it should be much larger, and a movement is afoot among the principal creditors to investigate matters closely.

A DEMAND of assignment has been made upon Alton F. Clerk, a Montreal stock broker.——P. Gauthier, carriage maker, reported already as being in trouble, has now assigned, owing $4,527.——A. Senecal & Frere, in the dry goods business for the last three years in the east end

Mercantile Summary.

of Montreal, have just assigned, owing about $7,000, with apparent assets of about $6,000.——L. I. Desrosiers, a grocer of recent establishment, has also made over his estate to the assignee. Liabilities not yet ascertained.

"SINCE Cyrus laid THE CABLE" some progress has been made. There are now no fewer than 37 cable ships in the world to keep cables in repair or to lay new ones, and whereas in 1857 there existed only 87 nautical miles of submarine cable, there are now 139,500 traversing the hills and hollows of all the seas, and no fewer than eight cables across the Atlantic. The first cable was the one carried across the Straits of Dover in 1851.

A REPORT upon the crops in the western corner of the Eastern Townships of Quebec appears in the Huntingdon *Gleaner* of last week. Says that journal: "The growth of crops of every description during the week has been almost phenomenal in its rapidity and luxuriance. This is especially true of Indian corn and potatoes—which, in many cases, are as far advanced as they usually are on the 4th of July. Meadows, too, have improved so much during the past ten days that the apprehensions felt a fortnight ago of a deficient hay crop are less generally entertained now."

Sole Agents for Canada for Priestley's well-known Dress Fabrics and Cravenettes.

Mercantile Summary.

THE assignment is announced of C. N. Percival, dry goods dealer at Smith's Falls to the representative of the Toronto dry goods house of John McDonald & Co. The firm of Percival & Craig got behind last spring and it was arranged that Mr. P. should continue the business, getting an extension of twelve months on liabilities of $19,500. He has, however, defaulted in the June payment, and has now assigned

ONE day last week two members of the staff of the Canada Permanent Loan & Savings Co., Mr. John T. Symonds and Mr. Norman L. Wilcox, were presented by the officers and staff of that company with handsome gold chains and lockets as an evidence of the esteem of the donors. The president of the company, Mr. J. Herbert Mason, made the presentation, the occasion of which was Messrs. Symonds and Wilcox leaving the company's employ to engage in other pursuits.

A FIRM formed only a few months ago at Louiseville, Que., to do a planing mill business, Moreau & Gravel, has already assigned, and owes about $3,000, principally to a local bank. —B. Seguin, a blacksmith at St. Timothee, lately reported failed, has compromised business liabilities of $1,600 at 50 per cent. He also owes $4,200 on mortgage. —Remillard & Frere, foundrymen in a small way at Three Rivers, Que., are in bad shape, and it is reported intended making an offer of compromise, but their effects are now under seizure. Merchandise liabilities are about $20,000

DURING the visit to Montreal, in June, of the American Society of Civil Engineers, among other attentions shown them, the officers and directors of the Canadian Rubber Company invited the party to the company's works, and gave them a luncheon. The guests were manifestly impressed with the extent of this great Canadian industry, which employs a thousand hands, and whose premises extend a thousand feet along two streets, five flats high. The other day the manager received from Mr. Hutton, the secretary of the engineers, a letter, dated New York, in which it is stated that the American Society of Mechanical Engineers "desired to convey to the Canadian Rubber Company, and to the managers their sincere thanks for the opportunity given to visit their shops, and observe the processes of the manufacture of this useful article, adding that the visit was enjoyed by all who were able to profit by it

THE Toronto Industrial Fair is to be held this year during the days from 3rd to 15th September inclusive.

THE damage to Kaslo, B.C., by the recent flood will, upon the estimate of the Nakusp *Ledger*, exceed $75,000.

THE British Columbia cedar shingle is making an excellent record in the east. One dealer in Toronto sold 23 million of these shingles.—*Vancouver World*.

CROPS never looked better at this season throughout the district than at present. Every grain seems to have grown and to be doing well.—*Edmonton, N.W.T., Bulletin*.

THE Leamington *Post* says: "The L. E. & D. R. R. will commence laying new ties on the London & Port Stanley Road in a few days, and will extend the line from Ridgetown to St. Thomas this year."

A THREATENED strike of miners at Nanaimo, B.C., has been averted. Work has been resumed at all the mines, with the exception of the Northfield, where 250 men were employed. This mine will remain closed down for some time.

HENRY SALTER, of Hantsport, N.S., has assigned. He is a manufacturer of fertilizers in a small way, and has also a variety of other occupations, as auctioneer, butcher, farmer and general trader. He owes some $12,000 to $15,000, about $5,000 of which is preferred.

MESSRS. LAZIER & SONS, and Mr. Henry Pringle, who have the franchise for building the Belleville electric street railway, are now getting prices for material, and in a week or ten days will be in a position to say when they will start work. The road will be built before anything is done at the electric light scheme.

FOURTEEN hundred men resumed work at the Grand Trunk car shops, Montreal, on Tuesday, after the Dominion Day holiday. There was a good deal of quiet gladness over the resumption, both in the hearts of the workmen themselves and in those of the shop-keepers who have been trusting many of them while out of work for the last two months.

A DEMAND of assignment has been made upon Mrs. R. D. Greet, who recently acquired the business of the Warren Scale Co., Montreal. The liabilities are about $3,600.——Edward Durand, a fruiterer and fish dealer in Quebec, is trying to effect a settlement at 25 cents in the dollar, cash. Liabilities are about $2,800.

YESTERDAY the confectionery stock of W. T. Ecclestone, in Toronto, was to be sold by the bailiff.——The stock of James Fitzgerald, Victoria Road, will be sold next Tuesday.

THOMAS EMPEY, wholesale dealer in liquors in Napanee, who has been a long time in business and borne a fair record, is in financial trouble, and the sheriff has taken possession of his premises. He will probably owe about $7,000.

A LONDON, Eng., despatch says: "Arrangements have been nearly concluded to provide for the necessary capital to finish the Chignecto ship railway connecting the Bay of Fundy with the Gulf of St. Lawrence. The promoters are sanguine that the railway will soon be in operation and will shortly submit a proposal regarding it to the Dominion Government.

NOTICE is given that a charter is about being sought for La Manufacture de Meubles de Victoriaville, Que. (in English the Victoriaville Furniture Manufacturing Co). Capital is to be $10,000 in shares of $50 each. The principal applicants are Messrs. D. O. and J. O. Bourbeau, J. Auger, L. Mahew and P. H. Guay, all leading merchants of the place. Victoriaville is in Arthabasca county, about one hundred miles east of Montreal.

THE Reford line steamer "Amaranthia," which went ashore near Isle Ronde in Montreal harbor, was got off on Tuesday, 3rd inst. Messrs. Reford & Co. have asked the Harbor Commissioners to hold an investigation and see if the pilot should be punished. Another steamship mishap is the sinking on Tuesday last of the steamer "Haverton" near St. Croix in the Gulf of St. Lawrence. She was laden with coal from Sydney, Cape Breton, and consigned to Carbray, Routh & Co. Vessel insured for $25,000 in English companies.

ELEVEN years ago the Toronto printing firm of Timms, Moore & Co., assigned, and shortly afterward resumed business. In 1890, Moore retired from the firm, George Y. Timms continuing, and in March, 1892, he assigned with liabilities of $10,000, assets being about the same. But creditors at that time were liberal and wrote off 70 per cent. of their claims. Lately Mr. Timms has been sued, and again he makes an assignment. We shall see how liberal his creditors can now afford to be?——Heydon Bros., plumbers, in Toronto, having been pressed by a creditor find an assignment necessary.——Another plumber, named W. J. Guy, began on his own account eleven years ago, and for a time made money. In Oct., 1890, he found himself the owner of more real estate than he could pay for, and was obliged to assign The business was since continued in the name of his wife; now she too assigns.

WE note a few New Brunswick failures. N St. Pierre, who keeps a line store—*i. e.*, a store just on the boundary line between Canada and the United States—at a place with the somewhat poetic name of Winding Ledges, has made an assignment of his estate.——Andrew Lottimer, a boot and shoe dealer at Fredericton, desires to compromise liabilities of about $13,000 at 20 cents on the dollar. This sort of a hankering has become almost chronic with Mr. L., as he is reported to have made a settlement in 1875 at 40 cents, and again in 1889 at 50 cents.——J. Lounsbury, formerly a hotelkeeper at Fredericton, and keeping general store for the last three years at Upper Haynesville, is seeking a settlement at 50 cents.——Adolphus Robichaud, a small grocer at Buctouche, has assigned.

EARLY in the present year, Albert Johnson opened a shoe store at Aurora. About three years previously, he had been in business in Burford, and appears to have been unsuccessful. A few weeks ago, being pressed for payment by a Montreal creditor, he gave a chattel mortgage, and this is now foreclosed.——Another boot and shoe concern in trouble is that of A. Hunter, at Barrie. He began business in 1889. Although he did a good trade, he was obliged, last autumn, to ask an extension from his largest creditors; but not being able to reduce his liabilities, there seemed not much use in waiting longer.——It is reported that T. & J. D. Brotherston, tinsmiths, at Cobourg, have gone away. They have always worked under a chattel mortgage; this being foreclosed, they concluded not to try longer.

IN Vancouver, B.C., a firm of tailors, E. Dawe & Sons, have got into difficulty and assigned. It is only about eighteen months since they removed thence from Collingwood, where they were favorably regarded.——Joseph Kingham & Co., a Victoria manufacturing jewellery firm, are in trouble through the failure of a private bank. Its trustees have taken possession of their property.——An assignment has been made by Pat. T. Patton, proprietor of the Victoria Hotel, in Victoria, B.C., with liabilities of $30,000. The nominal assets will equal about one-half this sum.——In the same city, M. Salmon, dealer in tobacco, cigars, etc., tried to ar-

range a settlement with creditors, but failed to do so. The business is now closed, and creditors will receive a small dividend, if any.

An assignment is made by a general dealer named George Bevilockway, Nanaimo, B.C., who has been keeping store fourteen years, doing a large trade. Unfortunately he has granted credit too freely, and although he claimed to have a surplus of $32,000 in June last, still he is in trouble, and his surplus has largely disappeared.——A year ago Frank G. Moody, grocer in Victoria, succeeded his father, who made him a gift of the stock in the shop. The business was then in good shape. Extravagance and neglect got him into trouble, and he has assigned. Creditors are very much dissatisfied, and will not accept the assignment.——A winding-up order has been granted the British Columbia Woodwork Company (limited) of Vancouver.

Doty Bros. & Co., who carried on an extensive engine business in this city, went into liquidation in May, 1892. The members of the old firm not having received their discharge from creditors, opened a business in October last with Mrs. Doty as proprietor. Evidently they have made a mistake in commencing so large a business in dull times with so little capital. On Wednesday a meeting of their creditors was held, but as it was not well attended nothing definite was accomplished.——Henry Lumbers, maker of patent medicines, has assigned to James Lumbers, of this city.——A few months ago Chas. S. Wright & Co. began the manufacture of carriages in Toronto. Now they are asking creditors to accept 25 per cent. on their claims.——M. Dwan, coal and wood dealer, who assigned last week, is offering creditors 20 per cent. on liabilities of $8,500. Nominal assets, $3,800.

--Little Ethel—"I wish I could get 'quainted with Susie Sweet, but I can't. She's awful exclusive." Mother—"Exclusive? Why, I never heard of the family!" Little Ethel—"Didn't you? Her mother keeps a candy store."—Street & Smith's *Good News*.

—The paragrapher (like death) loves a shining mark. See where he strikes as seen in *Texas Siftings*: "How old are you, sonny?" "Twelve years old, sir." "You are very small for your age. What is your name?" "Johnny Smith. My father is a baker in Manhattan avenue." "Your father is a baker? I might have guessed it by your size. You remind me of his loaves."

SUMMER FASHION IN GLOVES

The yachting glove is here, says an Eastern journal. There are a number of styles from which to choose. A white chamois glove bound and stitched in dark red and fastened with big red buttons is perhaps the favorite. With the ever-popular blue serge costume white chamois gloves are worn bound with blue leather and fastened with buttons the same shade as the binding. The yellow chamois glove is always desirable for yachting wear. When washed it appears as good as new.

This year the gloves are cut in admirable shape and are cheap enough to make their purchase economy. The suede gloves are more suitable for general summer wear than those of glace kid. They absorb the perspiration and are cooler.

The silk glove, which appears with perennial regularity every summer, is now seen in a new style. Gloves of old-gold silk are stitched in black and fastened with black buttons. Grey silk gloves are also treated in the same manner, making a glove jaunty enough to wear with the most up-to-date travelling dress.

—A pound of energy with an ounce of talent will achieve greater results than a pound of talent and an ounce of energy.—*William Mathews*.

TORONTO, FRIDAY, JULY 6, 1894.

THE SITUATION.

After many months of uncertainty and doubt, the tariff bill at Washington has finally passed the Senate, by a majority of five. The narrow majority was the root of the difficulty experienced in getting any sort of a tariff reform measure passed. If the bill does not effect much, it contains the promise of more. The event is a reminder that a protective policy is not permanent and must give way, even according to its advocates, when it has served its purpose. Instead of being a blow at manufactures, some of the changes will help them. It is something to have achieved the freedom of one of the great staples of raw material, wool. This will be a real aid to the woollen manufacture. But the farmer is anxious to know why, when foreign wool is admitted free, 50 per cent. duty is put on woollen goods; and the question is one that will have to be answered. If free coal and free iron had been added to free wool and free timber, tariff reform would have showed notable progress. At any rate, a beginning has been made; but it is by no means certain that the next election may not witness a set back instead of a further step forward. Before a decided advance can be made in the direction of free trade, the working classes require to be enlightened as to their own true interest. While they call for restrictions, on hours and price, on the sale of labor, their only property, they are not in a position to ask that employers shall accept the rule of free trade which they refuse for themselves. The march towards the goal of free trade may be impeded by many obstacles, but it is bound to be triumphant at last.

Tariff legislation ends, for the season, at Ottawa, just about the same time that the Washington bill passes its final stage. The course of procedure in both cases has been nearly the same. The Canadian bill, in its original form, proposed to reduce the duties on a large number of articles, though it left a still larger number untouched. As the bill progressed, showers of amendments minimizing the effect of the original proposals made themselves felt. As a measure of tariff reform, the instalment is scant. On almost every item touched on, considerations of private interests were urged, weighed, and acted upon. Often the legitimate purposes of the Legislature were thwarted, overlaid or forgotten. But here, as at Washington, the bill serves as a reminder that protection is a condition of probation, and cannot be counted on as lasting. Former tariff bills, since 1879, excited the hopes of manufacturers; this one aroused their fears. In both cases trade was disturbed by the suspense occasioned by the long-drawn discussion. At the next general election the tariff question will once more come up, and then the question of reduction will be paramount. A new element, with the Patrons, will enter the contest; and if they do not do much towards its illumination, they will at least, through strength of numbers, help to force a settlement in a direction to which there is a strong resisting element in the present Parliament.

Even on the supposition that an income tax was necessary, it was an anomaly to tack it to the American tariff bill. The bill professed to establish a revenue tariff, that is, a tariff for revenue disassociated from the idea of protection. But it is high enough to serve private protective purposes, and so arranged as not to produce all the revenue required. The abnormal proportions of the revenue are due to the enormous and unprecedented pension list, which at the same time creates the necessity for an income tax. This tax draws upon capital in a special manner, for which a complete precedent, with the exemption of $5,000, will be sought in vain. But besides an income tax proper, the measure includes an inheritance and a gifts tax, and as several of the States draw upon these resources, precisely that sort of double tax of which the colonial agents in England complain, is being resorted to at Washington as well as in London.

A railway strike on a scaleof that now going on in the United States cannot, in the nature of things, last long. If it become general, it would put an end to commerce, and actual famine would ensue in all the great centres of population. It would not have to be continued long to produce worse disaster than war. The want of coal would stop manufactures, the want of ice would spoil enormous quantities of food, the absence of the ordinary modes of transportation would cause a scarcity of the necessaries of existence, in all centres of population, in a short time. Gaunt famine, with her lugubrious train, would not be long in appearing. For these reasons such a strike cannot last long; if it did, the lives of millions would be put in peril. From the prospect of such horrors all parties must recoil, and some means of accommodation must be found.

On Monday, no less than seventeen railways were more or less involved in the strike, and still the circle of the evil continued to extend. The object of the strikers could not be attained if new hands could be found to operate the roads. When so many men are unemployed, the number of volunteers was sure to be large. The strikers resolved that the volunteers should not do what they refused to do themselves; and as violence was the only means of preventing them, mob obstruction was resorted to. If the men had a right to strike, their right was not less clear than that of others to take their places. The Government is bound to protect the new hands in their endeavor to sell their labor on terms which they are willing to accept. On appeal, it is found to recognize this duty, and soon the march of Federal troops towards the centre of the trouble, Chicago, is heard, and it is clear that nothing less than Federal troops will suffice; for two companies of militia when called upon to charge, at Sacramento, Cal., merely withdrew the charges of their rifles. The courts lend a ready aid to the Government in upholding the law. Meanwhile, sympathy with the rioters extends in various

directions, and involves even the restaurant-keepers, who dream of starving out the deputy United States marshals by refusing them food.

President Debs of the American Railroad Union evidently thinks himself a match, and something more than a match, for the President enthroned at Washington. Mr. Debs is credited with the prediction, which, coming from him, is really a threat, that "the first shot fired by the regular soldiers at the mobs will be the signal for civil war." Unless the United States Government is to consent to permit anarchy to reign supreme, as much force must be used as is necessary to enable the new hands who take the place of the strikers to run the trains without molestation. This protection any government, no matter what its complexion, would be bound to accord. The order to charge at Sacramento was disregarded; but this only proves that the militia cannot be relied on. The regular troops, if called upon to perform the painful duty of using force to protect, against mob violence, peaceable citizens trying to do their duty, may be relied on to do theirs. Debs' civil war will not show, as he pretends, ten to one on his side, and only one to defend the authority of the law. No doubt serious mischief may be wrought by reckless men under leaders who talk as Debs talks; but the Government of the Republic, which is bound up with the cause of civilization in the United States, is bound to win. It remains to be seen what suffering Debs, and others like him, will bring on those whom they can influence.

The American connections of the Grand Trunk became early involved, and this, in turn, affected the main lines in Ontario, where only local trains were run, through trains east and west being cancelled. The authority of the men who ordered the strike in the United States does not extend to Canada, and they cannot, by a simple order, bring about the same state of confusion here. There can be no strike here unless ordered on this side; but the enormous outlay of the Grand Trunk in the States, in order to get hold of "through traffic," is jeopardized meanwhile.

Col. Tisdale's complaint, uttered in the House of Commons, that Canadian fishermen on our side of the lakes are obliged to observe a longer close season than the American on their side, can be shown to be reasonable only by presenting proof that the liberty sought would not be destructive of the fishery. What proof is there of this? The close season is not made for the purpose of annoying the fishermen or putting obstacles in their way, but simply and solely for the protection and preservation of the fishery. But Col. Tisdale, who has fishermen voters among his constituents, apparently thinks himself obliged to echo their desires without much regard to their reasonableness.

THE COLONIAL CONFERENCE.

The Colonial Conference began its labors under restrictions and limitations which bind so long as they last, and which are in part only removable. There is no reason to suppose that the Imperial Government would give its sanction to anything which looked to the revival of the obsolete, discarded colonial system of mutual favors. The colonies are bound by the stipulation of Imperial treaties with foreign powers, which ensure to foreign nations any advantage which may be granted, during the continuance of the treaty, to the most favored nation. The existence of this clause has, of late, been challenged by Imperial Confederationists, and its withdrawal demanded. To the widespread empire of Great Britain this clause is probably of considerable value. It is certain that in Imperial circles it is thought to be. The advantages may be unequally distributed, and some contend that the colonies do not get their share. The Australian colonies are under a constitutional restriction which prevents their entering into preferential arrangements with foreign or other colonial governments.

The continued existence of these restrictions must depend upon the attitude of the different parts of the empire affected by them. They are not necessarily irrepealable, but they are not likely to be given up without good cause shown. They constitute the initial difficulty in the way of any intercolonial arrangement of a mutually preferential character. They might be overcome, under certain supposable conditions, but at present their removal is not clearly within sight.

For the colonies and for Great Britain, the question of preferential treatment by the colonies, of one another, is a grave question. This preference, if established at all, would have to include Great Britain as well as the colonies. This might not contravene the most-favored-nation clause, inasmuch as the colonies, as parts of the British Empire, are not distinct nations. But if the arrangement aroused the susceptibilities and the opposition of foreign nations, some serious problems might arise for solution. It is quite true that France and her colonies enjoy between themselves preferential treatment, and if Great Britain had retained her colonial system on the old footings, she might have done so without exciting a murmur from outsiders. But the United States, unreasonable as it would be, might think of retaliation, if the products of Canada were preferred in the British market to American. When, after the declaration of the independence of the Republic, Great Britain resolved to treat nations possessing colonies preferentially, the Government at Washington first remonstrated at the position of inferiority assigned her and finally responded by embargo. The cases are, of course, not parallel, but it is sufficient that they are even remotely analogous to justify calling attention to the historical passage.

There is no reason to believe that Great Britain would enter into any preferential arrangement with the colonies and against the rest of the world. As far back as 1844 the free trade party opposed a discrimination in favor of colonial sugar produced by free labor and foreign-grown sugar produced by slave labor. The Imperial Parliament had voted $100,000,000 to free the slaves in the West Indies, but the free traders afterwards refused to deny themselves the pleasure of buying the slave-grown sugar of other nations on equal terms with that produced by the free labor of her own colonies. The case can now be presented in which the claim for preference would be as great as that arising out of sugar produced by free and sugar produced by slave labor. The free trade sentiment of Great Britain is not weaker to-day than it was in 1844, and is as little as ever inclined to sanction preference in favor of the colonies. It is, we believe, out of the question to expect that the Mother Country will enter into any such arrangement. And the colonies cannot at present discriminate against nations which have treaties with England which contain the most-favored-nation clause. It is possible that this clause may be got rid of if the colonies unitedly demanded it. But the way to get a larger share of the trade of other nations is not to increase the taxes on their products, but to lower them; to increase them discriminately is to repulse their commerce.

It is unfortunately true that Canada has not a public man at the conference who understands the economy of international trade. They are all groping in the dark, and we may be thankful if they do no mischief.

Suppose it were proposed that the colonies uniting for trade purposes should retain their present tariffs, as against the outside world, and adopt a common tariff as between themselves, the mode of action would not bring any consolation to outsiders. Whether such an arrangement between the colonies themselves would be acceptable, or if accepted provisionally, whether it would give satisfaction, is one of the things to be considered. A host of objections would present themselves, from different standpoints, in any discussion of the question, and it is considered that many such must have found expression in secret conference.

The one question on which something practical ought to be possible is that of the means of communication between Canada and Australia. This implies that the colonies interested shall agree on the proportionate aid which either will grant. Whether assistance will be obtained from the British treasury is still in doubt, and a rival interest is offering strong opposition. Already a general resolution in favor of the Pacific cable has been passed.

The best recipe for increasing the trade of the colonies will be to remove burthens from it and make it as free as the circumstances will permit. If the conference tends to impress this truth on the public mind, it will not have been called together in vain.

In any case the meeting of these delegates from British colonies is not likely to be without justification. It was worth while to make some sacrifice to bring the representatives of the great colonies together to exchange ideas, and to see how far they agree on questions of common concern and wherein they differ. This knowledge will be of mutual benefit. Australia is no longer the geographical myth to Canada, or Canada the geographical myth to Australia, that they remained so long as the public men of one colony knew nothing of the public men of the other. To have exchanged sentiments and to have broken bread together may leave recollections behind not wholly without value, even if there were nothing more; but we hope for at least an improvement of the means of intercommunication as the result of the gathering.

UNITED STATES RAILWAYS.

The Interstate Commission at Washington has issued advance sheets of the forthcoming volume containing statistics of railways in the United States for the year ended with June, 1893. This is the sixth report of the Commission, and is prepared by its statistician, the preliminary income account for the period having been issued in December last. In spite of all we have heard about the folly and extravagance of the Americans in building railways of late years where they were not needed and could never pay, we find that the aggregate mileage of railroads in the Republic was increased by nearly five thousand miles (4,897½) during the fiscal year under notice, as compared with an increase of only 3,160 miles in the year preceding.

The aggregate mileage of railways in the United States at the beginning of July last year was 176,461 miles. But the total length of line, including all tracks, was 230,197 miles, which includes 10,051 miles of second track, and 42,043 miles of yard track and sidings. We thus learn the instructive fact that the length of yard track and sidings in the United States is 24 per cent., nearly, of the single track mileage. It is to be noted that there is, besides, over 10,000 miles of "second track," or as we would call it, double track. Fifteen of the western, south and middle States show an increased mileage on the year, several show a decrease. The total number of United States railway corporations in existence at the end of June, 1893, was 1,890, being an increase of 68 during the year covered by the report. Of this number 752 were independent operating roads and 989 maintained operating accounts. The tendency toward some form of consolidation during the year has been quite marked; 28 roads, representing 750 miles, have been merged; 20 roads, representing 1,782¾ miles, have been reorganized; and 16 roads, representing 1,469 miles, have been consolidated.

Now for a glance at the monetary position of this great assemblage of business organizations. The aggregate of property which is properly classified as railway capital in these roads is $10,506,235,410, which shows railway capital equal to more than $63,000 per mile of line. The amount of stock outstanding was $4,668,985,418, of which 85 per cent. was common stock, the remaining 15 per cent. being preferred stock. The funded debt outstanding was $5,225,689,821, classified as follows: Mortgage bonds, $4,504,383,162; miscellaneous obligations, $410,474,647; income bonds, $248,132,780, and equipment-trust obligations, $62,699,282. The amount of investment in the railway securities has increased during the year to $1,563,022,233, which is an increase of $171,565,180.

Probably the most dismal fact for investors in the whole of this document, packed as it is with valuable information, is this, that there is $2,859,000,000 of stock paying no dividends during the year. This means that 61.24 per cent. of the total stock outstanding yielded no return. Of stocks paying dividends, one-twentieth of of the aggregate paid from 4 to 5 per cent., one-ninth paid from 5 to 6 per cent., one-twentieth paid from 6 to 7 per cent., while from 7 to 8 per cent. was paid by a few roads. The amount of income bonds paying no interest was $204,864,269, or 82.56 per cent. of the total of income bonds. Railway mortgage bonds to the extent of $492,276,000—that is, almost 11 per cent. of the whole—paid no interest.

The seventh paragraph of the abstract—that respecting earnings and expenses—we confess we do not quite understand. The commission tells us that the gross earnings of all the American railways, in the period described, was something over twelve hundred and twenty millions ($1,220,751,874), and that the items were as under:

Gross amount received for carrying freight	$ 829,053,861
" " " " " passengers ...	301,491,816
" " " " " mails	28,445,053
" " " " " express matter...	23,631,394
Total gross receipts thus	$1,182,622,124

There is here a discrepancy of something more than $38,000,000, for the aggregate of the items given does not equal the stated gross earnings by the sum last named the previous year. Operating expenses during the year were $827,921,299, being an increase of $46,923,303 over the previous year. The income from investments reported by the railways was $149,649,615, while deductions on account of fixed charges and other analogous items were $431,422,156. The final net income available for dividends was $111,058,034, being a sum less than the corresponding amount for the previous year of $4,907,157. After deducting from this amount the dividends paid, the income account of railways in the United States for the year 1893 shows a surplus of $8,116,745, which is less than the surplus of the previous year by $5,919,311.

We observe that the commission takes credit for having, with the assistance of the railway accountants, revised the classification for operating expenses: "It is safe to say that within a few years there will be practical uniformity in the bookkeeping of railways so far as operating expenses are concerned." Another subject of interest touched upon in the report is the necessity of compiling freight statistics

more fully than at present is the case. Something akin to a clearing house of freight statistics, the commission consider, will become a necessity in the near future.

ABOUT PRICES.

In actual business, but little difficulty is found in deciding at what price an article shall be offered for sale. A merchant's prices must, if he would succeed, be, on the whole, in harmony with the prices of those who are his competitors for trade. Some people, happy mortals, are without effective competition in certain lines of trade. Here it is necessary to have regard, not so much to the profits of a single transaction, as to the net returns of a year's business. Of course, in these days, every merchant, with rare exceptions, has only one price for his goods. By this we mean one price to all people, which all the "haggling" and persistent attempts to "beat down" will not alter. But there is a sense in which no merchant should confine himself at all times to one unchanged price. Certain goods depreciate in value as the season advances or fashion changes. A skilful merchant will closely follow these and other similar forces affecting demand, and be the first to give effect to depreciations in value.

Caution should be exercised that this perfectly legitimate action should never degenerate into that curse of trade, an unwarranted cut in prices. Few merchants, notwithstanding their newspaper advertisements, enter the arena of trade from philanthropic motives. The universal object of selling merchandise is gain. And merchants, ever ready to acknowledge cutting prices as sin, throw all the blame of doing so upon a neighbor. But suppose a competitor should offer cotton below its cost price. Why follow such a bad example? Suppose he does get a temporary rush of customers, before he has finished supplying the town he will repent the undertaking. To not a few people a reasonable price is the best guarantee of quality, and cheap goods are regarded with suspicion. It is an easy thing for a house to get the reputation of selling "cheap" goods or obtain the name of "high priced"; the happy medium, although harder to attain, is worth striving after.

THE LIFE AGENTS' CONVENTION.

Having advised our readers of the fifth annual convention of the National Association of Life Underwriters, to be held in Chicago on June 19th to 22nd, we may now tell them something of what was done and said on that occasion. The president, Mr. Chas. H. Ferguson, reminded his readers that it is only four years since the organization came into life, at Boston, fourteen associations having sent delegates to that gathering. The second meeting was held at Detroit in June, 1891, and consisted of twenty-five delegations; the third in New York next year, at which thirty associations were represented; the fourth in Cleveland, Ohio, in September of last year, when thirty-one delegations attended. But to the Chicago convention, in June, 1894, no fewer than thirty-seven associations sent delegates. This was properly regarded as a matter for congratulation, especially as the gathering embraced representatives from practically every association that has at any time allied itself with the national body. But the president derived still greater comfort from the internal evidence of progress, which applied to the local associations generally.

Much has been accomplished, Mr. Ferguson tells us, in the brief life of this body. It made the first effort, as an organized body, to get rid of the pernicious practice of rebating premiums, which is "now greatly modified, though still existing." A valuable recommendation made at the Cleveland meeting, too, that had for its object the bringing members into closer relationship, was the introduction of a uniform topic for discussion. The idea has been well carried out, and has tended, in no slight degree, to bring about an improved condition.

The presidential address desires scope given to local associations that they may devise methods for the mutual protection of their members, in regard to "a class of evils which, not being complicated by legal enactments, it is possible to modify, if not altogether eradicate. I have in mind, more particularly, ourbusiness relations with agents, and the fact that there is at present no equitable method for the adjustment of differences between us, even when under contracts specifically drawn, hence I would recommend such action by this body as in its wisdom may be deemed best for all concerned."

It had already occurred to us that such an organization must find great difficulty in working during more than fifty-one weeks of the year, because its officials might be as widely apart as the cities of Boston and St. Louis, for example. We now see that this very difficulty is perceived by the retiring president, who proposes to the association to make the president of the association *ex-officio* chairman of the executive committee. "Organized as we are to-day," he says, "with the home of the president distant from that of the secretary some 900 miles, with the treasurer and chairman of the executive committee still farther distant, t has been impracticable for the executive officers to meet for conference as the needs of the association may have required. I would therefore recommend, in the selection of your official staff for coming years, that you bear these facts in mind." He would also have the functions of the secretary enlarged.

Among the suggestions made for the consideration of each local association were monthly meetings for mutual discussion and conference, and the inviting to these of medical examiners. "They are our co-workers and we would make them our allies." Regarding the laws having reference to rebate, it was recommended that associations organized in States where such laws do not exist shall seek to have them created and then enforced.

We believe that the time has come when aggressive action should be taken where such laws are already on the statute books, and we would therefore recommend the adoption by this convention of the following resolutions:

Resolved, That in the judgment of this convention the time has come for an active enforcement of the anti-rebate laws of the various States, and it is further urged that each local association promptly take steps to secure prosecution where such laws are violated.

Resolved, That the secretary communicate the action here taken to the local associations represented in this body.

The committee in its report did not favor the formation of a National Protective Association for the purpose of keeping unworthy men out of the business, but approved of the Georgia Compact measure.

FISCAL MATTERS IN THE STATES.

The financial and commercial conditions existing in the United States are a puzzle to many residents of that country. Not a few Americans have been in the habit of imagining that their natural resources, their industry and enterprise, and even their form of government, gave them immunity from the trials and disasters that beset other nations. They cannot easily be brought to believe that their statesmen and rulers may be wrong in their policy; but are much more apt to believe that older countries and more experienced statesmen must be wrong. Hence, when they see the industrial depression that has hung over that great country, succeeding the financial squeeze of 1893, and when they feel the result in the stoppage of their own businesses or the reduction of their own incomes, they are staggered.

Some of them try to put the blame on one of the political parties, and affirm, childishly, that if the other party had been in power, so-and-so would never have happened. They leave out of sight such underlying considerations as excessive imports in the face of reduced exports, the lessened value of those exports, the enormous mistake of the former silver coining policy, over-production in manufactures, the Pension Bill, extravagance high and low.

Some of the more influential journals of the United States have spoken out very plainly aginst the excessive protection which the McKinley tariff has imposed on the American people. "The depression in business finds a ready explanation in a policy that reduces revenue at the same time that it increases expenditure," says the Philadelphia *Record*. In an article entitled "McKinley Finance," that journal shows that while for the fiscal year ended June 30th, 1891, the total revenue of the Government was $408,080,983, for the fiscal year ended June 30th, 1894, the revenue was $295,000,000—a falling off of over $100,000,000. To better illustrate the workings of McKinleyism the following figures showing customs and internal revenue receipts for the four past fiscal years are given :

Fiscal Year Ended June 30.	Revenue From Customs.	Internal Revenue.
1891	$229,688,585	$142,606,706
1892	219,522,205	145,686,249
1893	177,452,964	153,971,072
1894	*132,000,000	*145,000,000

*Estimate

Thus while there has been a falling off of more than $97,000,000 in customs, there has been an increase in internal revenue receipts, notwithstanding the business depression. To show the absurdity of blaming the Democratic administration for this condition, the *Record* points out that when the former President, "Harrison, surrendered office to President Cleveland, the Treasury was bankrupt; but fixed expenditure had been swollen to terrific proportions. In 1889, when Harrison went into office, the total ordinary expenditures of the Government, exclusive of interest on the public debt, were $299,288,978. For the fiscal year ended June 30, 1892, the ordinary expenditures were $365,773,905—an increase of over $66,000,000. The 'Billion Dollar Congress' brought ordinary expenditure up to a million dollars per day."

TOWN AND CITY STORES.

From towns within a reasonable distance of a large city there comes a general cry that an increasing portion of the best trade is going to the city departmental stores. This diversion of trade is effected by means of letter orders sent from the country to the city retail establishments; and, if we may judge by the vigorous efforts city stores make to further its development, it is a source of no inconsiderable profit. Merchants in the towns think it but right that citizens of a town should patronize those traders who pay taxes to the municipality, and are helping to build up the town in which their interests are centered. But it is of little account to repeat this to customers, or to lecture them upon their duty. In point of theory, people doubtless *should* buy from their own townsmen; but as an actual fact, they *do* buy where they think it possible to obtain the best value for their money. Sentiment, and a sense of justice, avails but little with a woman when purchasing a new dress or a pair of shoes, and although men give the matter more consideration, and are more easily convinced of the country retailer's claim, even they not seldom patronize the city merchant. And, unless merchants in the towns are somehow able to make people see that their wares are as good and as cheap as those to be bought in the city, this trade migration will continue.

MONEY AND STOCKS.

The week which we purpose to review briefly has in financial circles been a short one and is void of any striking features. In addition to the usual Saturday holiday, Monday was observed as Dominion Day, while the Montreal Stock Exchange also adjourned on the 4th, the natal day of the United States. Although the Toronto Exchange sat on the 4th, business was more or less affected by the holiday character of the day. Industrial stocks have ruled quiet but steady and with the exception of Montreal Street Railway, there has been little activity. In both Toronto and Montreal a considerable amount of Montreal Street Railway stock has changed hands; at present quotations stand with 150 asked and 149¼ bid, new stock 144½ asked and 144 bid. The C.P.R. is evidently more favorably regarded, as their stock is a trifle firmer. Bank stocks remain steady. There has been a little movement in Western Assurance, but beyond this insurance stocks have remained inactive. Loan stocks, too, are unchanged and display little movement.

There has been no change in the money market since our last review, call loans remaining at 4½ to 5 per cent. Although offerings of money are at present more plentiful than the demand, the rates are not regarded as easy, since there is an absence of good security, and new industrial enterprises are scarce. Municipal debentures are now in better demand than they have been for some time past, the Toronto loan which has just been floated being regarded as a very successful financial operation. Commercial paper is being very closely scrutinized by the banks.

FOR DRY GOODS MERCHANTS

The kid glove trade next fall will be done almost entirely on the old lines. The season's prospects will not warrant any extensive handling of new lines.

Beware of the man who feels compelled to bribe you in order to get your trade. The kind or size of the bribe cuts no figure. He and his goods will bear watching.

Fans are smaller this year than heretofore, in graceful acknowledgment of the fact, doubtless, that it is harder to raise the wind than it used to be.—*Chicago Tribune.*

Fall orders, so far received, place whip-cords and diagonals of French design, and estamine and diagonal serges from the looms of Bradford, well to the front among dress goods.

Mr. Sutherland, the foreman of the Embro flax mill, says that the prospect for a good crop of flax in Ontario was never better. The acreage sown with flax in Manitoba shows large increases this year.

The weavers in the Moncton cotton mill who went out on a strike recently have returned to work, and the strike is at an end. The men, we understand, submitted to the terms proposed by the management.

A lady was recently seen cycling in Paris wearing the following attire: A skirt of purple velvet to the knees, with knickers to match, purple velvet bodice, with lilac silk frills; black stockings, high laced boots, and an immense black hat and veil.

The first bale of new cotton, and what is said to be the earliest bale ever raised in the United States, was sold at the Cotton Exchange in Houston, Texas, last Thursday, to Latham, Alexander & Co., of New York, for $235, or at the rate of 39 cents per pound.

There is a scarcity of cream and white silk gloves in the stocks of Toronto wholesale houses. For these a good demand has existed, but in regard to the quantity sold blacks still have the lead. Tan and mode shades have met with better success than they received a year ago.

The trimming goods' departments are quiet and trade is of a sorting up character. Small wares, however, such as elastics and hooks-and-eyes, meet fairly good enquiry. There has been, of late, a slight revival in the button trade, but the increased movement is by no means very marked.

Cream and white costumes are now seen everywhere upon our streets. Duck material appears to have won the popular fancy, and is worn perhaps more than any other summer fabric. The designs are not exceedingly varied, and white grounds with black and white specks or stripes are most often seen.

The sudden change, in the early part of the summer, from unusually cold to excessively hot weather, has had the effect of making this an excellent season for the sale of white goods, Swiss spots, Victoria lawns, white and colored ducks and fancy white muslins, as well as zephyrs in plain and striped patterns, have all met with good enquiry.

The Glasgow *Herald*, speaking of Fifeshire linen, says: "During the past week trade all round has deepened into dulness; neither sellers nor buyers have indicated great exertions to do business. On both sides—taking present prospects into careful consideration—it is anticipated that prices will be under their present standards ere long. Abroad the flax crop looks promising, and in the face of this favorable state of prospects buyers on this side have shown a laxity in venturing."

That values will rule firmer this fall many buyers are inclined to believe. The United States Tariff Bill has, at last, passed the Senate, and this has had a favorable effect upon commerce across the border line. American buyers are now making their appearance in Europe, and as a consequence, the values of some goods are stiffening. Toronto

houses are advised that all plain French wool dress goods, cashmeres and henriettas have advanced from 5 to 7½ per cent. There is also an upward move reported in certain lines of hosiery and gloves. Prices for some time have been upon a basis that in many instances admitted of little or no profit to manufacturers, and any marked increase in demand of necessity leads to higher prices.

There is a bushel of wisdom in a remark made by a business man lately: "You've got to push yourself out at times to win trade." Life is too short, and the world is too full of hustle for you to wait to let the best goods sell themselves.

Don't adopt the latest mode,
Don't trail your dress upon the road;
Don't ever lace your waist too tightly,
Don't wear a boot or glove unsightly;
Don't wear a thing that needs repair,
Don't, please, forget to brush your hair;
Don't ever wear too large a check;
Don't show too much of snowy neck.

Orders for fall requirements are being cautiously placed by the retail trade. As a travelling representative of a Toronto house puts it, "We are not met at every station by a band and torchlight procession." Judicious caution is a good thing, for since the retirement of Mr. Wiggins, as prophet of our Canadian weather, it is impossible to know beforehand just the kind of weather we are going to have during a coming season. And as every merchant knows, a late fall and winter is a deadly blow to the summer's trade in dry goods. But there is such a thing as being too timid and relying too much upon the wholesale jobber to carry the stock and bear all the risk. Many merchants who followed this course during the present season are now mourning "the profits lost on the goods they could have sold if they had only had them," as a well known mercantile bull puts it.

FOR GROCERS AND PROVISION DEALERS.

The grocers of Tilsonburg have decided to close their places of business at 8 o'clock each evening.

Private advices from Brazil commence to speak of the probability of an early increase in arrivals of coffee, which is accepted as an indication that the rains have nearly or quite ceased.

Our British Columbia exchanges say that the strike among the fishermen of the salmon canneries, of which we gave notice last week, is confined to the Skeena River. The canneries on the Naas and along the coast are not affected. A big run of fish is expected this year, and if this occurs the canners feel themselves independent of the early run.

Year after year, proudly asserts the *Observer*, Cowansville, Que., becomes to be recognized more and more as the cheese centre of the district. Factory men come for miles around to sell their cheese, and this year the buyers have recognized Thursday as a sort of market day.

The grocers and butchers of the Winnipeg Caterer's Union have a petition in circulation asking the chairman to call a meeting to discuss the advisability of having a weekly half-holiday during July and August. It is thought that the grocers, butchers and dry goods dealers will all probably arrange to keep the same half day.

In a business circular from Mayaguez, Porto Rico, received on Monday, occurs the following sentence: "We must call attention of shippers to the above low grades of dry fish exported from Nova Scotia which are daily becoming more difficult to handle, and will have to be subjected to important variations in prices." Upon quality depends the demand, and upon the demand depends the profits and general interest of the trade.

The Liverpool, N.S., *Times* says: "Very discouraging reports come from our boat fishermen all along the shore, as well as from the lobster canneries. The great fall off in the catch of lobsters last week was thought to be owing to the heavy sea which prevailed, but with a smoother sea this week the catch has continued to decrease, and some of the fishermen have taken up their traps for the season. The spirt of good luck the cod fishers had last week did not last, and for some days the best fished boats have been coming in with less than half a fare."

Latest mail advices from Barbadoes are to June 20th, and report a very strong market for sugar and molasses, with prices advancing. Molasses was quoted equal to 11c. per gallon. The shipments for season to date were as follows:

	Sugar. Hhds.		Molasses. Puncheons	
	1893.	1894.	1893.	1894.
United States	36,355	23,882	13,681	7,713
United Kingdom	6,116	8,319	325	1,163
British Provinces	1,178	4,110	18,405	25,789
Total.....	43,649	36,311	32,411	34,655

Fine salt is now selling, according to the *Telegraph*, at a lower price than ever before in St. John. Two vessels are in unloading for Messrs. Merritt Bros. & Co., and are the first to unload fine salt since the duty was removed. The duty was 7½ cents per cwt. There is a good demand for coarse salt, and most of that unloading is selling at the ship's side.

The lobster season in the Maritime Provinces closed on July 1st. On the whole the catch has been a successful one, and it is but reasonable to suppose that a fairly large pack has been put up. As usual, the same degree of success has not characterized all sections engaged in the industry, and some factories are complaining of a small pack. A number of the packers, during the course of the season, have had the fishery regulations prominently brought to their attention. The department prohibits the packing of lobsters smaller than nine inches, and the packers were in some cases packing as small as six and a half inch lobsters. Complaint was made, and Inspector R. A. Chapman visited Richibucto, N.B., recently, and imposed a fine on nearly every packer along the coast in Kent county.

Our English cousins must be strangers to the taste of real maple sugar, if a remark made by one of them recently may be taken as an indicator. He quotes another writer thus: "The pure product of the maple is hard to find, as it is frequently adulterated with cane sugar," and adds this comment: "This particular species of adulteration is, I should think, unique. For myself I think I should prefer the adulterant." Here is a chance for some Green Mountain boy or Buckeye lad to do good missionary work.—*The Helper.*

The trade pot will boil when you stir up business with the spoon of judicious advertising.—*Grocer's Review.*

Have good aims, but see that your gun is loaded with the cartridge of energy and education.—*Tradesman.*

The subject of the sanitary condition of the bakeries in Detroit is receiving considerable attention, says the *Helper*, for confectioners and bakers. At a joint meeting of the unions, a committee was appointed to canvass the city and consult the authorities, to see what could be done. Health Officer McLeod said all places found to be in an unsanitary condition should be closed, and quite a list was handed to Secretary Horn, found in that state. The agitation is already inducing many bakers to improve their shops.

ITEMS FOR DRUGGISTS.

H. McDowell & Co., of Vancouver, chemists and druggists, have secured incorporation as H. McDowell & Co., Limited, the capital stock being $100,000.

At the sales of coca butter in London and Amsterdam, on July 3rd, in the former market slightly easier prices were realized, but in Amsterdam the values obtained were about on a par with those of previous sale. This market in New York is steady in tone at 31 to 31½c.

The export of camphor from Tamsui, in the northern part of the island of Formosa, in 1893, was much the largest on record, and more than double that of the previous year, amounting to 32,134 cwts., against 15,440 cwts. for 1892. The exports in 1893 were, however, in consequence of disturbances on the border, smaller than usual.

The seneca root market was opened, says the Gladstone, Manitoba *Age*, the first of any consequence in town, on Monday; the prospects are that a much larger quantity will be marketed here this year than last. Over $3,000 worth of this valuable medicinal root was marketed here last year. There are already in the Richmond and Tupper districts twenty camping outfits digging up the roots. Each man can earn $2.00 per day at this occupation.

The *Journal and Bulletin of Commerce* says of the New York market: "The demand here for general goods is yet of a light and unsatisfactory character, and a quiet market is expected during this and the first half the coming month. Prices taken as a whole are fairly well sustained. The price of citric acid has been reduced. Opium is yet easy. Shellac and tragacanth are higher in London. Curacao aloes are doing better. Celery seed has sold at lower prices. Ipecac is weaker."

The annual meeting of the British Columbia Pharmaceutical Association was held this year in Victoria. Mr. D. S. Curtis, of New Westminster, declining to stand for re-election, Mr. T. A. Muir, of the same city, was chosen in his place. The council now consists of Messrs. H. McDowell and T. E. Atkins, Vancouver; T. M. Henderson, J. Cochrane and T. Shotbolt, Victoria, and T. A. Muir, New Westminster. At the first meeting of the council H. McDowell was re-elected president, with T. M. Henderson as vice-president, and Charles Nelson, of Victoria, as secretary-registrar. The council also reappointed the following as examiners: Charles Nelson and H. H. Watson, Vancouver, and T. M. Henderson, Victoria.

The New Brunswick Pharmaceutical Society held its annual

meeting on June 20th. The reports of the registrar, secretary and treasurer were submitted, all showing that the society is in a flourishing state. The membership is now 122, with only two delinquents. After some routine business had been transacted, the election of the new council for the ensuing year took place. Messrs. R. E. Coupe, R. W. McCarty, M. V. Paddock, Chas. W. Parker, W. H. Mowatt, H. J. Dick, Walter Clarke, N. B. Smith, Struan Robertson and George A. Moore, of St. John; C. H. Fairweather, Sussex, and Winslow Tilley, St. Marys, were elected. The officers chosen by the new council are: Messrs. R. E. Coupe, president; M. V. Paddock, vice-president; W. H. Mowatt, secretary; Hazen J. Dick, treasurer, and R. W. McCarty, registrar.

From the circular of S. W. Royse & Co., Manchester, Eng., dated June 23rd, we select the following: "Acetates of lime are quite firm, and are expected to be dearer, as the production in America is reported to be considerably decreased. Acetates of lead are steady, but only moving slowly; acetate of soda also is still slow of sale. Nitrate of lead has at present a much better enquiry. Carbonate of ammonia is unchanged, but muriate of ammonia is more plentiful and rather easier in price. Sulphate of copper has lost ground, and has still an easing tendency. Green copperas has at present very little enquiry, but appears to have reached bottom figures. Carbonate and caustic potash have a fair demand. Yellow prussiate of potash is selling at less than syndicate quotations. Prussiate of soda has advanced strongly, and is scarce on spot. Borax is still selling at low prices. Oxalic acid is firm, though quiet.

BOOK AND STATIONERY ITEMS.

Abut 200 German houses are engaged (though not exclusively) in collotype printing.

From 1850 to 1858, owing to the great rush to the mines of California, it is estimated that the annual output of playing cards went as high as 9,000,000 packs.

In Boston it is alleged that paper tyres for bicycles have come into successful use. We have paper car wheels, why not paper bicycle tyres?

The employes of the firm of Messrs. John Lovell & Son, of Montreal, have presented Mr. R. K. Lovell with an excellent oil painting of his late father, John Lovell, and a nicely worded address, on the completion of his first year as the head of the firm.

Of the 22,000 newspapers published in America, it is said that 15,000 are issued in the smaller cities, towns and villages. They have an approximate, combined circulation of 50,000,000 copies. Something like $40,000,000 of capital is invested in these properties, according to an exchange, and more than 400,000 persons are dependent directly upon country newspapers for support.

By a German Government investigation, it has been found that 61 per cent. of the deaths recorded in the printing trade, between the years 1881 and 1891, were due to lung disorder.

Sentences are growing shorter among writers of English. Sir Thomas Moore, Lyle, Syndey, Spenser, and others, forty to sixty words on an averrge. Even Macaulay used only an average of twenty-three, and the imitators of the modern French school do not use on an average more than fifteen.

Mr. Tuck, of the well-known English lithographing firm, Raphael Tuck & Sons, told an interviewer the other day that theirs was the only firm in that line which sends out travellers to the States. "We owe our very remarkable success largely to the fact," he declares, "that we have always given capital value for the money; and we have never spared expense in anything we have undertaken. The best artists, the most popular authors, the most perfect methods of reproduction have been employed by us, regardless of cost. We have always endeavored to lead in those particular articles in which we deal. We claim that to our house the public are largely indebted for the cheapening of high-class art productions."

English printers are complaining of the action of certain publishers in getting their cheap library editions printed abroad. The system, they say, is extending, much to the detriment of the trade at home, which, it is claimed, can do the work as economically as it can be done on the continent. It is not needful here to say that this is a just grievance. It is obviously so on the face of it, and we believe with a contemporary that such "wanton cheeseparing will inevitably recoil upon the houses which practice it," no matter in what country they may be located. Home industries and home labor have a right to demand consideration from people who look to the home market for their profits.—*Amer. Bookmaker.*

I have seen a number of examples of "English as she is wrote," says a correspondent in *Business*, and wish to add one which comes authoritatively from the Alps. It is in the form of two notices published by a native hotel:

"Ministers, the venerable voyagers, are advertised that when the sun him rise a horn will be blowed."

"In this hotel the wines leave the traveller nothing to hope for."

We observe that in a recent old country chemical circular wood pulp, brown or pine, is quoted, c. i. f., Hull, at £3 sterling per air-dry ton; soda unbleached, £10 10s.; ditto, half bleached, £13; sulphate unbleached, £10 15s.; ditto, half bleached, £13 15s.; sulphite unbleached, £10 10s.; bleached, £15 10s.

At a recent meeting of the Typographical Society of England one of the speakers said that he hoped the time was not far distant when employers would "have to make application to some authority before starting a printing office." This is quite a novel idea, says the *American Bookmaker*, and yet if put into practice in this country it might stop the increase in the number of ruinous concerns which are run by men who know no more about printing than they do about the bottom of the ocean.

Lord Wolseley has written a life of John Churchill, Duke of Marlborough, to the accession of Queen Anne.

A new novel by Mrs. Cotes (Sarah Jeannette Duncan) is announced by the Appletons. Its title is "A Daughter of To-Day."

What should be an interesting book, especially now that the Colonial Conference is meeting, is "The story of Australasia, New South Wales, Tasmania, Western Australia, South Australia, Victoria, Queensland, New Zealand," written by Greville Tregarthen. It is published in the Story of the Nations series.

The system of shorthand invented by Herbert Spencer's father, and in manuscript since 1843, is now published by his son, "from the conviction, long since formed and still unshaken," that it ought to replace ordinary writing."

"The Humor of America," by J. A. Barr, contains selections from the works of about fifty humorists. The biographical index to American and Canadian humorous writers is a feature.

Stationery business at wholesale in Canada is as a rule dull. There are plenty cheap books moving, but at very trifling profit for either buyer or seller. And even this business of cheap books is frightfully cut into by the big dry goods retail shops, who make the way of the retail bookseller still thornier.

One sometimes wants to hang up a photograph or a pretty card, and in most cases is at a loss to do it properly. To meet just this need the New York News Company has brought out a hanger, which consists of a bar with chain, there being on the bar two little clamps in which the photo or card is secured.

Among the New York novelties mentioned in last issue of the *Amer. Stationer* is an aluminum pen tray which simulates a turkey feather Another tray, oblong in form, shows an embosssed design of marine plants, among which two specially ugly looking frogs are fighting with cat-tails for weapons.

Some "Columbian" inkstands in silver have lately been brought out in the States. They are very handsome as well as convenient. The forms are both square and round, with decorations in dull finished embossing on a highly polished ground. The silver desk novelties are strikingly handsome. The same designs appear in cut glass, ebony, oak, etc.

By agreement of the creditors of Charles L. Webster & Co., publishers, New York, who were compelled to make an assignment several weeks ago, the business of that firm is to be continued until July 1st, 1895, under the management of three trustees, Mrs. Samuel Longhorne Clemens holds the copyright on Mark Twain's books, which is regarded as the most valuable asset of Charles L. Webster & Co., who own the plates.

SHOE AND LEATHER ITEMS.

Blucher cuts still hold their own. At one time confined to the narrow Picadilly toe, they are now used alike in shoes with square and opera toe.

A nice evening shoe is made with patent leather trimmings and cloth top, the toe is square and somewhat wider than that of similar shoes a year ago.

Four young men in Berlin, according to the *Record*, have formed themselves into a company for the purpose of making gloves. The firm is to be known as Eby, Cairns, McBride & Co.

For evening wear pumps appear to be passing out of fashion They are being replaced by more substantial shoes equally tasty, while patent leather is almost universally used as the material.

The annual picnic of the shoemakers of Montreal was held under the auspices of the Lasters' Union, Co-operative and Leather Cutters Assemblies, Knights of Labor, at Royal Park last Saturday afternoon The programme of games, comprising some 15 events, was well contested.

An evil in the shoe trade is the excessive number of styles made. It is a source of endless expense to the manufacturer, and not unfrequently results in loss to the retailer. Each merchant, if he wishes to be "in the swim," has to purchase the new styles carried by representatives of the wholesale houses. When we consider the different sizes that must be bought, the enormous expense of carrying anything like a complete stock becomes evident.

"Yes, I will add something towards a reward for the man who numbers patent leather shoes among the things of the past." The speaker was mournfully gazing at a scarcely perceptible crack in a patent leather shoe. "This shoe is ruined. No matter how carefully we handle these goods, a large percentage is sure to be spoiled, and retailers lose in the same way. Besides this, the leather being flexible, is worked up to good advantage in the summer, while the shoes are used principally for winter evening wear."

From Leicester, Eng., mail advices received say: "The boot and shoe trade shows a slight revival, and there is a fair demand for seasonable goods. Production, however, is being largely reduced to prevent the accumulation of stocks. The sales of leather are large, but prices are almost lower than ever. The enormous quantities of Australian and American leathers offering have run down prices all round, and English butts and bends are unusually low.

INSURANCE MATTERS.

The Eastern Assurance Company of Canada, whose head office is at Halifax, has appointed F. J. Stewart chief agent for Toronto: offices at No. 30 Victoria street.

The *Chronicle* says that the story published in the N. Y. *Journal of Commerce*, some days ago, to the effect that the Imperial and the Lion Insurance Companies had reinsured the Pacific coast insurance business of the Guardian, is untrue.

The premium income of the Life Insurance Clearing Company, of St. Paul, Minn., for the month of May, 1894, shows an increase of 126 per cent. over the average monthly premium income of last year. The company has no unpaid death losses either due or reported.

We are interested to learn that Mr. F. H. Johnston, who has been associated with his father, Mr. H. J. Johnston, in managing the Confederation Life branch for the Province of Quebec, has removed to the United States. He has received an appointment in the actuarial department of a life company in New Jersey.

A New York journal tells us of the death in Brooklyn, of Jeremiah Griswold, a recognized writer and authority on the history and the principles and practice of fire insurance, and the author of several standard fire insurance works. Born at Hartford, in 1814, he was consequently in the eightieth year of his age. Some of his works were the "Fire Underwriters' Text Book," the "Handbook of Adjustments," and the "Fire Agents' Text Book."

The president and managing director of the Great West Life Assurance Company, Messrs. Alexander Macdonald & Jeffrey Brock, were in St. John, New Brunswick, last week, negotiating an arrangement with the Dominion Safety Fund Association, of that city. It is declared that an understanding has been reached in regard to most of the details, and that if the arrangement is ratified, the Great West Company will either assume the risks now held by the Safety Fund or reinsure the policy-holders.

BOOKS AND PAMPHLETS RECEIVED.

ANNALS OF THE AMERICAN ACADEMY.—These annals, which are issued bi-monthly from Philadelphia, contain as a rule valuable contributions to political and social science. The July issue is just received. It contains the following papers: Rent and Profit, by C. W. Macfarlane; Peaceable Boycotting, by Chester A. Reed; Future Problem of Charity and the Unemployed, by J. G. Brooks; Significance of a Decreasing Birth-Rate, by J. L. Brownell. These, however, occupy only about two-thirds the volume; the remainder is filled with personal notes, book reviews, and the like. A supplement of 80 pages is devoted to Professor Gidding's paper on The Theory of Sociology.

ACTUARIAL SOCIETY OF AMERICA—Papers and Transactions.—This is a continuous publication, and the present issue of 128 pages is devoted to the proceedings of the meeting of the society in April. The papers read on that occasion are given in full. One deals with methods of valuing the marketable securities of life companies; another, by David Carment, of Australia, describes the mode of apportioning surplus used by Australian companies; a third makes some suggestions for dealing with companies whose reserve is impaired. A feature of the issue is a portrait of the smiling face of John R. Hegeman, whose guests the members of the society were on Long Island Sound.

In reply to a correspondent who asks the name of the present president of the Royal Society of Canada, we would say that the office is now held, and worthily held, by Mr. James M. LeMoine, of Quebec, a well-known and prolific author. Among his works—he writes in both French and English—are L'Ornithologie du Canada; Maple Leaves, two series; Quebec, Past and Present; Chronicles of the Lower St. Lawrence. For thirty years and more his pen has been busy contributing to Canadian periodicals, and producing works that mostly have Canada for their theme. Mr. LeMoine belongs to one of the old Canadian families, being a descendant of Jean LeMoyne, who was a seigneur of three fiefs, and a near relative of Charles LeMoyne, Baron of Longueuil. His house at Spencer Grange, Sillery, is well known for delightful hospitality, and has sheltered many eminent writers and scholars, among them: Dean Stanley, Charles Kingsley, Howells, the historians Garneau and Ferland. The late Francis Parkman was a frequent visitor, and has freely acknowledged the valuable aid rendered him by Mr. LeMoine.

UNITED STATES PATENTS TO CANADIAN INVENTORS.

The following list of United States patents granted to Canadian inventors, June 12, 19, and 26, 1894, is reported for this paper by James Sangster, Buffalo, N.Y.

Clutch Pulley—Herman Bunker, Barrie, assignor of one-third to Walter Peck Chapman, Hamilton, Ontario.

Ventilating railroad carriages—Samuel Hughes, Lindsay, Ont.

Cinder sifter—Adoniram J. Henderson, Toronto, Ont.

Machine for bending pipe—James G. Orr, Winnipeg, Manitoba.

Buckle—George Miller Aylesworth, Collingwood, Ont., design patent for 14 years.

Hammer-guard for fire-arms—Mary L. Campbell, Noyan, Canada.

Wire-fabric tool—Seldon S. Casey, London, Ont.

Shirt—Henry A. Hagen, Berlin, Ont.

Tire tightener—Wm. T. Mackey, assignor of three-fifths to J. W. Weart and A. B. Docksteader, Vancouver, British Columbia.

Printing telegraph—Edwin Pope, Quebec, Que

Sectional boiler, George A. Watson, Toronto, Ont., assignor to W. H. Laird, New York, N.Y.

Dental plate—Thomas H. Graham, Toronto, Ont.

Ventilating railroad carriages—Samuel Hughes, Lindsay, Ont.

Stem-winding watch—George S. Klein, Toronto, Ont.

Ice-creeper—James R. Russel, Hopewell Hill, Canada

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, July 5th, compared with those of the previous week:

	July 5.	June 28.
Montreal	$9,511,494	$9,195,501
Toronto	4,810,674	4,615,471
Halifax	1,124,377	1,126,687
Winnipeg	863,545	662,428
Hamilton	673,532	575,870
Total	$16,983,622	$16,175,957

Aggregate balances this week, $2,705,843; last week, $2,363,382.

—The presidency of the People's Bank of Nova Scotia, which had been held for the last five years by Mr. A. W. West, was rendered vacant by the death of that gentleman. At a directors' meeting some days ago, Mr. P. O'Mullin, an ex-mayor of the city, and for some years a director of the bank, was chosen its president. On the same occasion, Mr. James Fraser was appointed vice-president, and to fill the vacancy on the Board, Mr. Charles Archibald, of Cape Breton, now a resident of Halifax, was selected.

—The decrease in traffic on Canadian railways, if not as great as on some American, is still serious enough. The figures of the Grand Trunk for the week ended 30th June, show a decline of 26 per cent. compared with same week of 1893, and the Canadian Pacific a decline of 20 per cent. The earnings of the former road were $330,367, a reduction of $85,678; of the C. P. R. $470,000, a reduction of $94,000.

—The Commercial Bank of Windsor, according to the Halifax *Herald*, has opened an agency at Truro. C. A. Armstrong, formerly of the Middleton branch, is in charge.

—A cable message from London on July 3rd is authority that the National Bank of Scotland announces the issue of £140,481 four per cent. Toronto local improvement debentures at 101, repayable in 1904.

—The Hudson's Bay Company has announced a dividend of ten shillings per share for the past year, notwithstanding the decreased receipts from the fur sales.

Correspondence.

THE INSOLVENCY BILL.

Editor MONETARY TIMES:

SIR,—Allow me a few lines to correct what is evidently a misapprehension of the scope of my late remarks respecting an Insolvency Bill. A careful perusal of my observations will show that I am *not* opposed to an Insolvency Bill *per se*. Having spent, along with other bankers, many long hours in considering every line and clause of the bill before Parliament, I am not likely to stultify myself by taking that ground. In saying that there is "no absolute necessity" for an Insolvency Bill, I am merely anticipating and providing against the argument that as a bill of some kind is essential, it is better to have a bad bill than no bill at all.

So far from being opposed to members of Boards of Trade, I am in entire harmony with them in pointing out the great evils that now prevail by reason of preferences, and the great importance of having an Act that will cure them and provide for fair distribution.

But, along with the whole body of Canadian bankers, I am decidedly opposed to the insertion of clauses in the bill which will operate as a temptation to insolvency, which will enable money to be made out of insolvency, and which will have the effect of creating a class of persons whose interests will be to make as many persons *appear* to be insolvent as possible.

There is in my judgment no absolute necessity for discharge clauses in the bill at all. But if Parliament takes the ground that such clauses are a necessity, then I say that the minimum figure should be placed so high that no solvent man will be tempted to take advantage of it.

The present bill, in many of its provisions, is an admirable one, although one of its clauses is unjust to bankers. But the discharge clause, as it stood on leaving the Senate, is such that the Act might well be called "An Act for the encouragement of Insolvency."

That this will be its effect I am convinced, unless the figure at which discharge can be obtained is placed much higher than fifty cents. I stated before a committee of the Senate that sixty-six and two-thirds would be a reasonable minimum. The question was asked suddenly, and I had no time for consideration. But reflection has convinced me that the lowest figure that will answer the desired end will be seventy-five or eighty cents.

G. HAGUE.

Montreal, 4th July, 1894.

MONTREAL GREEN FRUIT MARKET.

A very successful sale of fruit was held at the Montreal Fruit Exchange, on McGill street, on Tuesday last. The offerings were one car straight of California peaches, of 1,084 boxes, and one car of apricots and plums. There was a large attendance of buyers, the bidding was good, and very satisfactory prices were realized. Mr. R. L. Watkins was one of the principal buyers, securing a large amount of the offerings. Peaches sold at 95c. to $1.80 per box, apricots at $1.10 to $1.15, plums at $1 to $1.45, and some very fancy lots brought as high as $2.50.

At the Montreal fruit auction rooms, on St Peter street, says the *Gazette* of Wednesday last, a very good sale was held, there being a fair gathering of buyers, but the prices realized were not high. The offerings were 700 water melons, a lot of potatoes and some walnuts. Watermeloes brought 21 to 23½c. each; potatoes, $2.50 to $2.75 per barrel, and walnuts 4c. per lb. The regular market for oranges is firmer, and prices have advanced to $1.75 to $2.25 for half boxes, $3.50 to $4.50 for boxes, and $6 for cases. On account of the extreme heat of late, the improved demand and the scarcity, the lemon market is strong, and values have an upward tendency, recent sales of nice stock having taken place at $4 to $5 per box. Bananas are also scarce at 75c. to $1.50 per bunch in a jobbing way.

The tie up of the Pullman strike is hampering the fruit trade of Montreal to some extent, there being no arrivals on that day. It is stated that there is in the vicinity of 100 cars of fruit tied up bound for Montreal and other points. Speaking of the matter the New York *Commercial Bulletin* says: "The extent of the effect of the Pullman strike upon the California fruit trade is very uncertain at the present time. It is the fact, however, that the shipment eastward of many carloads of fruit in the green state has stopped, and it is within reason that growers have either to let the fruit rot or sell it to canners or driers at whatever prices the latter may see fit to give."

BRITISH INSTITUTE OF CHARTERED ACCOUNTANTS.

Some time ago the London *Economist* commented on the fact that the question of the efficiency and use of audits raised in connection with the Liberator and other company scandals, should have formed the chief theme of discussion at the annual meeting of the Institute of Chartered Accountants. But that journal was by no means of opinion that the mode of dealing with the subject was satisfactory. For one thing, the president's statement that if an auditor pressed any point "so as to bring question at issue between the executive and himself before the shareholders, no due consideration would be given to his objections if the acceptance of his recommendations would diminish the dividends proposed by the board," though no doubt accurate enough, was somewhat beside the question. It is possible, the *Economist* thinks, that the Liberator shareholders would have accepted their dividends if the auditor's suppressed report had been presented to them; but it is tolerably certain that the publication of the report, though it might have cost the auditor his post, would have prevented the evils of the Balfour group growing until they reached such a calamitous point.

"As to the punishment of erring members of the Institute, nobody expects that the council would deal with cases which are *sub judice;* but there are cases in which members of the Institute, upon their own admissions, have conducted their audits in an entirely unsatisfactory manner, and in view of the fact alluded to by one of the speakers, that the effect of the recent disclosures 'had been to put back by ten years the position of the Institute in public esteem,' these cases should be dealt with promptly and effectually. The president's reference to the operation of the Companies Winding-up Act does not appear to have been particularly opportune. The intention of the Act is not only that guilty persons may be brought to justice, though that is its chief aim; but, as we have pointed out more than once, the mere publicity of the examinations by the Official Receiver is calculated to produce a very wholesome effect upon many officials generally."

A CHAPTER OF ACCIDENTS.

A highly imaginative and also humorous account is given by the Detroit *Free Press* of the troubles of an accident company with one of the policy-holders who had, after much solicitation, been induced to take out some accident insurance. The man had never met with an accident in his life until he had paid his first premium, but it was hardly receipted for before he fell down in front of the post-office and broke his leg. According to the story, he got out in June, after being laid up some six months, only to be hit in the eye with a ball from a Roman candle in the hands of a boy, on the 4th of July, which incapacitated him again for nine weeks. The third accident occurred to him in December, the same year, when a runaway team ran into a street-car full of passengers. No one else was hurt, but of course he caught it. This time he had a right arm broken and he got $25 a week for twelve weeks, as he was a bookkeeper and had to use that arm.

As he escaped the next Fourth of July, the company naturally thought that he was going to do better, only to be disappointed in August, when, in avoiding a sudden storm, he stood in the doorway of a store and a blast of wind shut the heavy door, catching his right hand and mashing several bones therein. He recovered just in time to have his right shoulder dislocated, and that had hardly been reduced enough for him to go to work before a big stone fell off a passing wagon and mashed his foot. To conclude the list of accidents sustained was a fall from a street car and the breaking of an arm, and the special agent of the company related the narrative with tears in his eyes. But the worst was yet to come, for, although at first he obtained some business in telling the story of this unfortunate man, of late the holders of policies failed to renew for the reason that the public began to think the whole thing was a "hoodoo." The highly wrought agent finally came to the conclusion that there was but one thing to be done, and that was to blow the unfortunate policy holder up with dynamite and pay his heirs $5,000 and have done with it.

A STERN AND UPRIGHT JUDGE.

The late Sir Matthew Begbie, chief justice of British Columbia was an uncommon man. He will probably be best remembered for the courageous part he played in the early and troublous life of British Columbia when mad gold fever was raging. He was appointed judge of the mainland of British Columbia as far back as 1858. Those were the days when on the whole Pacific slope of North America shooting was promiscuous and law unheard of. Chinamen were looked upon as other than human, and killing them was little more than a pastime when work was slack or when John had a good claim. Judge Begbie went up to Cariboo amongst this lawless crew, and the men looked forward to a bit of sport in the shape of judge baiting, and many were the boasts and schemes got up and talked of.

But the judge was a big, bony man, and his whole atmosphere and carriage suggested courage and determination. He soon saw what was before him in Cariboo. A Chinaman had been killed by a white tough only a short time before his visit to the district. Begbie swore in some sort of a jury, and passed the death sentence, to be carried into execution next morning at daybreak. No one thought it could be carried out. Many were the murderous plots and rescue schemes discussed during that night, but the man was hung next morning, and Begbie saw it done with his Winchester ready for use in his hands. The result was remarkable. The toughs at once said that a country where a white man was hung for potting a Chinaman was no kind of a country at all, and many of the worst sort left. But Begbie slung up many a man in the gold country of Cariboo.

Many tales are told of the decided way in which the late Chief Justice would say what he thought. A little while ago the journalists of the province came under his caustic notice. Sometimes the jurymen serving under him were very severely dealt with. For example, in 1863 a man was charged in Victoria with killing another man with a sand-bag, and in the face of the judge's summing up the jury brought in a verdict of "Not guilty." This gained for them a very pointed judicial admonition. Said the Chief Justice:

"Gentlemen of the jury, mind, that is your verdict, not mine. On your conscience will rest the stigma of returning such a disgraceful verdict. Many repetitions of such conduct as yours will make trial by jury a horrible farce, and the city of Victoria a nest of immorality and crime. Go, I have nothing more to say to you."

And then, turning to the prisoner, the Chief Justice added:

"You are discharged. Go and sand-bag some of those jurymen; they deserve it!"

RUNNING A STORE.

The Chicago *Dry Goods Bulletin* contains an article entitled "Running a Store," and quotes Charles Dudley Warner approvingly, when he says: "It is much easier to govern an island than to carry on almost any retail business." While it is all right to point out the obstacles that every day are overcome by the successful retail merchant, and congratulate him on his energy, perseverance, and genius, it is all wrong to constantly harp on the difficulties that beset the retailer and encourage him in the pessimistic view that they can never be overcome. There are thousands of happy, contented and prosperous retailers in this country who are in love with their work and to whom it is a positive pleasure to grapple with the problems that appear every day and solve them by their tact, experience, and native energy. The retailer is all right, and there is a better day coming for him.

St. Louis Grocer.

The smart youth at a Coney Island show who gave Rain in the Face a loaded cigar which went off between the noble red man's teeth is nursing a lacerated scalp due to the blows which the chief gave him in return for the familiarity.

THE OUTLOOK IN THE UNITED STATES.

The New York circular of Henry Clews & Co., dated New York, June 30th, says: "Within the past week, Wall street has shown some reaction from the improving tendency apparent during the previous part of this month. The change however appears to have been due rather to speculative manœuvres than to any important changes in material conditions. The 'bears' seem to have got up a concerted movement, including European co-operation, for raiding the market; their main dependence being on the impending Pullman strike, on a perverted construction put upon the banks supplying the treasury with gold, and on misrepresentations as to the cash resources of the Government, coupled with contemplated large sales of stock. The preliminary skirmishings of this movement had, during the first half of the week, quite an effect upon the prices of certain specialties; but on Tuesday the force of the scheme was broken by a series of explanations and denials, respecting the condition of the Treasury, issued by President Cleveland. Although generally approved, still there was some difference of opinion as to the necessity or the expediency of the President making such open reference to these matters; his frank statements, however, had the indirect effect of defeating the plans of the 'bears.' Buying orders came from London, which, in pursuance of the scheme, was to be a seller; and here the previous sellers became active in covering their 'shorts,' and some important recoveries in prices were the consequence. It thus happened that the movement that was intended to break confidence in the market has resulted in failure and has become a new element of strength.

"The really important event of the week has been the sympathetic strike of Western railroad employes. It is impossible, at present, to estimate the extent to which it may interfere with the carrying trade or to which it may affect large interests dependent upon railroad facilities. To those familiar, however, with the interests immediately concerned, it is not likely to appear by any means an unmixed misfortune. It will raise questions and lead to changes which the strikers seem to have little anticipated. The roads have long felt that, under the existing depression of business and the great decline in prices, large reductions in operating expenses had become necessary, not only as a means towards making both ends meet, but also of enabling them to make concessions on freight charges in certain directions. They have hesitated to make those adjustments through a general cutting down of wages, though they have done all that is possible through a reduction in the numerical strength of their employes. Their hands have now thrown down the gauntlet on one issue, the Pullman strike; the roads seem quite willing to accept the gage, but on another issue, a general reduction of wages.

"The banks have rendered a wise and wholesome support to the Treasury in undertaking to virtually supply whatever gold may be wanted for export pending the current outflow. The public have ceased to watch the declining reserves of the Treasury with timidity, and great relief is felt at the virtual assurance given by the banks, that they are prepared to make common cause with the Government until Congress has at least had a fair opportunity for extricating the national finances from their present exposure. It is to be hoped, however, that the President and the Secretary of the Treasury will use their utmost influence towards securing such legislation as will relieve the Treasury from the overwhelming burthen of its present demand obligations, with such other legislation as that step might make necessary."

CREAMERY BUTTER FROM CANADA.

A new trade is being inaugurated by Messrs. Marples, Jones & Co., of Mathew street, Liverpool, who have just commenced operations with their first consignment of mild Canadian creamery butter. It is as nearly as possible the same texture and character as Danish creamery butter, and is clean, sweet, and uniform throughout. The consignees are selling it at 88s. to 90s., packed in kiels or 56 pound boxes. There will henceforward be regular weekly shipments from Ontario and Quebec. The venture should be not only a successful but a popular one, for traders should prefer colonial to foreign produce. Canadian cheese sells largely now in this country, and there is no reason why Canadian creamery butter should not have an equally large sale, and why the enterprising firm who are introducing it should not "do" thousands of packages a week. The butter, it might be said, will take a few days longer on the voyage, but it will get less knocking about than the continental product, there being but one transhipment.—*Grocers' Review, Manchester.*

UMBRELLAS.

The value of the umbrellas now manufactured in London is estimated at £500,000, besides a considerable output at Manchester and Birmingham. For the high-class trade the wages are good, and numbers of women are employed at it. Really quick, clever hands can earn in London from 23s. to 42s. a week; but unskilled labor is cruelly sweated to produce the cheap, showy articles vended wholesale at 9d. each, which find their way into common shops for 1s. 1½d. each. Mr. Lakeman, in his exhaustive summary of London female labor, says: "In this trade learners are not usual, for they are taught by sweaters in the East-end, who take them for a year without wages, but allow 2s. 6d. a week for encouragement. These sweaters take goods from warehouses for very small quotations, and pocket the value of the pupil's work, so that they can afford to take work at a very low figure, and undersell competitors in the higher scale of manufacturing."

A WESTERN STORY.

At one of the National Life Underwriters' Association meetings, the following story was got off by Capt. F. A. Rendall, the toastmaster:—"Mr. L. D. Wilkes, of St. Paul, is obliged to take the next train. I had a story to introduce him with, and as it will take just a minute, I think I will tell it. Once upon a time, so the story goes, a cultured Boston belle paid a visit to some friends in St. Paul. Desirous of arranging a series of entertainments such as would befit her station and surroundings as a Boston girl, they planned for her what they regarded to be a substantial and instructive feast, rather than a frivolous one, that she might observe that even they, her friends, possessed a love for the true, the beautiful, and the good. On the evening of her arrival she was taken to a lecture by Donnelly on the Baconian cipher; the next night to an address by Robert Ingersoll on the "Mistakes of Moses," and on the third to a discourse by Mrs. Jenness Miller on dress reform. Upon visiting the young lady's room the next morning her St. Paul hostess found her guest packing her trunk, and inquiring with some solicitude the occasion for such a proceeding, the Boston belle replied: "Well, I think it is about time. The first night of my arrival I lost my Shakespeare, the second night I lost my belief, and the third night I lost my underclothes, and I guess I had better be going home."

—This is on the Brooklyn policeman: A story is going the rounds about one of the city detectives to the effect that he was detailed recently to find out something about a robbery that occurred in a bakery. On making his report of the case to the captain next day he said the name of the man who was robbed was Charley Russe, and then went on to describe how the place had been robbed. "How do you know his name is Russe?" asked the captain, who knew more about the case than his detective suspected. "I saw his name on the window," replied the intelligent sleuth. It turned out that the baker had the words "Charlotte Russe" on the show-window.

SEALED tenders addressed to the undersigned, and endorsed "Tender for Coal, Public Buildings," will be received until Wednesday, 18th July next, for Coal supply for all or any of the Dominion Public Buildings.

Specification, form of tender and all necessary information can be obtained at this Department on and after Wednesday, 27th inst.

Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted bank cheque, made payable to the order of the Honorable the Minister of Public Works, equal to five per cent. of the amount of the tender, which will be forfeited if the party decline to enter into a contract when called upon to do so, or if he fail to supply the coal contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender. By order,

E. F. E. ROY Secretary.

Department of Public Works,
Ottawa, June 22nd, 1894.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Supplying Coal for the Public Buildings, Ottawa," will be received at this office until Wednesday, 11th July next.

Specifications can be seen, and forms of tender obtained on and after Monday, 25th inst., at this office, where all necessary information can be had on application; also at the offices of R. A. Raza, architect, Montreal, Denison & King, architects, Toronto, and A. P. Lepine, Post-office, Quebec.

Each tender must be accompanied by an accepted bank cheque for the sum of $500, made payable to the order of the Honorable the Minister of Public Works, which will be forfeited if the party decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department will not be bound to accept the lowest or any tender.

By order,
E. F. E. ROY,
Secretary.

A SNAKE STORY.

Here is a snake story from a Bechuanaland paper which we do not remember having seen before. A Barberton man who goes to church regularly was one day walking along the banks of Concession Creek eating a sandwich, and on account of the usual disparity between meat and bread, he threw the redundant piece into the water. Immediately a swarm of yellow fish bubbled round it fighting for the mouthful. The man searched his pockets for fishing tackle, but all in vain, and he was just beginning to die of despair when his eyes lighted on a big black snake. At that moment he remembered how his father used to tell him that black snakes were very expert in catching fish. He, therefore, grabbed the reptile by the tail, carried it to the river, and held it over the struggling fish. The snake proved itself a born angler, and in the course of an hour the man had captured forty fine fish. A few days later, as he was walking in the same place he felt something rubbing against his leg, and, looking down, he saw his friend the black snake, eager for more sport.—*Rangoon Times.*

A GERMAN JOKE.

The following fraud upon an insurance company, which we find in the *Deutsche Tabak-Zeitung*, is certainly just a little too good to be true: "A cunning fellow, who wanted to smoke the best cigars at the cheapest possible cost, bought 1,000 cigars of the highest quality and corresponding price, and immediately insured the whole stock. When he had smoked the last of them, he demanded 750 marks from the insurance company on the ground that the whole of his insured stock, ten boxes of cigars, had been consumed by fire? The Solomonic court decided in favor of the plaintiff. The company then brought an action of conspiracy against the smoker, accusing him of having intentionally put fire to his own cigars, and deliberately destroyed his property. Hereupon the same wise court condemned the insured smoker to three months' imprisonment.

CULTIVATION OF THE SUGAR-BEET IN AUSTRALIA.

The Belgian Consul-General at Melbourne, in a report dated the 12th February last, states that with a view to increasing their agricultural resources, several Australian colonists have been paying attention to the cultivation of the sugar-beet. In the province of Victoria, especially, some attempts now being made point to complete success. The climate is favorable, and, if the lands, their manuring, and the plants are satisfactory, it cannot be doubted that the final result will give satisfaction to the promoters. The Consul-General draws the attention of European manufacturers to the demand which will arise for the necessary machinery to carry on the industry. In regard to the question of persons seeking for orders, he points out that first the permanent agent, and then the special agent, may be considered as successful elements; failing them, it will be indispensable to utilize all the means of publicity possible.

—The population of India numbered in 1891, the date of the last census, 287,000,000. In 1881 it was 250,000,000. The population now is considered to be something like 300,000,000.

"Let me remind you," said Mr. Justice Hawkins to a talkative witness recently, "that the time of this court is worth half-a-crown a minute." On this basis his lordship's trip to Epsom recently cost something like £30.

If we reckon the population of France at 37,000,000, we find that for every individual in France one dozen eggs are exported to England, and, computing five persons to each family in France, the British public pays to every six French families an annual sum of over £1 for eggs.

—The returns made to the Bureau of Navigation, although not yet complete, show that of 146 ships in the trans-atlantic trade belonging to American citizens, 64 are under foreign flags. These are all steel or iron steamships, mostly tramps, having a capacity of 197,108 gross tons.

TENDERS FOR DEBENTURES.

SEALED TENDERS endorsed "Tenders for Debentures," will be received at the office of the undersigned up to 4 p.m. on the First Day of August, 1894, for the purchase of Debentures of the Corporation of the City of Victoria, B.C., amounting to $35,000, or its sterling equivalent at the rate of $4.86⅔ to the one pound sterling, in sums of $1,000 or sterling equivalent as aforesaid, payable in fifty years from the First of August, 1894, and bearing interest from that date at the rate of 4½ per cent. per annum, payable half-yearly, with principal and interest payable as aforesaid at the office of the Bank of British North America either in London (Eng.), New York, U.S.A., or Montreal, Canada.

The Corporation reserves to itself the right to redeem and purchase these debentures on paying the amount thereof and the interest due thereon, at the date of such purchase, to the holder or holders thereof, at any time after twenty-five years from the date of issuance of such debentures.

The tenderer must state the price net at Victoria which he will pay.

In addition to the net price the purchaser will have to pay the Corporation the interest at 4½% from the First August, 1894, to whatever date the money is received by the City Treasurer.

The above Debentures are issued under authority of "The Provincial Royal Jubilee Hospital Aid By-Law, 1894," with principal and interest secured by a rate on all ratable land and improvements in the City of Victoria.

The Corporation does not bind itself to accept any tender.

ish Isles It was about this time that England began her work of colonization, to which the great spread of the English tongue is mainly to be attributed

The rapid spread of English is largely to be attributed to the simplicity of its grammar, which is less complicated than that of any other Western nation. Its marked poverty of inflection, as distinguished, for example, from the German, is a great point in its favor, and thus it is much easier for a German to learn English than for an Englishman or American to learn German. On the other hand, the extraordinary orthographic inconsistency of the language is a decided drawback, and there is little doubt that if English were written on phonetic principles, as Spanish or German, its spread would be much more rapid, to say nothing of the great boon this would be to the Anglo-Saxons themselves, who spend years of unnecessary toil in learning to read and write their own language

It is not likely, however, that any change will be made in this direction in the near future, at least in England, for the English as a nation are noted for their conservative habits, and, although they recognize the great advantages of a phonetic system, are in no hurry to adopt it. Any change in this respect must probably be looked for to America, where a few innovations have been already introduced. Thus, the spelling "vigor," "favor," "honor," etc., are American innovations, as are also "plow," "traveler," "center," "theater," etc. Other more recent forms, as "program" and "catalog," are already well established in America, but have found little favor in England

English speakers may be divided into four great branches, as follows: (1) The European, (2) the American, (3) the South African, and (4) the Australasian. Each of these branches has its peculiarities, and the divergence between the four is becoming more marked every year. Of the extra-European branches, American, although the oldest, has diverged least from the parent stem. It is surprising what a number of American words have been introduced into England, many of which are now considered indigenous to the soil. A large proportion of the slang spoken by the middle classes in England may also be said to have an American origin. On the other hand, the Americans have retained many good old English words which have long ago dropped out of our home vocabulary.—*Chambers' Journal.*

MONTREAL MARKETS.

MONTREAL, July 4, 1894.

BOOTS AND SHOES.—Manufacturers report orders for foot-wear coming in rather slowly, but now that the hurly-burly of elections is over in the Province of Ontario, better business is looked for from that quarter.

CEMENTS AND FIREBRICKS.—There are two London steamers now in with fair supplies of cement; the demand, however, has slackened, if anything, and prices are easy at $1.75 to 1.90 for Belgian and $1.90 to $2.05 for English. Firebricks steady at $14 to 19.00 per thousand

DAIRY PRODUCTS.—In butter there is little export movement, and trading is not of an active character. Values rule just about as a week ago, creamery being quoted at 18½ to 19½c.; Townships dairy, 16 to 18c.; Western, 14 to 16c. per lb. Business in cheese has also been comparatively light, and prices may be called off a point. We quote: Fine colored, 8½ to 9c.; white, 8⅜ to 8½c. Strictly fresh eggs bring about 10c. per dozen.

DRUGS AND CHEMICALS.—In this, as in most other lines of merchandise, the movement is a light one. Values generally tend to weakness, but buyers are not disposed to take advantage of the situation or buy beyond immediate wants. In bismuth there has been a fall, and much lower figures are prevailing. Salicine and salicylic acid rule low; citric, also flat; carbolic, steady and in good demand. Cream tartar has advanced from its very low position. Menthol, much firmer, it being claimed new crop of peppermint will be poor. Quicksilver firm and likely to be dearer. We quote:—Sal soda, 85 to 90c; bicarb soda, $2 40 to 2 60; soda ash, per 100 lbs., $2; bichromate of potash, per 100 lbs., $11.00 to 13.00; borax, refined, 7 to 9c.; cream tartar crystals, 18 to 19c.; do. ground, 20 to 22c.; tartaric acid, crystal, 30 to 33c.; do. powder, 32 to 35c.; citric acid, 45 to 50c.; caustic soda, white, $2.50 to 2.75; sugar of lead, 10 to 11c.; bleaching powder, $2 75 to 3 25; alum, $1 70 to 1 90; copperas, per 100 lbs., 90c. to $1.00; flowers sulphur, per 100 lbs., $1 60 to 1 90; roll sulphur, $1 60 to 1 90; sulphate of copper, $4 25 to 4 75; epsom salts, $1 40 to 1 60; saltpetre, $7 50 to 8 00; American quinine, 35 to 38c.; German quinine, 35 to 38c; Howard's quinine, 40 to 42c; opium, $4 40 to 4 90; morphia, $1 90 to 2.00; gum arabic, sorts, 18 to 30c.; white, 40 to 60c.; carbolic acid crystals, 35 to 45c. per lb; crude, 90c to $1 00 per gallon, iodide potassium, $3.90 to 4.25 per lb.; iodine, resublimed, $4.75 to 5.00; commercial do., $4 25 to 4.75. Prices for essential oils are:—Oil lemon, $1.75 to 2.25; oil bergamot, $3 50 to 4 00; orange, $2 50 to 2 75 oil peppermint, $3.75 to 5.00; glycerine, 18 to 20c.; senna, 12 to 25c. for ordinary. English camphor, 55 to 60c.; American do., 55 to 58c.; insect powder, 25 to 35c.

Oatmeal	"	37	.....

GROCERIES.—The week since last writing has been a broken one, and there has been but a moderate volume of trade doing, but there are those who profess to see some signs of improvement, and who look for some freer demand in the near future. There is certainly a larger business doing in sugars, which are steady at the advanced prices, namely, 4 3-16c. per lb. at refinery for granulated, and 3 3-16 to 3¼c. for yellows. An advance of a cent is reported in molasses at the island; local quotations are 27½ to 30c. per gal. as to quantity. New Japan teas are coming forward in moderate quantity, but there is as yet no great enquiry for these goods. Canned goods are dull, and no quotations have yet been made for new pack of vegetables. Rice prices are fairly established at $3.45 for B quality, Japan $4.50, and Patna $5 Valencia raisins very scarce and firm at 6c. for fine off stalk.

HIDES AND TALLOW.—There has been rather more business doing in hides since last writing, and tanners who have been hanging off for some time to try and beat hides down to 4½c. per lb for No 1 inspected have made some moderate purchases at 4c Dealers continue to buy No 1 green at 3½c, and other grades at proportionate figures Calfskins are worth 7c hairskins 20 to 25c each Tallow rather easier at 5½ to 5⅝c per pound

LEATHER The leather market remains dull and in prices we hear of nothing new. The American market is depressed through coal and railway strikes, and English advices show no notable improvement there The boot and shoe factories are not by any means busy We quote Spanish sole B A No 1, 18 to 20c do No 2 to B A 16 to 17c No 1 ordinary Spanish, 17 to 18c No 2 15½ to 16½c No 1 slaughter, 18 to 20c No 2 do 17 to 18c American oak sole, 39 to 43c waxed upper, light and medium, 24 to 26c.; do., heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 15c.; do., small, 10 to

12½c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 25c.; buffed cow, 9 to 11c.; extra heavy buff, 12½c.; pebbled cow, 8 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 11c.; rough, 16 to 18c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—General business does not improve, but we have a few changes in values to note. Scrap iron is easier at $14.50 to 15.00 for machinery scrap, and ordinary $10 to 12.00. Of Scotch pig, Summerlee is about the only brand here at unchanged prices. Bars are easier under competition, and have been bought in fair lots at $1.70. The quotation for steel boiler plates, ¼ inch and upwards, is now $2.10 to 2.15. Coke tins have been selling very low, and we now quote $2.85 to 3.00, though it has been said that round lots have been sold even lower than inside figure. Round lots of ingot tin have sold at 17c. We quote:—Coltness pig iron, none here; Calder, No. 1, $19; Calder, No. 3, $18; Summerlee, $18.75 to 19.00; Eglinton, $18; Gartsherrie, none here; Langloan, none here; Carnbroe, $18; Shotts, none here; Middlesboro, No. 3, $17; Siemens, pig, No. 1, $16.50; Ferrona, No. 1, $16.50; machinery scrap, $14.50 to 15.00; common do., $10.00 to 12.00; bar iron, Canadian, $1.70 to 1.75; British, $2.25; best refined, $2.40; Low Moor, $5.25; Canada plates—Blaina, or Garth, $2.15 to 2.20; all polished Canadas, $3.00; Terne roofing plate, 20 x 28, $7.00 to 7.25. Black sheet iron, No. 28, $2.40; No. 26, $2.25; No. 24, $2.25; tin plates—Bradley charcoal, $5.25 to 5.50; charcoal I.C., $3.50; P.D. Crown, $4.00; do. I.X., $4.75 to 5.00; Coke I.C., $2.85 to 3.00; coke wasters, $2.75; galvanized sheets, No. 28, ordinary brands, 4¼ to 4½c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5¾ to 6c.; tinned sheets, coke, No. 24, 6 to 6½c.; No. 26, 6½ to 6¾c.; the usual extra for large sizes. Hoops and bands, per 100 lbs., $2.30 to 2.35. Steel boiler plate, ¼ inch and upwards, $2.10 to 2.15; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.85; heads, $2.85; Russian sheet iron, 10½ to 11c.; lead, per 100 lbs., pig, $2.60 to 2.75; sheet, $4 to 4.25; shot, $6.00 to 6.50; best cast steel, 10½ to 12c.; spring, $2.50; tire, $2.50 to 2.75; sleigh shoe, $2.40; round machinery steel, $3; ingot tin, 17 to 18c.; bar tin, 25c.; ingot copper, 9½ to 10c.; sheet zinc, $5.00 to 5.25; spelter, $4.50 to 4.75; American do., $4.50 to 4.75. Antimony, 10½ to 12c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs.; annealed do., $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3½c. Coil chain, ¼ inch, 5c.; ⅜ in., 4½c.; 7-16 in., 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., 3½c.; ¾ in., 3¼c.; ⅞ in., and upwards, 3c.

OILS, PAINTS, AND GLASS.—The demand is slow, and there is not a change we can hear of in values. There have been no transactions yet in new seal oil; brokers have been trying to secure offers at about 35c., but have not thus far been able to do any business. We quote: Turpentine, 46c. per gallon for single barrels; two to four barrels, 45c. Linseed oil, raw, 54c. per gallon; boiled, 57c.; 5 barrel-lots 1c. less; olive oil, machinery, 90c.; castor, in cases, 6½ to 7c.; tins, 7½c.; Nfld. cod, 38 to 40c. per gallon; Gaspe oil, 38c. per gallon; steam refined seal, 42½ to 43c. in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00; No. 1, $4.50; No. 2, $4.25; No. 3, $4.00; dry white lead, 5c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 45 to 50c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50. Window glass, $1.20 to 1.25 per 50 feet for first break; $1.30 to 1.35 for second break; third break, $2.90.

TORONTO MARKETS.

TORONTO, June 5th, 1894.

DRUGS.—Some merchants incline to the view that trade has shown more life this week. We would willingly accept this opinion as correct, for things have certainly been very quiet for some time past. Values show no startling changes. Shellac and tragacanth are higher in London. Holders of Norwegian cod liver oil in primary markets prefer to hold their stock and take chances on the market in the fall. Camphor is easy. Salicylic acid remains at lower prices.

DRY GOODS.—An increase in the volume of business as compared with the movement of the previous week is noticeable. The continued fine weather is doing much to bring satisfactory results to the retail business houses. The goods for which there is at present best enquiry are: Silk gloves, cotton hose, light tissue underwear and such dress goods as spot and other muslins, Victoria lawns, ducks and similar summer fabrics. Laces and watered ribbons meet with fair request. The sudden change in June from cold to hot weather has created a good demand for white goods. The prospects of business for the autumn have improved and are now considered more hopeful than they were two weeks ago. With a settlement of the tariff question almost in sight, American buyers are now going to Europe, and the values of some goods are advancing. French woolen dress goods have advanced in primary markets from 5 to 7½ per cent. in value. There is also an upward move reported in other lines. For trimmings there is at present only a moderate enquiry. Jet edgings, however, meet with fair request. The button trade has experienced a slight revival, but as yet the improvement is not very marked.

FLOUR AND MEAL.—The flour market shows no improvement, and quotations remain unaltered, standing as follows: Manitoba patent, $3.70; Manitoba strong baker's, $3.45 to 3.50; patent, $3.00; straight roller, $2.70 to 2.80; extra, $2.50. Quotations on oatmeal have advanced within the last two weeks, and $4.20 is now asked for broken lots, and $4.40 for car lots.

GRAIN.—Market quotations are in exactly the same position they were in a week ago. The trade movement has been generally small, and the market contains no exciting features. The recent bulletin issued by the Ontario Government concerning crops in the Province up to June 15th, is of some little interest to the trade. The present condition of fall wheat is described as fair, with prospects of a crop quite up to, if not slightly better than, the average. Of spring wheat, the indications are that the crop will be

These prices are wholesale by the car load

about two-thirds of the average. "Barley has suffered quite extensively, is backward in growth, but at present is making very rapid progress, and with a continuance of favorable weather will probably come up to nearly the average of the last two years." Oats at present are backward, but present conditions point to a yield fully up to the usual amount. The yield of peas will be a little short in quantity, but at present the quality of the crop is in general all that could be desired, reports from the largest pea counties of the west being quite favorable. Corn bids fair to be under the usual quantity. Quite an extensive acreage of buckwheat is under cultivation this year, two-thirds of this crop being grown in the Lake Ontario and the St. Lawrence and Ottawa groups.

The stocks of grain in store at Port Arthur on June 23rd were 1,284,275 bushels. During the week there were received 93,132 bushels, and shipped 108,377 bushels, leaving in store on June 29th, 1,269,030

GROCERIES.—What may be considered a fairly active season's trade is being done. Dried fruits sell well in consideration of the presence of green fruits; stocks of Valencia raisins continue scarce. The sugar situation is without special change; orders for small lots are being freely received. The N. Y. *Journal and Bulletin of Commerce* of Wednesday says: Holders of raws are in most cases disposed to assume that about the only thing likely to seriously impair the market is a free sugar schedule, and while the possibility of such a result is admitted, it is considered a contingency too remote to worry over. At all events former rates are asked and the offering carefully made. Demand somewhat indifferent, but takes up odd lots without bearish effort. Samples of new season's Pocklin teas have been received; these are the choicest early pickings, but the quality has not turned out as well as that of similar receipts last year; the liquor does not appear to be as fine as that of last season, but is perhaps a little fuller bodied; prices, although not yet settled, will probably be much the same as those of a year ago. The general movement of teas to the trade is but fairly good. Some are inclined to regard the salmon situation with bullish eyes, but it is impossible so early in the season to give a forecast of the new pack. Holders of last year's pack say that it is now very good property and can be disposed of at an advantage.

HARDWARE AND METALS.—No special features have characterized the trade of the last two weeks. Galvanized iron, tin plate, and black iron are moving fairly well; but sales of zinc, copper, lead and antimony are decidedly slow. Solder is quoted lower, standing: Half-and-half, 13½ to 14c.; standard, 12½ to 13c. There does not appear to be any decrease in the demand for harvest and garden tools, the special requirement of the trade being just now for grain cradles, snathes and hay rakes; all kinds of hoes are in request. A good business is doing in cut and wire nails, although few car lots have changed hands. Trade in hinges and heavy hardware is fairly active. The movement of rope shows material decrease. For builders' and plumbers' supplies, country accounts continue to improve, but the city trade is flat. Stocks of screen doors and windows are low, and jobbers find some little difficulty in supplying the demand. Lamp goods and gas fixtures are now being shown by sample for the fall trade. Although somewhat early in the season as yet, everything points to a good fall trade in sporting goods during the next month. Shipments of window glass from stock continue to be small.

HIDES AND SKINS.—The local hide market has developed nothing new; prices are unaltered, and, as near as can be learned, the general feeling in the trade remains unchanged. The Chicago packer hide market has come to a standstill as a result of the great strike. All the big packing houses are closed down. Calfskins on the Toronto market are slow. Lambskins and shearlings have been advanced, the former now standing at 25c. and the latter at 20c. Tallow is without change or special features.

LEATHER.—Trade is still on the quiet side. Eastern factories are making but moderate demands upon stocks, while factories in the west are taking still less in proportion to their requirements. In consequence of heavy shipments made by way of export last week, nothing is going forward at present. Advices from England indicate a quiet market. The country jobbing trade shows but little activity. Values remain fairly steady, but are, of course, depressed.

PINE LUMBER.—Trade in the last few weeks has witnessed a slight improvement. The export trade to the United States still remains practically dead, although as there are now better prospects of a speedy settlement of the tariff question, it is confidently expected that the American demand will soon show signs of revival. The requirements of the city building trade are very small, the only really good demand coming from western Ontario. This section takes for the most part only the common grades. Values remain unchanged.

PROVISIONS.—General trade is only fair. The receipts of butter are not so large as they were a week ago, the consumptive demand keeping up moderately well, with quotations unchanged. Hog products are in much the same position as reported last week; the demand for lard appears to have gained somewhat in strength. Hops are quiet; only small lots are passing hands; quotations stand at 13 to 15c. Offerings of eggs this week are somewhat small, and trade lots are selling at 9½c., with really fresh bringing 13 to 14c. per doz.

WOOL.—Free wool now appears to be almost a certainty so far as the United States is concerned. *Bradstreets* of June 30th says: "Trade continues slow and the market is no firmer. Buyers are bidding lower prices on lots, and dealers maintain a fair amount of steadiness at the recent decline. Arrivals show an increase, and stocks are larger, although much below the usual average at this season. Manufacturers are not disposed to stock ahead with wool even at the low prices, as they do not regard the future of the goods market with favor, and consequently prefer to buy the raw material as they need it, and take chances on prices." Prices paid for the season's clip, of which free deliveries are being made, are somewhat higher, and dealers are paying 16 to 17c. for first-class merchantable fleece. The demand from the mills shows little or no improvement.

THE BRITISH GRAIN MARKETS.

The grain report of L. Norman & Co., Ltd., dated London, June 18th, says: "Since our last report of the 11th inst., the wheat markets have fluctuated according to the state of the weather and foreign advices. Early in the week the upward movement was maintained, but at the same time the volume of business transacted was far from large, owing to the attitude of sellers, who had either withdrawn from the market or held for limits far beyond buyers' ideas. At the end of the week, with fine genial weather and lower American advices, prices were weaker, but to-night on the opening advance in the U. S. A., market is closing firm with more enquiry. The quantity afloat to arrive is still large, but Russian shipments show a decrease, while American and Argentine exports during the week have been moderate. We can only reiterate our last week's remark that the course of the market now depends upon 'sunshine or rain.'"

Hard Manitobas.—Quiet but steadily held. A parcel on passage sold at 23s. 1d., c.i.f., London. Sellers, June and July shipment, ask 24s. 3d., c.i.f., and for July and August 24s. 6d., c.i.f.

Hard Duluth.—Quiet and little passing. For parcels on passage or for shipment, 24s. 6d., c.i.f., asked.

Barley:—Grinding qualities have been in active demand from ninepence to a shilling advance on the week. Malting sorts neglected.

Oats.—With large arrivals market very quiet with downward tendency.

Peas.—In London this article has ruled steady, but trade quiet. In Liverpool, owing to small stocks, market has been firm. White Canadian, June and July shipment, offering at 24s. 6d., c.i.f., but no buyers.

Hay.—Owing to rain interfering with the cutting of the home crop and damaging that already cut, this article has been very firm. For Canadian, sound, delivered at wharf in London, £4 per ton has been paid. For shipment there are buyers from £3 12s. 6d. to £3 14s., c.i.f.

THE GREAT-WEST LIFE ASSURANCE CO'Y.

Head Office, Winnipeg.

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First It is the only Canadian company giving its policyholders the security of a four per cent. reserve, all others without exception reserving on a lower standard

Second The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

Agents wanted in unrepresented districts. Application may be made to the Head Office, Winnipeg, or to

"LA COMPAGNIE GENERALE DES BAZARS."

On Friday last was held in Montreal a meeting of the creditors of the dry goods firm of Boisseau & Poliniere, proprietors of "Cie Generale des Bazars," in that city, a large dry goods retail concern. They assembled to discuss the situation and find out what had been the result of the stock taking and the investigation into the accounts. The curators, Messrs. Kent & Turcotte, submitted a statement that shows there is a surplus in the estate if the goods could be sold for 100 cents on the dollar, but even at a reduction the loss will not be a heavy one from present appearance.

The statement shows the liabilities to be: Direct, $147,912.20; preferred, $1,760, making the total liability $149,672.51.

The assets are as follows:—Stock of dry goods in store, corner St. Catherine and St. Lawrence streets, $109,517.46; fixtures, $7,-144.10; stock of dry goods in store, corner Dorchester and St. Lawrence, $24,717.90; fixtures, $584.48; book debts, good, $17,490.47; doubtful, $11,250.87; bad, $11,270.56; cash on hand, $3,001.65; book debts of L. H.Boisseau & Co., doubtful, $130.40; bad, $14,922.15; one-eighth share in Alley syndicate, $2,500; amount invested by Poliniere in Phœnix Printing Company, $2,000, making the total of the assets of all kinds about $204,000. It need not be expected that the estate, which will be sold to the highest bidder, will realize this sum, for $26,000 of book debts shown is already admitted to be a bad asset.

A list of the creditors shows about twenty Montreal houses into whose books the firm had got to an aggregate closely approaching $100,-000. Nine Toronto firms figure for $28,746 in all. Quebec, London, Berlin (Ont.), Glasgow and Paris houses are represented, though not for very heavy amounts.

BRITISH MARKETS.

The report of Messrs. S. W. Royse & Co., dated Manchester, June 23rd, says: With respect to chemicals, with the exception of the tar products branch, in which we note some improvement, there has latterly been little of special interest occurring in the general chemical trade; prices indeed are in general well maintained, but business only moderate. In the tar products, however, pitch has received attention, and has advanced strongly; naphtha is quite steady, with fair business doing; crude carbolic acid has been selling better and is dearer, but business is stopped for the present, as buyers do not see their way to the higher prices now asked; creosote also is firm, but benzoles are only quiet. In alkalies the prices are nominally unchanged; caustic soda has just a fair enquiry, but has perhaps a slightly easing tendency; ammonia soda is moving slowly, and soda crystals and bicarbonate of soda are quiet. The demand for bleaching powder is well up to the supply, and prices are quite firm. The Board of Trade returns continue, however, to be unsatisfactory; there is a further decline in the exports in May, and during the five months ended May 31st last, as compared with the corresponding period of 1893, they show in bleaching materials a decrease in weight of 7,829 tons, and in value of £73,886, and in alkalies a decrease in weight of 31,683 tons, and in value of £280,438.

MINERALS.—There is little change to report in this branch of trade. Iron ore has latterly been receiving rather less attention, but prices are, however, fairly steady. The imports have further improved, the returns for the five months ended May 31st last, as compared with the corresponding period of 1893, showing an increase in weight of 54,124 tons, and in value of £51,232. Chrome ore of good quality is enquired for, but is by no means plentiful on the spot, and commands full prices. Manganese ore of the higher strengths is also selling well at good figures. Foreign brimstone is rather stronger, and imports are again heavier, the returns for the five months ended May 31st last showing an increase in weight of 1,146 tons, and in value of £1,464, as compared with those for the corresponding period of 1893. Phosphates of lime are quiet for early delivery, but have more enquiry for forward shipment. Sulphates of barytes are only moving slowly. China clay, of all qualities, has only quite a moderate outlet in the home trade; shipments abroad are, however, fairly good.

MINING ENGINEERS' OUTING.

The summer meeting of the General Mining Association of the Province of Quebec, which takes place in conjunction with that of the Mining Society of Nova Scotia, is to be held at Sydney, Cape Breton, during the week commencing 10th July. About 150 Canadian mining men will then visit an island which possesses much interest for those associated with mining, besides exceptional natural and historical attractions. The steamer "Bonavista" will take a party of about forty ladies and gentlemen from Montreal, and many will go by the Intercolonial Railway. During their stay the visitors will be the guests of the Dominion Coal Company, limited, and the General Mining Association, of London, limited.

The new International pier, at Sydney, now equipped with one of the best coal handling plants on the continent, will be visited. Also the Caledonia and other collieries at Glace Bay, operated by the Dominion Coal Company. These mines use the large compound air and compound condensing steam Rand compressor, shown at the World's Fair, Ingersoll-Sergeant coal cutting machines, Stanley coal headers, new pit steel head frames, etc.

The engineers will hold one or more sessions at the new Sydney Hotel. At these there will be papers on the coal, gold and silver industries of Canada and methods of working, read by W. Blakemore, M.E.; John Rutherford, M.E., F.G.S.; Hugh Fletcher, B.A.; E. D. Ingall, M.E., R.S.M.; J. S. McLennan, Boston; J. G. S. Hudson, M.E; H. Donkin, C.E., and John Johnstone. The delegates will inspect the old Sydney mines, worked for 100 years, the oldest collieries on the continent. The workings extend some distance under the Atlantic ocean. Mr. R. H. Brown, M.E., general manager of the General Mining Association of London, Limited, will lunch the party. In the evening Mr. David McKeen, M.P., will entertain them at dinner. To Cow Bay by train, and then by steamer to the historic town of Louisburg. On Friday there will be excursions to Coxheath, visiting the copper mines worked by the Eastern Development Company, Limited, and possibly a boat sail through some of the beautiful bays of the Bras d'Dor.

In addition to the societies above named, there is expected to be a representation from the Ontario Mining Institute and the mining industries of British Columbia.

THE METRIC SYSTEM.

At the meeting of the Leeds Association of Engineers, last month, Mr. F. Howard Livens, in the course of a paper on "The British and Metric System for Engineers' Work," again raised the plea for the continental system of measurement. After referring to our arbitrary units, the lecturer showed the simple relations existing in the metric system between the units of length, weight, and capacity, which tend greatly to facilitate calculation necessary to engineers. Again, he contrasted the ease of minute sub-division possible by means of the millimetre, with the comparatively rough-and-ready 16ths and 32nds of an inch prevalent in this country, which, though exact enough for large work, are of no avail where any degree of minuteness is desirable. But the chief point, as it seems to us, to be urged in favor of an adoption of the metric standard, apart from any consideration of personal convenience, is that by the use of that system of measurement, our manufacturers and engineers would be able to meet continental rivals on their own ground. That we are seriously handicapped in securing orders abroad, by the employment of a style of measurement which is not known or appreciated by possible customers, needs little proof. Of late, some of our more wideawake firms, recognizing the fact, have given all dimensions in their lists in both styles, to suit both British and foreign correspondents. A general adoption of this idea, and the printing of the letterpress in the language of the country to which the list is despatched, would undoubtedly have some considerable effect upon our continental trade. Having got thus far, however, it may naturally be asked, Why not adopt the metric system altogether? And echo answers, why not? Already, it is employed almost exclusively for scientific purposes, and the rest would be a comparatively easy step. And its adoption by England and her dependencies would leave but a seventh of our export trade with countries outside the metrical system. This is a point worth consideration. —*Hardware Trade Journal.*

THE POSITION OF THE CUMBERLAND, N.S., COLLIERS.

The Cumberland collieries are generally considered as the remoter collieries of Nova Scotia. This, however, does not weaken their importance. The mines at Springhill and the Joggins, with an outlet to the sea, are known to be most formidable Canadian competitors of the collieries on the east side of Sydney Harbor. Parrsboro as a port is yet in its infancy. On the other hand, the collieries are not. Nevertheless, we do not anticipate the decay of the coal industry in Cumberland—as the Springhill Progressive Association does. The active prosecution of coal mining at Springhill and the Joggins will long be an important feature of the Nova Scotian coal trade, and the pending expansion of their markets into the northern States of New England through the reduction of the coal duty to a degree which will permit Cumberland to get into Maine, must be regarded as important factors in the creation of an increased prosperity in Western Nova Scotia. A care of Cumberland should be the capture of those points of consumption which lie along the route of the Grand Trunk Railway from Portland, Maine, up to the Canadian frontier, and so on into the Dominion by the back door. There is both the railway and the industrial consumption to be won by energetic ambition in these localities. Cumberland must, however, remember that it is the object of the mines on the east side of Sydney Harbor to push her as far into the rear as possible, and to obtain, among others, these identical markets.

No time should then be lost by Springhill and Joggins to put themselves in readiness to severely compete with the Dominion Coal Co. in Maine, etc. Down in Massachusetts and New York the chances of Cumberland getting any considerable market are remote, much more remote than up in Maine, and along the lines of rail into Canada. The Massachusetts and New York markets are the express specialties of the Dominion Coal Co. Every gun they can fire, so to speak, will be fired into these points, and Cumberland will find that any effort to get a good share of the more southern markets will prove largely abortive for this reason, that the struggle between Cape Breton, Pennsylvania, Maryland, Virginia and West Virginia will result in prices with which she will not be able to compete. It is clear that the operators of the Cumberland mines understand all this, and it is very gratifying to notice that they are carefully outlining a policy of catering for the western maritime markets, with preparations for the exploitation of the others alluded to, which, if carefully carried out, must continue and increase the importance of Cumberland for many a long year.—*Pictou Advocate.*

HANDSOME DONATIONS.

A despatch of last week from Quebec to the Montreal *Star* gave it as reported that a scheme for the settlement of all litigation concerning the will of the late Senator J. G. Ross has been agreed upon, and that the following are to be given out:

To charitable and educational institutions, Charities in Carluke, Scotland, $50,000.
Jeffrey Hale Hospital, Quebec, $150,000.
Morrin College, $50,000.
High School, Quebec, $50,000.
French Canadian Missions, $30,000.
Finlay and Male Orphan Asylums, Quebec, $70,000.
Ladies' Protestant Home, Quebec, $40,000.
Women's Christian Association, $10,000.
Women's Foreign Mission, $5,000

Other amounts are also, it appears, to be paid over to relatives.

—The ideal way, announces *Hardware*, to hang a hammock is to place it six and a quarter feet from the ground at the head, and three and three-quarters at the foot. The rope that secures the head should measure about one foot—it is better to be less—and at the foot about five times that. The object of this is to keep the head comfortable by being nearly stationary, while the lower part of the hammock will swing freely.

Sun Life Assurance Co. of Canada . . . . . .

Head Office—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

Brains and Capital

In every partnership there are two factors of great importance the managing brain and the capital employed: and if death removes either, the business must suffer. It often happens that the brains belong to one man and the capital to another. If the manager dies the capital is worth less than before; if the capitalist dies and his capital is withdrawn, the manager is crippled. It is clear that each has an insurable interest in the life of the other because the profits of each depend in part upon the life of both. The firm should therefore take one of the Unconditional Policies of the Manufacturers Life, which are free from all restrictions as to travel, residence or occupation, and are **absolutely indisputable on any ground whatever after the FIRST YEAR.** Get the rates and all particulars from any of the Company's Agents or from Head Office.

WHAT IS THE 7% Guaranteed Income Bond

OF THE

North American Life Assurance Company ?

It is a contract that may be secured by the payment of 15 or 20 annual premiums, and should death occur within the period selected, the full face of the Bond becomes payable.

If living at the maturity of the Bond, the guaranteed cash value, as also the surplus, may be withdrawn, or a paid-up Bond (payable at death) taken out for its full face, and in addition a 7% Guaranteed Life Annuity secured; in which case the surplus is also payable.

Pamphlets explanatory of this admirable plan will be given on application to any of the company's agents, or to

DEALERS IN

Stocks, Bonds, Government Securities, and MUNICIPAL DEBENTURES.

400 ACRES choice farm land for sale in the township of Romney, Co. of Kent, which is the Garden of Canada. These lots are situated on either side of the main road leading southward from Tilbury Centre toward Lake Erie. A portion of the land is within two miles of the lake and a half mile north of a station on the new Detroit River and Lake Erie Railway. It is also about five miles south of Tilbury Centre on the Canada Southern and Canada Pacific Railways. The Grand Trunk is still one mile farther north. On either of these roads a person may reach Detroit in less than one hour. The soil, which is deep and rich, thoroughly drained, is covered with ash, elm, hickory, basswood, etc. Terms to suit purchasers. **EDWARD TROUT,** Cor. Church and Court Sts., Toronto.

DECISIONS IN COMMERCIAL LAW.

Ex Parte KING.—Where a trader assigns the whole of his property as security for an antecedent debt and future advances, he does not commit an act of bankruptcy, if the lender agrees to make the future advances so as to enable the trader to carry on his business, and in the reasonable belief that he will thereby be enabled to do so.

DREW v. GUY.—The business of one restaurant keeper may be "similar," within the meaning of a restrictive covenant, to that carried on by another, though the establishment of the latter is a fully-licensed public-house and the former has no license of any sort, according to the English Court of Appeal.

RAMSAY v. MARGETT.—An ordinary receipt for the purchase money of goods is not an assurance, and, therefore, not a bill of sale within the definition of the Bills of Sale Act, and the fact that such a document acknowledges, in addition to the receipt of the price, that the goods are absolutely the property of the purchaser, will not make it a bill of sale, if it was only intended by the parties to be a common receipt and no part of the bargain between them. This is a judgment of the Court of Appeal in England, which also decides that where a husband sells goods to his wife which are in the house where they live together, the transfer of the property to the wife carries with it the transfer of the possession, and the goods are not, after sale, in the "apparent possession" of the husband within the Bills of Sale Act, notwithstanding that they remain in the same house, and in the joint use of husband and wife.

IN RE HERCYNIA COPPER CO. (LTD.).—Where a person has accepted the office of a director of a company, there ought to be inferred an agreement on his part with the company that he will serve the company on the terms as to qualification and otherwise contained in the articles of association. The articles of association named R. as one of the first directors, fixed the number of shares to be held as a qualification, and provided that the first directors should have power to act before acquiring this qualification, but in the event of their not acquiring it within one month of their appointment they should be deemed to have agreed to take the same, and the same should be allotted to them accordingly. R.'s name appeared on the prospectus as a director and he signed the articles, not as a signatory, but to show his assent to them. He never acted as director nor applied for any shares, nor were any ever allotted to him, and he was never registered as a member of the company. Held by the English Court of Appeal that R. had agreed to become a director on the terms of the articles and must be settled on the lists of contributories in respect of his qualification shares.

SMITH v. HANCOCK.—On the sale of a grocery business, the vendor agreed "not to carry on or to be in any wise interested in" the business of a grocer within five miles of the old shop for a period of ten years. Six or seven years afterwards the vendor's wife, out of her own separate money, set up in her own name—*i. e.*, in the name of her husband, with the prefix "Mrs."—a grocer's shop close to the place where her husband had formerly carried on business, and was assisted by her nephew. The vendor helped his wife to get a lease of the shop; he introduced her to a local bank, where she opened an account in her Christian name, and he introduced the nephew to certain wholesale provision merchants who had supplied him in his business, and induced them to give the nephew credit, he assisted in the preparation of a circular inviting old friends and customers to deal at his wife's shop, and distributed this circular among various friends. He had not, however, any pecuniary interest in the business, and did not otherwise than as above stated concern himself in it. Held, by the English Court of Appeal, that the vendor did not carry on, and was not interested in, his wife's business within the agreement.

IN STEAMSHIP "BRITANNIA" v. CLEUGH, AND STEAMSHIP "BRITANNIA" v. COTTON.—The Supreme Court of the United States laid it down that a steamship is in fault in running at a place where she is liable to meet outward-going vessels, across the ebb tide, in such a way that the current will prevent her from answering her helm with promptness. If two vessels under steam are crossing so as to involve risk of collision, the vessel which has the other on her starboard must yield the path to the latter and pass behind her. A steam vessel when approaching another vessel so as to involve risk of collision must slacken her speed, or if necessary, stop and reverse, and the latter must keep on her course, unless special circumstances render it necessary to do otherwise in order to avoid immediate danger. Where two steam vessels are crossing so as to involve risk of collision, the one whose duty it is to keep her course must not interfere with or thwart the movements of the other vessel by stopping her headway, unless some exigency or obvious danger justify her stopping. When a vessel has committed a positive breach of statute she must show that not only probably her fault did not contribute to the disaster, but that it could not have done so.

IN BARNES v. DOMINION GRANGE MUTUAL FIRE INSURANCE ASSOCIATION, the plaintiff's testator applied to the defendants in writing for an insurance against loss by fire on certain property, and gave an undertaking in writing to hold himself liable to pay to the defendants such amounts as might be required, not to exceed $46.50, and signed a promissory note in favor of the defendants for $15.25. The defendants' agent gave him a written provisional receipt for his undertaking for $46.50, "being the premium for an insurance," etc. Held, that the application, undertaking, note, and receipt constituted a contract of fire insurance within the provisions of R.S.O., c. 167, which could be terminated only in the matter prescribed by the 19th of the conditions set forth in s. 114, that is, by notice. And as the only notice sent by the defendants did not reach the testator's post office until two days before the fire, and a seven days' notice is required when given by letter, the contract was still subsisting at the time of the fire.

IN TENNANT v. GALLOW, an insolvent debtor, for the purpose of defeating the plaintiff's claim against him, by voluntary deed conveyed the equity of redemption to certain lands to another creditor, who, as previously arranged with the grantor, sold the property to an innocent purchaser, and applied the proceeds in payment of all the encumbrances on the property, and all his own debts, and those of certain other creditors of the grantor, and of a commission to himself in respect to the sale, and paid over the final balance to the grantor. Held, that the plaintiffs had no right of action against the fraudulent grantee to recover any part of the purchase money.

Mercantile Summary.

THERE is excitement at Kempt, Nova Scotia. Mr. Nash has struck a 3-foot gold lead near the Cowan mine. The reported yield is beyond any previous record thereabout.

THE gross receipts of the Richelieu and Ontario Navigation Company to June 30 were $155,442.03, an increase of $26,000 over last year.

THE American Flint-Glass Workers' Association opened their seventeenth annual convention on Monday last in Seminary hall, Montreal.

THE Lake Opinicon Phosphate Company (limited) has been gazetted, headquarters Kingston; capital stock $50,000. The company has power to mine phosphate and other minerals in the Province of Ontario. James Swift, of Kingston, is the leading stockholder, and associated with him are said to be several wealthy Americans.

THE township of Mersea drainage debentures for $19,500 were sold to G. Stimson, broker, Toronto. The bidders were Morris, of Hamilton, and Stimson, of Toronto. These are 5 per cent. debentures, repayable in twenty years. The same broker has purchased $5,000 debentures of the town of Brussels, issued for consolidation of the debt, and sold at about 6 per cent. premium.

Mercantile Summary.

THE *Nor'-Wester* of July 6th publishes crop reports from the principal points touched by the Northern Pacific, which are summarized as follows: General outlook very good. Wheat heading out in many parts of the province, but rather short in straw, and where there is a light soil somewhat thin. The latter is owing to drought in the early part of the summer. Plenty of rain has fallen all over the province within the past two weeks to satisfy all requirements.

IN the happier days of 1891 or 1892, Mons. F. X. Gadbois, of Arnprior, Ont., was a blacksmith, who had by industry saved about $1,000. He either imagined or was told that storekeeping was a fine occupation for a small capitalist, so he put his $1,000 into a small store. Perhaps, too, he hankered after an easier way of making a living than by pounding iron. At any rate, being entirely without any business experience, the end was not hard to guess. His $1,000 hard-earned money is in book debts or on shelves, and his assignment is now in order.——Albert Saunders, a carpenter and builder at Carleton Place, Ont., has assigned with small local liabilities.——At Gananoque, Albert Russell, a bookkeeper in a manufacturing establishment, recently started a furniture and agency business, but his failure is already reported.

Mercantile Summary.

THE Nova Scotia Telephone Company has completed wire connection with Maitland, Hants county, by way of Truro. The line goes through Clifton to Black Rock, whence 3,500 feet of submarine cable goes across the river and reaches Maitland.

A NEW brick block is being erected in Sussex, N.B., by George H. White, merchant. Among the tenants of the block will be the Bank of Nova Scotia; C. H. Fairweather, druggist; John Thompson, merchant tailor; George Sufferin, jeweller and watchmaker; James R. McLeod, tailor, and White, Allison & King, barristers.

QUEBEC letters patent have issued, incorporating Henry Lovell, Moody B. Lovell, Charles A. Lovell and Fritz E. Lovell, manufacturers, of Coaticook; Michael F. Hackett, John M. LeMoyne, Alfred N. Thompson, Henry E. Channell, of Stanstead Plain; and George F. Terrill, of Sherbrooke, to furnish electric light and power by the name of the Stanstead Electric Light Company; capital stock $25,000.

A CABLE despatch on the authority of the London *Times* says, under date 8th instant "The English papers say that the crop, which is now mostly gathered, is the biggest for a long time, and that both the grain and general crops are full of abundant promise. Potatoes form a possible exception both here and in Ireland, but it is not too late for their chances to improve. Much the same hopeful story is told from most parts of the continent."

Toronto

THE assignment of John Lindsay, general storekeeper at Lunenburg, N.S., is reported. He succeeded the well-established business of his father eight or ten years ago, but has not been able to hold the trade. He owes about $7,500.——At Port Hawkesbury, in the same province, D. A. McDonald, general store, has assigned.

DURING the past eight years, the firm of H. McDowell & Co. has developed quite an extensive drug trade in Vancouver, B.C., and in order to keep pace with their rapidly increasing trade, they find that they require additional capital. In order to obtain this, they have decided to dispose of their business to a joint stock company which they are now organizing with apparently good prospects of success.

IT is reported that W. J. Gray, blacksmith, has gone away from Kirkwall, leaving creditors in the lurch.——The bailiff has taken possession of the Opera House Hotel, owned by Chas. Egener, in Hamilton.——The same officer is also in possession of the paper-box manufactory of J. D. Mills, who has been in business about fourteen years, but of late has lost money in various ways.——The sheriff has sold the effects of G. S. Fowler, furniture dealer, Waterford, who succeeded to the firm of J. L. Barber & Co. in 1887. He has always conducted a farm, and his brother-in-law, A. M. Barber, has managed the businees. The trouble arose through a confession of judgment to his sister.——An offer of compromise at 60 per cent. secured is made by D. M. Walker & Co., dealers in dry goods at St. Catharines. This offer was not considered satisfactory to creditors, and has been, in the meantime, declined.

IN July, 1890, the firm of S. & J. Armstrong, general storekeepers at McKellar, got into difficulty and assigned to the sheriff with liabilities and assets of $17,000 each. This was compromised at a liberal rate. Since then they did a fair and apparently prosperous trade, and last autumn claimed a surplus of $10,000. A couple of months ago they disposed of their store business, and are confining their operations to that of lumber. Lately a number of writs have been issued against them, and an assignment has been made. The senior of the firm has recently been elected to a seat in the Legislature.——John Dilloway, florist, London, was formerly a brass founder in the employ of the railway. He changed his occupation in April, 1890, and since he has struggled against odds. Now the bailiff disposes of his plants, etc., by auction.

MR. GEORGE D. MITCHELL, one of the oldest and most respected business men of Peterboro', Ont., died on the 5th instant, aged 75 years. He was a native of Wiltshire, England, and established a grocery business in Peterboro' in 1859. At the time of his death he was head of the firm of G. D. Mitchell & Son.

THE merchants of a town are its backbone. Take them out of any town and in three months it will be as dead as the proverbial "door nail." They are the sap of the town, and give it activity and life. One live merchant is worth ninety-nine retired farmers. Merchants talk up the town; they draw manufactures into it; they draw residents: they invest money in it; they help it in a thousand ways.—*Dry Goods Review.*

MR. LOUIS H. BOISSEAU, of Boisseau & De Poliniere, retail dry goods, Montreal, whose recent heavy failure has been noticed in these columns, is making a personal offer of 65 per cent. on the liabilities of about $150,000, payable in quarterly instalments spread over fifteen months. Friends are to put up collateral security to the amount of $20,000, to be held until all the payments are completed. The feeling seems favorable to the acceptance of the offer.

QUEBEC province failures for the week, outside of the cities of Montreal and Quebec, are few and unimportant: J. O. Brunet, a small trader of St. Come de Kennebec, is reported embarrassed and about calling creditors together. He owes only about $1,000.——A. Lajoie, of St. Fulgence, in the Saguenay district, has assigned.——At Gentilly, a general dealer named A. Genest, who has also tried his hand at farming, beer-bottling, cheese-making, &c., wants creditors to accept 25 per cent. on their claims amounting to $3,800. He settled before in 1890 at 50 cents.——Robert, Freres & Co., tinsmiths, of Lachine, are insolvent, and their schedule of debts foots up to $3,290.

THE sheriff is in possession of the premises of Wm. Bateman & Co., biscuits and confectionery at Winnipeg. A number of judgments amounting to $10,000 have been issued against them. In 1881 they removed from Hamilton, where their father had conducted business many years——The same officer is also in charge of the premises of Jordon & Co., dealers in millinery, etc.——It is a dozen years or more since the Vulcan Iron Works were established in Winnipeg by prominent capitalists. But during no lengthened period of time could it be pronounced a financial success, although doing a large business. Of late there has been some dissatisfaction existing among stockholders as well as creditors, and a short time ago their banker obtained judgment for some $8,500. Now A. W. Law is appointed permanent liquidator for the company.

IN this city there are some troubles among traders to be noted: Thomas Hoskins, boot and shoe dealer, has placed his affairs in the hands of W. A. Campbell, who has called a meeting of creditors for Monday next. A stock of about $2,000 is claimed, while Mr. H. owes about $1,800.——The bailiff is in possession of the hotel premises of Mrs. M. J. Hawley. In February last her husband, Joseph, assigned, and the business at the new St. James' Hotel was turned over to Mrs. H., she giving a chattel mortgage for $14,000. She has failed to carry out her agreement, and the result is as above stated.——A grocer named W.F. Penrice began business in a small way in January, 1887. Now he assigns.

AN assignment has been made by Wm. Cross general storekeeper at Fenella. About six months ago he succeeded his brother in the store, having previously been farming, and it is not surprising to hear that he is already in difficulty.——G. W. Morrow, contractor, etc., St. Ignace, Algoma, is in trouble and has assigned.——Wm. Salisbury has been many years in the book trade, and lately doing business in Peterboro under the style of Salisbury Bros. He has been inclined to do a large trade, occupies extensive premises and carries a large stock entirely out of proportion to his trade. During the past two years his position has grown financially weaker, and now he assigns.——So also Philip Ginsberg, junk dealer, St. Catharines. He has been chattel mortgaged.——In the same place, Andrew May, dentist, assigns.

IN February, 1893, the firm of Thomas & Mowat commenced general business at Elkhorn, Man., and soon worked up a large trade. A year afterward they showed a statement of assets $17,000 and liabilities $10,000. Now we hear of their assignment.——It is some eight years since C. D. Anderson & Co. began a grocery business in Winnipeg. A few years after, fearing trouble, the business was transferred to Mrs. Anderson. This step was not contested. Shortly afterward she admitted C. A. Lemieux. In May, 1893, she withdrew from the firm, and was succeeded by P. Gosselin, who now composes the firm. Last April they showed a surplus of $4,000, but now they assign.

CLOTHIERS' TRIMMINGS

59 Front St. West Toronto

THE Molsons Bank has decided to open a branch at No. 2,342 St. Catherine street, Montreal. The new office will be ready for business probably before the end of the present month.

EDWARD STILL has been appointed trustee for the firm of Doty Bros. & Co., of Toronto, and the statement submitted to creditors shows liabilities of $30,000, with assets about half this sum.

THE Dominion Blanket and Fibre Company, of Montreal and Beauharnois, organized a little more than a year ago with a subscribed capital of $125,000, is reported in somewhat embarrassed condition, and a meeting of creditors is called for the 24th inst. It would appear that there has been some lack of ability and judgment in the management, and that their new mill at Beauharnois, calculated to cost about $80,000, has more than absorbed all the subscribed capital.

AN offer of ten per cent. has been made to creditors by C. H. Hartling, haberdasher, etc., Halifax, N.S., whose failure we chronicled a few weeks ago. He owes $4,267, about half of which is preferred.——In the same city C. F. Mott, soap manufacturer, has assigned, making preferences of $20,000. His business liabilities are quite slight, and his troubles are altogether due to unfavorable litigation in connection with some gold-mining interests he held.

A LITTLE run of shoe failures during the past week is to be noted. The principal one is that of Jean Simard, a retailer of some years' standing in Quebec, who has also recently done a little jobbing. His liabilities are about $21,000, and he is making a proposition to pay 50c. in three, six and nine months, secured.——F. Juneau, of the same city, is also reported embarrassed, owing some $4,000, and will require some indulgence to enable him to continue.——Three Rivers also contributes a couple of cases. A demand of assignment has been made upon C. Didier, of that city, whose troubles have been brought about by the failure of a son in the jewellery business last fall. Some $3,000 of his liabilities are due to Jean Simard of Quebec, whose stoppage is noted above.——Thos. Bedard began business in Three Rivers only two years ago, and is now asked to assign. Liabilities are comparatively small. —— From Brockville, Ont., is reported the failure of Mowatt & Johnson. Their liabilities are reported at $5,840, with nominal assets of about $6,000.

MONTREAL failures not noted elsewhere are as follows; F. H. Murphy, hay and feed, has assigned on demand, owing only $940.——L. W. Gauvin & Co., another concern in the same business, are reported as failed after a very brief career, and some of the creditors threaten criminal proceedings. Liabilities are reported at $4,000, with apparent assets of only about $500. Mr. G. failed about three years ago in general business at Notre Dame de Stanbridge. ——Lambert Leclair, plumber, is insolvent; liabilities about $1,500.——Mrs. C. A. Cadieux, doing a small business in dry goods and shoes, under the style of Cadieux & Co., has put her affairs into an assignee's hands, and owes about $800.——E. H. Lesage, dry goods, though showing a nominal surplus of $11,000 to $12,000 in stock and real estate, finds himself hampered in meeting engagements, and has called a meeting of creditors. He will probably get an extension. Liabilities are $6,800. ——M. Greenberg, a clothier, heretofore supposed to be in very snug shape, is asking a settlement at 50 cents in the dollar, secured, on liabilities of $12,000. It is understood he has been speculating to some extent.——Henry T. Spawn, laundryman, is reported an absentee, and a meeting of his creditors is called for the 23rd inst.

THE SITUATION.

Since the action of the United States troops at Chicago in preventing the impediments offered to the movement of the trains, the blockade has been gradually raised and traffic is resuming a normal aspect. The arrest of Debs, the head of the Railway Union, caused no outbreak or attempt at rescue, and justice will take its course. The charge against him and his fellow-conspirators is obstructing the movement of the United States mails. He had induced Sovereign, chief of the Knights of Labor, to call out the contingent of workers who were supposed to be under his command, but they refused to obey. Some pretend that on Saturday next the Knights will obey the order to strike, but it is not probable that, at so late a date, they will be willing to sacrifice themselves for a lost cause. At Sacramento, California, where two militia regiments had mutinied, the United States troops marched to the scene of disturbance without opposition. Signs of the collapse of the strike appeared quite as soon as could have been expected.

No act of indiscretion can be laid at the door of the Colonial Conference. In colonial discrimination a policy incapable of realization has been taken up, a policy which, if pressed, would produce friction where unity is the aim. Still, the admirable spirit displayed by the representatives of the several colonies must bear good fruit. In an informal way the conference tends to knit the empire more firmly together. If mutual aid were wanting a spirit exists which would call it forth, and it would come with perhaps more alacrity and enthusiasm from not being prearranged in definite proportions. It remains to be seen what the conference may be found to have done towards solving the cable question. Imperial aid for steam communication between Canada and Australia is probably now assured. Whether the growth of the British empire, in the future, is destined to preserve the unity which the conference favors, or whether individual development on lines of their own, in the far future, will guide and control some of the separate ports, is a problem of which the conference took no account.

Business fell off, says Mr. West, son-in-law of Pullman, and wages at the Pullman works had to be temporarily reduced, to be increased again when orders come in more briskly. The men asked Pullman to arbitrate the question whether he should not pay them more wages. He declined, refusing to permit outsiders to interfere in any contracts he had to make in his own business. The men struck, and the men on railways using Pullman cars followed, by way of sympathy with a false position. If the Pullman employees did not like to work for the wages offered, they had the right to refuse; but they have no right to force arbitration on Pullman to decide the way in which he should conduct his own business. If he were to yield, he would no longer be in a position to conduct his business in the only way which to his mind could be successful. Against arbitration in itself there is nothing to be said, but much in its favor; it is all right for those who want it, and is a valuable means of settling many differences, but it cannot, in a matter of private business, fairly be forced on any who do not desire to have recourse to it.

According to Pullman, the question raised by the strikers is whether his company should pay a rate of wages that would cause the cars to cost more than they can be sold for, and this question he naturally says is not one for arbitration. Arbitration is useful in its place, but it is necessary to observe its limits. When the meaning of a contract comes in question, a case for judicial interpretation has arisen. When questions arise under a contract, when it has to be decided whether the contract has been observed or broken by either party to it, arbitration may properly come in to decide; but contracts can be made only by the free will of the different parties to them, without the intervention of a foreign element. The difficulty arises from a confusion in the minds of excited or interested persons as to the proper uses and limitations of arbitration. If its uses are valuable, its limitations are necessary. Vague talk about arbitration, without observing this distinction, only obscures the issue instead of illuminating it.

On another vital matter, the right of the railway companies to fill the places of the strikers and to carry on their business by substitutes, without molestation, President Debs speaks fairly enough. He admits this right in theory to the fullest extent, but the strikers, in practice, acted in a contrary sense till their riotous conduct forced the troops to fire upon them. But the admission of Debs will not be without its moral effect in future. Unless civilization is to give way before the forces of anarchy, employers whose hands strike must be protected in the employment of substitutes. This is the whole question, so far as the duty of the State goes, when a strike has once been declared. In affording this protection, martial law had to be declared in seven States. It is humbling to the pride of our civilization to reflect that nothing short of military power sufficed to enable the railways, in presence of crowds of excited strikers, to move trains. The worst elements of the population, unconnected with the strikers, as always happens in such cases, greatly augmented the riotous multitude and were prominent in deeds of arson and obstruction. The charge of the troops effectually cowed the rioters and a quiet day followed.

When Master Workman Sovereign resolved to call out the Knights of Labor, he appealed to a million of men to reinforce the existing strike. His address to the Knights of Labor fails to give any good ground for rendering this vast mass of labor idle. He states truly that if the Pullman Company be selling cars below cost, it has nothing to fear from investigation. But the employes have no right to investigate the business of their employers; that is a privilege which belongs only to partners, and would ruin

many an organization which employs labor on a considerable scale. If, as Sovereign alleges, the stock of the Pullman Company has been three times watered, the remedy is in an alteration of the law which will prevent in future this abuse of corporate power. But if this has been done, the case is not an aggravated one, seeing that the company is not bolstered up by the tariff, but rests on its own inventions and its own achievements. Its monopoly is the monopoly of skill, enterprise and well directed capital; a natural, not an artificial monopoly, which any body of men with the means, the brains and the capital, is at liberty to imitate. The watering of stock, in this case, chiefly concerns the buyers of it. If it is, in the spite of a triple watering, still at par, the fact may show that large profits have been made in the past. It is not with the past, but with the present we have to do, and if the work is now being done at a loss, we are in the presence of an entirely new state of things. The profits that have been made are chiefly the result of the skill of the inventors and designers, and in only a small degree of the labor that worked out these designs; all contributed, but the basis of the success is to be found in the invention and skill which conceived and set the vast machinery of production in operation. In the actual facts, no ground for the course taken by Sovereign can be found, and the Knights had the good sense to refuse to strike.

Parliament at Ottawa has at last set to work with a strong determination to ratify the French treaty, the vote on it in the Commons being 120 against 41. The mode of concluding the treaty without full authority of the Canadian Government on all points was objectionable; and the Canadian negotiator having exceeded his instructions, our Government, in accordance with a well understood principle, would have been fully justified if it had refused to ratify. But on the whole, it was best to give effect to what had been done, especially as the treaty can be terminated on a year's notice. The value of the treaty to Canada will depend upon the means of "direct" trade with France being obtained, and this implies steam communication, for which so far no provision exists. Mr. Foster contends that the treaty leaves the Canadian wine producers "a very substantial and adequate protection," a view which they are by no means willing to accept. He intimated that the Government might concede to the Canadian wine maker spirits free of duty for purposes of fortification, and this will go far to remove their hostility. Objection was made that the French islands St. Pierre and Miquelon, in the Gulf of St. Lawrence, were not included in the arrangement, though they were thought to be when the Canadian negotiator appended his signature. Since last session some difficulties have been removed and obscurities cleared up. *Poisson conserves au naturel* is now admitted to mean fish preserved without the addition of other substances, such as sardines, and the "soap" of the treaty is confined to castile soap.

Nothing less than freedom from taxation, for the benefit of the British exchequer, of property held in the colonies by British subjects at the time of their death, is the demand of colonial representatives in London. Sir William Harcourt's amendment to the Death Duties bill does not meet their demand, and they have entered a protest against it.

Statistics covering the last 73 years, just submitted to the American Senate by the Secretary of the Treasury, illustrate the growth of trade relations between the United States and Canada. In 1821 the States sent us $2,014,520 worth of goods and we sent her only $414,500 worth.

UNITED STATES RAILWAYS.

SECOND ARTICLE.

Our last article on this subject dealt with mileage, capitalization and earnings of American railways. It is now desirable to learn something in detail about their equipment and their employees. According to the sixth statistical Report of the Interstate Commerce Commission, prepared by its statistician, being the complete report for the twelve months ended with June, 1893, the total number of employees in the service of railways was 873,602, being an increase of 52,187 over the previous year. Of this total of employees, 35,384 are assigned to the work of general administration, 256,212 to maintenance of way and structures, 175,464 to maintenance of equipment, and 397,915 to conducting transportation, the remainder, 8,627, being unclassified. If the employees be assigned to mileage, it is interesting to find that 515 men found employment in the railway industry in the United States per 100 miles of line, 21 being assigned to general administration, 151 to maintenance of way and structures, 103 to maintenance of equipment, and 234 to conducting transportation.

It is not a little singular that in a country of such magnificent distances as the United States, and with the well-known disposition of its inhabitants to make long and frequent journeys, the average length of road traversed per passenger is less than 24 (23.97) miles. This is to be accounted for largely, doubtless, by the fact that so many residents outside of the great cities travel to and fro between office and residence by commutation ticket. While the freight train mileage of the United States roads for 1893 was 508,719,000, the passenger train mileage was 335,618,000. The total number of passengers carried during the year was 593,560,612. The number of tons of freight reported by the railways for the year was 745,119,482. Ton mileage was 93,588,111,833. The average number of tons in a train was 183.97, and the average haul per ton for the entire country was 125.60 miles.

We cannot say that the railway system is an unsafe one which kills only one passenger out of every 1,985,000 carried, or injures only one out of every 185,000 carried. The number of passengers killed during the year was 299, being less by 77 than the number killed the previous year, and the number injured was 3,229. But the number of railway employees killed during the year was 2,727, being greater by 173 than those killed during the previous year. The number of employees injured was 31,729, being greater by 3,462 than the number injured the previous year. It is important to observe that of the total number of deaths to employees on account of railway accidents, 433 were due to coupling and uncoupling cars, 644 to falling from trains and engines, 73 to overhead obstructions, 247 to collisions, and 153 to derailments, the remainder being due to causes not so clearly defined.

It appears from the report that the most dangerous service is that of trainmen, and for these the statistics show 1 employee to have been killed for every 115 trainmen, and 1 employee to have been injured for every 10 engaged in this service, a proportion which must surely admit of improvement. An assignment of accident statistics to the territorial groups shows great diversity in the relative safety of travel and railway employment in the various sections of the country.

Now as to the equipment of the roads. The total number of locomotives at the close of the year was 34,788, being an increase of 1,652 during the year. Of these, 8,957 were passenger locomotives; 18,599 freight locomotives, and 4,802 switching locomotives. The total number of cars owned by the carriers making

report was 1,119,878, to which should be added 154,068 leased cars, making a total of 1,273,946 cars operated directly. This shows an increase in the number of cars directly controlled by the various roads of 58,854 during the year. Of the total number of cars, 81,384 were in the passenger service, and 1,047,577 in the freight service. The proportion being thus as three to ten, nearly. The number of tons of freight carried per freight locomotive was 40,062, and the number of ton miles accomplished per freight locomotive was 5,031,889. These figures show no change in the efficiency of freight locomotives as compared with previous years. The increase in equipment fitted with train brakes, or automatic couplers, as compared with the increase in equipment itself, is not as marked as in the previous year.

INCREASE OF DOMINION NOTE ISSUE.

From $20,000,000 to $25,000,000 is an increase of Dominion notes which could not be permitted without good reasons shown. The allegation is that the amount of small notes is insufficient to meet public requirements. The assumed deficiency has not forced itself, as it would be apt to do in a somewhat imperative way, on public attention. The public has not complained that small notes in the required quantity could not be got; the press has not made known a famine of notes as a means of changing five dollar bills. The discovery is made in the Government departments, probably the Ministry of Finance.

We cannot forget that to the Government the issue of small notes has been a means of borrowing from the public and of extorting forced loans from the banks, and in the absence of a clear demonstration of the necessity for a further issue, for the public convenience, we have a right to suspect that the old leven is working again, and that the desire to obtain a further loan presided at the discovery of the want of more small notes. There is one way in which a suspicion of this kind may be effectually allayed. Let it be decided to make the issue, the full amount of the notes, $5,000,000 in gold, should be deposited to meet demands on account of the general Dominion note issue. The gold basis cannot properly remain what it is, 15 per cent., if the issue is to be increased. When the Government compelled the banks to part with a large part of their gold in exchange for Dominion notes, the public treasury became to that extent the source of gold supply for the banks, the reservoir to which they must look, as on the other side of the water country banks look to the Bank of England. There is a limit beyond which Government notes, on a narrow basis, can safely be issued, and it is the first and highest obligation of the Government to see that that limit is not exceeded. The whole structure of finance, public and private, corporate and individual, depends upon it. The temptation to exceed a just limit has often elsewhere proved too much for Governments, when they become embarrassed, to resist. When power and privilege go together, the Government having the means of getting what would be denied to a corporation, a special element of danger is introduced. If the Ottawa Government resolved to extend the Government note issue by $5,000,000, on the present basis, there is great reason to fear that party would give what was asked. Here lies the danger. Though we might trust the patriotism of the Government, it does not follow that we could feel any safety in the economic discipline through which the minds of its members have passed.

It may, we trust, be taken for granted that there will be no attempt to force a further Government loan from the banks, under the pretence of a necessary increase of small notes. This process has gone quite far enough already, too far in fact. If the attempt were made, it should be resisted by all legitimate means.

The Government is not only an issuer of notes against gold. Through the post office. Savings banks it is a holder of deposits to a large amount. There is an occasional movement of deposits which does not depend upon any actual business demand, but is responsive to a feeling of panic which takes account of nothing but its own distrust. Last year a remarkable manifestation of this feeling, and the disastrous results which it is capable of producing, made its appearance in the United States. Beyond the part played by the silver question, the state of the currency had very little part in producing the general paralysis of business which supervened. Distrust was king; he caused the withdrawal of treasure from the banks, in the form of deposits, on an enormous scale, and for a while the banks found pretexts for a practical suspension, for which their charters would have been forfeited, if anybody thought it worth while to proceed against them on that ground. The only safe thing to do is to give no ground for suspicion or distrust either in connection with the currency or deposits.

Sir Robert Peel acted upon the principle when dealing with the Bank of England, that for all the currency issued beyond a specified amount, specie should be deposited pound for pound. There will be more reason to insist on this rule being observed in the case of an addition of $5,000,000 to the Government note issue than there was in the case of the Bank of England. The present small note circulation is made to serve the banks in lieu of so much gold. It is not gold, and though a legal tender, cannot, even in fair weather, take the place of gold everywhere. It would not pay foreign debt, and is therefore not a currency for all purposes like gold. An addition of $5,000,000 to the amount of these notes might be justifiable if they were based on $5,000,000 gold held on deposit; but not on the basis of an extension of pre-existing issues.

A TRIP TO HALIFAX.

We beg to express our grateful acknowledgments to a correspondent in Quebec who brings to mind what was written in THE MONETARY TIMES of 18th April last on the subject then mooted of holding a meeting of the Canadian Bankers' Association in the city of Halifax. He suggests that we reprint it, as a reminder to bankers looking for a holidaying place, which we accordingly do. Referring to the charms of such a salt-water programme as Mr. Knight had laid down for jaded bankers in his letter suggesting the Halifax gathering, we said:

"Halifax in July! The harbor with its fleets; the Basin, the Arm, the surf at Cow Bay, Studleigh—the old-world hospitality in new-world surroundings. Ah! Any one who has ever visited that entrancing city, be he a solemn banker or jocund bank clerk, will hold up both hands at the chance of an outing among such people and such scenes as Halifax can supply."

This pleasing prospect is just as true in July as it was in April, and much nearer hand. And we are glad to find that Halifax has been chosen for the annual meeting of the Canadian Bankers' Association, which will be held in that city on the 26th, 27th and 28th July, Thursday to Saturday. These dates have been chosen by the Halifax bankers in order that visiting associates may have an opportunity to witness a naval review which is to take place on the 28th. It has also been arranged that the regatta of the Halifax banks shall be held on that day, Saturday. Presumably the two days preceding, or most of them, will be devoted to the business of the meeting. The dinner, to which all associates attending will be invited, is to be given on the evening of the 27th. Papers on bank-

ing subjects will be read, and the meeting promises to be both interesting and profitable. To those who know Halifax no urging is necessary. They will go if they can. But to those who do not we recommend the trip with every confidence. Whether they go by boat down the Gulf, by the picturesque Intercolonial Railway, or by the shorter C. P. R. route through Maine, or by Grand Trunk to Portland, there is plenty to see and to enjoy.

LOSSES AND EXPENSES.

The year 1893 will be a memorable one for fire insurance bodies. The cases in which profit was made were rare. By a list published in the London *Review* of 27th June, it is found that out of fifty-two British fire insurance companies whose business for 1893 is reported, there are twenty-three whose losses and expenses come to more than their incomes, while of the twenty-nine which have got off with less than 100 per cent. loss and expense, thirteen have suffered an outgo of 90 per cent. or over.

Of the twenty British companies which are doing fire underwriting in Canada, thirteen expended last year in losses, commissions and expenses more than they received; while the remaining seven paid out from 89.6 to 99.6 of their total premium receipts. We give in the following list, in pounds sterling, the aggregate net premiums, net losses and percentage of outgo in these twenty companies:

Name of Company.	Net premiums.	Net losses.	Percentage loss and expense.
Alliance	£532,770	£348,815	98·7
Atlas	347,482	237,886	101.2
Caledonian	479,394	358,085	109.5
Com. Union	1,042,151	720,561	100.0
Guardian	566,773	377,646	102.0
Imperial	702,420	548,812	113.1
Lancashire	741,112	643,901	123.8
L. & L. & Globe	1,628,225	1,070,586	95.6
London and Lancashire	868,135	582,891	100.3
London Assurance	413,521	269,949	99.6
Manchester	666,145	395,389	89.6
National of Ireland	272,974	209,601	106.9
North British and Mercantile	1,447,390	1,050,184	105.3
Northern	716,307	448,950	95.4
Norwich Union	879,779	630,391	103.7
Phœnix	1,055,342	701,235	97.8
Royal	2,078,193	1,444,300	102.4
Scottish Union	462,066	278,151	90.4
Sun	975,375	733,142	108.4
Union	301,813	237,080	113.9
Total	£16,177,367	£11,287,555	Av. 102.25

Here we find, out of total premiums exceeding sixteen millions sterling, more than eleven millions, or say 69.78 per cent., swallowed up by losses of these twenty companies all over the world. But still, they have a margin of more than thirty per cent. left; surely, therefore, they can pay a dividend and put something to reserve. By no means, for while having 30.22 per cent. margin of premium over fire loss, they have expended more than 32 per cent. (32.47) in expenses of management. That is, their total outgo exceeds their premiums by £365,000. This has put some of them about dreadfully, and orders were at once given by a number of companies that expenses must be reduced. We do not wonder at this, but we do wonder at the way in which it was set about. Stationery and blanks were costing too much; less must be bought. Postages and petty cash must be restricted. Advertising was being too lavishly done; this must be reduced or withdrawn. Sign boards are too expensive, rents are too high, wages of clerks come to an excessive sum; a way must be found of reducing these. But what about agents' commissions, the largest item of all? Oh, they are sacred—they must not be touched; cut down everything and everybody but these. No company, not even the giants and exemplars among them, seems to have the pluck to attack the largest item of expense, namely, the commission paid for business, whose ratio has within the last twenty-five years grown to double, if not treble, what it used to be done for.

TORONTO TRADE FIGURES.

The foreign trade of the port of Toronto for last month shows a marked difference from that of the same month of 1893. Not only is there a falling off in imports of dutiable goods, but also in those of free goods, such as raw materials and the like. We compare the totals of the two months:

	June, 1894.	June, 1893.
Value of imports, dutiable	$ 774,841	$1,168,585
Value of imports, free	381,491	551,203
Value of coin and bullion	11,587	21,983
Total imports	$1,167,918	$1,741,771

Exports were not lessened but increased during the month just past, as the following brief comparison with June, 1893, will show:—

	June, 1894.	June, 1893.
Value of exports, Canadian produce	$269,855	$198,508
" " American "	16,069	17,977
Total exports	$285,924	$216,485

Considering first the imports, we find the decrease very generally distributed over the list; dry goods are not much more than half what they were in the previous June, and metal goods two-thirds; jewellery and watches, spirits and wines, being articles of luxury, might be expected to show a decline, but leather, books, paper, coal, paints, oils, drugs, are all imported in lessened quantity. Indeed but two or three items in the whole list show an increase. A new line of imports, bicycles, will be observed to loom up largely in the returns.

	June, 1894.	June, 1893.
Cotton goods	$ 40,089	$ 87,496
Fancy goods	32,080	30,887
Hats and bonnets	8,913	12,065
Silk goods	31,879	43,459
Woolen goods	109,042	243,241
Total dry goods	$222,003	$417,148
Brass and manufactures of	$ 4,177	$ 9,585
Copper, "	1,167	5,923
Iron and steel, "	110,993	153,034
Lead, "	1,820	3,608
Metal composition, etc	10,412	10,094
Total metal goods	$128,569	$182,244
Bicycles	26,346	.....
Books and pamphlets	22,506	30,966
Coal, bituminous	402	26,904
do. anthracite	162,266	224,484
Drugs and medicines	14,544	16,490
Earthen, stone and chinaware	28,209	25,604
Fruits, green and dried	14,941	22,405
Glass and glassware	28,807	25,916
Jewellery and watches, etc	11,040	16,007
Leather and manfrs. of	17,148	22,385
Musical instruments	7,850	10,717
Oils of all kinds	9,880	10,662
Paints and colors	11,241	13,289
Paper, envelopes, etc	33,231	37,535
Spirits and wines	4,576	13,619
Wood and manufactures of	12,872	18,163

There is not much to be said about exports. Those of both field and forest are very small. Among animals and their produce dead meats form the largest item, $111,771 in value, horses and eggs making up nearly all the remainder. Among manufactures exported, wood goods, iron manufacturers, leather, and liquors are main items. We append a comparison of exports of Canadian production:—

Produce of	June, 1894.	June, 1893.
The Mine	$78	$39
" Fisheries	50	62
" Forest	10,437	26,266
" Field	6,121	6,044
Animals, etc	124,578	78,520
Manufactures	128,137	87,577
Miscellaneous	454	....
	$269,855	$198,508

A list of free goods is also compiled month by month by the Board of Trade. The largest item in this is sure to be anthracite coal. Other considerable items are hides and skins, foreign fruits, such as pine apples and bananas, dyes and chemicals, tea and coffee, tobacco and raw cotton, jute and wool. In this list is also included settlers' effects, the value of which coming in last month was $12,484.

A YEAR OF CANADIAN BANKING—1893-4.

BY AN EX-DIRECTOR.

The annual reports of fourteen leading Canadian banks have now been published, and as these banks represent two-thirds of the banking capital of the Dominion, we can arrive at a tolerably accurate estimate of the financial condition of Canada. Diminished note circulation and deposits on demand, a very moderate increase of deposits on notice, and a general slight decrease in profits are the features of the year, and indicate diminished trade, small profits and some losses. The Government return of *all* Canadian banks for May, 1894, compared with May, 1893, shows, however, that although their capital has been increased by only $161,000, their reserve has been increased by no less than $1,145,640, and it now stands at twenty-seven millions, or over 48 per cent. of their paid-up capital; circulation has fallen about three-and-a-half millions, and deposits on demand nearly two millions, while deposits on notice have increased by only five and a quarter millions against fourteen millions for the previous year. It is satisfactory to notice that "specie and Dominion notes" have increased by over two millions, "municipal and other securities" by over two millions, and "railway securities" by nearly two millions more, the Bank of Montreal having invested $2,207,000 in first-class United States railway bonds. All this strengthens the position of the banks. "Call loans" have diminished by half a million and "current loans" by a similar sum. This indicates careful management on sound principles. The increase of $750,000 in over-due debts, however, has an ugly look. Ten of the banks show slightly decreased profits and four an increase Most of the French banks have done well, "Du Peuple" and "Hochelaga" having increased their Rest and deposits, the latter making a net profit of 13 per cent. The "Jacques Cartier" has very large deposits in proportion to capital.

COMPARATIVE STATEMENT OF 14 BANKS, 1892, 1893, 1894 (PERCENTAGES IN PROPORTION TO CAPITAL).

‡ Including assets realized after having been written off.

The general feeling in financial circles, both in Great Britain and the United States, is one of extreme distrust. In Great Britain it is estimated that no less than 250 million pounds sterling is being idle, deposited in banks at a nominal rate of interest. In the United States over 200 National banks closed their doors in 1893, or including State and private banks, savings banks, and loan societies, over 600, and the drain of gold still continues. Heavy losses have been made from the fall in prices of stocks, strikes, closed factories, and diminished railway receipts, in some of which Canadian speculators are said to have suffered. These must react to a certain extent on Canada. They did in 1857 and in 1873, as we all know. With us, however, there are mitigating circumstances, which so far have saved Canada from anything like panic. Our banking system is far sounder, and our commercial men more prudent.

In Ontario a fair average crop of grain, an extraordinary crop of hay, worth about forty million dollars, a fruit crop worth fifteen to twenty million, and an increasing export of cheese and hog products, have helped the farmers materially, and justify the statement of Mr. Cox, President of the Bank of Commerce, that "a good deal has been said, sometimes, I fear, for political purposes, about the embarrassed condition of our farmers, with their heavily mortgaged farms and low prices for farm products. That this is true with reference to a limited number of farmers in every community no person will attempt to deny; but we must not forget the infinitely larger number of prosperous and contented farmers with unencumbered and well-stocked farms, with good buildings, well-filled granaries, well-equipped implements, and steadily accumulating deposits in the savings bank." Quebec, too, had a splendid hay crop, and both there and in the Maritime Provinces, and in the North-West, the prospects for the coming crops are excellent, while cheese factories and creameries are rapidly increasing in number.

The Montreal *Gazette* shows that the reserves of cash in London banks are no larger than in Canadian banks; but it must be remembered that London joint stock banks (with the single exception of the Bank of England) have no note circulation to redeem; their deposits are no doubt very large in proportion to capital, but they keep on hand consols and India bonds, which can be converted into cash in a few minutes, and though the interest they bear is low, it is much higher than is now paid on deposits, and thus the business is very profitable. Canadian banks have no such resource.

The contention of Mr. Crawford, of Montreal, that reserves of over 50 per cent. "must either lead to extravagance, or must inevitably paralyze the energies of the best managers in the world," is untenable, and will not be endorsed by any sound banker. In Great Britain at least ten banks have a reserve of over 100 per cent., and many others from 50 to 100 per cent. The Bank of New Brunswick has 105 per cent., the Dominion Bank 100 per cent., and the Bank of Toronto 90 per cent. The amount of the reserve is always estimated in the price of the stock, and it probably earns more money for the shareholders in the bank than it would if distributed among them. It is not excessive reserves, but injudicious loans, that ruin banks.

In the lumber trade, the suicidal policy of allowing Americans to cut down our remaining pine forests for the sole benefit of United States' mill owners, workmen, and consumers, on payment of a small sum for rent and stumpage, unfortunately still continues. Canadian holders of limits and the Provincial Governments hold the key to the position, and need not fear any duties the United States Government may impose. Americans will not only pay these duties, but in the near future will pay almost any price the holders of limits may demand. In a national point of view, the best policy would be to let the trees stand, for the day is rapidly approaching when they will double and treble their value, and we shall have to look to British Columbia for lumber for home consumption. Already one cargo of sawn lumber has reached Montreal from Burrard Inlet, B.C., *via* Cape Horn!

In this Province of Quebec, municipal indebtedness is becoming a serious affair. In Quebec city finances there is a chronic deficit which, of course, yearly adds to its debt, and in Montreal the city fathers have incurred a very heavy debt, which must be stopped, or the city's credit will suffer. How different municipal affairs are managed in England! The affairs of the city of Bristol (about the same size as Montreal), are so well managed that its 3½ bonds are now selling at 117. But then none but leading citizens are sent to the council, and until men of high standing and character consent to serve in Canada no improvement need be expected.

The advocates of bi-metalism are pushing their panacea with considerable energy. Though Mr. Balfour and Mr. Gibbs, in England, favor it (no one suspects Mr. Chaplin to be either a statesman or a financier), Mr. Gladstone and Mr. Goschen, England's two greatest financiers, are both resolutely opposed to it, and there is no sign that the English people will ever consent to part with a single gold standard. The greatest financier in France, Leon Say, is understood to favor bi-metalism, but on the other hand, German bankers will have

none of it. At a recent meeting of the German Banking Association, a resolution in favor of a gold standard was unanimously adopted. Without the concurrence of England and Germany, any international agreement would be futile. So far as the agreement for bi-metalism is based upon the appreciation of gold resulting from its scarcity, facts would seem to be fatal to it. A writer in the New York *Forum* shows that since 1883 the output has steadily increased, and this is confirmed by the director of the United States mint. The output of 1892 is estimated at 138 million dollars, while the consumption in the arts is estimated to have been only seventy-five millions. Moreover, South Africa alone has increased her output since 1887, from two millions to twenty-five millions, and many think that this district alone will supply the wants of the world for a generation to come.

A very satisfactory feature in Canadian trade is that notwithstanding low prices, the exports are well maintained in value, while the imports are said to have fallen off some six million dollars for the year ending 30th June. This will give the banks plenty of sterling exchange and tend to make money easy. The imports, however, will probably increase to some extent, after the new tariff has become law. There is a large increase in the exports of horses and sheep from Montreal this spring, and cheese bids fair to exceed all previous records. There will always be a good market in Great Britain for the *best clover* hay, if shipped at a moderate rate of freight, while inferior hay is sure to leave a loss. Ocean freights at present greatly favor exporters, grain being carried below actual cost, and cattle at low rates.

The prospect is not bright. The heavy losses made must be liquidated sooner or later, before an era of prosperity can again set in, and in the process banks may suffer. The situation would seem to demand extreme caution on the part of both bankers and their customers.

If this is exercised Canada may come out of the trial not only without panic, but without serious loss or the impairment of her splendid resources.

NOTES ON BANK REPORTS.

MONTREAL.—Capital and Rest unaltered; $113,289 added to Profit and Loss account, making it $804,715; circulation decreased $488,188; deposits on demand decreased $976,724; deposits bearing interest increased $3,679,747; overdue debts increased $171,609; profits decreased 0.10, being 10.94 per cent.

COMMERCE.—$100,000 added to Rest; $12,500 written off bank premises and furniture; circulation decreased $337,242; deposits without interest decreased $145,203; deposits bearing interest decreased $250,760; overdue debts and mortgages decreased $42,182; profits decreased 0.14. per cent., being 8·80 per cent.

MERCHANTS.—$100,000 added to Rest, now 50 per cent.; second dividend 4 per cent.; contingent account decreased $29,480; circulation decreased $406,920; deposits without interest decreased $360,276; bearing interest decreased $4,193; overdue debts decreased $6,258; mortgages increased $156,700; real estate decreased $143,934; profits increased 0.44 per cent, being 10.51 per cent.

QUEBEC.—Capital and Rest unaltered; $22,072 added to Profit and Loss account; circulation increased $31,867; deposits without interest decreased $165,170; bearing interest increased $438,246; overdue debts, mortgages and real estate increased $20,635; profits increased 0.33 per cent., being 7.88 per cent.

TORONTO.—Capital and Rest unaltered, but $47,185 added to contingent fund; circulation decreased $243,490; deposits without interest decreased $400,330; bearing interest increased $247,996; overdue debts increased $58,773, but real estate decreased $5,104, and stands at only $397; profits decreased 1.90 per cent., being 12.35 per cent.

MOLSONS.—(30 Sep., 1893) $50,000 added to Rest, now 60 per cent., and $10,000 set aside for rebate on current bills; circulation decreased $83,258; deposits without interest decreased $301,194, and those bearing interest $562,554; overdue debts, mortgages and real estate increased $36,196; profits decreased 2.95 per cent., being 11.08 per cent.; on the 31st May, 1894, circulation had further decreased $451,661, but deposits had increased.

IMPERIAL.—Capital increased $3,735, and Rest by $55,093, now 58.95 per cent.; $5,000 written off bank premises and furniture account. Circulation decreased $173,290. Deposits without interest decreased $163,128. Deposits bearing interest increased $734,654. Overdue debts, mortgages and real estate increased $19,070. Profits decreased 0.40 per cent., being 12.02 per cent.

DOMINION is the first bank in Ontario or Quebec to reach a Rest of 100 per cent. by adding $50,000. Circulation decreased $115,574. Deposits without interest decreased $164,262, and those bearing interest $3,945; but the two amount to 6½ times the bank's capital. Overdue debts and real estate increased $10,396. Profits decreased 0.4 per cent., being 14.29 per cent.

ONTARIO.—Rest unaltered; but $15,221 added to Profit and Loss account; circulation decreased $82,132; deposits without interest decreased $138,268, and those bearing interest $250,842; overdue debts, mortgages and real estate increased $183,010; profits decreased 0.67 per cent., being 8.01 per cent.

EASTERN TOWNSHIPS.—$30,000 added to Rest; now 45.33 per cent.; circulation decreased $79,106; deposits without interest decreased $56,234; deposits bearing interest increased $88,932; overdue debts, mortgages and real estate decreased $1,740; profits decreased 0.31 per cent., being 8.73 per cent.

HAMILTON.—Capital unaltered; $25,000 added to Rest, now 54 per cent.; circulation decreased $109,668; deposits without interest increased $726, and bearing interest $151,391; overdue debts, mortgages and real estate decreased $31,325; profits increased 2.49 per cent., being 10.02 per cent.

DU PEUPLE.—$50,000 added to Rest, now 50 per cent.; circulation increased $61,534; deposits without interest increased $6,297; bearing interest increased $544,545; overdue debts, mortgages and real estate decreased $33,871. The President reports that the bank made a gross profit of 16½ per cent., but owing to two adverse judgments (one by the Privy Council for $50,000) $25,000 have been charged to profits, which reduced them to 9.07 per cent. net, against 12.93 per cent. for 1893.

HOCHELAGA has had another prosperous year and has paid a bonus of 1 per cent.; $40,000 were added to Rest, now 38.02 per cent.; circulation increased $9,644; deposits without interest decreased $57,699; bearing interest increased $66,610; overdue debts, mortgages, and real estate decreased $6,713; profits increased 1.26 per cent., being 13.11 per cent.

JACQUES CARTIER—$10,000 added to Rest, now 45 per cent.; circulation decreased $10,414; deposits without interest decreased $88,878; bearing interest increased $401,812, and now stand at nearly six times the capital; overdue debts, mortgages, and real estate decreased $58,708, but still $186,861; profits 9.73 per cent.

H. F.

Sweetsburg, Que., 5th July, 1894.

DEATH OF MR. BURNETT.

The death of Mr. James Burnett, president of the Montreal Stock Exchange, was most sudden and unexpected. He had been out for exercise on Saturday last as usual, awoke in the night and went to the stairs for some purpose, and apparently fell over them, for he was found at the stair foot, and died next morning. Mr. Burnett was a native of Scotland, and had been for years in the service of the Bank of British North America. He had been for some twenty years a stock broker, and had accumulated a good deal of money. He was known "on the street" and everywhere else as a square man, of good judgment and kindly qualities, and a large gathering of the best men in Montreal was present at his funeral on Tuesday last. Rev. Dr. Barclay officiated. Mr. James Burnett, the only son, was chief mourner, and was accompanied by Mr. Alex. Ewan and Mr. A. Mitchell. The Montreal Stock Exchange unanimously passed the following resolution:

That this board, having heard of the death of their late chairman and colleague, James Burnett, take the earliest opportunity of expressing their deep regret. They cannot, however, let the death of one of the oldest members of the Montreal Stock Exchange pass without placing on record their high appreciation of his high character, his ability and strict impartiality, and his uniform courtesy and kindness to those with whom he was brought in contact.

It is now moved that this board adjourn to-morrow, the 10th inst., and that the foregoing resolution be transmitted to the family of the deceased gentleman.

MONEY AND STOCKS.

While we cannot see any actual improvement in the financial situation, which continues depressed, it is some comfort to think that in the face of extreme industrial depression in those parts of the United States with which we have close relations, our money markets have been so well maintained. The natural inference, and one which we may perhaps legitimately draw, is that a latent strength has shown itself, and affairs have reached a point below which they cannot go. At present there is nothing to create a demand for money. In some countries the movement of the wool clip has an important effect upon the money market, but in Canada this industry, although undergoing steady development, has not reached sufficient proportions to materially affect the financial situation. No improvement in the demand for money can be safely looked for until a month or six weeks time has elapsed and the movement of the cereal crop begins.

In Montreal, the death of Mr. Jas. Burnett, president of the stock exchange in that city, has naturally caused a slight decline in certain securities. This is due to the fact that the firm of which he was a member carried the accounts of some other brokers, and until the future course of the firm be definitely announced, there will be a little uncertainty among the holders of some speculative stocks. The C. P. R. shares have again shown improvement, bids standing from ¼ to ½ better. Montreal Street Railway, on the other hand, shows a slight decline; Toronto Street Railway, an unlisted stock, sold at 53. Insurance stocks have ruled quiet, British and Western being off a point. Commercial cables have witnessed a slight decline. Bank stocks continue, for the most part, unchanged. Commerce has gained a trifle in strength, while Dominion has sold 1 to 1½ down.

TORONTO BOARD OF TRADE BANQUET.

It was an eminently proper step on the part of the Toronto Board of Trade to take advantage of the presence in Ontario of the delegates from various parts of the world to the Colonial Conference at Ottawa, and offer them a banquet. Accordingly, on Wednesday evening last some 120 gentlemen assembled in the rotunda of the Toronto Board of Trade building, the president, Mr. Hugh Blain, in the chair. Around him were the Lieutenant-Governor and Premier of Ontario, and many distinguished guests. Places of honor were given to the delegates present, who were:—

Hon. F. B. Suttor, M.L.A., Minister of Public Instruction, New South Wales; Hon. Nicholas Fitzgerald, M.L.C., Victoria; Sir Henry DeVilliers, K.C.M.G., Cape Colony; Hon. Thomas Playford, Agent General, South Australia; Sir Henry John Wrixon, K.C.M.G., Q.C., Victoria; Hon. Simon Fraser, M.L.C., Victoria; Alfred Lee Smith, New Zealand; Hon. A. J. Thynne, M.L.C., Queensland. Commissioners for Canada—Hon. Mackenzie Bowell, Mr. Sandford Fleming.

The arrangements for the dinner were worthy of the occasion, and the result was an affair which will be looked back upon with pleasure, whether for the speaking or social cheer, or for the opportunity it gave many of getting by personal intercourse a better notion of the ideas and purposes of British colonists afar from us. It was an exceedingly happy thing that the presentation to the Chamber by Mr. W. R. Brock of a marble bust of the Queen, took place on this occasion. The bust is a handsome one, by the Florence sculptor, Andrioni, and forms a decided addition to the ornamentation of the rotunda.

ELECTRICIANS IN CONVENTION.

Some time in September, probably during the latter half of the month, the Canadian Electrical Association will hold its annual meeting for 1894 in Montreal. The Mechanics' Institute of that city has been chosen for the meeting place. Among the papers to be read before this gathering are the following:—"The possibility of securing better regulation at central light and power stations by means of fly-wheel accumulators of improved construction," by Mr. John Galt, C.E. and M.E., of Toronto; "A method of distribution with equalization of potential difference," by Mr. D. H. Keeley, of the Government telegraph service, Ottawa; paper by Mr. E. C. Breithaupt, Berlin, Ontario. "The application of electricity for medical and kindred purposes, from light and power circuits," by Mr. W. B. Shaw, Montreal; paper by Mr. T. R. Roseburgh, lecturer in electricity, School of Practical Science, Toronto; "Electrolysis," by Mr. J. A. Baylis, of the Bell Telephone Company, Toronto; "Telephone cables, their construction and maintenance," by Mr. F. J. F. Schwartz, also connected with the Bell Telephone Company, Montreal; "Alternating motors," by Mr. L. M. Pinolet, Montreal; paper by Mr. John Langton, Toronto. The local committee is working hard in completing the arrangements so as to give the visitors a worthy reception. It may be safely predicted that the Montreal meeting will be a social success.

FOR DRY GOODS MERCHANTS.

Know your debtors and you will run less accounts with creditors.

Gauge your future operations by the condition of your stock at present.

Dispense credit with carefulness and your collections will be made with more cheerfulness.

Remedy the reasons for complaint which existed among your customers last season.—*These four paragraphs are from the Economist.*

Reports from all the cotton-growing sections of Texas are of the most flattering nature. Cotton and corn never promised such an enormous yield. Picking will begin in less than two weeks.

We have often referred to the importance of studying local tastes. Goods which in one town meet with poor request may be most popular in another town. Before buying for the trade of the coming fall and winter, consult your clerks and obtain their ideas as to what will be sellers during the next season.

German manufacturers of dress goods are already giving their attention to samples for the trade of next spring. At present the two prominent features seem to be the probable reappearance of mohair and alpaca stuffs and "tailor-mades." The latter require strong, cloth-like tissues of woolen or of worsted yarn.

As a producer of raw wool, Australia with 550,000,000 pounds, leads all other countries, the Argentine Republic follows with 400,000,000 pounds, and the United States comes next in order with 300,000,000 pounds. The two former countries consume little wool, but the United States consumes nearly all of its product and imports about one-half as much more.

It is a foregone conclusion, remarks the *Dry Goods Economist*, that the coming fall will be a rich harvest for the manufacturers of black silks. Gros grains, taffetas, Bengalines and gros de Londres, together with small brocaded effects, will be fairly well bought, if one may judge from the orders already placed by prominent retail houses throughout the country.

Thus far everything points towards a good fall trade in trimmings. Jetted trimmings will in all probability be good sellers. They are alike adaptable for trimming hats, gowns, or mantles for fall and winter wear. Braids, generally speaking, have not as good prospects, but narrow hercules and mohair binding braids will probably be active. Fur gimps with braid effects, together with the frilled or fluted idea, are taking novelties. They may be had in various shades, but browns will likely receive most favor.

In no department of the dry goods trade is so much tact and patience required as in selling silks. To most women the purchase of a silk dress is not an every day event, but a very rare and important one, and time is required for consideration. This shade and that texture should be displayed by the salesman in such a manner that their respective

merits become apparent. Purchasers often take an excessively long time in arriving at a decision, but it is better to put up with them than lose the sale and a customer through some hasty and impatient action.

The Manchester correspondent of the Glasgow *Herald* writes that "the fine weather of the past few days has brightened business up, the trimming, lace, and kindred branches having benefited considerably. The straw hat trade has this year been very poor, although with such weather as has prevailed this week larger sales may be expected. But the experience of those who bought well ahead earlier in the season has so far been disappointing. The demand for heavy goods has been of an average character. In the woollen districts there has been rather more doing. The Canadian trade has been disturbed by a few failures. The new Canadian tariff, so far as its nature can be ascertained, is in many respects unsatisfactory. On a number of goods the rates are actually increased. Carpets are still dull, and there is very little doing in the Canadian or American markets. In linens business is fairly steady, but work is not sufficient to keep looms fully engaged, and short time is in many instances being worked."

What mistakes have been made in judging purchasers by appearances! We remember a circumstance which will illustrate this. It occurred in one of the largest stores in a Western Ontario city. A milliner, who had just begun a season with the firm, was waiting on a woman. The day had been stormy and it was apparent from the woman's dress that she was not a citizen, but had come in from the country. The customer was not satisfied with the trimming of a hat which she had ordered and desired that some changes be made. After having discussed the matter for some time, turning to one of her helpers the head milliner said in an audible tone: "At any rate it is good enough for a farmer's wife." The matter was reported to the proprietor, who very soon dispensed with the services of his milliner. In doing so he said: "Mrs. C——, whom you so insulted, is the wife of a farmer, but if the day had not been a rainy one you would have pronounced her one of the dressiest women in the city. This establishment depends to a large extent upon the patronage of farmers and their wives; we cannot afford to wound the feelings of such good customers."

THE LUMBER TRADE.

There is a good pitch of water in the river just now, says the Ottawa *Journal* of Monday, and the logs are coming down nicely.

The export lumber trade from the port of Victoria, B.C., was at the close of June described as brisk. The Hastings mill was then running night and day, and the Moodyville mill running on full time.

Word received from St. John, N.B., says that there is less lumber coming down from bay ports than last year. A number of coasting schooners are laid up for lack of cargoes. Throughout the Province of New Brunswick merchants, especially those who ship to American markets, are holding their lumber in hope of an advancing market.

The great strike in Chicago has had little or no effect upon Canadian lumber markets. The bulk of our export trade is done with the Eastern States, and, as yet, transportation facilities in that section remain unimpaired. If trade were in an active condition, values would be indirectly raised in consequence of the labor crisis, but such is not the case.

Quotations for Douglas fir lumber in cargo lots for foreign shipment, according to the B.C. *Commercial Journal*, are:

Rough merchantable, ordinary sizes, in lengths to 40 feet inclusive, per M feet	$ 8 00
Deck plank, rough, average length, 35 feet per M	19 00
Dressed T. and G. flooring, per M	15 00
Pickets, rough, per M	8 00
Laths, 4 feet 6 inches, per M	1 90

Toronto lumber merchants report an exceedingly dull market. Transactions can only be made at prices below market quotations, and a great deal of stock must be handled to make a little profit. Basswood probably holds its own as well as any other hardwood. Ash meets with fairly good request. Some transactions have recently been made in maples at $15 to $16 per thousand. Butternut and chestnut are slow of sale, while cherry is almost out of the market, one holder having recently offered stock at $35 a thousand.

It has been generally conceded that the lumber mills of Marysville, New Brunswick, the home of Canada's timber "king," surpasses in cutting that of any other mills on this continent for the same kind of lumber. One gang has shown its ability to cut over one thousand feet in six minutes, the exact amount in one hour being 10,100 feet board measure. A day's work has been done of 144,000 feet for ten hours, one gang, and on Friday last the smallest gang of the five cut 680 logs in the ten hours, or more than one log a minute. Putting these logs at twelve to the thousand, this means something over fifty-six thousand for the day. This was ordinary cutting with low water and the usual run of lumber. It has never been equalled.—*St. John Record.*

The cargo market on Lake Michigan, with Chicago as the principal point, according to the *Northwestern Lumberman*, is manifesting more vigor than would seem possible under the circumstances. "Yard dealers have within the past month made numerous purchases of blocks at the mills, and the lumber thus acquired is coming forward in heavy volume, receipts in late weeks having showed a notable increase. This measure of life in the Lake Michigan movement has more than a local and sectional influence. It reaches all round the lakes and favorably affects the entire white pine field, and to some degree the yellow pine section of the south."

Referring to the condition of the British markets, that very good authority, the London *Timber Trades Journal*, says: "Buyers are afraid they have paid too much for what they have already secured, while on the other hand the shippers entertain the idea that they ought to get full prices for the balance of their stocks, so that between the two the wood market continues in a very undecided state. The chief feature of the London trade seems to be an anxiety in several influential quarters to realize as speedily as possible, and though the public auctions recently have been moderately supplied, we have no guarantee that this will be so for any length of time. There are no complaints of heavy stocks, but importers display a readiness to transact business at a small margin of profit, betraying a want of confidence in the future, from which there is no escaping."

FOR GROCERS AND PROVISION DEALERS.

On the run—ice.

London retail grocers and their friends will picnic in Queen's Park, London, on July 25th.

A down-town man who owns a hornless goat calls it "Oleomargarine" because it is no butter.—*Philada. Record.*

Workmen have commenced the erection of Mr. Geo. Matthews' new pork factory at Hull. It will probably be finished in October.

The butchers of London will close their shops every Wednesday afternoon at two o'clock during the months of July and August, commencing July 11th.

There is an abundance of sardines in the Kamouraska River this year, and the canning establishment of the Union Sardiniere Company is now in full operation.

Many grocers during these hot weeks miss the farmers' wives who supply them so regularly with choice butter. The cream is finding its way to the confectioner's establishment.

The Hamilton Retail Grocers' Association proposes to divide the city into four districts and appoint committees to canvass them, and if possible secure an early closing agreement.

The Co-operative Wholesale Society of Great Britain has established an agency in Montreal. Their agent in that city will purchase for export cheese, butter, and other produce.

The regular monthly compilation of the world's visible supply of coffee has been completed, and shows for July 1st last 2,146,423 bags, against 2,189,988 bags June 1st; a decrease of 43,565 bags. One year ago the visible supply was 3,100,618 bags.

"Well, little girl," said the grocer, "what can I do for you?" "I don't want to buy anything," replied the little girl. "Mamma told me to find out the prices and then come back. How much will I have to pay to get a dollar's worth of sugar."—*Chicago Tribune.*

Arrangements are now completed at all the canneries to start work as soon as the fish make their appearance in sufficient quantities which may be almost any day now. Already a few cohoes have been caught in the river. The spring salmon season has been fairly good, and a large number of these beauties have been canned at Ewan's cannery.—*Vancouver News-Advertiser, July 3rd.*

The Brazilian Government has decided that the export duty on coffee now being levied by the government shall in the future be wholly collected in gold, which will increase the benefit to the government about three times. Coffee represents fully one-half the exports from Brazil, and in the new year it is estimated that the exportable surplus of that article alone will amount in sterling value to between £25,000,000 and £30,000,000.

It is bad policy to send the poorest member of your staff to solicit orders. A British Columbia exchange tells us of a merchant who himself canvasses for orders, leaving his clerks in the store to make up parcels. Although this course may not be worthy of imitation, from it a point may be learned. You cannot over-estimate the importance of an agreeable and obliging solicitor of orders.

How many customers have been lost through an overcharge in their accounts? In a dispute over accounts the merchant is by no means always at fault—far from that—the best of people often are afflicted with a dislike to pay for goods they have already consumed.

But many grocers, butchers and produce dealers are lax in their methods of bookkeeping. Carrying accounts in one's head or writing them on odd scraps of paper are bad habits full of evil consequences.

THE MONETARY TIMES may perhaps find its way into some shop whose owner is indiscreet enough to allow loungers to gather around the door, sit on the chairs or stools, or even perch themselves on the counter. They may be nice fellows, and their conduct above reproach. But women do not like to make purchases in the presence of a crowd of men, and will often go a long distance out of their way to avoid doing so. It may be a distasteful task, but in the interest of buisness the merchant should ask loungers to "move on."

A demure-looking little man approached the haughty clerk in a grocer's shop, and meekly asked if he had any coffee to sell.

"We have ground coffee," said the young man.

"No other kind?"

"None. This is the best ground coffee on the market."

"But I don't want it," the little man braced up. "I got some sugar here the other day with sand in it, and I don't want coffee with ground in it. You must think I want the earth."—*Harlem Life.*

The London *Grocer*, June 30th, says regarding canned lobster: "The most interesting (double) event to note this week in connection with the trade, is the importation of 3,222 cases lobsters of the new season's pack, per 'Barcelona' from Halifax into Liverpool, followed on the 26th instant by the arrival per 'Madura' of 7,958 cases from the same port to London; and so eager have the trade been to operate that several sales have already been concluded at satisfactory rates for what may be termed the opening of the season, viz., 1-lb. tall tins at 30s. to 32s. per case, flats at 40s. to 41s., and fancy halves at 42s. to 43s."

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, July 12th, compared with those of the previous week:

	July 12.	July 5.
Montreal	$10,797,436	$9,511,494
Toronto	6,543,262	4,810,674
Halifax	1,649,731	1,124,377
Winnipeg	869,692	863,545
Hamilton	663,245	673,532
Total	$20,523,366	$16,983,622

Aggregate balances this week, $3,077,786; last week, $2,705,843.

INSURANCE NOTES.

Mr. Thomas Ritchie has been elected a director of the Acadia Fire Insurance Company in place of the late A. W. West.

The President of the Board of Fire Underwriters in St. John, Mr. W. H. White, and nearly twenty other gentlemen, general agents of all the fire insurance companies doing business in St. John, went out for an afternoon last week as the guests of A. C. Fairweather, the general agent of the Commercial Union Assurance Company, of that city.

The Dundas *Banner*, instead of falling to blaming or cursing the associated underwriters, or threatening them with opposition, for proposing to reduce the fire rating of Dundas, because its fire appliances are defective, makes suggestions that the town get a proper fire hall of brick built, and have a paid chief of the fire brigade, with three men and a team of horses permanently in the hall. "The saving to the town would be about $2,500 between classes B and C, and between C and D about $3,000."

In the light of recent accidents, says the *Boston Home Journal*, it is good advice to those who are thinking of going out in sail-boats managed by amateur sailors, to first learn to swim; second, buy cork-lined clothing; third, make a will, and fourth, stay at home.

METAL AND HARDWARE TRADE NOTES.

It costs about $600 per year to keep a locomotive in repair.

Pittsburg has 20 blast furnaces, 64 iron and steel mills, 500 glass factories, 20 natural gas companies, and 60 oil refineries.

A new washing machine is run over the floor like a lawn mower, and does the soaping, scrubbing and drying in one or two operations.—*Chicago Journal of Commerce.*

Platform scales were invented by Thaddeus Fairbanks in 1831. He was originally a retail grocer, but eventually became the largest manufacturer of scales in the country.

In May and April sisal and manilla hemp were lower than ever before. About the end of May values began to rise, and since that time rope manufacturers have made three advances. Prices now stand: manilla, 9¼c., and sisal 7c

Shipments of pig iron from centres in Great Britain since the beginning of the year until June 23rd were: Scotland, 132,108 tons; Middlesbro, 455,275 tons; Cumberland, 187,256 tons. During a corresponding time last year the shipments were: Scotland, 156,996 tons; Middlesbro, 432,173 tons; Cumberland, 122,979 tons.

Recent reports state that American pig iron has been offered in Montreal for $17 per ton, duty paid, but authorities say that a lower price will have to be made in order to gain a foothold there, and even if this is done "both Ferrona and Nova Scotia irons would be reduced in price to hold the market. It is stated that Canadian furnaces have some 15,000 tons of iron in stock awaiting purchasers."

James Watson & Co., Glasgow, in their weekly report say: "We have again to report a dull market for Scotch pig iron, with a very small business doing. The colliers' strike has already resulted in the damping down of 25 furnaces, and the greater number of the malleable iron and steel works close this week end. On account of the small stocks quotations for makers' iron are in many cases purely nominal."

Screw manufacturers have for some time felt very keenly American competition, and at a meeting in Montreal this week reduced prices. The discounts off lists now stand as follows: Flat head, brights, 80 per cent.; round head, brights, 75 per cent.; flat head, brass, 77½ per cent.; round head, brass, 72½ per cent. The discounts previously allowed were: flat head, bright, 77½ per cent.; round head, 72½ per cent.; flat head, brass, 75 per cent.; round head, brass, 72½ per cent. Thus the decline amounts to 2½ per cent.

"The strike of Scotch coal miners began on Monday," says the *Iron and Steel Trades Journal*, of London, Eng. "The men have shown unexpected unanimity, and 73,000 men have ceased work. The few men still hewing and drawing coal are working with the consent of the Miners' Union, so that the whole body of Scotch coal miners are at the outset acting as one man. We stated last week that if, as we anticipated, the Scotch colliers ceased work, no one could tell how long they would remain idle. The coalmasters may end the strike at any moment by conceding the men's demands and returning the recent reduction; but, failing this, it seems quite possible that the colliers will remain out for four or five months." The strike has naturally resulted to the advantage of English coal-owners and has prevented a decline of prices which would probably have otherwise taken place. The blast furnaces in Scotland must, says the *Journal*, be damped in a few days. "There is, however, six months' supply of reputedly good Scotch pig iron in Connal's stores. Ordinary forge or foundry iron comes into Scotland by water from Cleveland, and the makers of hematite on the West Coast and on the Tees could supply the needs of the steel works. Unfortunately, the mischief extends to the malleable iron and steel works, and this is a serious matter. Already one of the great steel works has shut down, and those working this week out are expected to remain idle after to-morrow until the colliers resume work."

ANSWERS TO ENQUIRERS

READER, Montreal.—The article to which we presume you refer, on the possibilities of a rapid transatlantic Canadian line of steamers, appeared in THE MONETARY TIMES of 25th December, 1891.

R. S., London.—We have repeatedly published such summaries as you suggest, sometimes occupying a page of successive issues. The value of Canadian products exported in the fiscal year mentioned was $47,137,203. The proportions of different classes of merchandise was: Animals and their produce, 45.20 per cent.; forest products, 25 per cent.; field products, 12.77 per cent.; fish, etc., 10 per cent. nearly; minerals and manufactures the remainder.

A CLERK desires to know if there is any book that will teach him how to become a successful merchant. This depends much upon what kind of youth or man he is and where he tries merchandising. He might buy "How to Keep Store," by Sam. H. Terry, published a few years ago by Fowler & Wells. Opening the book at random, we find these sentences under the head of "Liking for the Business": "We all have our tastes, and it is wiser to work with the current of them than against it. One man almost feels his soul contaminated if his hands are soiled; let him be careful about embarking in a business that will require him frequently to soil them. Another is sickened by certain odors; let him try something else. Another could not bear the small talk of half an hour across the counter over a few cents' worth of tape or needles; let him seek a more manly occupation."

—The Board of Trade in St. John is alive to the need of improved fire protection for that city. At a meeting of the council of the board last week a resolution was carried that a committee be appointed to deal with the subject. It is proposed to procure a chemical engine and extension ladders, to prevent the waste of water and to restrict the sale of fire works. President Hatheway, W. M. Jarvis, John White, G. H. Waring and Robt. Cruikshank were appointed the committee.

LA REPATRIEMENT.

During the first six months of 1894, according to the St. Hyacinthe Custom-house returns, as reported by the *Courier* of that city, the following families from the United States announced their intention of becoming residents of Canada;—

January	48
February	44
March	60
April	153
May	98
June	68
Total families	471

UNDERGROUND LONDON.

It gives an impressive idea of what subterranean London is fast becoming, says the *London News*, to learn that on emerging from the river the new City and Waterloo line will, in its passage up Queen Victoria street, run for a part of the way under the low-level main sewer, which, in its turn, runs along beneath the District underground railway. So that at this point in the city we shall have, first, a busy main thoroughfare, below that a steam railway, then a huge metropolitan sewer, then an electric railway, reaching its terminus at a depth of about sixty-three feet below the streets; and here it will communicate with another line—the Central London—which will lie at a depth of eighty feet.

—It is proposed at Adelaide, Australia, to place a barge on the Murray river, "fit it with canning appliances, tow it to some part of the river where rabbits, wild ducks and other game are plentiful, and thus establish a floating cannery. When game is made scarce in one place the barge will be moved to another."

—The Social Democratic beer war against seven of the Berlin breweries continues unabated. The Socialists are now endeavoring to prevent the sale of the boycotted beer in bottles by grocers and other shop keepers.

—At an auction sale in the north of England much amusement was caused by an old gentleman who persisted in running the price up seemingly against himself. At the end of the sale a cabinet was put up for disposal, and he continued his bids as usual, when the auctioneer spoke to him about it, and, after a little parley, said, "But I tell you there is no one else bidding for this ancient cabinet. You are raising the price against yourself." To which the old fellow replied, "Well, you see, I'll tell you how it is. I have got two commissions from two different people to bid for the cabinet, and I am still undecided as to which of them is to have it. I get a commission from both."

—Mother-of-pearl is coming into fashion again, or at least preparations are going on in anticipation of this. All kinds of pretty things are being shown, such as memorandum and address books, card-cases, letter-weights, inkstands and numerous other pretty devices, some of which are touched up with gold and silver.

—Others will judge you, not by what you can be, but by what you are; but you must judge yourself not by what you are, but what you can be.—*Ivan Panin.*

Though some look down on pawnbrokers
And quite despise the creatures,
We must confess
Their business
Has its redeeming features.

—*Judge.*

—The meanest so-called lawyer in this town is the one who allowed his wife to sue a prominent restauranteur for selling the husband liquor and then divided the $900 damages with his wife, refusing in the face of it all to go to a Keeley institute, and rapidly going through his share of the ill-gotten spoils.—*Boston Record.*

—A sun-fish, weighing one ton eight hundredweight, was caught by three boatmen in the service of the Melbourne Harbor Trust, as reported in advices to hand by the last mail. The monster measured 11 feet round his huge body.

—New Clerk.—I have a customer who wants a certain glove, but we're out of her size; what shall I do?

Old Clerk.—Tell her she's been wearing one size too large.—*Chicago Inter-Ocean.*

A DIPLOMATIST.

At the London Chamber of Commerce annual dinner last month the American Minister, in responding to the toast, "The Foreign Ministers and the Diplomatic and Civil Services," said the diplomatist should be a sensible man of business, and his function was to prevent misunderstanding by stating his case in the plainest way; if he had any errand at all, it was just that, and he wished to fulfil it. A fair field and no favor was what Englishmen wanted, and it was all that Americans asked. (Cheers.) It was to good faith the Duke of Wellington attributed much of his success; and the Duke said the best thing about Sir Robert Peel was his truthfulness. He had learned to respect the British representative in France for delicacy, honor, firmness, and the justice of his administration while he was in Canada; and the other day Lord Dufferin made a speech in Paris which was remarkable for every good quality of a diplomatic speech; it was frank; it was kind; it was sincere; it was respectful. The noble lord said one thing in regard to the Emperor of Russia which made a deep impression upon him, because it was the keynote of what diplomacy ought to mean, provided it was to be a useful function in the affairs of men. Lord Dufferin went to India to deal with a difficult question of a delimitation; and what, he said, armed him with confidence when he went there was the personal character of the Sovereign of Russia; he said he believed the Czar to be an honorable gentleman; he went to India relying upon that; and he attained the results his country desired and that the peace of nations demanded. Thus, what was required in diplomacy was that each man should address himself in good faith to the removal of misunderstanding, if any existed. (Hear, hear.) Speaking to the British people he could say that with his nation there was no misunderstanding. (Cheers.) It was his grandfather who signed the treaty of peace with England in 1814, and all he desired was to keep that treaty intact, and to make any other entirely unnecessary.

A PARALLEL CASE.

The circumstances and incidents of the great railway strike of 1894, which began in the West and threatens to spread to the East, are remarkably similar to those of the great railway strike of 1887, which began in the East and spread to the West. In 1876 there had been a World's Fair in Philadelphia, just as in 1893 there was one in Chicago. In 1876 there was a financial panic, the effects of which continued into 1887, just as in 1893 there was a financial panic, the unwholesome influences of which are still visible. In both periods a curtailment of the volume of business was complained of, and reductions of wages were general. Some of the men on the Pennsylvania railroads struck against a cut in their pay. They were enthusiastically applauded by other labor organizations, and though the "sympathetic strike" had not then developed all its mischievous powers, strikes became general in trades no way connected with the railroads. The strike fever was in the air, and it is affirmed that in Philadelphia gangs of street laborers quit work at the command of school boys who shouted at them in fun.

The attempts of the railroads to move their trains brought about riots very similar to those now occurring in Chicago. The militia was called out. At Baltimore, on the 20th of July, the 6th Regiment was proceeding to guard some railroad works, when it was attacked and stoned. The answer was a volley which laid eight of the rioters dead in their tracks. The worst trouble, however, occurred at Pittsburg, which became the storm centre of the struggle. The strikers, who were chiefly under the leadership of a brakeman named Zebb, practically took possession of the railway property. The State troops utterly failed to overawe the disturbers. They were attacked, forced to retreat before the mob, and, taking refuge in a roundhouse, were besieged all night by the rioters, who made repeated and almost successful efforts to fire the building and burn out the upholders of the law. During the night thousands of railway cars were destroyed, and before the law-breakers rested the Union depot, the Keystone hotel, the Pittsburg, Cincinnati & St. Louis freight sheds, the Panhandle depot and depot hotel, three engine houses, the Adams express depot and numerous smaller buildings were in ruins. Sheriff Fife was shot dead, Gen. Pearson was wounded, three soldiers were killed and a number wounded, and twenty of the rioters were slain. At Chicago like troubles occurred, but there the military were quicker in their action. The artillery fired and nineteen men paid for their rashness with their lives. The National Government intervened, Gen. Hancock was ordered to take command of the forces and preserve order, which was gradually restored, after Pennsylvania, Virginia, New York, New Jersey, Ohio, Illinois and Missouri had been put to heavy expenditure, immense loss of business had been involved and many lives sacrificed.

In Chicago this year the mobs have so far only gone the length of burning cars and injuring railroad property. Whether they will go farther remains to be seen. There is precedent for very much worse proceedings than have yet been recorded, and in all things else the parallel is almost complete between the events of 1877 and those of 1894. It goes to show that scarcity of work and multitudes of idle men at every turn, which would be thought a reason why men in employment should stick to their posts, are in reality no security against large masses quitting their work on pretexts that, in the present instance at any rate, cannot be held in any way reasonable. The discontent of hard times is apparently a stronger influence for mischief than care for self-interest is for good.—*Montreal Gazette.*

THE BLACKSMITH'S ART.

Among the various arts and crafts that have been ousted out of their place in modern times must, we fear, be included that of the blacksmith—not the blacksmith, be it understood, who is known to-day, the man immortalized by Longfellow, whose smithy is still as much in evidence as at any period of his existence as a class. He is the exponent of only one branch of the craft, and he has survived in all prosperity almost for the same cause that has brought about the partial extinction of his brother workers—the arrival of an age strictly utilitarian in all its aims and motives. The term blacksmith is defined generally as signifying a worker in iron, or, to state it with greater precision, a manual worker in that metal. It can scarcely be applied to workers employed in the various engineering and kindred trades which now form so essential a part in the world's industries. These men occupy a lofty place in

Tenders for City Debentures

CITY OF CALGARY, ALBERTA.

SEALED TENDERS Endorsed Tenders for Debentures, will be received by the undersigned up to noon of the first day of August, 1894, for the purchase of Debentures of the Corporation of the City of Calgary, Alberta, amounting to $40,000, in sums of $1,000 payable in thirty years from the first day of August, 1894, and bearing interest at the rate of 4½ per cent. per annum, payable half yearly, principal and interest payable at the Office of the Molsons Bank in the City of Calgary.

Tenders must state the price net that will be paid at the Molsons Bank in Calgary. Purchaser to pay interest to the Corporation at 4½ per cent from the first day of August, 1894, to whatever time the purchase money is received by the Corporation.

The Corporation does not bind itself to accept any tender.

Mayor's Office,
Calgary, Alberta, Canada,
June 30th, 1894.

WESLEY F. ORR,
Mayor.

City of Victoria,

BRITISH COLUMBIA.

TENDERS FOR DEBENTURES.

SEALED TENDERS endorsed "Tenders for Debentures," will be received at the office of the undersigned up to 4 p.m. on the First Day of August, 1894, for the purchase of Debentures of the Corporation of the City of Victoria, B.C., amounting to $25,000, or its sterling equivalent at the rate of $4.86⅔ to the one pound sterling, in sums of £1,000 or its sterling equivalent as aforesaid, payable in fifty years from the First of August, 1894, and bearing interest from that date at the rate of 4½ per cent. per annum, payable half-yearly, with principal and interest payable as aforesaid, at the office of the Bank of British North America either in London, Eng., New York, U.S.A., or Montreal, Canada.

The Corporation reserves to itself the right to redeem and purchase these debentures on paying the amount thereof and the interest due thereon at the date of such purchase to the holder or holders thereof, at any time after twenty-five years from the date of issuance of such debentures.

The tenderer must state the price net at Victoria which he will pay.

In addition to the net price the purchaser will have to pay the Corporation the interest at 4½ per cent. from the 1st August, 1894, to whatever date the money is received by the City Treasurer.

The above debentures are issued under authority of "The Exhibition Loan By-Law, 1894," with principal and interest secured by a rate on all ratable land and improvements in the Corporation of the City of Victoria.

The Corporation does not bind itself to accept any tender.

the world's history. They are, indeed, factors in the progression of humanity and civilization whose value only the historian of the future will be able to appreciate at its proper worth. But for our present purpose they are of little account, save in so far as they serve to indicate our point; and the growth and development of one trade, while it may more than compensate for the decline of another, does not prevent us from regretting that decline. The blacksmith is among the earliest pioneers of civilization. He it was who dealt the finishing blow to the Stone Age; and, during all the intervening centuries, his hammer has struck out the true ring of progress from anvil and iron. And now, in his turn, he is supplanted by a mightier than he in the Age of Steam.

Nothing, perhaps, will more clearly indicate the state into which the blacksmith's art has fallen than the exhibition held during this month under the auspices of the Worshipful Company of Blacksmiths, in England. This City Company was incorporated first by prescription in the year 1325, and subsequently confirmed by several charters, and had for its object the fostering of the craft after which it was named and the proper protection and encouragement of its members. The influence then exercised must have been considerable, but in the end Progress has proved too strong, and while the company retains all its accumulated prosperity, the craft from which its members were originally drawn has sunk into comparative insignificance. This is properly considered not to be past remedy. It has been a question of supply and demand. The general work of the blacksmith has been for the most part taken out of his hands by the use of machinery and the cheaper production thus rendered possible. He is replaced by the engineer, and it must be admitted that the world has gained considerably by the change. But for all that there is no reason why both should not flourish, and the Blacksmith's Company, both in its corporate capacity and through the generosity of private members, deserves praise for the manner in which of late years it has sought to restore something of the glories of the past.

That part of the blacksmith's work which has been most frequently handed down to us, and that which reflects the greatest credit on him, is the fashioning of iron by hammering. In the Middle Ages, when the blacksmith was at the zenith of his fame, the hammer and the anvil were practically his own tools, and by them he wrought all the metal-work of that period which is now extant. In the last two centuries, however, the simplicity of those tools was scorned, and as a consequence the art has lost almost all its exponents. Hammered iron is said, by a unanimous verdict of experts, to be the only form of that metal by which beauty and artistic taste can be expressed. The other processes, so common to-day, doubtless serve our turn. But for artistic and decorative purposes, the hammer alone can yield the best results. Unfortunately, however, this style of working is now fallen greatly into disuse. The Blacksmiths' Company recognizes this fact, and one of the principal objects aimed at in the London Exhibition already alluded to was the encouragement of workers in the production of hammered ironwork. In this respect it is to be hoped that progress is being made. An art, so many magnificent specimens of which are handed down to us from former times, should not be allowed to die. The mistake is that it is not always recognized as being at once an art and a trade. It is not to be expected that workers in hammered iron can turn out articles with the facility of machines turning out cheap novelties. Nor, on the other hand, must a too exalted idea be taken of the importance of this work. Hammered ironwork appeals chiefly to the rich and cultured classes, because they have at once the money to buy and the instinct to appreciate. Here, however, is a sufficiently large class to cater for. Of late years technical education, free libraries, and similar institutions have done much to develop the taste of the artisan. With better knowledge he has learned to take increased interest in his work.

The above article is from an editorial in the Birmingham *Hardware Trade Journal*. In the same paper we find a description of the work submitted for exhibition and award. The judges of the exhibits at the April show were Sir William Arrol, Mr. J. Farrard Clarke, and Mr. R. B. Evered. The present prime warden of the Worshipful Company of Blacksmiths is Mr. Pearse Morrison. The attendance at Ironmongers' Hall during the three days that the exhibits were on view numbered nearly 4,000 persons.

The examples of hammered iron work exhibited were divided into three classes. There was a class for work sent in by apprentices and youths, and another for the work of journeymen, while the third class consisted of an interesting loan collection.

The work sent in for competition reached in some cases a high order of merit, and included such articles of household use or ornament as fire-screens, lamp stands, electroliers, candlesticks and candelabras, gas-brackets, and flower stands. Conspicuous for its deft workmanship was the fire-screen made by Mr. Jas. Cook, in the employ of Messrs. Evered & Co., of Drury Lane, an intricate and ornate piece of work, which won the first prize, but was subsequently disqualified owing to its being overweight, the winner being thereby debarred from taking the prize medal which originally accompanied the first prize of £15. Mr. Cook, however, as some consolation for this disqualification, was presented with a special prize of £15 and a certificate of merit entitling his work to rank equal with that which obtained the first prize. Mr. Cook's handiwork was subsequently bought by a private purchaser for £50.

Owing to this mishap the medal went to Mr. Clarence Steer, who had been awarded second prize for a fire-screen of somewhat simpler design than the above; this was a very neat example of what a clever smith can accomplish with his hammer. Bold and simple, and well suited to the metal it was worked in, was the design of the clock-case with which Mr. Chas. Butler took the second prize.

A fine table lamp stand, the work of Mr. Thomas Atkins, carried off the third prize; while an extra prize given by Mr. Pease Morrison was gained by Mr. Henry Tompkins for on electrolier, elaborate in pattern, and very effective and handsome.

In the Youths' and Apprentices' Class, which was divided into three sections, six prizes were awarded, two in each section. The work exhibited in this class comprised, in a good many instances, articles made by lads in their own homes, and bore witness to a considerable amount of skill in the handicraft. Walter James Elwood secured first prize and medal in the first section for a gas bracket, ornamented with hammered iron roses, while the second prize went to Evan Saunders for a panel. In the second section the first prize and medal went to John Henry Oldaker for a candelabra of handsome design. The candelabra that won the second prize was an excellent example of flower work. This was made by John Carter. The first prize in the third section, together with the freedom of the company, was awarded to Arthur George Beaver for an ornamental firescreen, a capital piece of hammer work. The second prize and medal were awarded to Arthur John Hall for a bell-pull. Other excellent examples of work, too numerous to enumerate here, were contributed by the younger members of the craft; but special mention may be made of a candelabra and flower stand, the work of William Marshall, and a tripod stand for table lamp, Louis XIV. style, fashioned by William Cunliffe, both ambitious and successful attempts at decorative work.

Commercial.

MONTREAL MARKETS.

MONTREAL, July 11, 1894.

ASHES.—A few moderate shipments of 20 and 25-barrel lots have been made to Britain since last writing, but the market is easier at $4 for No. 1 potash; seconds are in more request and relatively stronger at $3.65. Of pearlash there is virtually none here, only four barrels being reported in store, and the price is firmer at $6. Receipts have been larger than in 1893, figures for six months ending June 30th being 245 barrels ahead of the corresponding period of last year. There are in store at the moment just about 200 barrels of pots.

CEMENTS AND FIREBRICKS.—There are no big receipts, but stocks are sufficient for all demands. English cement is selling at $1.90, four mos., ex-wharf in 100-brl. lots; smaller quantities up to $2.05; Belgian, $1.75 to 1.85. Firebricks $14 to 19 per M.; sales at $13.50 net cash for round lots are reported.

DAIRY PRODUCTS.—Cheese shipments continue heavy, the figures for last week being 107,468 boxes, as compared with 35,113 boxes

Address Canadian Office and School Agency, No. 56 King Street W., TORONTO, sole agents for Toronto, Montreal, and Manitoba.

for the corresponding week of last year. The total shipments to date are 457,000 boxes, being about 150,000 boxes ahead of last year. Values range just about the same as a week ago, fine colored being quoted at 8½ to 9c per pound; white, 8¾ to 8½c. There is but a light export movement in butter, but values are steady at last week's figures. Receipts of eggs are light and prices a little higher, at 11 to 11½c. per doz. for strictly fresh stock.

DRUGS AND CHEMICALS.—Just a slow summer movement can be noted in these lines. Manufacturers' prices for morphia and codeina are easier, but opium being firmer, these lines are likely to advance. Borax continues low in price, with little prospect of immediate change. Camphor shows a tendency to weakness; ergot very flat and weak. In essential oils bergamot and lemon are very low, and some inferior quality of latter is offered at nominal figures; eucalyptus also easier. Canary and hemp seed are advancing, and Tonquin beans held at higher prices. We quote:—Sal soda, 85 to 90c.; bicarb soda, $2.40 to 2.60; soda ash, per 100 lbs., $2; bichromate of potash, per 100 lbs., $11.00 to 13.00; borax, refined, 7 to 9c.; cream tartar crystals, 18 to 19c.; do. ground, 20 to 22c.; tartaric acid, crystal, 30 to 33c.; do. powder, 32 to 35c.; citric acid, 45 to 50c.; caustic soda, white, $2 50 to 2 75; sugar of lead, 10 to 11c.; bleaching powder, $2.75 to 3 25; alum, $1 70 to 1 90; copperas, per 100 lbs., 90c. to $1.00; flowers sulphur, per 100 lbs., $1.60 to 1.90; roll sulphur, $1.60 to 1.90; sulphate of copper, $4.25 to 4.75; epsom salts, $1.40 to 1.60; saltpetre, $7.50 to 8.00; American quinine, 35 to 38c.; German quinine, 35 to 38c.; Howard's quinine, 40 to 42c.; opium, $4.40 to 4.90; morphia, $1.90 to 2.00; gum arabic, sorts, 18 to 30c.; white, 40 to 60c.; carbolic acid crystals, 35 to 45c. per lb.; crude, 90c. to $1.00 per gallon; iodide potassium, $3.90 to 4.25 per lb.; iodine, resublimed, $4.75 to 5.00; commercial do., $4.25 to 4.75. Prices for essential oils are:—Oil lemon, $1.75 to 2.00; oil bergamot, $3.50 to 3.75; orange, $2.50 to 2.75; oil peppermint, $3.75 to 5.00; glycerine, 18 to 20c.; senna, 12 to 25c. for ordinary. English camphor, 55 to 60c.; American do., 55 to 58c.; insect powder, 25 to 35c.

DRY GOODS.—A fair number of moderate sized orders are reported by some houses, but business on the whole is behind what it generally is at the season, and country dealers are evidently buying cautiously. City retailers had a fair month in June, but are now comparatively quiet. Cable advice has been received from the Bradford district of an advance of a penny a pound in yarn, due to the advance in Merino wool at the London sales now on. In other lines of textiles there are no changes.

GROCERIES.—A little improvement in the demand is noted in some quarters, but trade is far from being active, and orders are largely of a sorting character. All the new Japan teas by first steamer are now forward, and those by second steamer are close at hand, but the bulk of the supply of medium and low grades will only come by sailing vessel, and will not be here for a month or six weeks yet. There seems to be a very indifferent demand for new teas, and not many have been yet sold. The market in Japan would appear to be rather firmer, with not a great deal of stock available. We hear of nothing new in blacks. Sugars are moving out in fair quantity at unchanged figures. Barbadoes molasses is held at 27½c. per gallon in round lots, 29c. in car lots, and 30c. per gallon for the single puncheon. A party from New Orleans has been in the city trying to drum up business in molasses, but without any great measure of success, it is understood. Stocks of Valencia raisins are absolutely cleaned. We are told that a party tried seven different houses without being able to fill his wants in this line. A cargo of some 4,000 tons of rice has come to hand for the milling company, and will be the only shipment this season.

HIDES AND TALLOW.—Trade in hides is quiet, tanners not being liberal buyers, but the price of No. 1 inspected is fairly steady at 4c. per lb., dealers buying at 3½c. For heavy hides they are paying 4½c., with sales of cured to tanners at 5 to 5½c.; calfskins are dull and easy at 5c.; lambskins 25 to 30c. each. Rendered tallow is easy at 5⅛ to 5⅜c. per pound.

LEATHER.—As yet there is no increased demand for leather, indeed some dealers report trade even quieter than it was in June. Tanners,

however, seem "going slow" in the way of production of black leather, and there is no notable accumulation of such stock, while of sole there is a pretty steady outgo to Britain. The market there for splits is not altogether satisfactory. A letter from England, just received, says that heavy American shipments of these goods, and pressure to sell, have virtually demoralized the market for the last few months. There are now indications of some improved demand, but not sufficient to make values firmer. We quote: Spanish sole B. A. No. 1, 18 to 20c.; do. No. 2 to B. A., 16 to 17c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 15½ to 16½c.; No. 1 slaughter, 18 to 20c.; No. 2 do., 17 to 18c.; American oak sole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do., heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 15c.; do., small, 10 to 12½c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 25c.; buffed cow, 9 to 11c.; extra heavy buff, 12½c.; pebbled cow, 8 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 11c.; rough, 16 to 18c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—The same dead condition of affairs continues in these lines here, and there seems to be little improvement in the situation abroad. Some slight stiffening is reported in the Glasgow iron market, owing to the coal strike, warrants being cabled at 42s. 2d., and makers' prices are from sixpence to two shillings firmer, but there is no more business doing. Canada plates and block sheets are also reported a little firmer in Britain, but cheaper freights will fully offset this. Coke tins very easy on spot, and probably $2.75 would not be refused for a round lot. We quote:—Coltness pig iron, none here; Calder, No. 1, $19; Calder, No. 3, $18; Summerlee, $18.75 to 19.00; Eglinton, $18; Gartsherrie, none here; Langloan, none here; Carnbroe, $18; Shotts, none here; Middlesboro, No. 3, $17; Siemens, pig, No. 1, $16.50; Ferrona, No. 1, $16.50; machinery scrap, $14.50 to 15.00; common do., $10.00 to 12.00; bar iron, Canadian, $1.70 to 1.75; British, $2.25; best refined, $2.40; Low Moor, $5.25; Canada plates—Blaina, or Garth, $2.15 to 2.20; all polished Canadas, $3.00; Terne roofing plate, 20 x 28, $7.00 to 7.25. Black sheet iron, No. 28, $2.40; No. 26, $2.25; No. 24, $2.25; tin plates—Bradley charcoal, $5.25 to 5.50; charcoal I.C., $3.50; P.D. Crown, $4.00; do. I.X., $4.75 to 5.00; Coke I.C., $2.85 to 3.00; coke wasters, $2.75; galvanized sheets, No. 28, ordinary brands, 4¼ to 4½c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5⅜ to 6c.; tinned sheets, coke, No. 24, 6 to 6¼c.; No. 26, 6⅛ to 6⅜c.; the usual extra for large sizes. Hoops and bands, per 100 lbs., $2.30 to 2.85. Steel boiler plate, ¼ inch and upwards, $2.10 to 2.15; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.85; heads, $2.85; Russian sheet iron, 10½ to 11c.; lead, per 100 lbs., pig, $2.60 2.75; sheet, $4 to 4.25; shot, $6.00 to 6.50; best cast steel, 10½ to 12c.; spring, $2.50; tire, $2.50 to 2.75; sleigh shoe, $2.40; round machinery steel, $3; ingot tin, 17 to 18c.; bar tin, 25c.; ingot copper, 9½ to 10c.; sheet zinc, $.00 to 5.25; spelter, $4.50 to 4.75; American do., $4.50 to 4.75. Antimony, 10½ to 12c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs.; annealed do., $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3½c. Coil chain, ¼ inch, 5c.; ⅜ in., 4½c.; 7-16 in., 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., ½c.; ¾ in., 3¼c.; ⅞ in., and upwards.

OILS, PAINTS, AND GLASS.—Business in these lines is of a very limited character indeed, and we cannot learn of a single variation in values from previous prices. We quote:—Turpentine, 46c. per gallon for single barrels; two to four barrels, 45c. Linseed oil, raw, 54c. per gallon; boiled, 57c.; 5 barrel-lots 1c. less; olive oil, machinery, 90c.; castor, in cases, 6½ to 7c.; tins, 7½c.; Nfld. cod, 38 to 40c. per gallon; Gaspe oil, 38c. per gallon; steam refined seal, 42½ to 43c. in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00; No. 1, $4.50; No. 2, $4.25; No. 3, $4.00; dry white lead, 5c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.: London washed whiting, 45 to 50c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50. Window glass, $1.20 to 1.25 per 50 feet for first break; $1.30 to 1.35 for second break; third break, $2.90.

WOOL.—The London sales have opened, and cable advices report a 5 per cent. advance in merinos. Cape wool firm at last closing prices. A late cable from the Cape anticipated that the turning point had been reached, and local holders do not seem anxious to push sales of the little stock on spot. A cargo of about 1,200 bales is just about leaving the Cape for this market. In domestic wools there is nothing new to report.

TORONTO MARKETS.

TORONTO, July 12th, 1894.

DRUGS.—The position still remains quiet, and the movement to retail houses is not satisfactory in amount. Values for the most part are not subject to any considerable fluctuations. Opium is lower at $4.25 to 4.50. Carbolic acid continues easy. At the sales of cinchona bark in London on Wednesday prices were unchanged. The spot price of Canada balsam fir in New York is $2.25, but forward deliveries are offering as low as $2.10. The New York *Bulletin and Journal of Commerce* of July 11th says: Opium without important change. Oxalic acid is firmer. Canary seed shows a further considerable advance. Cardamon seed is easier.

DRY GOODS.—Wholesale houses report the demand for present requirements as keeping up fairly well, while orders for fall goods are in many instances in excess of expectations. However, it must be said that expectations had reached a very low ebb. The coming season will bring with it fewer novelties than usual, and many of the old lines will remain with us for another year. The trimming business is improving, and jet and spangled goods promise well. The general feeling is for narrow trimmings. No new features as to values have come into prominence since our last report.

GRAIN.—The local market has remained quiet since our last report. For wheat there is a good local demand from millers, but beyond this nothing is doing. Quotations on the whole remain unaltered, with the exception of oats, which at 38 to 39c. are easier. This decline is due partially to the receipt of some 20,000 bushels of Manitoba oats, which broke the strength of the market. They were sold, we believe, at 37½c. Peas are firm and in good export demand, but no round lots are obtainable. Barley, rye, corn and buckwheat find but little movement. Interest now centres in the growing crops, and the principal event of the week was the issuing of the United States Government crop report. It was distinctly bullish, but the trade did not appear to consider it an important factor, as after a spirt of about 1c. the market sold off sharply to a point below the previous day's quotations. The report shows the condition of spring wheat to be 68.4, as against 88 last month. The condition of winter wheat shows a fractional improvement. The statistical bureau now estimate the total spring and winter wheat crop at 380,000,000 bush., as against 396,000,000 bush. last year. The Cincinnati *Price Current* estimates it at 475,000,000 bush., as against 450,000,000 bush. last year. Shipments of wheat from all exporting countries continue to fall below requirements.

The stocks of grain in store at Port Arthur on June 29th were 1,269,030 bushels. During the week there were received 81,269 bushels, and shipped 52,612 bushels, leaving in store on July 7th, 1,297,687.

GROCERIES.—The volume of movement is probably not so large as that of last week, yet a quiet season's trade is doing. Dried fruits find fairly good demand, holders of Valencia raisins being firm. Sugars have not met with as good request from retailers as a week ago, and jobbers are inclined to shade prices, although quotations have not changed. The movement in teas is fairly good. Toronto merchants have received invoices of new season's Northern China (Moning) Congou teas, while the arrival of this year's growth of Southern China Pocklin teas is expected within a week or ten days' time. Some interest centres in this year's pack of strawberries now completed; both bulls and bears are in the market, the majority of those interested probably holding that the pack is under the usual amount. Tomatoes, corn and peas are firm at quotations.

GREEN FRUIT.—Although during a part of the week the weather was not most favorable for trade, a fairly large quantity of fruit has been sold. The stock of oranges is small, the movement light, and prices sustained. The demand for lemons has been a shade weaker, while the failure to obtain shipping facilities in the west has caused an accumulation of stocks in New York. Lemon quotations in Toronto stand at from $3.50 to $4 a box. Bananas at present are in rather scarce supply, but merchants expect free deliveries shortly. Raspberries, cherries, gooseberries and currants are now selling freely, with quotations varying from day to day. The strike in the Western States has prevented receipts of California fruits, and this has naturally strengthened the demand for fruits on the market.

HARDWARE.—The actual trade movement is in very small compass. Retail merchants are carrying small stocks, and are ordering goods only to meet present requirements. In this course their action is not unlike that of wholesale merchants who are not looking for any immediate advance in values. The demand for fencing wires has fallen off, and will remain slack until the harvests are over. Enquiries for shelf goods are not for large amounts, although some particular lines show activity. Sales of harvest tools are now only made to complete stocks, and this trade is almost finished for the season. Window glass continues to remain at a very low basis of values. In many lines manufacturers feel keenly American competition, for many firms in the United States are running at a loss rather than close their factories. For some time the competition in screws has been very keen, and this week Canadian makers made a reduction of 2½ per cent. The discounts off list now stand as follows: flat head, bright, 80c.; round head, bright, 75c.; flat head, brass, 77½c.; round head, brass, 72½ per cent. Since May manufacturers have made three advances in the prices of sisal and manilla ropes; manilla now stands at 9½c. and sisal 7c. But in general market quotations remain unchanged, although transactions in many instances are made at very low figures.

HARDWOOD LUMBER.—Dulness pervades the market. Quotations nominally remain unchanged, although more transactions are made under than at these figures. Ash is in fair demand, 2½ and 4 inch cuts being considered best property. Basswood in 1 in. size is in good demand, and it may be perhaps said that basswood is as firm, if not firmer, than any other wood in the market. For butternut and chestnut there is no demand. Cherry is out of the market, and transactions are only made at exceedingly low figures, one holder offering at $35 a thousand. Soft and rock elm are quiet, with but little doing. Maple finds fair request, and we have some stock passing hands at $15 to 16.00; 1½ in. cut is in good demand. Oak is slow of sale. Walnut is quiet. Trade in whitewood is not active. For red birch there is the usual good demand. The progress made with the United States tariff has had little or no effect upon the market, nor can any improvement in the export trade be expected until a definite settlement is made.

HIDES AND SKINS.—Little that is new and interesting can be said of the local market Green hides continue quoted at 3c., and car lots of cured are selling at 3½c. Offerings of hides are not large, but yet are sufficient to supply the demand. The packer hide market, or, in fact, all stockyard operations, have come to a standstill on account of the strike. Lambskins and shearlings are in usual supply on the local market; quotations remain unaltered at 20c. for the former, and 15c. for the latter. Calfskins are quiet. Tallow shows no accumulation, but the movement is confined within narrow limits.

PROVISIONS.—As is usual at this season of the year, trade displays no special activity. The receipts of butter in this market have been fairly large, but local quotations are firmer. Prices stand as follows:—Creamery rolls, 22c.; creamery tubs, 20c.; select dairy, 16 to 17c.; low grades, 13c. per lb. For butter there is little or no export enquiry. Cheese is jobbing at unchanged prices and the movement is quiet. No change in hog products is to be reported, and no large lots are moving. Eggs are quoted at 10½ to 10¾c., some of the receipts running very poor in quality.

WOOL.—Offerings are very free, and the quantity of wool delivered is in excess of that marketed here a year ago. Growers appear anxious to sell. This is probably due more to a desire to realize money than to any lack of faith in the future of the market. A large quantity of wool is being offered in the North-West, and the Toronto Hide Co. report having purchased the clip of the Canadian Agricultural Co., which amounts to about 70,000 lbs. The same company have also bought 30,000 lbs. of territorial ranch wool, at Medicine Hat, at a price which will net growers 9 to 9½c. Quotations on the Toronto market are unchanged, combing selling at 16 to 17c., and clothing, 18c. per lb. The July series of the colonial wool sales opened in London on the 3rd, and show an average advance of 5 per cent. over the last sales.

London Mutual Fire Insurance Company
ESTABLISHED 1859.
LONDON, ... Ontario.

The only "Fire Mutual" Licensed by the Dominion Government.
Buildings and their Contents Insured at the lowest rates consistent with security.

T. S. MINTON, AGENT, 26 Wellington St. E., Toronto.
D. C. MACDONALD, Sec. & Man. LONDON, ONT.

THE GREAT-WEST LIFE ASSURANCE CO'Y.
Head Office, Winnipeg.

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

Agents wanted in unrepresented districts. Application may be made to the Head Office, Winnipeg, or to

ALEXANDER CROMAR, Manager for Ontario.
12 King street East, Toronto.

Excelsior Life Insurance Co.
INCORPORATED 1889.
Head Office—Cor. Adelaide & Victoria Sts., Toronto, Can.

STOCK EXCHANGE PHRASES.

People are always willing to read about stock exchange operations or celebrities. But they do not always understand what they read, because the terms used are unintelligible. *Harper's Weekly* has devoted the following article to explaining them :—

Many of the phrases used in Wall street, as well as the methods of business on the Stock Exchange, are enigmas to outsiders. What are known as "privileges" are not officially recognized by the exchange. Yet these "privileges" form an important part in the daily life of some of the members of the exchange. These "privileges" are knows as "puts," "calls," "straddles," and "spreads." All are purchased by speculators as an insurance against losses in their operations in the market.

A "put" is a contract given to receive and pay for stock at a price below the current market price for a cash consideration, usually 1 per cent.

A "call" is a contract to deliver stock at a price above the current quotation for a similar consideration.

A "straddle" is a dual privilege to receive or deliver stock at a price usually from 2 to 3 per cent. above or below the market figure, the consideration being about 1 per cent.

A "spread" is a privilege in two separate contracts, one a "put," the other a "call," the consideration for which is usually larger than in the other options, say 1½ per cent. There are many other terms used on the Stock Exchange which may be briefly stated and explained.

A "break" in the market is a serious decline caused by a stringency in the money market or any other similarly potent factor in stock speculations. The bear clique attacks the market, and holders unable to carry the load of stocks sell out. A marked decline in values follows; the market thereupon breaks down.

"Ballooning" is to work up a stock far beyond its intrinsic worth by favorable stories, fictitious sale, or other cognate means. "Block," a number of shares, say five thousand or ten thousand, massed together and sold or bought in a lump.

To "buy in" is the act of purchasing stock in order to meet a "short" contract, or to enable one to return stock which has been borrowed.

"Carrying" stock is to hold stock with the expectation of selling it at an advance. A "clique" is a combination of operators controlling vast capital in order to expand or break down the market. "Conversions": bonds are frequently issued with a provision whereby they can at any moment be exchanged for equivalent stock; such securities are called convertible, and the act of substitution is styled "conversion."

"Corners": when the market is oversold the "shorts" are compelled to deliver, finding themselves in a "corner."

"Collaterals": any kind of securities given in pawn when money is borrowed.

To "cover": where stock has been sold "short" and the market advances, the seller buys in order to protect himself on the day of delivery; this is "covering" one's "shorts."

"Differences": the price at which a stock is bargained for and the rate on the day of delivery are usually not the same; the variation is known as the "difference," and occasionally brokers pay over his money balance instead of furnishing the stock; but such cases are rare.

A "drop" in a stock is equivalent to a "break," except that it may possibly be due to wholly natural causes.

"Forcing" quotations is where brokers wish to keep up the price of a stock, and this is generally accomplished by transactions among themselves. This is known also as "washing." To be more explicit, "washing" is where one broker arranges with another to buy a certain stock when he offers it for sale. The bargain is fictitious, and the effect, when this fact is not detected, is to keep the stock quoted, and if the plotters buy and sell it to a high figure, to afford a basis for actual transactions.

"Watering a stock" is the artifice employed to double the quantity of a stock without improving its quality.

"Long" in stocks is where an operator is carrying stock for a rise. To "load" up is where operators buy very heavily. To be "short" of the market is where an operator has sold stock which is not yet actually in his possession. "Milking the street": the act of cliques or great operators who hold certain stocks so well in hand that they may cause any fluctuations they please, and by alternately lifting and depressing the price of the shares take all the floating money in the market. This is also known as "shearing the lambs."

A "point" is a theory or a fact regarding stocks on which one bases a speculation. The market is "off" when prices have fallen either in a week, a day, or even an afternoon. A "pool" is the stock and money contributed by a clique to carry through a "corner." To "unload" is to sell out a stock which has been carried for some time. There are other phrases in the Stock Exchange vocabulary, but the foregoing are those most used in the daily routine.

THE FUNCTIONS OF A CHAMBER OF COMMERCE.

At the twelfth annual meeting of the London Chamber of Commerce, the president, Sir Albert K. Rollit, M.P., made an address in which he touched upon the various functions of such a body as he was addressing. It might act, he said, as the intelligence department of the forces of commerce, and, in this respect, the London Chamber had answered 891 inquiries during the past year. They might advise, he said, not upon any particular speculation, but upon the general conditions of success or failure, and thus become the eyes and ears, as it were, of the commercial community. Want of information also facilitated financial fraud. There are always South Sea or other bubbles floating in the commercial atmosphere; always pills to put off the earthquake, and undertakings for objects to be hereafter disclosed. It is difficult to say how far governments and laws could take care of the fools as against the knaves of the world, and it is perhaps therefore best to try to teach the fools to take care of themselves by placing means of knowledge within their reach. For instance, deficient information is one of the chief causes which enabled fraudulent company promoters to be successful, the law securing information before, instead of after the fact, and being punitive instead of preventative, as it might be made by insisting upon prospectuses being more explicit and definite as to existing agreements (the substance of which ought to be accurately stated), as to real, as distinguished from the nominal capital, and as to the real relations of the promoters with the vendor, and by prescribing an efficient audit and securing proper and regular returns. Companies' returns to the Registrar ought to be enforced by the public authority; so should a real audit, and the returns ought to include particulars of debentures and mortgages, the issue of which is now often a source of fraud and peculation as distinguished from legitimate speculation.

The need of advanced commercial education enforces itself with the increase of international trade, and yearly the necessity grows of less insularity, more knowledge of language, moneys, and measures, so as to converse, correspond, quote and invoice to other peoples in their own tongues and systems, and so as to gain for ourselves an accurate knowledge of their trade, wants and requirements. The same remarks hold with regard to science, and especially applied science, for, while we have improved much, there is still a great want of skilled heads of departments, and of that knowledge of design and construction which led to the importation of so many special machines from America and Germany, and of works of art and taste from France, which itself felt the necessity of advancement by sending its pottery from Limoges to be decorated in the East. . . .

As to our comparative trade, there is much doubt, and some—I think too much—despondency. The depression has been world-wide, and it must both end and mend, though there are undoubtedly, as had been foreseen, greater difficulties of British business than formerly. The Earl of Derby had said so long ago as 1836, in his speech on the Corn Laws: "The Continent will not suffer England to be the workshop of the world." Yet we have been, and more. We have worked and carried for the world, and, in by far the largest proportion, do so still. We had also supplied the world, and hence our accumulated capital and its power, and the earning power of £70,000,000 of our mercantile fleets. And both the facts and figures indicate in a recent parliamentary report that the amount (measured in goods, not in money) of our foreign trade has continually increased, and that it is still true that there is no weakening in the hold of the United Kingdom (in comparison with its chief competitors, Germany, France and the States) upon either the import or export trade of the world. And this position may be improved by looking further afield and by colonial expansion and union. Once we treated our colonies as "plantations" for our own and sole business benefit; next, we counted their cost and cried, "Perish India;" now, we truly regard both as sources of mutual benefit and help, and as most useful and regular markets for our special manufactures. This feeling we must cherish. The less jeers we hear of "Australian finance" and "Botany Bay Budgets" the better. The Congresses of British and Colonial Chambers called by the London Chamber have done much good; the Intercolonial Congress at Ottawa, and the advocacy by Canada and Australia of British cable and other intercommunications, call for every sympathy, and even, if necessary, for some economic sacrifices for great political and commercial ends. The British cable question may become not only theirs, but ours; for if India were ever again in arms, and the overhead line between Bombay and Madras were cut, our only line of communication with Madras and Calcutta would then be by Russia and Eastern Asia, no safe route under such or similar circumstances

BRITISH GROWN TEA.

The termination of another season produces figures which emphasize the steady headway which the teas of India and Ceylon are making in the favor of consumers in all parts of the world. It is not many years ago that China held the premier position as a tea-producing country, and supplied the bulk of the leaf consumed in the United Kingdom, but the energy of our planters in the British dependencies has ousted the Chinaman very effectually from our market, and such is the perseverance of our traders that it seems only a question of years before we are able to command the greater share in the tea trade of the world. Owing to the smaller crop last season in India the total exports were only 112,125,000 lbs., as compared with 118,759,000 lbs. in 1891-2, but during the twelve months just ended 123,712,000 lbs. have been shipped, both Australasia and America taking larger quantities than ever before, as well as the United Kingdom. Our own consumption, however, tells the best tale, for while the imports last year were about 3,000,000 lbs. smaller, the quantity used was only about 1,000,000 lbs. less than in the previous year, while during the past season, in spite of an increase of more than 6,000,000 lbs. in the receipts, the surplus of over 1½ million lbs. extra has been consumed, thus showing that the demand has been greater than the supply. It is with Ceylon tea, however, that the greatest strides have been made, four years ago the consumption in England being only 42,616,000 lbs., or scarcely more than one-half of the quantity of China tea used, whereas during the past 12 months 71,076,000 lbs. of Ceylon has been delivered, against 50,678,000 China, representing now only 13 per cent. of the total quantity used, 86½ per cent. being British grown tea. Ceylon tea is also making rapid progress in the colonies and abroad, Australia and New Zealand taking more than double what they did two years ago, while to other markets 1,937,000 lbs. were shipped direct in comparison with 1,181,000lbs. in the preceding year, and 4,066,000 lbs. were re-exported from here, as compared with 3,447,000 in the previous year and 2,093,000 in 1891. Should the consumption of China tea continue to decline at the same rate that it has been doing for the past four years, it will not take much more than a similar period to altogether extinguish its use in this country.—*Eng. Ex.*

—At the Alton County Court recently, says a Manchester paper, the trustee of the estate of Mr. E. Seward, grocer, sued a laborer named Burch for the sum of 10s. for goods supplied. The defendant, who had become totally unable to work by reason of illness, admitted the debt, but pleaded that he had no means of paying it. A gentleman in court offered to pay half the amount in settlement, but this offer the plaintiff refused. Thereupon the judge gave a verdict for the plaintiff, and ordered the amount to be paid by instalments of one penny per month. As the costs amounted to 3s., it will take over thirteen years to liquidate the whole sum of 13s. 1d.

Head Office—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

Brains and Capital

In every partnership there are two factors of great importance the managing brain and the capital employed, and if death removes either, the business must suffer. It often happens that the brains belong to one man and the capital to another. If the manager dies the capital is worth less than before; if the capitalist dies and his capital is withdrawn, the manager is crippled. It is clear that each has an insurable interest in the life of the other because the profits of each depend in part upon the life of both. The firm should, therefore, take one of the **Unconditional Policies of the Manufacturers Life,** which are free from all restrictions as to travel, residence or occupation, and are **absolutely indisputable on any ground whatever after the FIRST YEAR.** Get the rates and all particulars from any of the Company's Agents or from Head Office.

WHAT IS THE 7% Guaranteed Income Bond
OF THE
North American Life Assurance Company ?

It is a contract that may be secured by the payment of 15 or 20 annual premiums, and should death occur within the period selected, the full face of the Bond becomes payable.

If living at the maturity of the Bond, the guaranteed cash value, as also the surplus, may be withdrawn, or a paid-up Bond (payable at death) taken out for its full face, and in addition a 7% Guaranteed Life Annuity secured; in which case the surplus is also payable.

Pamphlets explanatory of this admirable plan will be given on application to any of the company's agents, or to

DECISIONS IN COMMERCIAL LAW.

UNION STEAMSHIP CO. v. CLARIDGE.—Where a shipping company employ a contractor to unload their ship, but appoint certain of the crew to assist in the unloading, it is a question of fact, according to the Privy Council, whether such members of the crew were under the orders and control of the contractor's foreman or not, and whether, therefore, the company are liable to one of the contractor's workmen who receives injuries through the negligence of such members of the crew.

NIXON v. QUEEN INSURANCE CO.—A policy of insurance against fire required that in case of loss the insured should, within fourteen days, furnish as particular an account of the property destroyed, &c., as the nature and circumstances of the case would admit of. The property of insured by this policy was destroyed by fire, and in lieu of the required account he delivered to the agent of the insurers an affidavit in which, after stating the general character of the property insured, he swore that his invoice book had been burned and he had no adequate means of finding the exact amount of his loss, but he had made as careful an estimate as the nature and circumstances of the case would admit of, and found the loss to be between $3,000 and $4,000. An action on the policy was defended on the ground of non-compliance with this condition. On the trial the jury answered all the questions submitted to them, except two, in favor of N. These two questions, whether or not N. could have made a tolerably complete list of the contents of his store immediately before the fire, and whether or not he delivered as particular an account, etc. (as in the condition), were not answered. The trial Judge gave judgment in favor of N., which the court of Nova Scotia *en banc* reversed and ordered judgment to be entered for the company. Held by the Supreme Court of Canada, that, as the evidence conclusively showed that N., with the assistance of his clerk, could have made a tolerably correct list of the goods lost, the condition was not complied with; and further, that, as under the evidence, the jury could not have answered the questions they refused to answer in favor of N., a new trial was unnecessary, and judgment was properly entered for the company.

SALTERIO v. CITY OF LONDON FIRE INSURANCE CO.—A condition in a policy of insurance against fire provided that if the policy or any interest therein should be assigned, parted with or in any way encumbered, the insurance should be absolutely void, unless the consent of the company thereto was obtained and endorsed on the policy. S., the insured under the policy assigned, by way of chattel mortgage, assigned all the property insured, and all policies of insurance thereon and all renewals thereof, to a creditor. At the time of such assignment S. had other insurance on the property, the policies of which did not prohibit their assignment. The consent of the company to the transfer was not obtained and endorsed on the policy. Held by the Supreme Court of Canada, affirming the decision of the Supreme Court of Nova Scotia, that the mortgage of the policy by S. without such consent made it void, and he could not recover the amount insured in case of loss.

HURDMAN v. CANADA ATLANTIC R. R. CO.—In an action under Lord Campbell's Act for damages arising from the death of a servant of a lumber company, who was engaged in counting lumber in a car of the defendants in the lumber company's yard, caused by his being squeezed between two piles of lumber, owing, as the jury found, to the negligence of the defendants' servants in charge of an engine in giving the cars too strong a push, the Court of Queen's Bench held that, assuming knowledge on the part of the crew of the engine of the position of the deceased in the car, it would be a negligent act to propel the car so rapidly against another as to be likely to injure him, and, there being a conflict of evidence as to the rate of speed, the case could not have been withdrawn from the jury. The knowledge of the crew of the engine that the deceased was in the car and of the probable consequences to him of the work in which they were engaged, if done without due care, imposed upon them a duty, whether he was there as a mere licensee or otherwise, to use the care necessary to avoid causing that injury. The finding of the jury that the deceased voluntarily accepted the risks of shunting did not entitle the defendants to judgment; he voluntarily accepted the risks of shunting, but did not give the defendants leave to run the risk of killing him by doing their shunting negligently.

FROM CREDIT TO CASH.

This is a difficult move and yet one frequently made. One of the first requisites of success is candor in making a statement to patrons whose credit is to be stopped. A subscriber in Salisbury, N.Y., makes the following announcement:—

AN IMPORTANT CHANGE IN YOUR INTEREST.
SALISBURY, March 15, '94.

To My Friends and Customers:

Having thoroughly tried the credit system of doing business for the past ten years, I fully realize that the perplexities of the same are only known to those who have tried it. The extra expense of keeping books, collecting accounts, and the loss of many accounts, all add to the detriment of the system.

I most respectfully wish to inform every one within the circle of my customers and trade that I propose to change from the present system to one that is being quite generally adopted by thorough business men, THE CASH SYSTEM. This system has more merit than the other. If every person would confine himself to this way of doing business, the failures throughout the country would be a thing of the past.

I propose to *reduce the price on all of my goods* and challenge competition as to price and quality.

I am thankful to all my friends and customers for the many favors and patronage of the past, and hope for a continuation of the same. On April 2, I intend to inaugurate the cash system, and prove to all that the place to buy goods is at the old stand at Salisbury Corners. Most respectfully yours, JOHN L. STAHL.

It is beyond dispute that an ironclad cash business is free from many of the annoyances, friction and losses of one conducted on credit.

As a rule, however, the unprofitable conduct of a credit business is because of carelessness in granting credits and supervising accounts. The dealer doing a large and profitable business with thousands of customers upon the credit plan, will not admit that his system has any more disadvantages than a cash business. He will claim that it enables him to sell a much larger quantity of goods, and that the larger his sales the smaller is the ratio of expense to their volume. The credit is an accommodation, and therefore prized by consumers who become wedded to one store and are not given to shopping, as are cash buyers. His credit being good, and being a large buyer, he makes purchases at bottom figures, and then sees to it that prices to consumers are as low as those made by the cash store.

On Sixth avenue, this city, there are cash and credit stores doing business side by side. Both systems are very successfully carried on. These stores, however, have trade that is distinct both as regards the standing and class of customers served, as well as differences in the style and character of the stock and service.

The moral is that the success of any system is in the man and not in the method. If he cannot succeed on a credit basis, he does well to change to a cash system. We regret, however, that there are more changes from cash to credit, and many of these are disastrous.—*American Grocer.*

Mercantile Summary.

THE city of Winnipeg asks tenders for debentures to the extent, in all, of $98,500. Of these $18,000 worth bear 6 per cent. interest, the remainder 5, and they mature at various dates from 1899 to 1910.

THE *Guardian*, of Charlottetown, says that several fishing schooners have arrived at Rustico. Codfishing is poor at Anticosti, and bait very scarce. The lobster factories around Rustico have closed for the season.

THE directors of the International Steamship Company have resolved to build a new steamer in September, to be ready for service in 1895. The new boat will be fast, and will have a much greater capacity than any boat now on the line.

THE Fredericton *Record* understands that Mr. Loring Bailey, of the Bank of British North America in that city, has been granted three months leave of absence on account of failing health, and will presently leave for American coast cities.

THE British yacht "Britannia" beat the American yacht "Vigilant" for the seventh time in succession on Monday last, and on the same day Oxford's athletes took all the prizes away from the Yale representatives on the amateur athletic field. Add these trials to their home troubles, and there is no wonder the average American is not cheerful.

Mercantile Summary.

THE saw-mill of Mr. McLaren, at Cobden, near Pembroke, is to be run by electricity, generated over a mile distant at a water-power made by damming up a small stream so as to give a good head of water. The dam is made of solid masonry, twenty-five feet high.

THE New York *Shipping and Commercial List* has long been a welcome visitor to this office. It is the oldest trade paper in America, having been established almost a century ago. The editorials of this journal are generally short and always interesting. The paper appears in a new and improved make-up, which, as the publishers put it, is "but the first step in the progressive plan mapped out for the future of the paper."

THE Summerside, P. E. Island, *Journal*, in its list of personals tells of a dozen or two of people from all over who are holidaying at that attractive place on the island, Boston people, Montreal people, Halifax people, bankers, merchants, commercial travellers. And it tells of one of these, a Massachusetts man from Brookline, thus: "Mr. Lombard says it is a great pleasure to come here, where one gets away from the ceaseless cry of 'hard times' that is heard in all parts of the United States, and away from a country where everybody is feeling 'blue.'"

We have made large clearing purchases from the Magog Mills, which we offer below manufacturers' prices.
Sole Agents for Canada for PRIESTLEY'S well-known DRESS FABRICS and CRAVENETTES.

Mercantile Summary.

THE city of Vancouver, B.C., failing to establish in the Supreme Court its rights to open certain streets across the Canadian Pacific railway's track, applied to the Privy Council for leave to appeal its suit against the company. This has been refused on the ground that the company had a prior grant from the Crown of the foreshore.

OUR trade with Great Britain continues to grow. The importations of the Mother Country from Canada during the six months ended with June were £694,655 greater than in the first half year of 1893, which is an increase of almost forty per cent. The principal articles which conduced to this increase were: bacon, £51,000; sheep, £18,000; cheese, £18,000; ham, £5,000; eggs, £1,500; fish, £273,000; wood, £260,000. On the other hand, the exports from Great Britain to Canada during the half year were smaller by 28 per cent. than during the corresponding period of 1893.

THERE is a lively war among the steamship lines sailing from New York, and steerage rates are low. At the present time, says the New York *Times*, the White Star Line makes a rate of $10 to English ports, and $15 from them. The American Line makes a ten-dollar rate to English ports and $8.64 from England to the United States. It is thought that the White Star people will meet this rate. The Cunard line rate is now $10 steerage. None of the other lines have taken part in the cutting up to the present time, although it is not improbable that all the pool lines will take a hand in the fight.

Toronto

THE Province of New Brunswick furnishes two small failures, namely, J. E. & R. S. Lanson, saw and grist millers, at Stanley, and S. A. Steeves, a trader at Salisbury.

AFTER being fourteen years a resident of Wellington, B.C., John A. Thompson, hardware dealer, etc., has got into difficulty and assigned. As yet we have not been able to learn anything definite about his affairs.

THE Quebec shoe jobber whose failure we noted last week, J. Simard, is offering 50c. on the dollar, secured. Liabilities are put at $20,581; assets, $17,807, not including bad and doubtful debts.——F. Juneau, also of Quebec, and in the same line of business, is offering 40c. on liabilities of about $4,000.

A DEMAND of assignment has been made upon T. W. Ness & Co., Montreal, manufacturers and dealers in electrical apparatus. No figures are yet available. The business has been extended beyond the limits the capital invested would warrant, and negotiations have been pending with the view of putting the concern into joint stock shape.

THE sheriff is in possession of the premises of W. Allan, pork packer in Winnipeg, under a judgment in favor of the Merchants' Bank for $1,300. He has been many years in business, and was for a time fairly successful.——A number of judgments have been obtained against the Shaeffer Piano Co. in the same city, and the sheriff has advertised the assets for sale.

THE liquor stock of Thomas Empy, Napanee, is advertised to be sold in a week from today. Also, on Wednesday next, the dry goods stock of W. H. Smillie & Co., Niagara Falls. On the 26th the general stock of Jacob Schaffer, of Paris, will be sold, and on the same day the clothing stock of Smith Bros., Sarnia and Dresden, will be sold at London.

AT Falmouth, N.S., a victualler named T. M. Martin has made assignment of his estate, and creditors are likely to fare poorly. He built a house in 1892, which helped to embarrass him.——Mrs. J. N. McLellan, in general trade in a small way at Strathlorne, in the same province, has also failed. She continued the business of her first husband, J. J. Campbell, for a time, marrying her present husband two years ago.

THE increase of our cheese trade goes merrily on. We learn from our Montreal correspondent that the quantity shipped to Britain from that port last week reached 107,468 boxes, which compares well with the 35,113 boxes of the corresponding week last year. Nor is this an isolated week, for the total exports of cheese from Montreal up to 7th July, this year, were 457,000 boxes, which exceeds those of last year to same date by 150,000 boxes.

AN old-time baker of St. John, N.B., J. O. Miller, who has never made much progress or gathered much gear, has made assignment of his estate. Liabilities are local.——Kinnie & Co., saw and gristmill, at Hopewell Hill, in the same province, are reported insolvent. They have been in weak, slow shape for some time past.

"IN the High Court of Justice, Chancery Division, between Russel A. Alger, petitioner, and the Sarnia Oil Co., respondents." Such is the dignified heading of a document emanating from Sarnia the other day. It is a dividend sheet of the oil company in question, the claims against which were something like $130,000 (General Alger's being $87,754), and the dividend declared comes to 7 cents and a fraction in the dollar. The concern had between thirty and forty creditors.

IN Quebec Province, we note the following failures:—Miss V. Brodeur, milliner, Sherbrooke, is reported in trouble, owing about $1,500, and desiring to make a settlement.——D. Longtin, general store dealer at St. Phillippe, has made abandonment of his estate, and owes about $2,300. He was originally a farmer, and has not shown much business aptitude.——C. Tapp, of St. Thomas de Montmagny, is offering a compromise of 15 cents on the dollar. As might be supposed, the assets are very small. ——Joseph Asselin, general dealer at Beauce Junction, is gazetted insolvent.—— Damien Bouchard, in the grocery line, at St. Hyacinthe, has failed; liabilities, $2,565.

IN Montreal, the furniture firm of W. R. Fee & Co. have assigned on demand. The firm is of only recent formation, succeeding Fee & Martin, who failed last year. Complications with the lately failed firm of Silk & Co., carpets, have had something to do with their present troubles. They owe $12,395.——Moses Tesser & Son, haberdashers, in business since 1892, have been under seizure for rent, and creditors have been called together. —— P. Rivara & Co., hotel men, are unable to meet liabilities, and have assigned.——A small tailoring concern, Ray & Fils, by name, have failed, owing $983.——The creditors of E. H. Lesage, dry goods, reported suspended last week, ask him to assign.——M. Greenberg, clothier, has now assigned.

MR. DAVID GOLDIE, of Ayr, sends us a circular dated 6th inst., announcing that the business heretofore carried on in his name will be continued under the firm name of "The Goldie Milling Company," (Limited). "The directors of the company who join me in the management of the business under the new name, are John Goldie, George E. Goldie and Robert Neilson, all of whom have been connected with the business for several years." Mr. David Goldie is president, and Mr. Neilson, secretary. The Greenfield mill at Ayr, and the Cumberland mill at Highgate, are the mills of the company

D. E. KSNZIE has been a general dealer at Mooretown for about two years, and having but little of any capital to begin upon, it will be no surprise to hear of his assignment.——A few months ago W. H. Smellie, from Stirling opened a store in Niagara Falls. He has principally been in the hands of one house, to whom he has assigned, with about $15,000 liabilities. His nominal assets are $1,000 more. He offers sixty cents in the dollar. —— In October, 1893, Philips & Wilson bought the bankrupt stock of S. R. Glassford at Cannington. The former retired in February last. Wilson then took his brother into partnership and they removed the stock to Barrie the other day. The venture there has not been satisfactory, and they have assigned to their principal creditor. It is evident that the money their kind mother willed them a few years ago has disappeared.——Galbraith & Co., in the knitting business at Guelph, had in 1892 about $6,000 assets in cash and machinery, and did not owe anything. Of late they have been losing and now settle with creditors at 50 per cent., except their banker, who holds a chattel mortgage.——A compromise of 50 per cent. is offered by H. F. Buck, furniture dealer at Lisle towel.

A DOZEN years ago or more Wm. Winder did a large and apparently prosperous shoe trade in Toronto. Outside of his stock all his surplus was invested in real estate in the "boom" times. But at a later stage this was all turned over to the mortgagees in consideration of a release from their covenants. He also gave the creditors back their stock and got his release. Five or six years ago he started again in a small way, but not being able to succeed, an assignment has now been made. He owes about $1,000 with nominal assets of $300. ——Another boot and shoe dealer here is Thos. Hoskins, whose creditors held a meeting on Monday last, and arranged a compromise at 30

per cent.——The bailiff is in possession of the premises of George Henry, tobacconist, Toronto.——An assignment has been made by Chas. Swift, boot and shoe dealer on Church street, to W. A. Campbell.——In Nov., 1891, C. J. Thomas, grocer, failed and assigned. His stock was then sold by auction to his wife at 57 per cent., and she has since continued the store. Heavy expenses and too much credit have brought about her assignment.——S. Hughes, dealer in paints, etc., has got into trouble and eventually assigned.

In 1892, E. B. Deming succeeded S. Deming & Co. in the tailoring trade at Sarnia. He is a resident of Chicago, where he occupies a good position. Since then the business here has been badly managed by his brother; an assignment has resulted.——The Pennington-Baker Seating Co., of Dundas, was incorporated in December, 1892, with a nominal capital of $50,000. About half of this sum was paid. Shortly after incorporation they renewed a $5,000 chattel mortgage, and they have seemingly not improved their position, for they have now assigned, and among their liabilities is $25,000 due their banker. In addition to this they owe $3,000 or $4,000 to outside creditors. A nominal surplus of $30,000 is claimed. In the winding up process this will probably disappear.

HO! FOR HALIFAX.

Halifax harbor will witness an imitation sea fight on Friday of next week, and the Intercolonial Railway has a cheap excursion to Halifax and return, which will take it in. Any one wishing to visit that city may be transported from Toronto, on the 23rd and 24th, by either Grand Trunk or Canadian Pacific railway to Quebec, and then per Intercolonial to the Nova Scotia capital for $16.70, return fare. Montreal people get down and back for $10. If this is not a temptation to a seaside trip, we do not know of one. Bankers are especially interested in this because of the annual meeting of the Canadian Bankers' Association in Halifax next week. We are advised that the Halifax bankers are laying out most attractive plans for their western brethren, and it will say little for the Ontario and Quebec associates if they do not respond in dozens or in scores to the invitation of their salt water friends.

—For Correspondence &c., see pages 85 and 7 of to-days issue.

STOCKS IN MONTREAL.

Writing on Wednesday night our correspondent says :—" The Montreal market for stocks has been a quiet one during the past week. There have been only morning sessions of the board, and no considerable transactions are to be noted. Values may be called steady, and any slight depreciation in certain lines, due to the death of the late president of the board, has been fully retrieved. Money is plentiful and easy at the banks. The general rate for call loans is 4½ per cent., but large borrowers are said to have got some concessions even below this rate; securities, however, are closely scanned. The discount rate is 6 to 7 per cent. Sterling exchange is dull; for 60-days bills between banks the rate is 9⅜ to 9 7-16, over the counter 9⅝ to 9¾; demand bills between banks, 9⅞ to 9 11-16; counter, 9⅞.

THE SITUATION.

One possible objection to the Government Bill, to authorize an increase of Dominion notes from $20,000,000 to $25,000,000, is obviated by the provision which requires an amount of gold to be held against the notes equal to the new issue. The banks, it is explained, have asked that this provision should be made, and the case was one in which they had a special right to be heard. The Government will not, under the circumstances, be able to make the issue a means of obtaining a loan for outside purposes. When gold has been bought to cover the entire issue, the expenditure for that purpose will equal the gain of the note circulation. Debentures, we presume, will have to be sold as a means of obtaining gold. In this way, a new loan is obtained; but when the gold is purchased nothing will be left for any purpose outside of the note transaction. Five millions of additional gold will strengthen the basis of the note issue, and give the banks additional assurance that their demands on the Government for gold will create no serious embarrassment to the Treasury Department.

Sir John Thompson's bill, which provides that, if the Supreme Court Judges retire at 70 years of age, they will do so on full salary, is at best only a partial remedy for an admitted evil. Some men are as good at seventy as they have ever been, and have the advantage of additional experience, but this is not true of the majority. At that age some Judges are unable to keep up sustained attention, and others have been known to go to sleep on the bench. The decay of the powers of nature is not confined to the Supreme Court Judges, though the remedy is. There can be no doubt that Judges have been known to retain their positions after they could no longer do full justice to them, tempted by the consideration that to do so retirement would reduce their emoluments inconveniently. We are almost within sight of a perilous crisis in connection with the judiciary. The Bench of Ontario is no longer quite what it ought to be. The salaries paid to Judges do not tempt the ablest men at the bar to exchange their briefs for the bench, and as professional gains tend to increase with the increase of wealth and the amounts at stake in litigation, the chasm gets wider. The bill does not make retirement by the Supreme Court judges compulsory at 70 years of age, but offers a temptation to resignation instead. This would probably have the desired effect, where a visible decay of powers has set in, and in other cases resignation is not desirable. This measure is constructed on too limited a scale altogether.

Aside from the main dispute over the Sunday car question, it is plain that the city of Toronto cannot permit third parties, who have no special right to do so, to run cars on the tracks on Sundays when they are not occupied by the company which has an exclusive right to use them in this way. Such a usurpation, if acquiesced in by the city, would render the corporation liable to the company for damages. The Sunday car bussmen made a capital mistake in tactics when they attempted to utilize the tracks for their Sunday vehicles. The city was bound to interfere to prevent them, though the police blundered in the execution of their task when they took possession of cars before any attempt was made by the owners to move them. Apart from the attempt at a surreptitious use of the tracks by the buss owners, there are other encroachments of daily occurrence which ought to be subjected to regulation. Ordinary vehicles constantly run upon the tracks as far as they can, and only get off when the gong rings a note of danger. The tracks should not be permitted to be used by ordinary vehicles, except when necessity compels, the side spaces of the streets being occupied, and then they should move off as soon as possible. Unless this rule be laid down and enforced, serious accidents are sure to result from the present practice.

Authority is sought from Parliament to enable the C. P. R. Company to import duty free material for making iron bridges in substitution of certain temporary wooden structures. A doubt arose under the construction of the contract whether the company was entitled to this indulgence, and to remove this doubt the authority of the Legislature is involved. Mr. McCarthy objected to the removal of the doubt in this way, and thought the company should be left to enforce their claim in the courts. Indeed, he regards it as an alteration of the contract, by which, he says, the company will benefit to the amount of $200,000. Sir John Thompson did not agree with this suggestion, and the House of Commons readily gives its sanction to the removal of the doubt.

Towards the end of the session the usual list of grants, of a miscellaneous character, is asked. Many of them are revivals of expired grants not issued. When the grants are not claimed within the year, there is default somewhere, the claimants as a rule not having done their part in time. When this happens, care should be taken to ascertain whether the default is grave or merely nominal. A re-grant cannot under all circumstances be regarded as a matter of course or claimed as a right. These miscellaneous grants are full of anomalies, and therein equitable distribution throughout the provinces by the central authority is nearly impossible. Political influence cannot be silenced in the selection of roads to be aided. Each party will do something to watch the other; but in all cases the advantage remains with the party that holds the purse strings. The grants will be welcomed by a number of struggling companies. The total amount is $3,124,000.

Now that the great railway strike, which had its headquarters at Chicago, is over, the commission of enquiry representing the Washington Government will try to find out the causes of the trouble. About the initial stage there is no doubt. But as the trouble developed into greater proportions, it is not improbable that faults may be found to have

been committed on both sides. A court before which questions connected with the strike came up pointed out that it would probably turn out that there had been conspiracies among the railway managers, as well as among the workmen, to bring traffic to a stand. If this should prove to be the case, the law will be ready to punish conspiracy wherever it be found. Private accounts confirm the suggestion of the court. The more serious breaches of the law lie at the door of the strikers, who dishonored their cause by ruthless violence. But even here, the accounts of what was done in the way of damage were greatly exaggerated. Still, when all possible deductions are made, on this score, there is enough left to the account of violence and outrage to cover the perpetrators with eternal disgrace. Debs and his associates are in jail, and they will be put on trial for conspiracy to prevent the movement of the mails.

After a conference of two weeks, the joint committee of the two Houses of Congress at Washington have been unable to come to any agreement on the tariff bills. The possibility of agreement was never so dubious as at present. For the time being the deadlock is complete. A single Senator is credited with the power which has brought about this state of things. The private interests at stake become extremely formidable when they can bring the wheels of legislation to a stand by using their influence on a single Senator. Some way out of the difficulty may be found, though what it will be it is not easy at the present moment to guess.

MUNICIPAL FIRE INSURANCE.

The citizens of Toronto have been treated by Alderman Lamb to the prospect (in perspective) of a new method of indemnity for loss by fire. Says this worthy gentleman: Do away with these companies, whether English, American or Canadian, which are doing your fire insurance and charging you too much for it. Come to me and I will see that you get cheap insurance under the shield of the corporation of Toronto, which will write all your risks. But what is much more serious, the City Council of Toronto, or rather a majority of its members, for some of the aldermen are sensible people, has approved the saddling of this city with the burden of such a scheme. When British capitalists get to know this fact, and Mayor Kennedy, Alderman Shaw and R. T. Coady, Treasurer, cross the Atlantic to float $1,250,000 of Toronto bonds next month, they will have a bad quarter of an hour.

Enterprising Alderman Lamb submits an estimate of the cost of conducting such a concern as the Insurance Branch of the Corporation of Toronto. But why should he go to the trouble of such a calculation, and why should he put the citizens to the expense of such a staff as he proposes? Why not go at once to the assessment department of the city and order an assessment of the citizens for fire insurance purposes? Tell every property owner, "You must insure with us and be assessed therefor." Thus he would save all the expense of an underwriting organization.

A word as to the risk assumed by a corporation which would entertain such a wild scheme as that propounded by Alderman Lamb. No thought appears to have been given to conflagration hazard. People laugh at such a thing, and point to the immunity of Toronto from fires. If the average citizen of Saint John, New Brunswick, had been asked in the spring of 1877 what was the prospect of a conflagration in that city, he too would have laughed. But the city was in ashes one June day notwithstanding, in spite of all that firemen, citizens and troops could do. In certain states of the wind, Toronto offers more chances for a sweeping conflagration than St. John.

Suppose the credit of the city pledged to make good the loss of the $200,000,000 fire insurance on city properties and stocks, which is now estimated to be distributed over the British, American and Canadian fire underwriters, what would be the effect on investors of such a burden? The debentures of Toronto would be discredited to a degree that would render them nearly worthless, for who would pay them if the city were laid in ashes? What capitalist, in the old world or the new, would take the bonds of a municipality with such a liability hanging over it? If the property covered were swept by a conflagration and destroyed, what basis would be left as security for our bonds?

There was once in this province, it is true, a condition of things under which a premium note given for fire insurance operated as a mortgage upon the land of the farmer who gave it. If this rude form of obligation was ever justifiable it is binding no longer, having been done away with twenty odd years ago.

We do not recall any instance in which municipalities in Canada have really embarked upon the troublous waters of fire insurance. But we have repeatedly given our readers instances of attempts in the States to do the fire underwriting of certain limited areas or special lines of business. And the result of such attempts has invariably been disaster. Readers will recall the Isolated Risk company, formed to do a special safe business in Canada, that there was sure to be "a lot of profit" in. Where is the Isolated Risk to-day? And what special interests framed the Stadacona Fire Insurance Company, which was to do business in the Dominion within certain lines? No matter what they were, the company has been, if not in oblivion, certainly buried. Then there were others who aimed at success by means of building up a great premium income, thinking perhaps that safety must be found therein. In the last twenty years the National, the Dominion, the Provincial, the Canada Fire and Marine, the Union, the Agricultural companies went under the waves. And more lately we have seen two more Canadian companies, the Citizens and the Royal Canadian, pass out of existence. So much for the great profits popularly supposed to reside in fire underwriting.

Any business man on a large scale who takes a prudent and broad view of the obligations assumed by fire insurance companies, will not put all his eggs in one basket, *i.e.*, he will not entrust all his fire insurance to one company. A manager of a loan company, speaking on the subject yesterday, declared that if any one company with which he did business, if even the biggest and strongest, were to take over by reinsuring the risks of all other companies in the business quarter of Toronto, he would instantly cancel his risks in that company. And why? The reason is plain. A conflagration in that quarter of the city would mean ruin to that company. And this is the very hazard to which Mr. Lamb, in his blind enthusiasm, seeks to expose the city of Toronto.

MONTREAL TRADE FIGURES.

A decided lessening of imports at Montreal is shown in the totals of the June Customs return, just received. But the lessening is really only in the dutiable goods. Where goods to the value of $2,180,646 dutiable were brought in at that port in June of last year, the imports of them for June, 1894, were only $1,564,378, a decrease of say $616,000. But last month's imports of free goods were $1,882,602, where the previous June's was $1,390,369. On the other hand, the coin and bullion imported last month was a bagatelle ($10,522) compared with the $512,667 of June, 1893. The aggregate imports last month

were thus $3,457,501, against $4,083,684 in the previous June. But the exports last month show an increase. Canadian produce shipped from Montreal last month was of the value of $4,674,509, which is $700,000 more than the similar exports of June, 1893. The total export was $5,986,061 in value, the difference being made up of United States sheep, maize, wheat, etc.

The principal dutiable imports were as under, compared with those of the previous June :—

	June, 1894.	June, 1893.
Cotton manufactures	$86,306	$125,867
Fancy goods	32,138	35,047
Hats, caps, and bonnets	7,204	12,173
Silk manufactures	57,115	61,159
Woolen manufactures	232,921	369,309
Fur, manufactures of	29,068	20,208
Total dry goods	$444,752	$623,763
Brass and manufactures of	12,728	13,280
Copper "	1,719	9,118
Iron and steel "	251,672	361,933
Lead "	4,048	15,785
Metal and composition	9,708	13,663
Total metal goods	$279,875	$413,779
Books and pamphlets	22,018	29,490
Coal, bituminous	12,193	19,608
Drugs and medicines	25,184	47,975
Earthen, stone and chinaware	18,756	13,958
Fruits, green and dried	36,220	58,017
Glass, window and other	46,002	58,351
Jewellery and watches	14,912	14,467
Leather and m'frs of	21,847	40,129
Molasses	26,708	49,254
Oils of all kinds	45,872	57,138
Paints and colors	40,990	43,511
Paper and envelopes	26,204	33,771
Spirits	29,667	36,156
Tobacco and cigars	8,933	15,412
Wines	23,935	36,992
Wood goods	13,168	20,363

The regularity of decrease all over this list of dutiable goods is something remarkable; it is most marked perhaps in dry goods and in metals; iron and steel goods, for example, show a falling off equal to fully one-fourth. The total value of dutiable goods, as we have seen, imported, was $1,564,000, a marked decline, while the free goods imported were $1,882,000, a marked increase. The main items among the latter were raw cotton, $104,000; hard coal, $157,809; dyes and chemicals, $54,000; West India fruits, $53,000; steel rails, $81,000; hides and skins, $35,000; salt, $16,000; raw sugar, $835,000; tea, $34,000; settlers' effects, $32,000; wool, $4,312; coffee, $26,000.

In dealing with the figures of June exports we find that the Canada products among them were, in order of their importance, first, animals, then forest products, field products and manufactures. Cheese, $1,837,000, and horned cattle, $1,242,000, easily overtop any other items in the list. Then comes lumber, $750,000 (a very marked increase this year); dead meats, $194,000; wheat, $126,000; hay, $108,000; leather, boots and shoes, cotton goods, iron ware, tobacco and cigars, fish, asbestos and coal. The exports of Canadian goods are given below, but it is worth while to note here the articles of United States growth or manufacture which were shipped across the seas by the St. Lawrence route. They were, coal, $1,558; forest products, $21,255; sheep, $112,915; other animals or meats, $25,060; green fruits, $53,044; Indian corn, $489,936; wheat, $507,006; flour, $18,875; tobacco leaf, $16,444; manufactured goods, $9,861. Total American goods, $1,261,000.

EXPORTS CANADIAN PRODUCE.

	June, 1894.	June, 1893.
Produce of the Mine	$ 10,102	$ 22,662
" " Fisheries	11,233	7,855
" " Forest	785,683	209,836
" " Field	440,878	901,692
Animals and their produce	3,195,059	2,477,178
Manufactures	229,154	177,950
	$4,672,109	$3,797,173

MINERALS OF THE UNITED STATES.

In contrast with that of 1892, which was the largest known, the mineral and metal output of the United States for last year was the smallest in value since 1889. This we have on the authority of Mr. David T. Day, in his report upon the *Mineral Resources of the United States* for the calendar year of 1893. Whereas the mineral wealth of the country raised in 1892 showed a value increased by $30,500,000, or 4⅜ per cent. over 1891, the output of 1893 showed a decline of 11.44 per cent., or $78,795,284. The decline in both output and value of minerals was general, but it was greatest in pig iron and structural materials. Bituminous coal showed a slight increase in quantity, but the normal increase was checked and the total value was less than in 1892. The general decline was attributed to the financial depression and the consequent decreased consumptive demands. "It was only conspicuous during the last half of the year," the report says, "as considerable time is necessary to affect the mining industry, and as it is correspondingly slow in recovering, its effect will be equally pronounced in 1894."

According to a paper contributed to the report by Mr. James. M. Swank, the maximum of American production of steel rails was attained in 1887, and the production of pig iron reached its highest point in 1890. Not one new blast furnace is being built in the United States in 1894, and the directory of the American Iron and Steel Association shows 50 furnaces less in 1894 than in 1892. "Prices of all kinds of iron and steel have never been so low in this country as during the last twelve months," says Mr. Swank, writing in May. The output of pig iron for 1893 was 7,124,000 tons as compared with 9,157,000 tons in 1892, and the value declined from $131,161,000 to less than $85,000,000.

The product of gold was the largest since the year 1886, amounting to 1,739,081 ounces, worth $35,950,000. The increase is attributable to the new mines in Colorado. Silver production was brisk during the first few months, but fell off in the latter part, the total, 60 million ounces, valued at $77,575,758, falling short of the 63,500,000 ounces of 1892.

Not much effect upon the copper industry was produced by the events of the year. The product from American ores was 337,416,000 pounds, and from imported pyrites 7,723,000 pounds. The total is slightly less than that of 1892. Lead and zinc both show a decline, quicksilver a noteworthy increase, viz., from 27,993 flasks in 1892 to more than 30,000 flasks in 1893, the increase being from the Ætna, Mirabel and New Almaden mines.

A considerably improved out-put of aluminum is reported. There was 339,629 pounds produced, chiefly by the Pittsburg Reduction Company, and its value is placed at $266,908, or more than 79 cents per pound in the producer's hands, so that the rapid lowering of price predicted for this interesting metal has not been reached. A marked decline of nickel production is to be noted, "due to Canadian competition."

In the chapter on fuels in the summary of the chief geologist, we find it stated that "the consumption of natural gas (in the United States) is limited more and more to domestic use," and another feature of the situation is the increase in price to consumers. The value of the product in 1893, namely, $14,346,250, shows a reduction of half a million in the year. Petroleum, however, exhibited at the same time with enormous exports—the largest recorded—804,221,000 gallons, a decline in production of the older fields and an increase in the newer, also an increase in price. While there was a slight decrease in bituminous coal, the

output of anthracite was enlarged: 114,629,000 long tons of the first, and 48,185,000 tons of the latter, of a total value of $208,498,000, are figures which show somewhat eloquently the wants of the Great Republic in this particular. The colliery consumption of the year was over 4 million long tons. Coke production, of course, received a serious "set back" from the depressed industrial conditions. It declined from 12,010,000 tons to 9,460,000 tons. Pennsylvania produces 65·8 per cent. of the coke and Alabama 12 per cent.

METALLIC PRODUCTS OF THE UNITED STATES IN 1893.

Products.	Quantity.	Value.
Pig iron ....long tons..	7,124,502	$84,810,426

* Including building sand, glass sand, limestone used as flux in lead smelting, limestone in glass-making, iron ore used as flux in lead smelting, tin ore, iridosmine, nitrate of soda, carbonate of soda, sulphate of soda, bauxite and alum clays used by paper manufacturers.

—Mr. Edward E. Ward, accountant of the London branch of the Molsons Bank, has been appointed sub-manager of the Exeter branch of the same institution.

THE BANK STATEMENT.

We give below a condensation of the figures of the statement of Canadian banks for the month of June, which bears date Ottawa, 18th July. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities, average holdings of specie, and Dominion notes, &c.

CANADIAN BANK STATEMENT.

LIABILITIES.

	June, 1894.	May, 1894.
Capital authorized	$ 75,458,685	$75,458,685
Capital paid up	62,112,883	62,112,169

A LIFE ASSURANCE TRANSFER.

Word comes to us from the Maritime Provinces that the business of the Dominion Safety Fund Insurance Association, whose headquarters were at St. John, New Brunswick, has been transferred to The Great-West Life Assurance Co. of Canada, whose head office is at Winnipeg. This, we take it, is one result of the visit of certain officers of the latter company to the Eastern Provinces of Canada.

The Dominion Safety Fund began as a post mortem assessment life concern in the year 1881. But it was well advised to change its basis, and accordingly launched out upon a natural premium system in February, 1884, graduating its rates of premium according to age, and also getting a loan of some $50,000 from its shareholders, to be deposited with the Government, but to be termed guarantee fund, though repayable as soon as the company was able to repay it. In 1887 or 1888 a difficulty arose which caused the Government at Ottawa to refuse the company a license, the circumstances being these: Some $45,000 of the company's Government deposit was in the Maritime Bank when the bank failed. The Government claimed priority of payment over other creditors for this sum, but the claim was resisted and came before the courts. But meantime the Government, it seems, looked to the company to put up $45,000 more, and because it did not do so withheld its license. The circumstance was doubtless of serious disadvantage to

the future growth of the company, although it managed to secure a very fair amount of business among the professional and commercial class.

Its shareholders were nearly all in New Brunswick, the principal holder being Mr. J. Dewolf Spurr, who held $43,200, with one-fourth paid up. Several other Fredericton or St. John people held $10,000 to $12,000, with one-fourth paid up, and the total number of holders of the $120,000 was about seventeen, with $29,172 paid up. Into the terms upon which the Great-West Company takes over the business of the Dominion Safety Fund we have no need to enter. It was deemed expedient to wind up the business of the latter, whose income was declining, as we see by comparing the receipts of 1893 with those of 1892. Its aggregate business at the close of last year amounted to $1,549,000 under 1,292 policies.

ROYAL INSURANCE COMPANY.

The general law of average holds good in the matter of insurance as well as in most other things, and no doubt the experience of the past few years has given the fire underwriting companies good reasons for a readjustment of their rebates, allowances, special terms, etc. It will be found that this course can in most instances be taken by the companies with profit to themselves, even though it may occasion a slight reduction in the total amount of premium income. The experience of the Royal during 1893 in the matter of losses has been no exception to the rule. In the year 1892, owing to the St. John's, Newfoundland, fire, they were very heavy; but in the year 1893, without any general conflagration, they exceeded those of the previous year. In all countries in which the company has operated, the losses during last year seem to have been exceptionally heavy, and in the aggregate amounted to £1,444,300; the commissions were £283,-091; expenses of management, £401,688; or a total outgo of £2,129,-079. To meet these losses, commissions and expenses, we have on the other side of the account fire premiums reaching the enormous sum of £2,078,192,162, the largest receipts in one year of any company in the world; and interest receipts £29,500, or a total thus insufficient by £21,386 to meet the outgo. Unpleasant as these figures may appear, they do not need unduly to ruffle the shareholders, who have had a dividend of 35 shillings per share, which absorbed £219,000, and there is left at that fund a trifle of £161,000. One can hardly look over the statements of this company without expressing surprise at its enormous figures. The total funds, including capital, £375,702, reaches the sum £8,262,161, or about forty millions of dollars. To put these resources in tabulated form we have the following array extracted from the report:

FUNDS.—After providing for payment of the dividend, the funds of the company will stand as follows, viz:—

Capital paid up			£375,702	0	0
Fire fund	£728,000	0 0			
Conflagration fund	200,000	0 0			
			928,000	0	0
Reserve fund			1,582,393	11	7
Life funds			4,921,035	19	8
Superannuation fund			41,957	2	11
Balance of profit and loss			161,043	13	2
			£8,010,132	7	4

The directors say further, under date 11th June, with respect to the late manager: "It is with great sorrow the directors have to record the serious loss which the company has sustained through the death, in November last, of Mr. John H. McLaren, who had been connected with the company since 1856, and had held the position of manager for over twenty-five years. It would be difficult to estimate too highly the services rendered by Mr. McLaren, and which so largely contributed to the success of this company. He was a man of conspicuous ability, and his zealous and untiring devotion to the company will be gratefully remembered by those whose interests he so faithfully served.

"The vacancy caused by the death of Mr. McLaren has been filled by the appointment of Mr. Charles Alcock, who previously held the position of sub-manager."

ANSWERS TO ENQUIRERS.

J. W.—It is an awkward matter to advise upon. Do not, however, be too sure you are right; you had better consult your lawyer. The author of "Friends in Council" has wisely said: "Avoid anything like a juggling dexterity in business matters; your dexterity may be useful in self-defence, but should not be aggressive. . . . Concessions and compromises form a very large and very important part of our dealings with others. . . . Delay is in some instances to be adopted advisedly. It sometimes brings a person to reason when nothing else could."

FRIENDLY CRITIC, Barrie.—Have not forgotten; the matter is neither strayed nor lost. The data are accumulating all the time. You will find something on the subject from another pen in to-day's MONETARY TIMES, page 94.

BOOKS RECEIVED.

THE SHAREHOLDERS' AND INVESTORS' MANUAL.* This book, the editor and proprietor, Mr. Arthur Weir, tells us, is published at the request of a number of bankers and others interested in establishing a permanent handy record of meetings of banks and joint stock companies in Canada. It contains a brief financial review of the year 1893; clearing house figures; stock exchange quotations, and a digest of the monthly bank returns. The reports of the chartered banks are mostly those to May, 1893, a few being for the calendar year; but those of the loan and insurance companies, some forty in number, are generally for the full year 1893. It will prove a convenient volume for those who desire a record of the transactions of our banks and building societies. And it is the intention of the editor to enlarge and improve it.

JOURNAL OF THE CANADIAN BANKERS' ASSOCIATION† Successive numbers of the journal grow more interesting, and exhibit more clearly the purpose of the editors. In addition to a number of 80 pages, there is, this month, a supplement of 32 pages, which contains reports of the first and the second annual meetings, and a complete list of associates. A paper on the "Early Currency of Canada," by Mr. J. W. Hamilton, of Ottawa, shows research; and the paper by Mr. Vere C. Brown, which enquires "What have been the Causes and Results of the late Financial Crisis in the United States, and what may Canadian Banks Learn Therefrom?" is a most creditable attempt to deal with a very large subject. Mr. Brown discusses at length the part played by a defective currency in the United States in bringing about the crisis. He declares that because there is nothing to impel the notes back for redemption when they are no longer required by the public, the currency system is doubly chargeable with a share of responsibility for the crisis. Firstly, had the excess of circulation caused by the issue of silver certificates been thrown back on the Treasury as soon as there was redundancy, the necessity for gold would have brought the silver question to an issue at once. Secondly, the increased volume of currency caused a glut of loanable funds. If the banks had sent in the credit-based currency for redemption, the gold borrowings of the Government would, to a like extent, have decreased the volume of money in general circulation, and thus have checked the inflation caused by the silver issues, or, if gold were borrowed abroad, have caused a corresponding tension in the money markets there. A third prize essay is that upon the "Education of Bank Officers," by Mr. D. M. Stewart. In the department of correspondence, we find a letter from Mr. E. D. Arnaud, of Annapolis, making some practical suggestions. For example: "All the statutory holidays in Canada fall at a season when the weather is such that they cannot be properly made use of and enjoyed by the banking fraternity." And the writer proposes the adoption of the English plan of "arranging a holiday at reasonable intervals all through the fine summer months."

LIFE ASSURANCE IN CANADA, by Frank Sanderson, M.A., of the Canada Life Assurance Company. This *brochure* forms No. 7 of Vol. III. of the transactions of the Actuarial Society of Edinburgh. We have already referred to the paper as having been read before the society in January of the present year. It is a condensed statement of the legal and other conditions under which life assurance is done in Canada, and a sketch of the progress made by different groups of companies. We quote elsewhere from it in this issue.

FOR DRY GOODS MERCHANTS.

The *Columbian* says that silkworms thrive in British Columbia and suggests that sericulture be introduced into the province.

Merchants bought large stocks of stiff hats for the spring trade. Soft hats, however, appear to have been most in favor, and so most dealers have yet on hand many stiff hats. Orders for them for the fall trade are sparingly given.

Silk mitts are in good demand. They are not expensive, and the demand has probably been stimulated if not created by a spirit of economy. White and cream colors are most worn. The season now closing has been a most successful one in these lines.

Cream gloves are popular in silk, lisle and taffeta textures. Cream silk gloves have been rather scarce, but stocks are at present more plentiful.

Duck suitings have met with a good reception this summer, and although prophesies as to the course of dry goods trade are not often safely indulged in, it is more than probable that next spring these fabrics will be even more popular for street wear.

† Vol. I.; No. 4; June, 1894, with Supplement. Monetary Times Printing Co., Limited, Toronto.

Learn to say "no" to undesirable credit risks. If you don't your profits will soon show on the wrong side of the ledger.—*Economist.*

The employees of the retail dry goods stores in Toronto were given a free trip last Saturday to Victoria Park. The band of the Royal Grenadiers gave concerts both afternoon and evening.

"Are these colors fast?" she asked of the new clerk, to which he replied, "Yes, indeed. You ought to see them when they once start to run." *Washington Star.*

The Canadian Colored Cotton Company's mill at Hamilton has closed down for two months, opening September 10. The mill has been running on short time for several months, and when it reopens employees have notice that their wages will be reduced.

No indication is as yet afforded as to when operations will be resumed at the Milltown, N.B., cotton mill. The suspension has been seriously felt in local business. The recent employees are gradually going away or obtaining other employment.—*Beacon.*

One tone in color dwelt upon is as monotonous as one tone on the piano; range in color, with harmony, must exist in all beautiful dress and decoration.

Live up to your advertisements in spirit as well as in word. To do otherwise is poor policy. Some Toronto houses have this summer made an unfavorable record along this line which some people will not soon forget.

The moot question now among leading houses, says the *Economist*, is what is best to buy for all that we can sell quickly and successfully. We should say not high-priced fabrics, but should advise the buying of medium-priced mixtures and checks. Qualities to retail at 39c., 50c., 75c., $1 and $1.25 per yard should be those to which you should give special attention.

Walk down King street, or up Yonge, in Toronto, and everywhere you will see posters announcing "Bargain sales," "Summer goods sales," "Sales regardless of cost," "Building sales," and a host of variously named sales. Well and good—July is always a quiet month; waken things up if you can. But all the time keep your eyes on the profit and loss accounts, particularly the latter. Some merchants have an idea that because summer fabrics are worth less now than they were a month ago, stable articles should also be marked down. And so during the summer sales, cottons, linens, thread, linings, household furnishings and other indispensable articles are sold at lower prices. This is needless, and quite a mistake.

FOR GROCERS AND PROVISION DEALERS.

Quebec bakers have had a successful picnic.

Wallaceburg is to have an evaporated fruit factory.

Trout anglers say that that is the only real sport.

Petrolea butchers held their first picnic on the 18th inst.

Sunday-school Teacher.—"Why was Lot's wife turned into a pillar of salt?" Tommy.—"'Cause she was too fresh."

The Western Fisheries Co., New Westminster, B. C., have put up 600 barrels of spring salmon to fill an order for the English market.

W. H. Kerner has retired from the Hamilton Biscuit Co. John Davidson, J. S. Reid and R. F. Wodehouse will conduct the business hereafter.

The strike of fishermen on the Skeena river has been settled by the canners agreeing to pay the same price for fish as last year.

A copartnership has been formed at Montreal for the purpose of conducting the general commission business under the firm name of Bay & Heim. The firm consists of Wm. G. Heim and Oliver Bay.

Two Peterboro' bakers sold light weight bread. The town officials made an inspection of the bakeries, and the offenders paid fines in the police court.

The Board of Trade has received a letter from a raisin agency in Spain asking for the name of some person in St. John who would be a good agent here for the Maritime Provinces.—*Record.*

A cargo of about 4,000 tons rice has been received by the Montreal Milling Co., and is said to be the only parcel expected this season.

Maine canners send out the statement that the pack of lobsters is short this year. Maritime Province canners make a similar report. They say that fresh fish dealers have taken up the bulk of supply of fresh lobsters received thus far.

Usually large catches of cod have been taken at Silly Cove, New Pelican and Heart's Content, in Newfoundland. But at other points, Anticosti for instance, the catch is short.

"You say my beloved predecessor died of a very trifling cause?" asked the newly arrived missionary of the South Sea Island king. "Yes," replied the sable monarch, with a ruminating glance at his favorite copper kettle; "yes, he died of a mere boil."

Teacher—"The race is not always to the swift. Do you understand the inner meaning of that?"

Bright Boy—"Sometimes the head feller's tire gets punctured."—*Good News.*

Latest advices by mail confirm previous reports that the catch of sardines on the French and on the Portuguese coasts has been comparatively light thus far this season.

There is some danger of a failure in the Montreal ice supply. Many of the dealers are refusing orders for ice and stopping the supplies where payment has not been made. If the months of August and September should prove to be warm ice will be scarce and prices high.

Canada's Dairy Commissioner says that seven new cheese factories and two creameries have been started in New Brunswick this year. Of these, there are four cheese factories in Kings county and three in Kent county. A new creamery has been started in Kent, and one near St. Stephen, Charlotte Co.

Do you remember when in Smith's store the other day how untidy it looked, and as you passed Brown's butcher shop, what an unpleasant odor greeted your olfactory senses? Now, look around your own shop and try to see things as a stranger would view them. "Cleanliness is next to godliness," especially in hot weather.

It would seem at first blush a wild venture, from a business man's point of view, to send a shipment of dried fish all the way from Nova Scotia to the Sandwich Islands and pay $300 freight per car load on it. But two lots have just been sent from Halifax to Honolulu, and a satisfactory profit is announced upon the transaction.

The St. Catharines *Journal* says that one Peter Nath, of Port Dalhousie, is engaged in the industry of catching and smoking mackerel. "Heretofore we were of the opinion that these fish were habitants of the sea, but Peter says Lake Ontario is full of them, and the samples he shows are something which Fishery Inspector Kerr should promptly investigate."

English mails state that the total exports of tea from the north of China to the United Kingdom thus far in the new season are about 16,000,000 pounds, against 20,000,000 pounds in 1893-94. From Foo Chow the statement is received that the quantity exported from thence to the United Kingdom since the opening of the season has been nearly 7,000,000 pounds, as compared with between 5,000,000 and 6,000,000 pounds last year.

Mr. Matthews, when spoken to yesterday in regard to the new pork packing establishments in Hull, stated that they would simply be for the export trade of the firm. They will have a capacity of handling three thousand hogs weekly. "We hope to get a great many of the western hogs," said Mr. Matthews, "that now go through to Montreal." The estimated cost of the buildings is in the vicinity of $30,000. One will be 113 x 85 feet and five stories high, and the other 49 x 81 and four stories high. One will be for cold storage and curing, and the other for fertilizing, larding and killing.—*Ottawa Citizen.*

SHOE AND LEATHER ITEMS.

Tan comes for shoes and faces.

Tennis shoes appear to find better sale in the smaller towns than in the large cities.

In the window displays of Toronto's large departmental stores summer footwear has a prominent place.

The season is now well advanced and strenuous efforts must be made to bring out trade. Begin at once, for it will be easier to sell summer goods this week than next.

It is said that the fashionable shoe in London next winter for street wear will be the heavy double-soled russet.

Boots and shoes for summer wear should be larger by half a size than those worn during the winter. Shoes, since they leave the ankle free, are generally considered more comfortable than boots.

Tan shoes, if left in the window for any considerable length of time, cease to be similar in shade to the footwear which they represent, exposure to the sun making them three or four shades darker.

The boot and shoe stores of St. Stephen, N.B., now close at six o'clock on Tuesday, Wednesday and Thursday evenings of each week.

Messrs. Vine and Scott are shipping large quantities of raw hides and sheepskins from the city at present.—*St. Catharines Journal.*

Many a man's income is limited only by the amount he can borrow.

An Ontario manufacturer, who makes an excellent boot, wishes to see it sold at a reasonable price and so stamps the price, $2.50, upon the sole. This, we are told, is a common practice in the United States.

"Move on" shoes are sold to policemen, postmen and others who are constantly walking. The principal features about the shoe are the exceedingly heavy sole and square toe. A Toronto manufacturer takes special pride in his make of "move on" footwear.

Young Wife (at telephone)—Is that the office of the telephone company? I want to talk with Cyrus Winterbottom. I'm his wife, and——

Telephone Girl—Number?

Young Wife—Number? I'm his first and only, you insulting creature!—*Chicago Tribune.*

Some of the doctors have discovered that high-heeled shoes cause blindness. This ought to be an eye-opener for women, but it is not likely to be one.—*St. Louis Post-Dispatch.*

Two of our large boot and shoe manufacturers, says the Montreal *Trade Bulletin*, report an increase in fall orders, while some of the smaller houses have had the same experience. A number of sorting orders have also been filled, so that altogether there is an improved feeling. Remittances have also shown some improvement, and our manufacturers are beginning to look forward for a good fall trade.

Messrs. Culverwell, Brooks & Co., London, Eng., in their last circular say of hides: The hide trade during June has been quiet, but there have been signs of a disposition to buy at the unprecedentedly low level of values now current. Only one series of public sales was held at the close, and the increased private sales were supplemented by a better trade at auction for some classes of raw goods. Salted hides have maintained their value, and in a few instances show a slight recovery. Dry hides have sold to a fair extent, and may be quoted rather higher. East India kips have not a few enquiries, but no business of any importance has transpired. In regard to leather they report as follows: The trade in English tannages has been extremely quiet, as usual at the close of the half-year, and prices have shown renewed weakness in face of the retail demand. East Indian tanned hides have been in small supply, but quite equal to the restricted enquiry. Values show little change, but close weak on all except the lowest qualities. Australian sides have been a very slow market, and quotations are again in buyers' favor.

ITEMS FOR DRUGGISTS.

Look out for counterfeit $10 bills, and incidentally, for good ones, too.

The primary market for Florida sponges is ruling strong, with the new crop coming in slowly.

The foreign manufacturers of muriate of cocaine have advanced their prices 25c. per ounce.

The export duty upon vanilla beans from Mexico, beginning July 1st this year, is 45c. per kilo.

"We are discovered," exclaimed the hairpin. "Impossible," insisted the collar-button.—*Detroit Tribune.*

Cables from Messina report a decidedly stronger market for oil lemon, though no quotable change in the value has occurred here.

Mr. Fred James has disposed of his drug business in Port Stanley to the Port Stanley Drug Company, in which Dr. Mothersill is interested.

Old Gentleman—Do you think, sir, that you are able to support my daughter without continually hovering on the verge of bankruptcy? Suitor—Oh, yes, sir; I am sure I can. Old Gentleman—Well, that's more than I can do. Take her and be happy.—*New York Weekly.*

Phosphate mining in Canada is not very remunerative now, owing to the lowness of prices. In 1891-92 only 17,234 tons were worked, as compared with 25,257 tons in the previous year.

Cables have been received from Constantinople advising damage to the growing crop of opium by the earthquake. But the reports have apparently not been seriously entertained, as the situation here remains unchanged.

For new crop Angostura tonca beans $1.75 is asked in instances, though bids a trifle less might be entertained if firmly submitted. The parcel recently to hand is understood as weighing about 40,000 lbs.—*N.Y. Journal and Bulletin of Commerce.*

During the month of May, 13,279 cwts. of alkali were shipped from the United Kingdom to Canada. This compares but poorly with shipments amounting to 29,519 tons in May, 1893.

Senega root continues to be marketed in considerable quantities in Manitoba and the North-West Territories.

American saffron is very unsettled. There are more small orders than usual in the market, and they are being filled at 22 to 25 cents as to quantity and seller. The recent arrivals of new crops have been sold, but to more than one dealer, and the stock will probably become more scattered than in former years, when the bulk of the stock was more or less concentrated.—*N. Y. Shipping and Commercial List.*

Weary Watkins—"Kind sir, I am penniless. Will you give me 10 cents for a bed?" Mr. Rosenstein (seeing a bargain)—"Yes. Vere is de bed?"

AMERICAN PATENTS TO CANADIAN INVENTORS.

The following list of United States patents granted to Canadian inventors, July 3rd and 10th, 1894, is reported for this paper:

John Forbes, Halifax, Nova Scotia, skate.

Eugene Guay, St. Henry of Montreal, Quebec, machine for waxing leather.

Whitmore Irving, assignor to C. A. Sleeves, Moncton, Canada, support for vehicle shafts.

Thomas Talbot, assignor of one-third to B. Charron, Matteawa, Ontario, hand car.

William S. Wilson, assignor of one third to D. S. Henderson, Ontario, manufacturing rivets, studs, etc.

William Cavers, Owen Sound, Ontario, combined shaft support and anti-rattler.

Angus Fougere, assignor to R. H. Cushing and J. A. Harris, Moncton, Canada, nut lock.

John D. Le Bel, London, Ontario, composition for fire kindlers.

Alexander S. McBean, Montreal, Quebec, trolley-pole.

Arthur K. Evans, Toronto, Ontario, rope-grip.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, July 19th, compared with those of the previous week:

Clearings.	July 19	July 12
Montreal	$12,252,665	$10,797,436
Toronto	6,120,531	6,543,262
Halifax	1,281,815	1,649,731
Winnipeg	779,047	869,692
Hamilton	632,029	663,245
Total	$21,066,087	$20,523,366

Aggregate balances this week, $4,360,957; last week, $3,077,786

—The Peoples' Bank of Halifax has opened two new branches, one at Canso, N.S., and the other at Levis, P.Q.

—Mr. S. L. Forrest, formerly with the Winchester branch of the Union Bank of Canada, has been removed to Norwood, Ont., at which place he has taken the managership of the new agency for that bank opened this week.

—We are informed that Mr. John Hood, accountant of the Bank of Ottawa in Arnprior for several years, has been appointed manager at Hawkesbury. We learn further, with respect to the same bank, that Mr. James Martin, manager at Hawkesbury, has been appointed manager at Kemptville.

—There is to be an exhibition in the city of Quebec in September. For a time the fact looked doubtful because the Mayor of the city had imposed conditions which the Exhibition Company would not agree to. But, as we learn from *Le Quotidien*, Hon. L. P. Pelletier, Provincial Secretary, has acted as mediator. Meeting the Mayor at a public dinner he set himself to smooth the differences. The result was that the two gentlemen agreed on Thursday last upon an advisory committee of ten members, which has already held a meeting and accepted the offer of the Mayor to recommend to the City Council a grant of $8,000 to the exhibition unconditionally. In case there shall prove to be a deficit in the finances of the exhibition, the city will contribute $2,000 towards it, or the city will itself expend these $2,000 in fireworks, sports or the like. The Exposition Company passed a resolution agreeing to go on with the preparations whenever the Council had ratified the Mayor's offer.

—Very decided interest continues to be taken in the Maritime Provinces in the subject of dairying, and energetic measures have been taken in the right direction since the visits of the Dominion Dairy Commissioner. For example, we hear that the cheese factory at Grand River West was opened on the 10th inst., and received 3,600 lbs. of milk on that day. Again, the Crapaud creamery and Tryon creamery make about 400 lbs. of butter per day. Owing to too great pressure, the boiler of the former collapsed and a new boiler and engine are being placed. The butter thus far produced has been very satisfactory. Indeed, the *Guardian* tells us, "The happiest man of all is Manager Olguire—who says that this is the 'dandiest' butter factory he has yet seen. This creamery is under the management of the Dominion Government, and the outlook gives promise of great success."

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending 30th June, 1894.

J. M. COURTNEY, *Deputy Minister of Finance.*

Correspondence.

THE WIMAN CASE.

Editor MONETARY TIMES

SIR,—To the hypercritical it may seem to be not quite *apropos* to discuss, in the columns of your business journal, insanity in any of its phases or aspects. Though this opinion be entertained, there is no occasion to canvass it with hesitancy, as if it had the impress of infallibility upon it, for such is clearly not the condition of things.

You have, as we find, already invaded the field supposed to be the reservation—the special preserve of the medical expert, by directing attention, both editorially and through the agency of Dr. Lett's analytic pen, to the mental condition of one of the most widely-known business men on this continent.

To the case of Mr. Erastus Wiman, from a professional point of view, attention has been very appropriately drawn by Dr. Lett, who deserves the thanks of your readers for the service thus rendered them.

The question raised by him in regard to certain features of Mr. Wiman's case is, as it certainly seems, most important to the class of readers you have long been in the habit of addressing. No other class of men in the community, perhaps, to the same degree and so frequently, tax the energies of the brain, upon the functional vigor and efficiency of which the material prosperity and progress of our country so largely depend. The bustling man of business much too commonly treats that organ as if it requires neither rest, recreation nor time for repair. Its resources are drawn upon in the most prodigal manner, as if it were a bank with illimitable credit and an inexhaustible exchequer. With increasing frequency, as the result naturally is, the enormous and unreasonable drain, sooner or later, becomes disastrous.

Over-drawing, long-continued, stops, in time, as stop it must, then comes the announcement:—"No funds!" and this is speedily followed by a crash.

General paresis, one of the most fatal of mental maladies, is more common among pushing business men, men of tireless energy and activity, than among the members of any other section of the population. These men, when they become insane, are the optimists encountered by the mental pathologist, and a terror they often enough are, too, to those who have them in charge. They hatch gigantic schemes, possess colossal fortunes, build railroads to the moon, hold the Alps and the Pyrenees in the hollow of their hand, and form alliances with gods and angels. Though God's anointed, in their own estimation, as they are, the tendency of their condition is, inevitably, downward toward the lowest depths of dementia—their doom, to die, in the end, like a drivelling idiot, paralyzed, it may be, in almost every fibre and molecule in their body. Other forms of brain-disease also are on the increase in the ranks of those engaged in commercial pursuits. It were well, therefore, if those whose lives may be said to be wedded to day-book and ledger, to office or store, could be induced to pay more attention than they do to mental sanitation, and familiarize themselves with the perils of brain-collapse, to which they are peculiarly liable, as well as with the premonitory indications of its approach.

The public at large know precious little about the simplest of diseases; but their want of knowledge of disease of the mind is phenomenal. The difficulties to be overcome in acquiring a moderate degree of acquaintanceship with the more common manifestations of the early stages of brain disease, do not seem to be very great, and yet it is amazing how almost impossible it is to get a judge or a jury to recognize as insane any person whose case has not assumed the form or arrived at the stage of raving madness. The fact is that men may reason acutely, talk rationally, understand as thoroughly as anyone can, the difference between right and wrong in the abstract, but, nevertheless, be mentally unhinged. To one who can appreciate how easy it is to perceive the nature of the faults and failings of another, and how very difficult it is to perceive the nature of his own shortcomings, it ought to be possible to form some conception of the egotism that blinds the insane to the distinctions between *meum* and *tuum*. "Your doxy," says Lucille, "is heterodoxy; my doxy is orthodoxy."

Now imagine, if you can, a hundred times intensified by insanity, the self-idolatry thus

illustrated, and you will then have some idea of the egotism of the insane—egotism, if one may so speak, in the state of advanced hypertrophy, in short, the egotism of disease. The insane are, nearly all of them, egotists, even the melancholiac egotistically believing that no one ever suffered the tortures of the damned as he has had to endure them. It is this element of insanity that divorces the judgment of the insane from act, wish, and desire, having reference to themselves. Reason, in health, hinders, restrains impulse. In insanity the inhibiting machinery always becomes deranged. "There is," says Dr. Bucknill, "a latent devil in the breast of the very best of men." In the sane condition, the demoniac element is held in check; in the insane condition, the check-rein is lost, or weakened by pathological encroachments—changes in the tissues of the brain. There is a wide difference between the patient now confined in one of our asylums for the insane, and the inmate of Bedlam fifty or a hundred years ago. Then the lunatic was furious, often in chains. To-day, especially if under asylum treatment, the insane man seems very much like other men, upon the whole, showing more common sense and better manners thau a large proportion of those outside of the asylum, who have extended to them the courtesy of being regarded as sane. The late Dr. Workman, when he was Superintendent of the Toronto Asylum, often facetiously remarked that as between the majority of those in that institution and the majority of those outside of it, the fact no doubt was that the advantage in many respects rested safely enough with the people under his charge. After making all due allowances for the Doctor's partiality for his patients, there remains, in his view, a pretty fair-sized kernel of truth, apart from the wit and sarcasm of his vein.

Whether patients, fifty years ago, were naturally more furious than they are to-day, or if they were, whether inhuman treatment made them so, is a question hardly beyond the region of dispute. But that insanity was then more demonstrative, more dramatic, and more tragic than it is in our day, can scarcely be questioned. Whatever be the explanation, it is now pretty well established that many of the insane are very much like their sane neighbors, with the exception of a tendency to get into trouble of one sort or another, or even to commit criminal acts under the impulse of morbid emotion, or instinct, or in consequence of will power being paralyzed or weakened. With the widely prevailing ignorance concerning the real nature of insanity, and the occurrence of an occasional instance in which there is, not a marked change of character, but rather an exaggeration or intensifying of the traits peculiar to the individual when sane, it is not strange that a case, here and there, is encountered, which, for a long time, has been a puzzle to everybody, even to the doctors themselves. Cases of this sort sometimes remain months, years, with their real nature undetected, until some crime or some gross act of impropriety prompts investigation, thus leading to the discovery that their singularity of conduct has been due to no vicious or criminal intent, but to insane impulse. Insanity may, in one case, be as exclusively limited to action and emotion as it is in another to language and thought. Why anyone should stubbornly shut his eyes to this fact, as fact it is, seems difficult to explain. That the public, in regard to this truth, is either wilfully or ignorantly blind, is nevertheless beyond dispute.

Prominent among the causes of insanity are previous brain disease, hereditary taint, and anxiety coupled with overwork. To these elements of the problem, in a given case, add an egotism pampered and pushed to the bursting point by a process of gradual inflation, a predilection for grand enterprises and gigantic schemes, a tendency early manifest, and attaining, in the course of time, enormous development; recklessness in business transactions, with a resort to questionable means to secure some real or imaginary end in view, and, with all, a sense of satisfaction and a serenity of mind displayed but little less than marvelous, even after criminal charges have been established. Here we have a concatenation of causes and effects which point significantly to mental derangement.

In the case of Mr. Wiman such is the combination of factors constituting its history. No ranting or raving is here needed to point the moral, nor hallucination or delusion to adorn the tale. Upon the evidence supplied by conduct alone might the conclusion, in regard to this somewhat singular case, be allowed to rest. In connection with it, previous brain disease, as causative, has an important bearing. Precisely what the pathological character of the derangement was it may be impossible to determine. It is sufficient here to say that among the symptoms Mr. Wiman is said to have had vertigo, insomnia, and mental fatigue disproportionate to the mental energy expended. Whatever the disorder may have been, it was thought to be sufficiently grave to call for suspension of intellectual effort, and relief from the wear and tear of business excitement for a time. Heredity, as a factor, is rendered fairly presumptive by the existence of epilepsy in the family, a sister of Mr. Wiman, as we are told, having been a victim of the disease. It is not generally known, but nevertheless the fact is that epilepsy and insanity are often traced to the same source.

The paralysis or phthisis of a grandparent may be transmitted, in transmuted form, to the second or third generations, to assume in one descendant the features of hysteria, in another those of epilepsy, and in another those of insanity. What the character of the original morbid condition was that has been handed down to brother and sister—to one as epilepsy, to the other as an inordinate, abnormal egotism and craving for notoriety, as the family history in this case reveals, is a matter of interest, but not essential to our present purpose to enquire. That heredity has had an important role in the drama of the crisis involving Mr. Wiman's business affairs, is exceedingly probable, if not absolutely certain. Heredity, metaphorically speaking, leaves its trade mark upon its wares, and this case certainly bears its impress. "The fixed and intense expression of any one emotion," says a recognized authority, "may be taken as a presumptive symbol of partial insanity." It was to one of his parishioners, perhaps, who had been giving this sort of proof of insanity, that Dr. Smith, an English divine, nearly two centuries ago, was addressing his pointed remarks when he found occa-

sion to say :—"Pride swelled thee to a proportion ready to burst, it brought thee to feed upon air, and to starve thy soul only to pamper thy imagination." The pious old doctor evidently regarded the case as that of a commonplace, vulgar sinner. It was, no doubt, an error in diagnosis. The victim of passion, thus all-absorbing, was evidently an individual with all the credentials required to secure him a place in a mad-house.

When egotism, finding expression in vanity long recognized as over-weening, and in a craving for public admiration manifestly morbid in character, usurps the reins of mental authority and then launches into criminality, the existence of insanity in some one of its forms or stages may be said to be fairly presumptive, and where shown to be due to brain disease, fully established. In this case, causes which are said to have been in operation, and manifestations which are admitted to have been observed, when taken as a group, not only do not exclude disease of the brain, but render such a condition in the highest degree probable. Many of the applicants for admission into our hospitals for the insane, are received upon the strength of evidence which, were it sifted, would be found much less conclusive. "Many a patient that I have had under my care," says Dr. Ray, "has concocted schemes and devised plans, for the government of subjects purely imaginary, that would have done infinite credit to the ambitious designs of monarchs having the distinguished privilege of wearing real crowns, and occupying real thrones." The great ability for the devising and the executing of grand schemes and magnificent undertakings with which Mr. Wiman has been credited, does not, therefore, as it would appear, disprove insanity. The existence of unquestionable sanity must, therefore, be made to hinge upon an order of proofs entirely distinct from that. Neither does the capacity to talk and write coherently, nor the absence of delusion and hallucination, disprove insanity. If Mr. Wiman talks and writes in that manner, and if he has no delusions or hallucinations—a matter somewhat problematical—he is, in these respects, not essentially different from a large proportion of those consigned to retreats for the insane.

Of Mr. Wiman it was said to the writer, by one who has known that gentleman long and intimately: "He is a plunger." A little interrogation elicited the fact that he was not so earlier in his business career in New York. "Though always bold in speculations," intimated the writer's informant, and as he added, "courageous in the face of the most formidable business difficulties, he was not always a plunger." This aspect of the case appears to sustain Dr. Lett's view in reference to Mr. Wiman's alteration in character, though it conflicts somewhat with the idea that this alteration represents a plunge, more or less suddenly, from one extreme to another, as the doctor's method of stating the circumstances of the case might lead one to suppose the change in character actually was. The term "plunger" has a peculiar suggestiveness as thus employed. It gives in the compass of a nut-shell a comprehensive conception of Mr. Wiman's character. Many insane men are plungers, emphatically plungers—men who precipitate themselves upon difficulties and dangers without pausing to count or to estimate the consequences; men who dive headlong into abysmal depths without any thought to inquire whither they lead, or what distance to the bottom. Men whose sanity, like Cæsar's wife, is above suspicion, are not plungers, and no one thinks of designating them as such. The case of Mr. Wiman, like every other case of the kind, ought to be judged, not by this circumstance or by that, accepted as a criterion, but as a whole. Insanity is not a simple fact, but a body of facts, no one of which, taken singly, proves the existence of insanity or anything else in particular Having carefully weighed all the facts connected with the case, one would be exceedingly reckless to say, as some editors have said: "There is no evidence of Mr. Wiman's insanity."

G. W. BINGHAM, M.D.

Waterloo, July 14th, 1894.

MONTREAL BOARD OF TRADE BANQUET.

On Saturday evening last, the delegates to the Colonial Conference were entertained by the Montreal Board of Trade, at a banquet in the Windsor Hotel. Nearly 200 gentlemen sat down. The viands and the decorations were admirable. Mr. W. W. Ogilvie, the president of the Board, occupied the chair.

In response to the toast, the Lieutenant-Governor, M. Chapleau delivered an eloquent speech in French. At the conclusion there were loud cries of "Anglais." Mr. Chapleau then said: You force me to enter very dangerous ground. The interior of Australia, as I have been told, is dangerous to travellers who venture into that country. Well, gentlemen, the dangers of the interior of Australia are not greater than the dangers I expose myself to in your language. (Laughter and cries of "No, no.") It is all very well for you to say so, but I feel as if I were in a straight jacket when I speak in English after speaking in French. . . . Mr. Chairman, I cannot refrain from expressing here a souvenir that comes to my mind at this present moment. It was under your auspices, and the auspices of the important body which you represent as their president, that I had to welcome here in the Province the coming of the worthy representative of Her Majesty. It was a good omen for me to be one of your guests then, and I trust it also was a good omen that I should be invited here to-day to our brothers from the Antipodes. . . . It has been Mr. Howell a good fortune, after fifteen years, in which he has always stepped at the frontier everything that was good and not very heavy duties, to let in free some of the best stock ever imported into the country. When I was connected with the Department of Trade and Commerce, I had not the good fortune of

City of Winnipeg Debentures

SEALED TENDERS marked "Tenders for Debentures," addressed to the undersigned, will be received at the office of the City Comptroller, Winnipeg up to 12 o'clock noon on Friday, the 3rd August, next, for the purchase of $85,700 of Debentures as follows: $18,000 6% maturing 8th January, 1900; $7,000 6% maturing 16th June, 1900; $6,700 6% maturing 24th Aug., 1901; $8,000 5% maturing 20th Aug., 1901; $14,500 5% maturing 6th April, 1911; $31,500 5% maturing 30th April, 1899; $5,000 6% maturing 20th Dec., 1910.

Interest payable in Winnipeg half yearly.

Tenders may be for the whole or part. No tender necessarily accepted. Further information can be obtained from the City Comptroller.

R. W. JAMIESON,
Chairman Sinking Fund Trustees.

Winnipeg, Manitoba, 11th July, 1894.

Tenders for City Debentures

CITY OF CALGARY, ALBERTA.

SEALED TENDERS Endorsed Tenders for Debentures, will be received by the undersigned up to noon of the first day of August, 1894, for the purchase of Debentures of the Corporation of the City of Calgary, Alberta, amounting to $10,000 in sums of $1,000, payable in thirty years from the first day of August, 1894, and bearing interest at the rate of 4½ per cent per annum payable half yearly, principal and interest payable at the Office of the Molsons Bank in the City of Calgary.

Tenders must state the price per that will be paid at the Molsons Bank in Calgary. Purchaser to pay interest to the Corporation at 4½ per cent. from the first day of August, 1894, to whatever time the purchase money is received by the Corporation.

The Corporation does not bind itself to accept any tender.

Mayor's Office,
Calgary, Alberta, Canada.
June 30th, 1894.

WESLEY F. ORR,
Mayor.

BRITISH COLUMBIA.

TENDERS FOR DEBENTURES.

SEALED TENDERS endorsed "Tenders for Debentures," will be received at the office of the undersigned up to 4 p.m. on the First Day of August, 1894, for the purchase of Debentures of the Corporation of the City of Victoria, B.C., amounting to $25,000, or its sterling equivalent at the rate of $4.86⅔ to the one pound sterling, in sums of £1,000 or its sterling equivalent as aforesaid, payable in fifty years from the First of August, 1894, and bearing interest from that date at the rate of 4½ per cent. per annum, payable half-yearly, with principal and interest payable as aforesaid, at the office of the Bank of British North America either in London, Eng., New York, U.S.A., or Montreal, Canada.

The Corporation reserves to itself the right to redeem and purchase these debentures on paying the amount thereof and the interest due thereon at the date of such purchase to the holder or holders thereof, at any time after twenty-five years from the date of issuance of such debentures.

The tenderer must state the price net at Victoria which he will pay.

In addition to the net price the purchaser will have to pay the Corporation the interest at 4½ per cent. from the 1st August, 1894, to whatever date the money is received by the City Treasurer.

The above debentures are issued under authority of "The Exhibition Loan By-Law, 1894," with principal and interest secured by a rate on all ratable land and improvements in the Corporation of the City of Victoria.

The Corporation does not bind itself to accept any tender.

abolishing the exaction of duties of imports from the Mother Country or the sister colonies. I hope you and Mr. Bowell will do the work in the next few years.

As the first magistrate of this province, I beg to extend the heartiest welcome to our distinguished visitors, and I am sure I express the deepest feelings of your hearts when I say that we in the province of Quebec anticipate the greatest good that we can as British subjects expect from such a visit, that is, imperial unity and the greater glory of our noble sovereign. In Australia, as we in Canada, they have arrived at that age when they have to decide whether they will continue as members of the old firm, or do business for themselves alone. They are in the position of the child who has grown up to manhood and looks round to see what he is going to do. If a desire was to be expressed by me it would be this: As in the old country we have firms that have been firmly established and have commanded the credit of the whole world for a long time past, I hope that the loyalty to the old firm may continue even if the child has grown to manhood. (Cheers.)

The Chairman.—We have now arrived at the toast of the evening, the health of the colonial delegates. The conference has proved already that blood is thicker than water and that charity begins at home. I think, also, it will bring before the Empire the great question before the "most favored nation," and I hope when that is taken into consideration the golden rule of "do unto others as you would they should do unto you" will be kept in mind.

Hon. Mackenzie Bowell, Canadian Minister of Trade, was asked first to respond, and made an address.

Hon. F. B. Suttor, of New South Wales, was the first of the foreign delegates to respond to the toast. He said: One indeed must be a hardened speaker not to be moved by the words which you have heard from your president. In proposing the toast of "The Queen" he looked upon this as a family gathering and as a breaking of bread between brothers. If that be so, and it is, who could we more properly break bread with than with your president, one of the greatest breadmakers in the world? (Laughter.)

For the first time, at Toronto the other night, I gave a few figures to show the importance of Australia and to make the people of Canada understand why we were worthy of their consideration from a trade point of view. I pointed out that the total trade of Canada was £44,876,616, and the total trade of Australasia was £84,651,488—(applause)—or, in other words, the total trade of Canada per inhabitant was £9 5s. 8d., while the total per head for Australasia was £22 0s. 6d. In these figures I do not include the trade between the Australian colonies. I do not give these figures to in any way disparage Canada, but to show the importance of Australasia, and I hope you will see it in that light. (Applause.) I am proud to say that the trade of Australia is, per inhabitant, greater than that of any other country in the world, except Belgium.

Sir Henry DeVilliers, of the Cape of Good Hope, after some introductory remarks, said:—I have often been asked since I arrived in Canada, "Why should the Cape of Good Hope have sent a representative to this conference; the subjects to be discussed were the Pacific cable and improved steamship communication between Australia and Great Britain, what interest have you in that?" My answer is that, though we may not have a direct interest in that particular subject, it is our interest to keep up the unity of the Empire. So far as the steamboat service is concerned, some people have said, "If you increase the steamship facilities between Australia and Canada, the Cape of Good Hope will be likely to suffer." Well, sir, these prognostications have been made before. It was said when the Suez canal was constructed that the whole of the trade would be taken away from the Cape, but the result has been exactly the contrary, and the commerce and trade of the Cape have been greater than ever.

It may be said, what have you to give us? Well, if I only mention lumber, I think I have mentioned a great deal, because wherever I go in this country lumber is seen on every side. The quantity you can supply us with is beyond alculation, and the quantity we can take is very great. Very few of you, perhaps, are aware of the enormous developments of the gold and diamond mines of the Cape. We have not sufficient lumber required for diamond mining purposes, and the last words Mr. Cecil Rhodes said to me before leaving the country were: "Mind you tell them that the diamond mines and gold mines of this country can absorb an enormous quantity of Canadian lumber." Agricultural machinery is also greatly required by us and is admitted free. These are two articles we can receive from you, but what can we give you back again? The chairman has told me only to-day that the difficulty is as to return freights. I hope that the time will soon come when your increasing wool industry will enable us to send you ship loads of wool from South Africa. Your growing prosperity will also make you want a great many more diamonds. We have plenty fruit, and we shall be able to send you fresh fruits at a time when you have none in this country. Mohair is produced by the Cape in greater quantities than in any other country in the world. The great exporting country has hitherto been Turkey, but the Cape has far outstripped Turkey in that respect, and as your manufactories increase that is an article which will be particularly required.

—"Notice Lushley at the banquet last night? Seemed to enter into the spirit of the thing freely." "Er—yes; but not so freely as the spirit of the thing entered into him.—*Buffalo Courier.*

Commercial.

MONTREAL MARKETS.

MONTREAL, July 18, 1894.

GROCERIES.—Sugars may be said to be firmer if anything. An advance of a quarter to three-eighths of a cent is reported in New York, and local refiners have been asked for quotations from Chicago and other American points. A settlement of the United States tariff question will likely be followed by an advance here. At the moment the refinery price of granulated is still 4 3-16c., and of yellows from 3 3-16c. up per pound. Molasses as last quoted. Japan teas by the second steamer are all forward, and are being fairly distributed. The buying in Japan is said to have slackened off, but the market rules firm. London advances say new blacks have met with a good reception. In coffees just a moderate movement is reported at 19 to 21c. for Rio and Maracaibo; Java and Mocha 24 to 29c. per pound. There is still a dearth of Valencia raisins, and there is a probability of some moderate lots being brought in from New York. The market in Denia has opened at about the same figure as last year, though it was expected that higher prices would rule. Currants are in fair supply at 3c. per pound for brls., cases, 3½c.; prunes, 5½c. Rice, $3.45 for A quality; English style, $3.35; Patna, $4; crystal Japan, $4.50. Canned salmon, $1.25 the general asking price, though it is said some French houses have been offering cases at $4.50 to arrive.

METALS AND HARDWARE.—Since last writing, Scotch iron warrants unaccountably declined to 39s., but subsequently recovered to 41s. 11d. Makers' prices are again cabled from sixpence to a shilling further advanced. Locally Summerlee pig is now held at $19.50, and Eglinton at $18.50 per ton, an advance of 50 cents; Carnbroe, to arrive, is quoted at $18. Some late small sales of American iron, No. 2, Niagara, are reported at about $17 net cash. Polished Canada plates have sold at $2.75.

Black sheet iron is rather easier, and one or two large lots have been sold at cut figures, but for ordinary transactions our quotations will hold. If the Scotch coal strike continues, it is expected plates generally will be affected by higher coal prices. We quote:—Coltness pig iron, none here; Calder, No. 1, $19; Calder, No. 3, $18; Summerlee, $19.50; Eglinton, $18.50; Gartsherrie, none here; Langloan, none here; Carnbroe, $18; Shotts, none here; Middlesboro, No 3, $17. Siemens pig, No 1, $16.50, Ferrona, No. 1, $16.50; machinery scrap, $14.50 to 15.00; common do., $10.00 to 12.00; bar iron, Canadian, $1.70 to 1.75, British, $2.25, best refined, $2.40. Low Moor, $5.25; Canada plates—Blaina, or Garth, $2.15 to 2.20; all polished Canadas, $2.75. Terne roofing plate, 20 x 28, $6.00 to 6.25. Black sheet iron, No 28, $2.40, No 26, $2.25; No 24, $2.10, tin plates—Bradley charcoal, $5.25 to 5.50; charcoal I C, $3.50, P D Crown, $4.00; do I X, $4.75 to 5.00. Coke I C, $2.85 to 3.00; coke wasters, $2.75; galvanized sheets, No 28, ordinary brands, 4¼ to 4½c; No 26, 4c; No 24, 3¾c., in case lots. Morewood, 5¾ to 6c.; tinned sheets, coke, No. 24, 6 to 6¼c; No 26, 6½ to 6¾c., the usual extra for large sizes. Hoops and bands, per 100 lbs., $2.30 to 2.35. Steel boiler plate, ¼ inch and upwards, $2.10 to 2.15; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.85; heads, $2.85; Russian sheet iron, 10½ to 11c.; lead, per 100 lbs., pig, $2.60 2.75; sheet, $4 to 4.25; shot, $6.00 to 6.50; best cast steel, 10½ to 12c.; spring, $2.50; tire, $2.50 to 2.75; sleigh shoe, $2.40; round machinery steel, $3; ingot tin, 17 to 18c.; bar tin, 25c.; ingot copper, 9½ to 10c.; sheet zinc, $5.00 to 5.25; spelter, $4.50 to 4.75; American do., $4.50 to 4.75. Antimony, 10½ to 12c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs.; annealed do., $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3½c. Coil chain, ¼ inch, 5c.; ⅜ in., 4½c; 7-16 in., 4¼c; ½ in., 3¾ to 4c; ⅝ in., ½c; ¾ in., 3½c.; ⅞ in., and upwards.

Oils, Paints, and Glass.—Wholesale trade is of a very quiet summery character in these lines. Brokers are finding it hard to get much enthusiasm up in new seal oil, but some few transactions have been put through it is said at the low figure of 32 to 34c. per gal. for large lots. For old stock 42c. is still being asked in a jobbing way for oil that cost last year 45 to 46c. Some supplies of new oil are near at hand. No new cod oil to hand yet; sales of Gaspe oil to arrive are reported at 30 to 32c. The fishing at Newfoundland is said to be excellent, and low prices are probable. Linseed oil is pretty firm at quotations, and turpentine is keeping pretty steady, the prices in the South being more closely regulated. Castor oil is easier, and is bought at 6¼c. per lb. in 5-case lots. Leads, glass, &c., present no new features. We quote: Turpentine, 46c. per gal. for single barrels;

St. John, N.B.

two to four barrels, 45c. Linseed oil, raw, 54c. per gallon; boiled, 57c.; 5 barrel-lots, 1c. less; olive oil, machinery, 90c.; castor, in cases, 6½ to 7c.; tins, 7½c.; Nfld. cod, 38 to 40c. per gallon; Gaspe oil, 38c. per gallon; steam refined seal, 42½ to 43c. in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00; No. 1, $4.50; No. 2, $4.25; No. 3, $4.00; dry white lead, 5c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 45 to 50c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50. Window glass, $1.20 to 1.25 per 50 feet for first break; $1.30 to 1.35 for second break; third break, $2.90.

WOOL.—An absence of activity is still to be noted. Mill-men have apparently no present pressing needs, and holders are not anxious sellers. What little business is being done is at the following figures: Greasy Cape, 14 to 15½c.; B.A. scoured, 27 to 34c.; Nor'-West about 12c.; domestic fleece, 17 to 20c.; pulled, 20 to 22c. per pound.

TORONTO MARKETS.

TORONTO, July 18th, 1894.

DRY GOODS.—Salesmen have been driving away all this week, and as a result trade has been about up to an average. But the requests made upon the wholesale houses for season's requirements are never large in June. The weather has been propitious to the retail trade, and the shelves of country dealers have been lightened somewhat of the heavy loads of summer goods which they carried a short time ago. About the fall trade there is little to say. Retail merchants evidently intend to let the jobbers carry their stock. A dry goods man returning from British Columbia reports trade as exceedingly quiet in the small towns of that Province; but that in Victoria, Vancouver and New Westminster there is more doing.

TORONTO STOCKS IN STORE.

The following table shows the stocks of grain in store at Toronto on Monday morning, July 16, and the corresponding week of 1893:—

	July 16, '94.	July 17, '93.
Fall wheat, bush.....	63,201	109,953
Red wheat "	nil	nil
Spring wheat, "	2,895	33,107
Hard wheat, "	17,906	9,982
Goose wheat, "	1,523	400
Oats, "	23,957	15,723
Barley, "	49,260	34,607
Peas, "	1,670	9,406
Rye, "	nil	nil
Corn, "	nil	480
Total grain, bush.....	160,412	213,748

The stocks of grain in store at Port Arthur on July 7th were 1,297,687 bushels. During the week there were received 81,744 bushels, and shipped 24,144 bushels, leaving in store on July 14th, 1,355,317.

GRAIN.—Although during the week some fluctuations have taken place, quotations with but one exception stand where they did a week ago. Wheat is depressed in the face of free deliveries of winter wheat in the United States. Some wheat has already been cut in Western Ontario and turns out well, samples of red winter weighing 62 lbs. to the bushel. Locally the millers have made moderately large demands upon stocks, and we learn of some rather large lots sold in Montreal for export shipment. A merchant, who is usually well informed, informs us that both oats and barley will beyond doubt be a light crop in Eastern Ontario. Some barley has already been cut east of Toronto. From present appearances the Northwest harvest will be a success, as the crop is fully a week or ten days in advance of its usual stage at this season of the year. Dry weather has, however, injured the crop in some districts. Oats are lower in price at 37 to 38c.; this decline is due to the near approach of the new crop.

These prices are wholesale by the car-load.

GREEN FRUIT.—Warm weather continues to bring out a good consumptive demand. Oranges are in but moderate request; prices show little or no change; the feeling, however, is somewhat firmer. Lemons have sold well; the New York market has eased off in face of a poor demand from the Western States, and although we are still drawing on stock obtained from Montreal in the spring, the feeling here in consequence is a shade easier. The week's receipts of bananas have been large, values as a result are on a lower basis; quotations vary from 75c. to $1.50 a bunch. Raspberries are plentiful, prices varying daily. Watermelons are more freely received, prices ranging from 20c up.

GROCERIES.—Some improvement in trade is noticeable this week. But although merchants are asking for goods, they are rather tardy in making payments. "If good men are asking for time," remarked a wholesale grocer, "what do you think the chronic renewal seekers are doing?" But taking everything into consideration, the advancing season appears to increase the volume of trade. Stocks of dried fruit, particularly of Valencia raisins, remain scarce. The coming month will bring with it the arrival of 1894 crops, and shipments will doubtless be hurried forward in order to supply bare markets. Valencia raisins promise to be an abundant crop. French prunes, from latest reports, are likely to show a large yield. Grenoble walnuts have every appearance of showing a shortage when gathered. Advices concerning Tarragona almonds are not favorable owing to damage received early in the season. Paper shell almonds, however, promise well. Last Friday refined sugars advanced ¼c. per lb. in New York; this has naturally caused a firmer feeling here, but quotations are not changed. The distributing movement to retail merchants shows larger volume this week in consequence of the advance of the fruit season. The following regarding the growing rice crop is taken from Dan Talmage's Sons (July) bulletin No. 3, rice crop, 1894: Present month and early August is the critical period of growth, and the question of moisture causes apprehension. Harvest will be generally late, but some arrivals may be expected from upper and lower coast in first half of August. Area planted, 147,500 acres. Total area present season, 197,500 acres, which under ordinary conditions should produce 7,900,000 bushels rough, equal to 625,000 barrels cleaned rice. Samples of new season's Moning Congou teas are now to hand, and cup qualities are fully as good as those of last year. The volume of movement of teas to the retail trade is thought to be quite up to the usual season's amount. The interest in canned goods is of course now all centered on the new pack. We have interviewed the secretary of the Canadian Packers' Association in regard to the quantity of fruit and vegetables already packed and the growing crops. He reports as follows:—Strawberries are now done; the pack has been a small one, and probably does not amount to more than one-quarter the usual quantity. From no one quarter comes favorable reports, although the best crops appear to have been in and around Norfolk county. June peas have not turned out well; in consequence of the hot weather they were ripened too quickly. Trenton and vicinity has probably fared best in regard to June peas, but the whole pack cannot be placed at over half the normal amount. Raspberries are commencing fairly well, but are suffering from drought. Pears and peaches promise well; corn and tomatoes are good in some sections, in other districts they suffer from lack of rain.

HARDWARE AND METALS.—On the whole trade is quieter than it was a week ago. However a fair number of orders have been received, principally for harvest tools, cradles, cut nails, hinges, and goods for building or repairs. The volume of business doing in general shelf hardware has fallen off, although the movement in tinware appears to show improvement. Wire nails find less demand. However a considerable number of dealers continue to send in orders for ½-ton shipments. Trade in wire is flat, while no one anticipates any immediate improvement. Some metals are moving freely, such as galvanized iron, black iron, sheet steel and tin plate. Other metals are selling but slowly, although some good sales of ingot tin and zinc spelter are reported. The plumbing trade is, so far as the country is concerned, slightly more satisfactory; but the city trade shows no improvement. The lamp goods trade begins to show some life, and orders are being received both for immediate and fall shipment. Sporting goods are being inquired after, but the actual movement as yet is small. Orders for fall supplies of tinware are being freely booked. Values have been exceedingly steady with but one exception. Rope shows an advance of ½c. per lb., which is the fourth advance made by manufacturers since May.

HIDES AND SKINS.—Trade has few features of interest. Hides are in fair request at quotations; sales of No. 1 cured have been made this week at 3½c. A fairly large supply of green lambskins are coming forward from the slaughter houses. On the 17th the usual advance was made, and lambskins now stand at 30c. and shearlings at 25c. Tallow is quiet, but steady, values remaining without change.

LEATHER.—Not many weeks will have elapsed before the fall season is with us, but notwithstanding this fact, the movement of leather, as reported by Toronto houses, shows little improvement, corresponding in this respect with that of Montreal. "Trade is a little better locally," said one dealer, "but that is all." The two large Ontario factories are cutting on fall goods, but their operations lack energy. Montreal shoe houses propose, we are told, beginning more active operations, and a good demand for leather may be expected from this quarter before long. English advices show nothing new. No leather is at present going forward in export. From all we can learn the output of sole leather is up to an average amount.

WOOL.—Toronto warehouses continue to receive large quantities of wool. The prices paid are: unwashed, 10 to 10½c.; rejects, 13 to 14c.; merchantable, 16½ to 18c. per pound. Reports from Manitoba and the Territories indicate free receipts of wool. The flock of the Canadian Agricultural Company, some 15,000 sheep, averaged about seven pounds per animal.

THE GREAT-WEST LIFE ASSURANCE CO'Y.
Head Office, Winnipeg.
The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:
First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.
Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.
Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.
Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.
Agents wanted in unrepresented districts. Application may be made to the Head Office, Winnipeg, or to
ALEXANDER CROMAR, Manager for Ontario.
12 King street East, Toronto.

SEE THE NEW o o o
Unconditional
Accumulative Policy
ISSUED BY THE
Confederation Life Association
TORONTO, ONTARIO,
It is a simple promise to pay the sum insured, in the event of death.
It is absolutely free from all restrictions as to residence, travel and occupation.
It is entirely void of all conditions save the payment of premium.
It provides for the payment of the claim immediately upon proof of death.
It offers six modes of settlement at the end of the Dividend Period.
It is absolutely and automatically non-forfeitable after two years, the insured being entitled to
(*a*) **Extended insurance,** without application, for the full amount of the policy, for the further period of time definitely set forth in the policy, or on surrender, to a
(*b*) **Paid up policy,** the amount of which is written in the policy, or after five years to a
(*c*) **Cash value,** as guaranteed in the policy.
Full information furnished on application to the Head Office or to any of the Company's Agents.

THE POSITION IN THE UNITED STATES.

In his last New York circular, dated 14th July, Henry Clews has the following about the railway strike and the financial position:—

In this case it has been seen that the arraying of the utmost force of organized labor could only end in a defeat that would widely discredit the union principle and emancipate industry from the disturbing rule of unions. The interruption of travel and transportation has been regarded as more a temporary postponement of railroad business than as so much permanent loss; and the destruction of property has been viewed as a charge upon the local governments which have failed to prevent violence, rather than upon the corporations that have been raided. Moreover, whatever minor forms of actual and uncompensated loss have fallen upon the railroad interest, it is felt to be a small matter in comparison with the offset accruing from the signal failure of the strike principle and the consequent future limitation of the union's power of disturbance. The firm attitude assumed by the Government in, for the first time, affirming that these violent methods of strike are fundamentally opposed not only to the rights of the citizen, but also to the laws of the United States, is an invaluable contribution towards confidence in the future immunity of our railroads and other large corporations as against the lawless interruptions of labor from which the country has suffered so much and by which the use of capital has been surrounded with very serious risks. In brief: Wall Street regards the struggle as the crowning battle between the employing class and the employed class, in which the former has regained its right to unobstructed freedom of contract in the employment of labor. The result of this victory is of no small value to the future stability of our industries; and the estimate put upon it is significantly expressed in the steadiness of the financial markets amid so much confusion.

Another result of much value to the railroads has come out of the strike. Under the past depression of business and the general fall in prices, the roads have felt the necessity of a general reduction in wages, and yet they have hesitated to enforce it lest it should produce a labor disturbance. They have now an opportunity of replacing their past employees, and are doing so upon a generally reduced scale of wages. A valuable opportunity has thus been afforded for the railroads conforming their scale of expenses to the general, and probably permanent, reduction in prices. Thus what has been dreaded as a possible great national calamity turns out to be a valuable contribution towards completing the process of readjustment which our material interests are now undergoing.

FRIENDLY SOCIETIES IN CANADA.

To even trace in outline the rise and progress of friendly societies in Canada would require more space than can here be allotted to it, and hence only very brief notes will be made. For some years the friendly societies in Canada have been undergoing a gradual evolution from mere benefit societies, whose payments were founded on donations to friendly societies with benefits founded on *contract* between society and member. To discover or evolve order out of this chaos has been no easy task. As yet freindly societies in Canada cannot be said to be more than assessment societies whose life assurance schemes are founded on what the president of the Institute of Actuaries in 1890 (Mr. William Sutton) called a "fallacious principle which had long ago been exploded in this country (England)." These friendly or assessment societies are of two classes—

(1) Those founded in connection with fraternal order.

(2) Those having no fraternal feature.

The former are not under Dominion Government supervision; the latter are to a limited extent, if doing business in more than one province. Both these classes differ from a regular mutual assurance company or society, in that the latter must be actuarially solvent, whereas a friendly society in Canada need only possess sufficient available assets to meet present liabilities.

Of the four non-fraternal societies coming under class 2 above, two found it expedient in 1892 to anticipate their natural fate by re-assuring in a similar, but stronger American assessment society. The Dominion Insurance Department supervises the business of societies under class 2 (native or foreign), which do business in more than one province, but it assumes no responsibility for, nor vouches for, their actuarial solvency; and such societies have by law to bear about in their literature and advertisements the opprobrious title "*Assessment System.*" Although called "assessment societies," nearly all of these societies of both classes have regular periods of assessment, and comparatively regular levies or rates. In many instances these rates approach to those of short-term rates of a regular company, but a great deal of controversy and misunderstanding prevails among the members of these societies and others as to the possibility and necessity of these assessment rates ever increasing. On this subject an educational process has been and is still going on.

The first attempt to deal with friendly societies in Canada in a comprehensive way is found in the Ontario Insurance Corporations Act, 1892, although various laws respecting benefit societies have been passed since 1850. But the above Act is the only case where an attempt has been made to regulate these societies, fraternal or non-fraternal. Of course this law does not affect societies operating entirely outside of Ontario. The general effect of the above Act, as regards friendly societies, has been to change them, so far as possible, from societies whose payments rested on donation, to societies with payments founded on contract.

All friendly societies undertaking insurance contracts in Ontario must now be registered on the "Friendly Society Register" of Ontario. Various clauses are enacted for the regulation and conduct of these societies, *e. g.*—

(1) The registration and classification of their contracts and accounts in a form approved by the Registry Officer.

(2) An annual "*bona fide* and business-like audit of its books of record and account," showing the actual assets, liabilities, receipts and expenditures, and the statement of the insurance fund or funds, and a copy of such summary statement shall be filed in the office of the Registrar," as well as furnished to the members or lodges.

(3) The investment of the surplus funds in specified securities.

(4) An official audit in certain cases by the Registrar.

(5) Penalties for falsifying an account or obstructing an official audit.

(6) The suspension or cancellation of the registration of a fraudulently conducted or insolvent society.

(7) Regulations as to foreign friendly societies.

(8) The exclusion of foreign assessment endowment societies, and the prohibition of the future incorporation of native assessment endowment societies.

The certificate of registry issued to a friendly society, or the reporting to the Insurance Department, does not imply any approval of the financial standing or basis of a society, as they are not permitted to make any deposit with the Ontario Insurance Department, which assumes no responsibility for their actuarial solvency. It may be stated that the Wives' and Children's Act, hereafter described, now applies in Ontario to friendly societies. The foregoing regulations only apply to friendly societies operating within Ontario. Societies whose operations are confined to any other province are not subject to these regulations.

INSURABLE INTEREST (ONTARIO).

The laws of Ontario are founded on the common law of England; certain Imperial statutes (prior to 1792); and provincial enactments. Among the Imperial statutes is the well-known Gambling Act of 1774 (14 Geo. III. cap. 48), which has been law in Ontario and remains so, except as modified by the Insurance Corporations Act (1892).

Section 35 (2) of the latter Act, reads thus:—"In order to render valid any contract of life assurance, the beneficiary under the contract, being other than the assured or the parent or *bona fide* assignee or nominee of the assured, or a person entitled under the will of the assured or by operation of law, must have had at the date of the contract a pecuniary interest in the duration of the life, or other subject insured."

Section 35 (1) removes the incapacity of a minor between ages 15 and 21 to make a contract of life insurance (either for his own benefit or for that of his father, mother brother, or sister), and he may now not only make such a contract but he may also give a valid discharge for a surrendered policy or other benefit thereunder.

Prior to the Insurance Corporations Act, 1892, a parent did not have an insurable interest in the life of his child, when a pecuniary interest did not exist.

Notwithstanding this, a large number of industrial policies on children had been issued in apparent ignorance of the law. Instead of exempting policies on children from the operation of the Gambling Act, 1774, as was done in the case of the Friendly Societies Act in England, the force of the above mentioned Act was modified in the Corporations Act by legalizing such policies for the future within certain limits as to amount and age. But existing insurances were not interfered with. Thus from ages 2 to 10, the amount of insurance that may be effected on children (where a pecuniary interest does not exist) is limited and gradually graded from $25 to $147. After 10 years of age, the restriction as to the amount of insurance ceases. According to decisions of the United States courts, it has been held that a parent has an insurable interest in the life of his minor child, especially where relationship is accompanied with presumptive or conclusive evidence of pecuniary interest, benefit or advantage from the continuance of the life assured. Accepting this wider view of insurable interest, the Insurance Corporation Act provides, section 35 (6):—

"In respect of insurance heretofore or hereafter effected on the lives of persons under 21 years of age, where such insurance has been effected by a parent upon the life of his child, such insurance shall not be deemed to be invalid by reason only of the parent's want of pecuniary interest in the life of the child."—*Life Assurance in Canada, by Frank Sanderson, M.A.*

MATCHES MADE OF PAPER.

Not many improvements are recorded nowadays in the manufacture of matches, says an exchange, but it has lately been proposed to substitute for the ordinary article a novel kind of paper arrangement, described as resembling in its general construction the coiled tape measure used by tailors. The coil thus employed is a roll of paraffin paper, enclosed in a metallic case, one end of the paper projecting after the manner of the tape measure, and at regular intervals on the paper are small points covered with an igniting substance. In practice one has only to give the end of the paper a smart pull, bringing the igniting point in contact with a small steel plate, and a light is struck which burns slowly and evenly, and on the roll being thus exhausted from use, a fresh one can be inserted in its place. Matches of this description can be manufactured with great rapidity and at very small cost.

CHINESE ORIGIN OF TEA.

Tea is spoken of as a famous herb in Chinese literature as early as 2000 years B.C., at which time its cultivation and classification were apparently almost as thorough and complete as it is to-day. One of the ancient legends says says that its virtues were accidentally learned by King Shen Nung She, the Chinese monarch who is also known as "The Divine Husbandman," who flourished 4,000 years ago. He was engaged in boiling water over a fire made of the branches of the tea plant, and carelessly allowed some of the leaves to fall into the pot. The liquid which he expected to come from the vessel simply as sterilized water was miraculously converted into an elixir of life by the accidental addition of tea leaves. Soon after it became highly esteemed in the Oriental cities, and was used as a royal gift from the Chinese monarchs to the potentates of Southern and Western Asia.

—A private cablegram received on Wednesday in Montreal says:—"London wool sales opening to-day. Australians, prices for merino, all descriptions, higher by 5 per cent. Capes, no quotable change. Large attendance and spirited bidding."

Sun Life Assurance Co. of Canada . . . . . .

Head Office—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

Brains and Capital

In every partnership there are two factors of great importance: the managing brain and the capital employed, and if death removes either, the business must suffer. It often happens that the brains belong to one man and the capital to another. If the manager dies the capital is worth less than before; if the capitalist dies and his capital is withdrawn, the manager is crippled. It is clear that each has an insurable interest in the life of the other because the profits of each depend in part upon the life of both. The firm should, therefore, take one of the Unconditional Policies of the Manufacturers Life, which are free from all restrictions as to travel, residence or occupation, and are **absolutely indisputable on any ground whatever after the FIRST YEAR.** Get the rates and all particulars from any of the Company's Agents or from Head Office.

WHAT IS THE 7% Guaranteed Income Bond
OF THE
North American Life Assurance Company ?

It is a contract that may be secured by the payment of 15 or 20 annual premiums, and should death occur within the period selected, the full face of the Bond becomes payable.

If living at the maturity of the Bond, the guaranteed cash value, as also the surplus, may be withdrawn, or a paid-up Bond (payable at death) taken out for its full face, and in addition a 7% Guaranteed Life Annuity secured; in which case the surplus is also payable.

Pamphlets explanatory of this admirable plan will be given on application to any of the company's agents, or to

DECISIONS IN COMMERCIAL LAW.

TURNER v. ISNOR.—The defendant's servant, while engaged in his master's business, was driving at a rapid pace down hill. The horse was a wild one, hard in the mouth, and difficult to control or check suddenly. The plaintiff's two children, aged respectively two and ten years, were playing on the road some distance ahead. The driver saw the children, but supposed that there was sufficient space to pass between them, and made no attempt to pull up the horse until it was too late to do so. Both children were run over and injured. The Supreme Court of Nova Scotia held that the servant had failed to exercise the degree of care that was requisite under the circumstances, and that the defendant was liable.

DOMINION BANK v. WIGGINS.—The Court of Appeal holds that an instrument in the form of a promissory note, given for part of the price of an article, with the added condition "that the title and right to the possession of the property for which the note is given shall remain in (the vendors) until this note is paid," is not a promissory note or negotiable instrument, and the holder thereof takes it subject to any defence available to the maker against the vendors.

REDFERN v. POLSON.—The shareholders of a dry dock company, in November, 1888, sold and transferred their buildings and plant, and also contracted that they would, within a year, transfer their charter by assigning all their stock to the nominee of the purchaser. A portion of the purchase money only was paid. The purchaser did not, however, nominate a person to whom the shares should be transferred, and the same were not transferred before this action, and in November, 1890, an order for the winding-up of the company was made. The liquidators of the company now brought this action to recover the balance of the purchase money and interest. The Court of Chancery decided that they were entitled to judgment for the same.

MOLSONS BANK v. HEILIG.—The plaintiffs sued the defendant as indorser of a promissory note made by Patterson Bros. It appeared that they held a number of notes of Patterson Bros. indorsed by various persons, and that they also held a mortgage from Patterson Bros. on certain lands to secure their general indebtedness. Before this action the plaintiffs had released and discharged certain of the lands comprised in the mortgage without the consent of the defendant; but, in consideration of such discharge, had received the full value of the said lands, and had applied the proceeds in reduction of the general indebtedness of Patterson Bros. Robertson, J., holds that the defendant as a surety was entitled to have credited, in reduction of his liability upon the note, a *pro rata* share of the amount realized by the plaintiffs on the mortgage, and also a *pro rata* share of the value of the security still in their hands, and there must be a reference to the Master to ascertain the same, and an order for payment by the defendant to the plaintiffs of the balance which should be found due from him after taking such account.

BISHOP v. NORWICH UNION FIRE INSURANCE SOCIETY.—A policy of insurance issued by the defendants contained a condition that "where any difference shall arise with respect to the amount of any loss or damage by fire, such difference shall, at the request of either party, be submitted to arbitrators," etc. A subsequent clause provided that no suit or action for the recovery of any claim should be sustainable "until after an award shall have been obtained, fixing the amount of such claim in the manner above provided," etc. The Supreme Court of Nova Scotia, held, that in absence of a request by the defendant, the submission to arbitration was not a condition precedent to the plaintiff's right of action. The policy contained a further condition that it should not cover unoccupied buildings, unless insured as such, and that if the premises became unoccupied, the policy should cease and be void, unless continued by indorsement of the policy. The buildings insured consisted of a house and two barns. The evidence showed, and the jury so found, that the house was only occupied a part of the time during the currency of the policy. Held, that there was not an occupancy of the premises insured within the meaning of the condition.

DOYLE v. PHŒNIX INSURANCE CO.—The plaintiff was general agent of the defendant company for Nova Scotia. The instrument appointing him contained the following provision; "Each party hereto may terminate this agreement by giving the other written notice to that effect, and the agent shall not be entitled to any commissions upon premiums collected or received after the expiration of such notice," etc., etc. The company having terminated the contract without previous notice, the plaintiff claimed damages. The Supreme Court of Nova Scotia, held, that either party was at liberty to terminate the contract at a moment's notice.

TRADE MARKS.

There are two standards by which industrial progress may be judged. Most people consider the question from one point of view only They compare relative prices, while relative values are not taken into account. Manufacturers appear to be straining every nerve to produce cheap goods, and in the race not unfrequently overlook the question of durability or utility. The questionable economy of using cheap goods has often been discussed; the questionable advantage of making and selling cheap goods is not so often the subject of investigation. The inventor seeks to produce a machine that will lessen the cost of production, and his handiwork is constantly replacing human labor. Against this we have nothing to say. Every saving in energy, although it causes temporary distress among the displaced laborers, must result ultimately to the general good. What we wish to point out is the desirability of inventive genius seeking to raise the quality of goods, as well as to cheapen their production. There is money for the manufacturer in making goods of superior quality. One of the essential points in building up such a trade is the use of trade marks. Give the object a special name that the public can easily remember, introduce it by judicious advertising and rely upon the quality of one article to sell another. Seek to have the people ask for your brand. For if no particular make be requested, the merchant will prefer to sell an article, probably of inferior quality, upon which greater profits can be made.

No one must sell the Queen's uniform. An ex-member of the Montreal Garrison Artillery was a prisoner in the Police court at Montreal on Friday last, charged with selling the property of the Government, namely, a service cap, a serge tunic and a pair of pants, value eight dollars. He was found guilty, and sentenced to pay a fine of $10 and costs or go to jail for twenty days at hard labor

Mercantile Summary.

THE Eastern Townships Agricultural Association intend to hold their annual exhibition in Sherbrooke in the beginning of September.

FIVE per cent. Fredericton, N.B., debentures, with thirteen years to run, which were issued to retire other debentures falling due, realized four per cent. premium.

JUDGE DUGAS, of Montreal, held last week that nickel-in-the-slot machines in saloons constituted gambling, and fined one saloon-keeper on a test case $75 and costs, or three months.

C. F. C. BURPEE, of St. John, brother of the late Hon. Isaac Burpee, died at Calais, Maine, the other day, after a short illness. He was 62 years of age.

WE learn by circular from the secretary, Mr. A. B. Mackenzie, of New Westminster, that the Royal Agricultural and Industrial Society of British Columbia will hold its annual fall show on Tuesday, Wednesday and Thursday, 9th, 10th and 11th October, 1894. Entries close Monday, the 2nd October.

A NEW money order system has gone into effect at all post-offices in the United States for sending money in letters at rates much lower than heretofore. Orders for $2.50 or less can be had for a fee of only 3 cents, and orders for large amounts up to $100 at rates graduated up to 30 cents.

Mercantile Summary.

THERE is to be an inspection of the R. & O. Navigation Company, Eastern Division. The directors of the company left a week ago by the Quebec boat to make an inspection that should be very thorough and cover everything, even to the simplest ticket agencies.

THE harness shop of D. L. McRitchie, at Scotstown, Que., has been sold to Dan. McKenzie, who has taken over the stock-in-trade and good-will of the late firm; and in future the business will be carried on by D. McKenzie & Co.

IT is stated by the St. John *Globe* that the Caribou Gold Mining Co. proprietors have secured seven of the best gold mining properties in Nova Scotia, including Truro, Caffrey, Huntington, Dixon, Toquay, Amherst, and Bruce, covering about 1,000 acres. Four of these have already quartz mills in operation. The Caribou company has been organized, with headquarters at Halifax. The following officers were elected: President, D. McLellan, St. John; vice-president, N. Curry, Amherst; secretary, M. Cunningham, Amherst; solicitor, W. H. Covert, Halifax; directors, Messrs. McLellan, Pugsley, Blair, St. John; Longley, Cunningham, Curran, Sircom, Halifax; J. L. Jennison, New Glasgow. The capital stock is $500,000.

Mercantile Summary.

THE appropriate name for a sleeping car on the Intercolonial Railway is "Baddeck." It instantly suggests blue mountains, salt sea air, fishing in Cape Breton, Charles Dudley Warner, and amusement. The car bearing this name is newly upholstered, fitted with electric light, and the buffet is replenished often.

THE Montreal dry goods firm of W. H. Merrill & Co. has been served with a demand of assignment; liabilities $4,217. Mr. Merrill was one of the firm of H. & H. Merrill, who at the time of the American war were probably the largest retail importers of expensive dry goods in Canada.——The direct liabilities of T. W. Ness & Co., electrical goods, Montreal, whose failure we noted last, are figured at $31,000, indirect $13.000. A meeting of creditors is called for the 30th inst.

SMUGGLING rum, even if it be good rum, will not be permitted. For the first time in years the Montreal Customs authorities libelled a vessel so charged. The captain of the "Margaret Mitchell" had brought, besides his cargo of molasses from Barbadoes, some twenty gallons of fragrant and strengthful rum, and selling this liquor to captains of other vessels in port. What will be done to him, we are not told, but his Montreal agents had to put up $400 to get the vessel released.

Sole Agents for Canada for PRIESTLEY'S well known DRESS FABRICS and CRAVENETTES.

Mercantile Summary.

MR. LEWIS E. THOMPSON, of Santiago, Chili, has been appointed commercial agent in that country for the Dominion of Canada. We are told that Mr. Thompson is a Canadian who went to Chili years ago in the interest of the Waterous Engine Works Company. He is now established as a commercial agent, and will put his services at the disposition of any Canadian manufacturers.

IN the Province of Quebec, outside of Montreal city, the week's failures are as follows:—C. O. Champagne, a grocer, at Sorel, has been served with a demand in insolvency, and has debts of about $1,500.——E. Auclair, a grocer and butcher, at St. Vincent de Paul, has assigned on demand. He owes a good deal for the extent of his trade, some $9,146, much of which is apparently due to relatives.——The noble red man figures on the list this week in the person of Oroniatakon, alias L. M. Jocks, who is a general storekeeper, Caughnawaga, who is declared an absentee, and the Court has ordered a meeting of his creditors.——E. Provost, carriage builder, Actonvale, has made assignment of his estate, and shows debts of $4,013, $1,950 of which is hypothecary.——E. G. Davidson, who has been hotelkeeping, at Magog, little more than a year, is insolvent, owing $2,246——T. Thibaudeau, a peddler and small storekeeper, of Deschambault, is offering his creditors 25 cents on the dollar.——P. E. Beaulieu, in general store business, at Ste. Flavie, and previously a section foreman on the Intercolonial Railway, has made assignment of his estate. He owes about $6,000, and shows a deficit of $1,000.

Is it possible for wheat to go lower? The price of July wheat in Chicago on Saturday last fell to 52½c. a bushel, the lowest on record.

At a special meeting of the stockholders of the Central Vermont railway, last Saturday, Mr. Charles Percy, treasurer of the G.T.R., was elected a director, in succession to Mr. Robert Wright, the late treasurer.

M. Fitzgerald, of Merrickville, Ont., who left the farm just about ten years ago to take up hotel-keeping, has had to assign.——M. Sauve & Son, of Brockville, Ont., well known as boat builders, have also assigned.

The lake steamer "Selwyn Eddy" reached Chicago on Tuesday with the largest cargo of coal ever brought into the Chicago river. It was 4,252 tons, beating that of the steamer "Alva" last week of 3,972 tons. The "Eddy" drew full 16 feet of water.

From the Winnipeg *Free Press* of Friday last we learn that the sixth of the C.P.R. excursions from Ontario brought some 550 people into that city. Many of these were to remain in the city for the exhibition week, whilst others would go to various points of the province.

Henry Yates, a well-known citizen of Brantford, died on Sunday last in his 73rd year. Mr. Yates was long chief engineer of the G. T. R., afterward known as one of a successful firm of contractors, Yates & Stratford. He was an Englishman of the downright stamp, a participant in discussions at annual meetings of one or two Canadian banks, and a great lover of Canada.

Recently the wife of Wm. Walsh, clothier, in Winnipeg, who traded under the style of Walsh & Co., obtained judgment against him for $11,370, and put the sheriff in possession of his premises. Beside this there are three or four judgments amounting to $7,390. As expected, the position of the wife in this matter is unfavorably commented upon by other creditors.

In October last J. Welch opened a general store at Apsley with little or no capital. He gave a chattel mortgage for $1,860 on his stock of $2,000. Under these circumstances no one need be surprised to hear of his assigning, which he has done to Henry Barber.——An assignment has been made by J. F. Allan & Co., general storekeepers at Copleston. Mr. A. bought the stock of his father-in-law, who failed five years ago, and claimed a surplus of $2,000. But it is evident from the above that he never made any progress.

A bailiff has sold the grocery stock of Mrs. Elizabeth Collins in Hamilton. She cannot owe much.——An offer of compromise at 40 per cent. is made by S. & J. Armstrong, of McKellar.——Last week we noted that J. Shaffer, general storekeeper, was pressed by creditors. Now we hear of his assignment to Richard Tew, with liabilities of $2,500 and nominal assets of $6,000.——John Armstrong, grocer at Peterboro, who assigned two months ago, now offers creditors 25 per cent.

A dry goods man, at Pembroke, Ont., named Thomas Clark, is reported to be seeking a settlement at 60 cents on the dollar, in quarterly payments over twelve months. Liabilities about $7,000. Mr. Clark has been in business some 25 years; but with a very small measure of success, as it is reported that he has made a settlement at least twice before at 75 cents and 60 cents respectively, within six or seven years.

The less important Montreal failures for the week include the assignment of George Eadie, crockery dealer. He obtained an extension in April, 1893, and again sought the indulgence of creditors last spring, but has had finally to close up altogether.——Philias Lapierre, who has done a small tailoring business for about two years, has assigned.——J. Frappier & Co., grocers, have done likewise. Liabilities, $958.——Cyrille Sicotte, a contracting builder, has been served with a demand in insolvency. He compromised $5,800 of liabilities in 1890 at 25 cents.

From six hundred to a thousand persons arrive at Yarmouth every week from the United States by the Yarmouth line of steamers. Pondering this fact, the shrewd folk of that live Nova Scotia town, among them L. E. Baker, Robert Caie, W. L. Levitt, A. W. Eakins, S. A. Crowell, Hugh Cann, and John Levitt spent $75,000 in erecting the Grand Hotel, which was opened for business last week. It is hoped and expected that this commodious hotel will be a favorite resort for the best class of travel to Nova Scotia. It is described as well arranged and handsome, and Mr. Wilson, the manager, will see the i mportance of its being well conducted.

We note the following late Nova Scotia failures: G. A. Beales, a farmer, who started in the confectionery line at Mahone Bay in 1892, has assigned.——William Stoddard, trader, at Falmouth, has likewise turned his estate over to the assignee.——At New Glasgow, D. A. McLeod, grocer and butcher, is reported failed. He was unfortunate before in 1891. ——R. Pratt, grocer, of Wolfville, is endeavoring to get a settlement at 30 cents on the dollar. The liabilities are $6,000 to $7,000, with assets of about $3,500.——At Digby, Tim O'Connell, trader, has made an assignment.

H. P. Labelle, the failed Montreal furniture manufacturer, has made an offer of 20 cents. In the face of a claimed surplus in January last of $40,000, this seems incongruous. The estate will be wound up.——The offer of 25 cents on the dollar made by the failed firm of Marsau & Brosseau, hay exporters, Montreal, has not been accepted by all the creditors, and their assignment is now announced. The liabilities foot up to $192,000.

A compromise has been arranged at 65 pe cent. secured, by D. M. Walker & Co., stationers, St. Catharines, payments spread over one year. They owed about $15,000.——After a year or so in the shoe business, Fred W. White, who traded at Harrow, under the style of his brother, Geo. H. White, has assigned. ——N. Wilson & Co., dealers in men's furnishing goods, in London, have made a second assignment. The first time the estate only paid ten per cent. This time he trades in his brother's name, Thomas, the money to start with being borrowed from his father, who unhappily mortgaged his property. They had a stock of $3,000, but the business has been somewhat neglected.

A feature of the week in Toronto business circles is the intended re-organization of the wholesale grocery firm of Eby, Blain & Co. Application has been made to the Ontario authorities for power to form a joint stock company, under the style of Eby, Blain & Co., Limited. Capital $150,000, in fifteen hundred shares. The applicants for the charter are the old members of the firm: Messrs. J. F. Eby and Hugh Blain; Messrs. J. W. Borsberry, R. W. Ritchie, J. H. Devany and John A. Milne, who for many years have represented the house on the road; Mr. W. H. Seyler, head salesmen, and Mr. Chas. C. Bennett, accountant, together with Mr. W. J. McMurtry, the popular manager of the Mutual Reserve Fund Life Association. The provisional first directors of the company are to be Messrs. Eby, Blain, Mc Murtry, Seyler and Bennett. It is a very interesting circumstance that the most prominent of the employees of Messrs. Eby, Blain & Co., some of whom have been with the house for periods of six to thirteen years, become mem-

bers of the new company and put money into it. This shows their faith in the prosperous future of the business. The members of the company possess the requisite qualities to build up a business, and the firm has always been known for its probity and enterprise.

AFTER being engaged here about nine years as milliner, Mrs. Mackay has got behind with her payments and the bailift has taken possession of her premises.——J. D. Oliver, who, in February last, assumed the liquor business carried on for years by Gianelli & Co., in Toronto, assigned to E. R. C. Clarkson, owing $3,519 direct, $4,207 secured, with assets of $9,074, thus showing a surplus of $1,400.

AMONG the measures assented to at Ottawa during the session closed on Monday last is the incorporation of the St. Clair & Erie Ship Canal Company, which proposes to build a canal across the county of Essex to connect Lake St. Clair with Lake Erie, and thus avoid the navigation of the Detroit River and save about 110 miles in distance. The charter provides that as soon as $500,000 capital has been subscribed, and $50,000 paid into some chartered bank, a meeting of the stockholders shall be held at Toronto, and the company organized for business. The estimated cost of the canal is as follows: Excavation, $2,800,000; bridges, $240,000; other work, $160,000; total, $3,200,000. An issue of $4,000,000 worth of bonds will be made as soon as the company organizes, and it is said that they have already been "placed." Four different railways will be crossed, with which traffic connections may be made. It is expected that complete arrangements will be made so that work may be vigorously pushed early in the spring. On Saturday last the gentlemen whose names follow are incorporators of the canal scheme, the Act incorporating which has passed the Canadian Parliament, met at the Russell House, Detroit: William C. Baxter and Winfred C. Porter, of Minneapolis; L. Frank Lukens, of Milwaukee; Charles T. Towne, of Duluth; Edmund G. Arnot, of Brooklyn; David Tisdale, of Simcoe, Province of Ontario, and D. Farrand Henry, of Detroit. We hear that several Detroit capitalists were invited to the meeting to hear a presentation of the scheme, and that they will put money into the company. The prospect of the canal is making something of a flutter in the western part of Kent and the east of Essex.

THE sudden departure, across the border, of Donald G. Stephenson, lumberman and warden of York county, was a great surprise to his many friends and creditors. He left his home in East Toronto, ostensibly, to go to Orillia, about ten days ago; but he explained to an acquaintance, whom he chanced to meet at Niagara Falls, that he had missed his train and concluded to cross the lake. It was well known by a few of his friends that he was heavily involved, but no person supposed he had done anything criminally embarrassing. So far the worst that is known is that he made free use of notes that were obligingly signed in blank, and in one instance the maker of these finds that he owes over $7,000 when he deemed himself liable for only as many hundreds. Not a few persons who can ill afford the loss have cause to regret the trust they implicitly reposed in Stephenson. He has spent his whole lifetime in the neighborhood, did a great deal of conveyancing, was in many instances legal and general adviser in all matters of difficulty, and was a general repository of the business affairs of nearly all the old neighbors. Being reeve of the village since its incorporation he took an active part in advancing its interests, becoming president of the Scarboro Electric Railway, etc. Public and other affairs, however, engrossed his attention so much of late that his business was sadly neglected, and he has made but little out of it. Unfortunately his books, while they show his sales, etc., give no information as to his financial condition. Having a splendid memory, he kept no paper record of his liabilities which will probably reach $50,000, and his nominal assets possibly half this sum. Before leaving he assigned, leaving it with his clerk, and dating it one week ahead.

THE SITUATION.

Tariff legislation had better success at Ottawa than it has so far had at Washington. The reduction was made by the same political party that made the increase, in response to a general demand for tariff reform. Resistance came from the protected interests, as was to be expected, and the measure was less comprehensive as it passed than in its original form. If a sweeping change, at a single blow, be possible, it can only come through a change in the positions of the dominant and the subordinate parties; but such a revolution would not probably bring with it all that it seems to imply. A change from a high to a low tariff must be gradual, if disaster is to be averted. The other principal measure introduced by the Government, the insolvent bill, failed to pass. The obstacles in its way were in the questions whether it ought to include farmers and what rate of composition ought to entitle to a discharge. The insolvent bill will reappear, and the old difficulties will again present themselves. It cannot be said that either side of the controverted questions has gained visibly on the other, through the discussion of the measure, during the session.

War is reported to have broken out in Corea, between Japan and China, both of which have certain treaty rights to interfere in the affairs of the native government. England will not take part in the trouble unless forced to do so by third parties prejudicing by their action her interests. It is not probable that any other European nation will become involved in the dispute; but if any should, there is no saying where the conflagration would spread. The different nations interested have sent vessels of war, some one, some more, to the scene of action. Even the United States, which can only have the interests of a few resident citizens to guard, has spared two from the Behring Sea fleet.

Two questions of international fishery practice, one general, the other particular, are before the public. The particular one is the arrest of another American fishing vessel near the mouth of the Detroit river, for violation of the fishery law. As she belongs to a fishing company, the presumption is against her. The general question arises out of a provision of the Canadian law, that American fishermen who use the rod and line in our waters must take out a license at a cost of $5 each. It is pointed out by the objectors that no similar exaction is made on Canadians when they fish with the same implements in American waters. But if we compare things which are unequal, for the purpose of demanding equal treatment, we are evidently on false ground. At first blush, it seems a churlish thing to charge the citizens of a neighboring nation $5 for a license to fish with rod and line. But it is a necessary precaution to prevent destruction of the fishery. We found that our best fisheries were in danger of being depleted, and, in pure self-defence, we were obliged to have recourse to precautionary measures. We would much prefer that no such necessity existed and that we were not obliged to do what can so easily be made to appear in an invidious light; but necessity controls, and we perforce obey. The comparison of rod fishing privileges relates to one rich fishery in course of being seriously reduced, and another in a far greater stage of decline. We trust that, under like circumstances, we should not show ourselves less generous than our neighbors, but the circumstances are not similar.

Mr. Charles E. H. Vincent has interpellated the British Government, in the House of Commons, on the question of the treaty obstacles to preferential trade within the Empire. What he wants to know is whether the stand taken by the colonial conference at Ottawa will lead to the removal of those restrictions. He could not have expected a direct and immediate answer to the query. The reply of the under secretary for the colonies, Mr. Sidney Buxton, was, that the report of the proceedings of the conference by the Earl of Jersey, when it arrived, would receive due consideration. It is not impossible, perhaps not improbable, that something will be done that will permit the colonies to make preferential trade arrangements among themselves, not to the exclusion of Great Britain. But if the colonies preferred the mother country to foreigners, they would be apt to ask that she should reciprocate; and this, we take it, is precisely what her interests will not permit her to do. Will the colonies grant to her a preference without reciprocation? This is doubtful, and it is probably just here that trade preference within the empire will fail to put to test of actual experiment.

The political managers at Hawaii have gone through the form of another revolution. They have changed the name of their management from a Provisional Government to a Republic. They are still said to keep in view future annexation to the United States. Just before the change was made, the story was set afloat that England was intriguing to gain some advantage in the islands. When, more than half a century ago, an independent government offered the islands to Great Britain, she refused the gift, and has never since shown repentance for that act of abnegation. The United States executive does not want the islands, but it cannot be said that Congress sympathizes with this view. If the sugar speculators can get their way by buying up a senator or two, they might consent to increase their outlay somewhat to complete the annexation, if it suited their purpose, for the time being.

Free coal and free iron ore have proved to be the rock on which the Wilson tariff bill is stranded. Senator Gorman, the author of the bill having done his best to wreck the tariff policy of the Democratic party, of which he is a member, finds it convenient to turn attention from his own act by a violent attack on President Cleveland. The charge made is that, as the changes were made by the Senate, the President privately assent-

ed to them, rather than have no tariff bill at all, and that after doing so he wrote a letter to Mr. Wilson, expressing his dissatisfaction. Gorman called on other Senators, said to be seized of the facts, to corroborate his statement. As Senator Hill points out, this proceeding was in the nature of an impeachment, at once formal and informal, of the chief magistrate, whom the senator for New York magnanimously defends against the attacks of the conspiring Senators. The man who shows to the greatest disadvantage in this business is Senator Gorman. His objection is to free coal and free iron ore, and he claims that duties ought to be put upon them for revenue purposes. But the President has all along taken the ground that raw material ought to be free: of the soundness of this policy there can be no doubt. Senator Gorman's extreme violence in his attack on the President goes far to show that he felt himself to be in the wrong. The attack on the President brings out in full force a striking anomaly in the American constitution. The President may recommend Congress to pass legislation of a nature which he specifies; if he may express an opinion by message to Congress, why not verbally? An opinion privately expressed can scarcely be held to be official; and if senators may consult him on questions of legislative policy, is he to be condemned only for answering their questions when he fails to agree with them? If the tariff bill be wrecked, on Senator Gorman and his fellow conspirators, and not the President, the responsibility must lie.

It is a curious fact that Senator Gorman bases his opposition to free coal on a mistaken notion to the facts. His story that the company which controls the principal coal mines of Nova Scotia pays a royalty to the Government of Canada is entirely devoid of truth, and the theory he builds upon it, that free coal would enrich the Government of Canada at the expense of the United States, is false in two particulars: false in the assumption that the Ottawa Government would profit by the coal output of Nova Scotia at all, and false in the theory that free coal, which is essential to manufactures, could injure the United States. On these grounds all Senator Gorman's opposition to free coal is based, and as they exist only in the imagination, the justification offered for his action is without value.

A prominent organ of commercial opinion in England, the *Economist*, in dealing with the resolutions of the Intercolonial Conference, states emphatically that trade preference within the Empire is "a policy which it is quite impossible for this country [England] to acquiesce in." The argument is used that the extent of the trade of the colonies represented is, with the exception of Canada, so small as to have very little to divert in a new direction. As for Canada, it is alleged that her tariff, whether intentionally or not, does press more heavily on British than on American products; but, it is pointed out, her remedy could be found in a simple alteration of her tariff. If the fact is so, there is no design about the discrimination, it is purely accidental. As for the imposition of a discriminating duty to be applied to the defence of the Empire, the remark is made that the two objects—revenue and the shutting out of foreign trade—are incompatible. This objection goes too far, for its obvious that, within moderation, both these objects could be attained. Objection is taken to the inequality of the scheme; under it "only about 24 per cent. of the colonial import trade would be subject to the tax," while nearly 72½ of the Imperial import trade would be laid under contribution. "What we are asked to do," the *Economist* puts it, "is to quarrel with the nations who last year took no less than $198,029,000, or fully 71½ per cent. of our products, in the hope that we may increase our trade with the colonies by supplying them with a fraction of commodities they now obtain from foreign countries." The desire of Canada to increase her direct trade with Australiasa is admitted to be "a perfectly legitimate aspiration;" but, the *Economist* asks, "is it reasonable that we [England] should grant a subsidy" for the purpose of enabling Canada to divert the intermediate trade from us?" This is, perhaps, the average British view of the matter, not however universally accepted.

BANKING REVIEW.

Having given last week the figures of the Canadian Bank Statement for May and June, it is not necessary to discuss at any great length the comparative position. While there is no noteworthy difference between the totals of the return as compared with the previous month, it may be of passing interest to compare them with those of the previous June. There is a decrease of $3,000,000 in circulation; an increase of $5,000,000 in deposits, which are now almost $186,000,000. But at the same time there is a decrease of nearly three millions in loans and discounts. The statement is on the whole indicative of dulness—a shrinkage in the volume of trade. Evidently the banks find it less easy to lend their money with reasonable safety in commercial channels either in Canada or the United States. Hence they are naturally driven to invest in bonds or debentures, an increase of securities of this sort held being observable in the year to the extent of $4,278,000. We may remind our readers that at the close of June last year matters in the United States were by no means in a normal condition. The financial difficulties of our American neighbors had begun in May, and by the 1st July some effect from them had begun to be felt in Canada. We append our usual abstract:

ABSTRACT OF BANK RETURNS.

AN ASSESSMENT LIFE FAILURE.

Our readers were told some weeks ago that an investigation was being made into the affairs of an assessment body, the Canadian Masonic Mutual Benefit Association, of London. The investigation was a lengthy one, the hearing at Toronto being adjourned from time to time, to allow the officers of the association to produce more and still more evidence. But the result has been that the Registrar of Friendly Societies has given judgment under date 19th July, revoking and cancelling the certificate of the association. Thus, by operation of the Ontario Statute, the association is dissolved and its assets will be distributed to beneficiaries. We are informed that Mr. Andrew Ellis, of London, Ont., late secretary, has become receiver, subject to confirmation in that office by the High Court of London.

The Canadian Masonic Mutual Benefit Association has been in existence for more than twenty years, and during its first dozen years the deaths of members numbered 226 per 1,000 members. According to the calculations of Mr. R. Lewis, its president, these deaths did not cost the members $226 each $1,000, because some of the deaths were paid for out of the reserve formed by the company presumably from admission fees and expense contributions. Referring to the cost per member, Mr. Lewis told us in 1886, that "it has not, in any one year, exceeded $15 per thousand, and it is not likely to do so in the future." How grievously mistaken Mr. Lewis' estimate was appears in the record of subsequent years. According to the evidence before the Registrar, the mortality went up to $30 and even $40 per 1,000. And some of the oldest members had paid in $600 and $700 each. To-day, in their old age, they cannot get fresh assurance, and have nothing to look forward to but their share of the $75,000 reserve. What that will be when divided among 1,300 members may be ascertained by a sum in simple division, perhaps sixty dollars apiece.

It is held by the Registrar, we understand, that the recent division of the members into two classes (because of the dissatisfaction caused by frequent assessments), was not legally binding, and that consequently Class B has no legal status. Hence all members are on the same basis. It is worth while to remark here that under the arrangement proposed by the management Class A was left to a practically unlimited assessment, while Class B was to be let off with a fixed premium, which, we may add, was totally inadequate. Indeed the practical effect of framing Class B was to hive all the old men in Class A.

It is almost ten years since (8th August, 1884) we used the following language about this very company, among others, when giving tables of membership and deaths in five assessment societies on this continent: "These figures should be carefully examined in order to note the rapid increase in members so long as the death losses called for less than $10 or $12 on each certificate of $1,000, and then the decline of membership as the cost went up to $15 or $20 or $30." The table showed that in the Masonic Mutual Benefit the figures varied as under:

Year.	Average Members.	Number of Deaths.	Cost per 1000.
1872-3	1,740	14	$ 8.04
1874	1,960	16	8.10
1875	2,250	26	11.50
1876	1,944	25	12.80
1878	1,603	20	12.40
1880	1,475	27	18.31
1883	1,492	26	17.40

Thus the membership increased in the years 1874 and 1875, but declined from the year 1876 onward, while the cost rose in three-year periods to $10.80—$10.83—$15.30—$17.40. And in still more recent years the membership grew less, being 1,401 in the year 1886, and 1,304 in 1887, and only 1,397 in 1894, while the assessments grew so heavy as to call forth the protests of members and finally the action of a Government official, which has resulted as described.

What this journal said in 1884 we repeat now: "To every man of sense, or of conscience, who is connected with an assessment life association of any sort, we say—separate yourself at once and forever from the delusion. Wash your hands from the guilt of enticing innocent people by your example into dependence upon such a rope of sand for the support of their families in the hour of need, thus causing them to neglect reliable insurance until too late to procure it."

It is agreeable to learn that there is no evidence of intentional wrong-doing in the conduct of this association. Mr. Lewis, the president, is a respectable man, and the worst that can be said of him is that he and his associates, being wedded to a vicious principle, showed wonderful perseverance in a mistaken direction. Sympathy must be felt for a large number of good members of the ancient and honorable craft who are now from 50 to 70 years of age, have lost nearly all the hundreds of dollars they paid in and are unable to get legitimate life assurance for their old age.

COUNTERFEIT LIFE INSURANCE.

THE RECORD FOR TEN YEARS PAST.

In our issues of August 4th and 11th of last year, and previously for several years, we have given a compilation showing the membership and the cost of certificates in a large number of assessment societies. In 1892 the number of such societies, of which figures were given for the eight previous years, was fifty-six. Last year, sixty were embraced in the tables. This year we give the record of fifty-nine societies. In most cases this record extends over ten years past, thus presenting the best retrospect of so many, and of such prominent societies, that has ever been brought together in so brief a space.

In this list will be found the interesting record for ten years past of eleven Grand Lodges of the A.O.U.W., including that of Ontario. Also of the Legion of Honor, the Chosen Friends, Covenant Mutual, Knights of Honor, Maccabees, the Mutual Reserve Fund, N. W. Masonic Aid, Royal Templars, and Royal Arcanum. Many of our readers will probably be interested in the condition and prospects of one or more of these leading exponents of the assessment system, and will carefully preserve this compilation for future reference.

As explained before, the column headed "Cost per $1,000" in the following tables, embraces a uniform addition of $4 for working expenses. Some societies bring their expenses within that amount, but many exceed it. To compute accurately the expenses of each society separately would be an almost impossible task. In many cases the information is not to be found in the official reports. The two important features of this return are the increase or decrease of the membership, and of the mortuary calls. These seem to bear a sympathetic relation to each other. As the societies grow older the assessments increase and the membership soon afterward commences to stand still, then to decrease for a few years, and then there is the sudden collapse. So long as an assessment society is young, and many young men are induced to go in, it continues to float gaily upward like a balloon. But a time soon comes when it is no longer so cheap as it was, and the members sigh in vain for the good old times of $6 or $10 per $1,000 as their share per annum, and as $12 and $20 and $30 are called

for, their faith takes a chill, and they can no longer urge their friends to join. The next thing we hear is some such final wail as found the report of President R. Lewis, of the Canadian Masonic Mutual Benefit Association at its 22nd and last meeting in London on the 14th February last: "We have kept expenses down, but in *stopping the onward march of mortality among our members we have absolutely failed.*" A glance over the following tables will show that this is true of a great many societies not yet twenty-two years old, or ever likely to be. Let the reader now take a glance forward at the increasing assessments and decreasing membership in the case of Nos. 1, 3, 5, 9, 12, 15, 17, 22, 23, 25, 35, 37, etc., etc.

Owing to the length of the list, we are compelled to divide it, giving the concluding portion in our next issue.

Name, and date of Origin.	Year of Record.	No. of Members.	Cost per $1,000.	Year of Record.	No. of Members.	Cost per $1,000.

Arrangements have been made by the North British and Mercantile Insurance Company to establish a Western department at Chicago. It has appointed W. J. Littlejohn manager, and J. C. Griffith, of Milwaukee, associate manager. The appointments were made by the general manager and the manager of the foreign department, and are considered excellent ones. Mr. Littlejohn has been with the Connecticut for some years, and Mr. Griffiths has been resident-secretary of the N. B. & M. at Milwaukee since 1891. The department, of which these gentlemen have charge, consists of thirteen States, extending from Ohio and Michigan to Dakota and Kansas.

HEAD WORK.

On board of an Island steamer on Toronto Bay the manager of one of the largest enterprises in that city found a seat beside an acquaintance one day last week. As they looked at one another the thought seemed to arise in the mind of each, "What are you doing here?"—for it was about eleven o'clock in the forenoon. Neither of them asked the question aloud, but each knew what the other was thinking. Presently the railway man said: "I'm on board here because I was not fit for my work. Everything I took up appeared bristling with difficulties. My brains would not work, my nerves were on edge, and I felt as if a weight were upon my head. So I dropped everything, locked my desk, and here I am for two hours." And he went on to explain that formerly he thought it his duty to stick at his desk and plod away, headache or no headache, mind clear or muddy, for a certain number of hours per day, in pursuance of his duty to his employers. "But I have learned," he said, "that if my nerves are unstrung, my temper uncertain and my head not clear, I am not much use to myself or anybody else. And so, in such case, I now leave my office at once, take a bath, or a drive, get a change somehow, and in a short time I go back to my desk and do more work *and better work* in two hours than I can do in a whole day if I am out of sorts."

There are many business men of to-day who have not yet reached the conclusion of the man just quoted. They grind away, fit or unfit, and some of them will tell you that they have to do so. What they mean is, that their time is not their own, they are employes, and that whatever ails them, be it heartburn, neuralgia, toothache, the blues—no matter, so long as it is no disabling ailment, they must be in their counting-houses, pretending at least to work. But the employers themselves are under no such necessity. Nobody—unless perhaps the god Plutus whom they worship—compels *them* to "stick to the ship." It would be far better that they should leave the office for an hour or two and get themselves recreated. But there, nevertheless, they stick, we have often seen them, haggard from sleeplessness or grumpy from dyspepsia, stupid from pain or exhausted from mental overwork. And what is the result? Their work is ill done. Their instructions are confusing because their judgments are confused; their policy in delicate matters, it may be, is unworthy of them, because they are not themselves for the moment. They snap at their clerks, they offend their customers, perhaps quarrel with their banker, and all because the balance of their faculties is gone—the cause indigestion, or fatigue, or "nerves." There is quite as much philosophy as fun in the well-known anecdote told by Sydney Smith to illustrate his doctrine propounded to Kinglake, that "Digestion is the great secret of life; I am convinced that character, talents, virtues and qualities are powerfully affected by beef, mutton, pie-crust, and rich soups. I have often thought I could starve or feed men into many virtues or vices."

We must not be understood as in any sense apologizing for the people who make themselves ill by late hours, overeating or drinking, and such excesses. No man has a right to rob his employer or his own business of his normal working-time because he has "hot coppers" or a "swelled head" from too much dancing or poker-playing and their accompaniments the night before. We are addressing business men with usually level heads. But the point sought to be made is, that when a man whose task is head-work, finds his head or his spirits unequal to the task laid upon them, he should get his system put right before he attempts to do his work. We would have brain-workers remember, that while one cannot do good work where his physical machinery is out of order, there is something more in a man than the mere physical machinery.

Outdoor air, change of scene, recreative exercise, nay, often the mere brief contact with novel minds or companionship in unusual social, philanthropic engagements—so curiously is the human being constituted—will restore the lacking mental or spiritual "spring." And so we subscribe heartily to the principle of letting one's work alone for an hour or two till the machine gets into working order again. In a few hours after they had met, the writer and his friend came back from the Island, new men, restored by the trip and the excitement of the pretty spectacle of the Bowling Tournament for the Walker Trophy. And they were more than ever resolved to preach and practice the doctrine of proper recreation for overworked business brains.

THE AMERICAN BUSINESS SITUATION

We find the following summary of the financial and commercial position in the States, in the New York *Tribune*, of Monday last, 23rd instant:—

"A year ago the country was in the agonies of panic. Banks were dropping every day, and commercial failures were nearly 500 per week. Manufacturing establishments in every direction were closing, domestic exchanges were disorganized, stocks were dropping towards the lowest point, soon after reached, and prices of commodities were sinking. Comparisons with such a period would naturally exhibit gain in many respects. Failures are now less than 250 per week, and in aggregate of liabilities only $2,600,000 for twelve days of July. But the volume of business is smaller than a year ago. Payments through all clearing-houses last week were 17 per cent. less than last year, and for the month thus far 23 per cent. less than in 1892. Railroad earnings thus far reported for the month are 32 per cent. less than last year. Commodities average lower than a year ago, and are close to the lowest point ever known. A year ago heavy foreign loans to relieve temporary necessities brought gold hither, but now it is going abroad, $3,300,000 last week. The trouble about money, which was by some supposed to be the cause of all disorder last year, no longer exists; the markets are overloaded; the New York banks have $221,000,000 on hand, and each week brings hither a million or two more for which the stagnant business of the interior finds no use."

BRITISH COLUMBIA BOARD OF TRADE.

This is the name of the organ of the Victoria, B.C., merchants, the annual meeting of which was held on the 13th inst. in that city. The Secretary of the board read a letter from the president, Mr. Flumerfelt, expressing regret at being unable to be present. He was at the opening of the colonial conference at Ottawa. So Mr. C. E. Renouf, the vice-president, took the chair.

The annual report of the board dealt at length with the different branches of trade and commerce. The construction of the marine railway at Esquimalt is considered of great benefit to shipping. The dry dock was occupied 66 days during the year by seven vessels of 10,773 tons. The report refers to the improvements in the harbors of Vancouver and Nanaimo and the Fraser River. Also to the necessity of beacons, buoys and lights on the southwestern coast of the island and the northern coast of the province. The necessity of a life-saving station on the west coast is forcibly set forth. The hope is expressed that the colonial conference will result in the development of Canadian-Australian trade. Mails now reached Victoria from Sydney in twenty-one days.

Improvements have been made in the telegraph service. Frequent apologies of the press for not receiving despatches, on account of the wires being down, are cited as proof that it is still very defective. While the company deserve credit for overcoming the flood difficulties, the fact remains that a single line cannot satisfy the demands of Vancouver Island, and it is suggested that an alternative line be laid to the American side. Reference is made to the progress of the negotiations for the Pacific cable and the possibilities of a Hong-Kong-Victoria cable are dealt with.

With respect to agricultural progress, bad weather during the harvest and low prices during the winter had reduced the returns of producers. The continued importation of farm produce shows that mixed farming has not been extensively adopted. It is suggested that the larger holdings be subdivided. The Fraser river floods were not as bad as reported, but they demonstrated, in the opinion of the board, the necessity of a thorough system of dyking. The Government is commended for its action respecting the flood, and reference is made to what action the boards of trade took

A paragraph on the coal trade is of interest: The Vancouver Island coal retains, we are assured, its hold on the San Francisco market. The excellent relations between employers and employees, and the unlimited supply make the future prospects of the industry very encouraging. The output from the gold mines during 1893 amounted in value to $353,355, of which amount Cariboo contributed $202,000. Some dredging for gold has been done on the Fraser and Thompson rivers, and the proposed Cariboo railway will tend to develop the mines in other directions. Capital has been attracted to Big Bend, but the high cost of stores and machinery retards progress A great deal of space is devoted to the mining region of West Kootenay.

It is pointed out that according to the census returns British Columbia is the largest manufacturing province in proportion to population. The value of the tools and machinery used in the industrial establishments is $3,248,570. The number of employees has increased 300 per cent. during the year. The factories have felt the general depression, but the opening of trade with Australia provides a new and profitable outlet for their products.

The volume of trade during the year had not been so great as during the previous two years, but it had maintained a healthy condition. Much capital is stated to be locked up in unrealizable assets and the conservative policy of the banks had caused money to circulate less freely. The temporary stringency has, in the opinion of the board, necessitated greater care and stricter economy in all lines of business, which will ultimately serve the best interests of the province.

UNION ASSURANCE SOCIETY.

As great a contrast as we have recently seen between the results of the fire and life branches of the business of an insurance company which does both fire and life underwriting, is shown in the experience for 1893 of the Union Assurance Society of London, England. In the life branch there has been very great activity, and new business yielding no less than £47,780 in new annual premiums at a reduced ratio of expense, is the result of the working of this branch of the business. The total assets of the society, £2,550,000 sterling, coupled with the ancient reputation of an office founded in 1714, render unnecessary any praise of its solidity and general position. But the fire business of the Union for 1893 makes a very poor showing indeed, for the company expended in losses and expenses £42,495 more than it received in premiums, a most unusual and no doubt unexpected result of the effort to increase its business abroad. The fire premiums of the year, £301,813, are about £39,000 ahead of those of 1892, but in order to get this increase of £39,000 the expenses were slightly swelled in ratio. And then the fire losses, which in 1892 were 67 per cent. of the premiums, went up last year to 78 per cent. The fire insurance business of the Union needs reconstruction of some sort ; perhaps another policy has already commenced. In any case such another exceptional year as 1893 is not to be immediately apprehended. The income of the society for the year was £652,668, which is something over three millions and a quarter of dollars, and the accumulated funds were increased by more than £25,000 from the business of the year.

WHO IS RESPONSIBLE FOR THE LOSS?

This question is to be decided by a New Brunswick court under novel circumstances. It is, says the St. John *Globe*, an important case, and one involving some interesting legal points which will be tried here at the September sitting of the Circuit Court. The case is one in which the whole shipping community, as well as the Dominion Government, is interested. On the 26th of February last the fishing schooner "Redbreast," owned by Charles Harkins, of Dipper Harbor, was wrecked on a ledge off Grand Manan, New Brunswick, and lost. The owner at once applied to the Dominion Government for indemnity, claiming that the loss of his vessel was due to the fact that the buoy marking the ledge was at least 100 yards out of position. The Government refused to consider Mr. Harkins' claim, and he then placed his case in the hands of a legal firm. We now learn from the *Globe* that these gentlemen, after careful investigation of all the particulars, have begun suit for the recovery of the value of the vessel, not against the Dominion Government, but against one of its officials, Wm. Benson, of Seal Cove, Grand Manan. This man is the buoy inspector for the district, and it was his duty to see that the buoy was in its right place. Capt. Harkins declares that he has known the buoy to be out of position on other occasions. The "Redbreast" was valued at $525.

INSTITUTE OF ACTUARIES.

We gather from a circular some further particulars with regard to the Colonial Examinations of the Institute, which were held on the 20th and 21st April, 1894, at Sydney, Melbourne, Wellington, Montreal and Toronto. The results were as under, as we gather from a circular issued by the Institute :

PART I.

Twenty-nine candidates sent in their names, of whom twenty-one presented themselves, and fourteen passed as follows :—

Class I.—None.
" II.—Sanderson, Wm. (Toronto)
Wood, A. B. (Montreal).
" III.—Brough, F. (Toronto).
Eedy, A. M. (Sydney)
Farrell, J. (do.).
Harris, F. I. (do.).
Hindmarsh, J. (Melbourne).
Jobson, A. (do.).
Martin, S. G. (Wellington)
Norris, C. A. (Melbourne)
Owen, E. T. (do.).
O'Reilly, A. J. (Montreal).
Sheager, J. (Melbourne).
Wylie, S. B. (Toronto).

PART II.

Thirteen candidates sent in their names, of whom eleven presented themselves and seven passed as follows :—

Class I.—Henderson, R. (Montreal).
" II.—Elliott, C. A. (Sydney).
" III.—Adams, C. E. (Wellington).
Fraser, T. J. (Melbourne).
Hardcastle, E. E. (Wellington).
Hollingworth, A. C. (Sydney)
Johnston, F. H. (Montreal).

PART III., SECTION A.

Three gentlemen sent in their names, of whom two presented themselves and passed as under :—

Class II.—Blackadar, A. K. (Montreal).
" III.—Muter, Percy (Wellington).

SECTION B.

Of the two gentlemen who sent in their names, one presented himself and passed, viz :—

Class II.—Blackadar, A. K. (Montreal).

ALFRED G. WIGGINS, Asst. Secretary.

London, 2nd July, 1894.

CLIPPINGS FOR MANUFACTURERS.

Noah was the first electrician. He made the arc light on Mount Ararat.—*Philadelphia Record.*

St. Stephen and Milltown, N. B., will, before long, be connected by an electric railway with Calais, Maine.

More than twenty thousand dollars in wages were paid to the workmen at the International Mines in Cape Breton last month.

The factories at Gananoque will have, it appears, to be closed for six weeks, during which time a new dam will be built at the falls.

The cooperage mills of Essex, Kent and Lambton have closed down for a month, says the St. Thomas *Journal*, for want of business, and, as a consequence, 1,000 men or more will be idle.

Last winter American anthracite coal sold at $10.50 per ton in Winnipeg. Next winter, it is announced, that this coal will be sold at a reduction of $1 a ton, in consequence of the competition of native coal.

Mr. A. M. Hamilton, of Warkworth, has purchased a roller mill property at Sarnia and will remove to that town. He has engaged as manager Mr. H. A. Milhern, late proprietor of the Otonabee Roller Mills, Peterborough.

The following are the officers of the New Westminster and Vancouver Tramway Company for the ensuing year :—President, David Oppenheimer ; Vice-President, B. Douglas ; Directors, J. A. Webster, Isaac Oppenheimer, and E. A. Wyld ; Sec.-Treas., P. N. Smith.

The manufacture of cutters for next fall's trade has been started at the Brockville carriage works. Last year this class of goods, as well as road carts, were made in Gananoque. The company will hereafter turn out all their goods in Brockville and employ a full staff there all year round.

A foundryman of St. John, N.B., Mr. Joseph McAfee, has built a new foundry on Paradise Row, in that city, next to Lordly's foundry, and calls it the "Valley Foundry." He is fitting it up with all the proper appliances and improved machinery to make stoves, plumbers' goods, etc., and castings for railway or mill purposes.

In five days last week the Chatham Mfg. Co., says the *Planet*, shipped one hundred wagons to different points in Ontario. The output up to the present exceeds by over five hundred wagons the entire number sent out last year, notwithstanding the fact that not a single wagon has been sent to the Northwest.

Boston imported about 10,000 tons of Nova Scotia coal in June. Of this quantity 4,483 tons was shipped from Parrsboro in barges.

For some time there has been on foot a project to establish a paper factory in Winnipeg. The industry is now, according to the *Free Press*, about to become a reality. Machinery to the value of $20,000 has been ordered, and the work of erecting the necessary buildings will be commenced at once. The factory will be located on the bank of the Red river, in the northern part of the city. About twelve men will be employed.

LUMBER AND TIMBER PIECES.

A raft of the Moore Lumber Company, which was on its way down the Ottawa last week, consisted of over 150,000 pieces of timber.

Mr. G. B. Greene, manager of the Upper Ottawa Improvement Company, says this is the best season he ever knew of for getting logs down the river.

In consequence of the dulness of demand and poor prices for deals one of the lumber mills on the St. John River, that of Hale & Murchie, near Fredericton, closed down at the end of last week and will not start up for a month.

Morrison's mill on the St. John was put up at auction some days ago to satisfy mortgage claims amounting to $14,250. The property was bid in for the amount of the mortgages by Mr. J. G. Murchie, who has been operating the mill.

The insurance companies involved in the loss experienced in the great lumber fire at Dubuque, where the loss amounted to $400,000, have procured such unquestionable evidence that the fire was occasioned by the locomotives of the Chicago and Western Railroad that they have resolved to sue that company for the recovery of the amount paid to the insured.

Good pencil cedar is getting so scarce that the great firm of Faber & Co. have begun to cultivate forests of cedar (Juniperus Virginian) in Germany. At Schloss Stein there is a cedar forest which covers thirteen acres, and the head of the firm has, for many years, maintained nurseries and plantations of cedars on his land in Bavaria, grown from seed which he imported from Florida.

The supply of logs in the Mitchell and Douglas booms are about exhausted. Rafting will be finished at the Mitchell boom by the 25th, and at Douglas by the 28th July. The booms will still be kept in place, as there are still from 8,000,000 to 10,000,000 feet of logs between the Grand Falls and Fredericton, N.B. This lumber will come down as soon as there is a rise of water, and the lumbermen are hoping that the rise will come soon.—*Fredericton Gleaner, 21st.*

FOR GROCERS AND PROVISION DEALERS.

A man has caught a sturgeon off Leamington, which weighed 200 pounds and measured eight feet in length. It sold for $16, and is called the largest sturgeon ever taken out of Lake Erie.

A special despatch of last week from Clayton, Delaware, to the New York *World*, says that the peach crop of Delaware is estimated at 150 000 baskets. The crop last year was 7,000,000 baskets.

According to the St. Thomas *Journal* the Ingersoll Packing Company refuse to buy hogs from Chatham district, because the flesh is too soft. A prominent breeder suggests that this is because the hogs are fed on beans.

The retail grocers' excursion to Niagara Falls, from Hamilton, last week, was the largest that ever left Hamilton. There were four trains, containing in all thirty-four cars. They departed at 8, 8.15, 9.30 and 10.30, and every car was filled.

A despatch from Moncton says that Spence and Tucker, lobster packers, of Cape Tormentine, N.B., and Northport, N.S., have assigned for the benefit of their creditors. No preferences. Their assets are about $1,600. Liabilities about $2,500.

The Forrest Milk Condensing Company, Kingston, N.S., is making 175 to 200 lbs. of butter every day, which is shipped in air-tight five pound cans to the West Indies. The butter nets 22 cents clear of all expense. They are also condensing milk and coffee.—*Halifax Chronicle.*

A wonderful story is that of the origin and growth of the coffee plantations in Nyassaland. When (some 16 years ago) Mr. Buchanan was going out to Central Africa as horticulturist to the Church of Scotland Mission, the curator of the Edinburgh Botanical Gardens presented him with a sickly little coffee tree, which was not thriving well in those gardens. This tree reached the African Shire Highlands alive, and being planted at Blantyre, throve mightily, flowered, bore fruit, and became the parent tree of the five millions which are now producing thousands of pounds worth of coffee berries.

Wednesday afternoon last was practically a half holiday in London, owing to the grocers' picnic at Queen's park, which was attended by an immense crowd.

Incorporation under Quebec laws will be sought for the Hovey Bros.' Packing Company of Sherbrooke, Que. The capital is to be $25,000, and the first directors will be: A. F. Hovey, Fred K. Hovey, W B LeBarron, J B LeBarron and C E Jenkins. The Messrs Hovey have for some years done a pork-packing business at North Hatley.

Mr. E. Valpy, the North American representative of the Huntley and Palmer biscuit manufacturers, Reading, Eng., has probably the most extensive route of any commercial traveller on the American continent. He goes all over Canada, the United States, and a large part of Mexico, and it takes him a year to make a full round of the principal business cities of the three countries

The first shipment of Pacific coast salmon this season has been made by the A B C Co.'s Skeena River canneries. The "Danube," which came down from the north on the 13th, brought 1,000 cases in all from the Naas and Skeena, consisting of 300 cases of flats and 700 cases of balls. At present the River's Inlet establishment leads with 7,000 cases, from which figures the packs run down to 4,000.

Under the heading of "A Hint for Canada," the *Canadian Gazette*, of London, England, has the following: "It is stated that the Austrian War Office has decided to make an experiment with Australian meat for feeding the Austrian army. A shipload of Australian meat, sent last week to Vienna, packed in ice, arrived in very good condition, says the *Standard*, and the whole of it was at once bought up by the butchers, who retailed it as fresh-killed beef from home-bred animals, a trick apparently borrowed from the meat salesmen of London.

There is something to be said in favor of the Salvation Army as a philanthropic organization, but what are they doing in such a galley as that of a retail grocery on Yonge street, Toronto, called the Salvation Army Grocery? And how do they come to have, as they advertise that they have, a Salvation Army dairy somewhere, whence they bring, as their gilt-letter window states, "Supplies from the Social Farm?" It would seem that there is commercial method in all the Army's peripatetic collection of money. But when the grocers and grocers' wives, and dairymen and dairymen's daughters all over Canada, who along with other people have been putting money into the Army's collection boxes, realize that the happy red-shirted and blue-bonneted evangelists are running opposition to them with a Holy Farm and a Social Dairy, and a gilt-edged grocery, they will be anything but pleased.

The annual outing of the Montreal grocers took place last week at Sainte Rose, Island of Montreal. It was attended by 3,000 people—not all of them grocers, but many of them wives or daughters of grocers and the admirers of young grocers. It was the fourteenth annual picnic, and two-thirds of the people reached the grounds by special C.P R. train. The *Gazette* avers that while "some persons have been so bold and unfeeling as to say that he puts sand in his sugar, mixed ground olive shells with his pepper, 'doctored' his tea, and sold cotton-seed oil when the purchaser wanted the best olive oil." nobody believes these things. "Indeed, the great majority of the general public have a sneaking regard for the grocer, and don't believe that he is such a bad fellow after all. So long as they continue to give such picnics as they have done, at such reasonable figures, just so long will the pic nics continue to be a success, and their patrons will silently say "*Vive la pique-nique des epiciers.*"

BOOK AND STATIONERY ITEMS.

Imitations of fruit in stone are made by ingenious Germans for the purpose of paper weights.

Crinkled tissue papers are still used by the ladies for lamp-shades, fans, doll dresses, hand screens, &c., &c.

Bliss Carman has put another edition of his "Low Tide on Grand Pre" into the hands of C. W. Webster & Co., Springfield, Mass. It retails at a dollar.

Marbloid, a new material in imitation of black and colored marble, onyx, etc., is made into inkstands and pen racks by some eastern United States houses.

The Japanese silk copying letter books are still commanding praise from those who use them. Their non-blurring character is a feature which commends them.

In setting advertisements one of the first aims should be legibility Attractiveness, novelty and all other considerations should be subordinated to this one.—*The American Bookmaker.*

It was J. M. Barrie, the lively author of *A Window in Thrums*, who said: "Though to get the right word (in composition) is the sweetest thing in life, it is as difficult to hit as a squirrel"

A beautiful little edition of Goldwin Smith's latest book, "Oxford and Her Colleges," is published by McMillan & Co., uniform with which, in vest-pocket size, is "A Trip to England," by the same author.

The Uranium Metal Pen Co., Grand & Toy, sole agents for Canada, produce pens which are declared to be "smoother than gold and more durable than pure steel." They are made in six numbers and are very neatly put up.

On the fly-leaf of an odd volume of Emerson's works accidentally picked up by Prof. Tyndall at an old bookstall—a volume which first made him acquainted with the writings of the New England seer—are inscribed these words, "Purchased by inspiration."

Violet, heliotrope, biscuit and other tints, also "grey calico" paper with canvas surface, are used for summer notes and envelopes. We have seen in Hart & Riddell's, too, very neat embossed monograms in rustic letters for summer use, on rough, mill-finish paper, moss-colored letters.

G. P. Putnam's Sons announce an important work entitled "The Blind as Seen Through Blind Eyes," in which Maurice de la Sizeranne gives, from the experience of Valentine Hany, an account of the every-day life of a blind person, and also particulars as to the most recent changes and improvements in teaching the blind.

No business man has a reasonable excuse for letting his letters or invoices received lie about his desk or store when he can buy a G. & T. Letter Fyle for 40 cents. It is a marvel of cheapness, for it is mafle of seasoned wood, covered with stout leather paper, has a metal fastener and a capacity of 800 letters.

It is undeniable that the price of writing paper has got down to a very fine point. What with the depression in the States, and consequent slaughter prices, the production in Canada, and the competition of the Old Country, the figures for writing papers are at present too low to be a pleasant contemplation for the manufacturers.

Drop into the Authors' Club in New York, and you will just find a number of quiet, dignified men divided into groups; some in cushioned corners, others around little tables, all but a few in ordinary business clothes, smoking very long pipes, and bluing the air with "baccy." Some occasionally swap stories, but the conversation is largely "shop." Commercial travellers are the only men who can talk more "shop" than your literary fellows.

The Clean and Ready mucilage system is another recent effort to get rid of the often intolerable nuisance of a gum pot and brush. We have seen it at Brown Brothers, in operation. Neat and heavy cut glass bottles have a perpendicular spout into which fits a tube with handle attached. This tube serves the purpose of a fountain gum-brush, acting somewhat like a fountain pen, and apparently, as is claimed, "Clean and Ready."

The Simplicity Cloth Bath, which has been used in the States for two years, has just been introduced here by Grand & Toy. It is not a bath for washing the body, but an invention intended to supply the long-felt want of a process for moistening the leaves of a letter copying book, without the inconvenience of using brush, blotters, sponges, water tubs, and other old-time necessities. By an ingenious use of the principle of capillary attraction, a flat cloth is kept constantly damp. The laying of this cloth upon a page of the copying book dampens it enough to make a copy of a letter. The process is very quick, handy and clean.

A Miramichi correspondent wishes to know who wrote a book on the French Canadians some twenty-five years ago, and if it is in print to-day. We reply that *Les Anciens Canadiens*, by Phillippe Aubert DeGaspe, was published in 1863, and is probably the one referred to. It has been translated into English, and the Dublin *Review* said of it: "Illustrative of old Canadian manners, tales of this character render a service which is not to be undervalued." The same author produced *Memoires*, published at Ottawa in 1866, and S. Lesage, writing of it in *La Revue Canadienne*, declares that "this fine and delicate observer was brought up in the front rank of the old Canadian aristocracy."

INSURANCE NOTES.

A fireman's tournament in St. John, during August, is one of the events for which the lively firemen of that city are arranging.

R. H. Matson, general manager of the Provident Savings Life Insurance Society, of New York, has been visiting Halifax.

The Equitable Life Assurance Society of the United States has opened at Sherbrooke a general agency for the Eastern Townships

Be sure to get an accident policy before you start away on your summer vacation; and do not get it for a month, but rather for a year.

Care eats life as rust eats steel. The man who can lessen care lengthens life. Be insured in a good company and do away with care. —*Black and White.*

The Portage la Prairie *Liberal* has it that the Farmers' Mutual Insurance Company in Manitoba did new business to the amount of $72,000 during the month of June.

We are told that R. D. Morkill, jr., has been appointed agent of the Union Fire Assurance Society, of London, England, for Sherbrooke and neighborhood.

Mr. D. C. Edwards, whose headquarters are in Montreal, is now acting as general manager for the Eastern Assurance Company, in the Provinces of Quebec and Ontario.

Fire and Water, of New York, is going to have an elaborate convention number, which is to be illustrated. They have sent for photos of the mayor, city clerk, members of the fire committee and all the officers of the department in Montreal.

The city council of the town of Magog, Que., has decided to purchase from the Waterous Engine Co., of Brantford, one of their steam fire engines, price $2,000, the old hand engine being taken back for the sum of $500. Tenders are being called for the building of eight cisterns for water supply for the town.

The annual meeting of the P. E. I. Agricultural Mutual Fire Insurance Co., took place last week in Charlottetown. The statement submitted was satisfactory, though more losses were paid this year than formerly. The officers and directors were re-elected.

The year 1893 has proved a particularly bad one for the French company, La Commerciale, the outgo being as under:—Losses, 70·44 per cent.; commission, 30·28 per cent.; expenses, 14·87; total, 115·59 per cent. The debit balance, which in the previous year stood at fr. 9406, rose on December 31st last to fr. 153,769.

We find in the July issue of the *Monitor*, published in London, Ont.; a partial list of industrial insurance claims paid by the London Life Insurance Company. They range from $5 up to more than $400 each, and are nearly four hundred in number, distributed over thirty or forty places in Canada and a few points in the United States.

The energetic managers of a Detroit accident company have issued what they term "the businessman's policy," which gives fixed compensation for a variety of particular injuries which may not disable a man from the entire performance of his duties, together with the usual payments for loss of time occasioned by injuries.

In a brief review of "Harris's Technological Fire Insurance Commentary" the *Policyholder*, of Manchester, England, says: "The meanings of many terms, which would otherwise be unintelligible to many people, are given. For instance, we find that 'blenks' is a West-country term for ashes; 'dry meat' a provincial name for hay; and that a 'stiff' is in Suffolk a blacksmith's anvil, and in Yorkshire a ladder!"

It is stated by the *Indicator* that Mr. J. J. Macartney, lately with the Prudential Insurance Company of Detroit, and at present working at the London Life Insurance Company's branch office in Hamilton, Ont., has been promoted to the responsible position of assistant superintendent of the London Life. He is a hustler, and "Progression in every Particular," and has had much experience in industrial life assurance.

No one ever doubted that the Germania Life Insurance Company was a staunch and well managed institution, says the *Insurance Times*. Its statements are honest, but it seems in the case of its reporting to the department the company was entirely too conservative, as the New York Insurance Department credits the company with $300,000 surplus more than the company itself claims. The explanation of this is that the officers of the Germania Life appraised their own assets too low.

The Central Mutual Fire Insurance Co. of P. E. Island has held its annual meeting. The report of the manager, Mr. Donald Morrison, showed that 105 policies were issued during the last year, making in all 384. The amount of insurance carried is $301,350, reserved capital, $7,538. The company had no losses during the past year. A vote of thanks to the management was carried. The directors, nine in number, re-elected Roderick Munn president, Joseph Wise vice-president, and Donald Morrison managing director.

Instead of holding their regular meeting in Waterloo as usual, the directors of the Ontario Mutual Life Assurance Company held their regular meeting in London on Friday last. The occasion of the change was that the directors desired to inspect the London properties, upon which considerable loans have been placed, and also to make valuations of realty upon which loans have been proposed. The directors present were:—Messrs. I. E. Bowman, M.P., C. M. Taylor, Robt. Melvin, Robt. Baird, Alfred Hoskin, Q.C., B. M. Britton, Q.C., John Marshall, J. Kerr Fisken, E. P. Clement, and W. J. Kidd. There were also present the manager, Wm. Hendry, and the secretary, W. H. Riddell. The resident director, Mr. John Marshall, entertained the directorate and management, together with some friends, at his residence, "The Beeches."

THE SHARE MARKET.

The hot weather, the bankers' excursion, the holiday season, and various other reasons are put forward to account for the dullness in stock transactions here. Money on call in New York is easy at 1 per cent., and first-class mercantile paper done at 3½ to 5. In London money is obtainable at 1½ per cent. per annum, but even this provoked no speculative movement. There have been very few transactions in the Toronto market this week. Bank of Hamilton sold at 158 and Bank of Commerce at 139; Dominion a trifle higher at 278 bid; Montreal slightly lower, 218½; Molsons a shade higher, and Ontario lower; 182½ bid for Imperial and Toronto, with a still greater margin between buyers and sellers. Nothing at all done in loan societies' shares. Freehold, Western and London all held higher without bids. Among miscellaneous stocks street railway sold at 149½ and British America Assurance at 110½; Commercial Cable and Bell Telephone both a trifle higher. Incandescent Light offered at 111, with 113 asked; Western Assurance a little stronger at 146¼ bid, holders still asking 147.

COMMERCIAL BANK OF MANITOBA.

The liquidators of the Commercial Bank of Manitoba have declared a dividend of 17 per cent. to all creditors whose claims have been allowed by the court. The following statement of realizations on the assets, from 3rd July, 1893, to 30th June, 1894—practically twelve months—is furnished:

PREFERRED CLAIMS PAID.

Bank circulation redeemed	$406,695
Interest paid on same	5,581
Provincial Government deposits	84,294
	$496,570

OTHER LIABILITIES PAID.

Loans from other banks	$172,583
Loans from other corporations	30,000
Net disbursements	14,324
Offsets	54,900
Balance at credit in Imperial Bank of Canada	81,045
Total	$849,422

TRAFFIC OF THE SUEZ CANAL.

What a great avenue of traffic the Suez Canal is will be gathered from the following figures: Three thousand three hundred and forty-one ships, of 7,659,000 tons, passed through the Suez canal in 1893, yielding 68,000,000 francs ($13,600,000) in dues. According to the report of the company about to be issued, passengers numbered 186,459, and yielded 1,864,000 francs, while sundry accessories yielded 384,000 francs, making a total of 71,000,000, or $14,200,000: 3,082 of the ships, or 94¼ per cent., passed through by night. The average duration of transit was 20 hours 44 minutes, of actual motion 16 hours 53 minutes. There were nine petroleum vessels. The *Railway Review* says, as to the nationality of the vessels, that the English were 2,405; German, 272; French, 190; Dutch, 178; Austro-Hungarian, 71; Italian, 67; Norwegian, 50; Ottoman, 34; Spanish, 29; Russian, 24; Portuguese, 10; Egyptian, 5; American, 3; Belgian, 1; Brazilian, 1; Japanese, 1.

BOOKS RECEIVED.

TORONTO AND ADJACENT SUMMER RESORTS.—Under this title a summer resort guide to Toronto and neighborhood, edited by Dr. E. Herbert Adams, has been published by Mr. Frederick Smily, under the auspices of the Citizens' Committee, Mr. J. Enoch Thompson. It is an interesting book and a pretty book, well printed, abundantly illustrated, and with some new features about it. The editor holds forth eloquently upon the healthfulness of Toronto and its various moral and æsthetic advantages. Then there are a goodly number of pages and pictures about athletics, the military, &c., &c., which we assume to have been prepared by Mr. Smily himself. The Island, the Lake Ontario resorts, Muskoka, the Georgian Bay, are all described, with evident knowledge and with a chastened enthusiasm, and there is a map of the two last-named. The photogravures of such scenes as Bala Falls, Shadow River, Eschol Vineyard, are most attractive. The directories of places and prices of summer hotels is also a decided convenience.

THE ARGUS COMPARATIVE CHART.—This shows the receipts and losses for the year 1894 of the principal fire insurance companies doing an agency business in the Western States. It gives also the percentages of aggregate fire loss in the various 29 States, from which it appears that Montana is lowest, with 36 per cent., and North Dakota highest, with 327 per cent. Rollins Publishing Co., Chicago.

POCKET CHART OF CO-OPERATIVE ASSOCIATIONS, Life, Accident, and Fraternal. Showing their condition and amount of business done for the five years ending 31st December, 1893. 96 Pages. Price 25c. Address the Leavenworth Publishing Co., Detroit, Michigan.

CAXTON'S PRINTING PRESS—1477

Mother of Liberty! Crude, cumbrous, slow
With what laborious travail tedious pains
Thy wooden joints were racked in giving birth
To Learning 'midst an intellectual dearth,
By Caxton, he who counted not his gains
In gold, but how his foster child should grow.

From thy most fruitful womb was Freedom born,
Whose saintly halo was the light of Truth,
At whose effulgence Error veiled her face,
Oppression sought in hell a hiding place,
Sage Wisdom waited on the call of Youth,
And false Tradition put to open scorn.
Far mightier than the implements of war,
Thou canst a dynasty both make or mar.

THE PRINTING PRESS OF TO-DAY—1894.

A thing insensate, but of many parts—
Wheels, wheels, and wheels in combination, set
Each for its function; rollers, bolts and bars,
Huge cylinders, whose revolution jars
The solid earth, whence it was mined to get
This shapely form—a marvel of the arts.
See! now it moves! Ye gods, your Mercury flies!
Men stand bewildered as they watch his flight,
And note his missives to the sons of men
Drop, neatly folded (work of many a pen),
In such profusion that it gluts the sight,
Confounds their wits and fills them with surprise
O that the shade of Guttenberg might see
What his rude, wooden press has come to be!

—WILLIAM T. JAMES, in the *Pressmen's Souvenir*

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, July 26th, compared with those of the previous week:

CLEARINGS.	July 26.	July 19.
Montreal	$15,028,446	$12,252 665
Toronto	4,851,884	6,120,531
Halifax	1,129,687	1,281,815
Winnipeg	892,033	779,047
Hamilton	542,956	632,029
Total	$22,445,006	$21,066,087

Aggregate balances this week, $3,020,874; last week, $4,360,957.

—The Bankers' Association has assembled in annual meeting at Halifax, and we learn by telegram that while the attendance was fair there was not the number of members present who were expected. The gentlemen who attended from Toronto, so far as we can ascertain, were: Mr. B. E. Walker, general manager Canadian Bank of Commerce; Mr. Lash, the solicitor of the bank, and Mr. V. C. Brown, of the head office staff; Mr. B. Jennings, local manager Imperial Bank; Mr. J Henderson, inspector Bank of Toronto. We hear that three of the Ontario managers of the Commerce, Mr. D. H. Charles, of Woodstock; Mr. M. Morris, of Seaforth, and Mr. R. S. Williams, of Goderich, are in attendance. There are, besides, from Montreal, Mr. Thomas, general manager of the Molsons Bank; Mr. Webb, general manager of the Union Bank, Mr. Stikeman, the assistant general manager of the Bank of B. N. A.

—The immigration agent of the United States at Quebec, Mr. Levy, has received from his Government a list of more than 400 anarchists lately expelled from France and other European countries. And his instructions are not to allow any one of these to disembark from a ship without notifying his Government. Like instructions have been given to United States agents everywhere.

—Dr. J. Howard Hunter, the Inspector of Insurance and Registrar of Friendly Societies for the Province of Ontario, has left this week for a trip to the Old Countries. Some such recreative opportunity must be welcome to Dr. Hunter, whose duties have for years been uninterrmittent and most laborious.

—A quarterly dividend of 3 per cent has been declared by the Dominion Bank for the current year, and will be payable at the bank on 1st August

SUMMARY ITEMS.

A GOOD man is lost to the banking fraternity of Canada through the death, on Wednesday last, of Mr. J. Murray Smith, manager of the Montreal branch of the Bank of Toronto. Heart disease is given as the cause of his death, which was sudden. Mr. Smith was about 58 years of age, and has been more than 33 years in the service of the bank. By faithful diligence he worked up to be made manager of the Peterboro branch, a position he long held, and when Mr. Coulson was brought from Montreal to Toronto to take the general managership Mr. Smith was promoted to be his successor in that important city, a post which he has well filled. He was prominent, besides, in religious work.

THE Toronto retail dry goods firm of James Eaton & Co., who obtained some notoriety last spring by giving away mantles freely, is in trouble, and the creditors are now entitled to the kind consideration and press notices the firm at that time received. Having been in business many years in Western Ontario, Mr. E. came to this city in 1883, and has since conducted a moderate dry goods trade without displaying any symptoms of financial decay, while he had the management. During the past year his son assumed control and has been expanding the business much beyond the limit of prudence or the firm's resources. Now the firm show liabilities of more than $132,000, and nominal assets $10,000 less. Of the former sum about $70,000 is due a British creditor who is secured by Manitoba farm property. This can safely be discounted at least 50 per cent. And should the general assets realize half the sum of the liabilities it would be a pleasant surprise to creditors. A few days ago he gave a bill of sale to his son for $31,000. At a meeting of creditors held here on Wednesday last this was set aside and a resolution passed to stay proceedings until the 3rd Sept. During the interim Mr. Eaton, Jr., is to proceed to Glasgow and arrange with their principal creditor. Mr. W. A. Campbell was instructed to act as liquidator and provisional assignee. In the event of any trouble arising he is authorized to wind up the estate.

THE important concern, the Williams, Greene & Rome Co., Limited, shirt manufacturers, etc., made an assignment last Tuesday. The announcement is unexpected, for the business of the concern, besides being large and active, is understood to be profitable, being done with the retail merchants all over the Dominion, and pretty largely in Manitoba and the North-West. It was necessary for the concern to get indulgence last year on $80,000 of their payments, and they had met $60,000 of these. But owing to an unforeseen disappointment they find it impossible to meet the last payment due in September. The business will meantime be continued.

Correspondence.

CASH RESERVES.

Editor MONETARY TIMES:

SIR,—Might I be allowed a word or two on the terrific controversy over which two or three of your Montreal confreres have their horns locked at present. One paper quotes one banker as an authority, and one another, as if perfection existed in either model, forgetting that the laws of finance are as inflexibly ruled by common sense and circumstances as the laws of trade itself.

Also forgetting that their oft quoted high salaried models must waive public considerations at times and make profits—like the farmer's son—"honestly and safely, if they can," but *anyhow*, or incur the wrathful eloquence of their terrible Nemesis, Crawfodr, Morrison, etc., at their respective annual meetings.

Honest discussion of banking or public affairs is beneficial, can never do harm, *au contraire*. The Government have returns made and printed at great trouble and expense, to inform the public and provoke just such discussion.

Without looking at the merits of the rival contentions, it would be seen that a comparison of our own Canadian Bank statements, with those of some of the best banks in the world, show that the words "Cash Reserves" are looked upon very differently by our Canadian critics.

On this hinges the whole honesty of the discussion, and Canada can well stand comparison.

In making a statement of his position would not any of these writers be justified, as an individual, in including as *cash* not only what was in his till or pockets in coin and legal tender notes, but also "cash at banker's"—*i.e.*, cash that he could have for the asking, or by simply drawing his bill or cheque.

Why should *a bank* be treated differently?

Therefore, in critcizing the cash reserves, let such funds be included, as is done in England, before quoting a per centage for either the Bank of Commerce or any other bank.

If those balances are not *all* cash balances (and some of the balances due from other countries may not be immediately available), then an agitation for a specific showing of the cash strength portion would be in order. The banks themselves would no doubt gladly respond and show their exact position and strength in "cash at banker's," in their own interest. To quote only coin and Dominion notes, as is being done, is misleading to the public, harmful to the banks, and can have only one effect upon the papers who place the issue unfairly. Even where this basis is dwelt upon, credit is taken by one modest contestant for improving the Merchants' Bank Reserve, *inter alia*. But what do we find? By their last statement cash and legal tenders only showed 10.98 to deposits and circulation.

In 1884, ten years before.....	10.87
" 1881	11.67
" 1880	13 38
" 1879	18.43
" 1878	19.65

No doubt the bank required such support, and got it in that particular form, as it and the Commerce (the favorites quoted) doubtless would again if required, although their general managers and their affairs were *not* indebted (as

is presumed) to the superior financial abilities of such editorial Solons.

A comparison of the strength of the Bank Cash Reserves of this country with those of the old country would show that we are away ahead in this respect, and it would only be fair to place it alongside of an argument which holds up banking examples here to point out a false reference or create wrong impressions.

Always be sure of your fact, Messieurs. The principle contended for may be right or wrong, but it will not be helped by erroneous views or an unpatriotic set of impressions directed against our home banks.

Yours,

GREENHORN.

TENDERS FOR DEBENTURES.

SEALED TENDERS marked "Tenders for Debentures," and addressed to the undersigned, will be received up to 12 o'clock noon on **Saturday, the 11th August, 1894,** for the purchase of debentures of the Corporation of the town of Galt, for public school purposes, amounting to **$11,000** (eleven thousand), in sums of $1,000, payable within thirty years, and bearing interest at the rate of 4 per centum per annum, payable half-yearly, on the 31st day of December and 30th June, at the Merchants Bank of Canada, Galt.

No tender necessarily accepted.

THOMAS McGIVERIN,
Chairman of Finance.

Galt, July 23rd, 1894.

City of Victoria,

BRITISH COLUMBIA.

TENDERS FOR DEBENTURES.

SEALED TENDERS endorsed "Tenders for Debentures," will be received at the office of the undersigned up to 4 p.m. on the First Day of August, 1894, for the purchase of Debentures of the Corporation of the City of Victoria, B.C., amounting to $25,000, or its sterling equivalent at the rate of $4.86⅔ to the one pound sterling, in sums of £1,000 or its sterling equivalent as aforesaid, payable in fifty years from the First of August, 1894, and bearing interest from that date at the rate of 4½ per cent. per annum, payable half-yearly, with principal and interest payable as aforesaid, at the office of the Bank of British North America either in London, Eng., New York, U.S.A., or Montreal, Canada.

The Corporation reserves to itself the right to redeem and purchase these debentures on paying the amount thereof and the interest due thereon at the date of such purchase to the holder or holders thereof, at any time after twenty-five years from the date of issuance of such debentures.

The tenderer must state the price net at Victoria which he will pay.

In addition to the net price the purchaser will have to pay the Corporation the interest at 4½ per cent. from the 1st August, 1894, to whatever date the money is received by the City Treasurer.

The above debentures are issued under authority of "The Exhibition Loan By-Law, 1894," with principal and interest secured by a rate on all ratable land and improvements in the Corporation of the City of Victoria.

The Corporation does not bind itself to accept any tender.

WELLINGTON J. DOWLER,
City Clerk.

City Clerk's Office, Victoria, B.C.,
30th May, 1894.

FOREIGN COMMERCE OF THE FISCAL YEAR.

The following is the Bureau of Statistics statement of the total values of imports and exports of merchandise, gold and silver for the twelve months ending June 30th, 1894, as compared with the twelve months preceding of United States trade:

MERCHANDISE, TWELVE MONTHS.

	1893.	1894.
Exports—Domestic	$831,030,785	$869,181,315
Foreign	16,634,409	22,929,965
Total	$847,665,194	$892,111,280
Imports—Free of duty	$444,544,211	$379,742,912
Dutiable	421,856,711	275,092,961
Total	$866,400,922	$654,835,873
Excess of exports over imports		$237,275,407
Excess of imports over exports	$18,735,728	

GOLD, TWELVE MONTHS.

Exports	$108,680,844	$77,028,729
Imports	21,174,381	72,453,066
Excess of exports over imports	$87,506,463	$4,585,663

SILVER, TWELVE MONTHS ENDING JUNE.

Exports	$40,737,319	$50,451,043
Imports	23,193,252	13,282,605
Excess of exports over imports	$17,544,067	$37,068,438

City of Winnipeg Debentures

SEALED TENDERS marked "Tenders for Debentures," addressed to the undersigned, will be received at the office of the City Comptroller, Winnipeg, up to 12 o'clock noon on Friday, the 24th August next, for the purchase of $96,500 of Debentures, as follows: $18,000 6%'s maturing 8th January, 1899; $7,000 5%'s maturing 16th June, 1900; $6,700 5%'s maturing 24th Aug., 1901; $8,300 5%'s maturing 20th Aug., 1906; $14,500 5%'s maturing 6th April, 1911; $14,000 5%'s maturing 30th April, 1899; $30,000 5%'s maturing 29th Dec., 1910.

Interest payable in Winnipeg half yearly.

Tenders may be for the whole or part. No tender necessarily accepted. Further information can be obtained from the City Comptroller.

R. W. JAMESON,
Chairman Sinking Fund Trustees.

Winnipeg, Manitoba, 11th July, 1894.

City of Victoria,

BRITISH COLUMBIA.

TENDERS FOR DEBENTURES.

SEALED TENDERS endorsed "Tenders for Debentures," will be received at the office of the undersigned up to 4 p.m. on the First day of August, 1894, for the purchase of Debentures of the Corporation of the City of Victoria, B.C., amounting to $100,000, or its sterling equivalent at the rate of $4.86⅔ to the one pound sterling, in sums of $1,000 or its sterling equivalent as aforesaid, payable in fifty years from the first of August, 1894, and bearing interest from that date at the rate of 4½ per cent. per annum, payable half-yearly, with principal and interest payable as aforesaid at the office of the Bank of British North America either in London (Eng.), New York, U.S.A., or Montreal, Canada.

The Corporation reserves to itself the right to redeem and purchase these debentures on paying the amount thereof and the interest due thereon at the date of such purchase to the holder or holders at any time after twenty-five years from the date of issuance of such debentures.

The tenderer must state the price net at Victoria which he will pay.

In addition to the net price the purchaser will have to pay the Corporation the interest at 4½% from the First of August, 1894, to whatever date the money is received by the City Treasurer.

The above debentures are issued under authority of "The Sewerage Loan By-Law, 1894," with principal and interest secured by a rate on all ratable land and improvements in the Corporation of the City of Victoria.

The Corporation does not bind itself to accept any tender.

WELLINGTON J. DOWLER,
City Clerk.

City Clerk's Office, Victoria, B.C.,
30th May, 1894.

The figures are in accordance with what has been anticipated from the earlier statements. As indicated by the report of exports of principal classes, the total exports for June are $8,000,000 below the amount for June, 1893, but are yet $5,800,000 in excess of imports, swelling the total of excess of merchandise exports over imports for the fiscal year to $237,200,000, and comparing as follows with the excess of imports of merchandise over exports or vice versa in previous years:

Year ending June 30	Total exports and imports.	Excess of exports over imports.	Excess of imports over exports.
1875	$1,046,448,147	$	$19,702,725
1876	1,001,125,861	79,643,481	
1877	1,053,798,346	151,152,994	
1878	1,131,917,298	257,814,254	
1879	1,176,217,216	264,961,922	
1880	1,503,563,404	167,283,912	
1881	1,545,041,974	270,712,718	
1882	1,475,181,831	25,302,683	
1883	1,547,020,316	100,658,188	
1884	1,408,211,302	72,815,046	
1885	1,319,717,084	164,922,425	
1886	1,314,960,966	44,088,024	
1887	1,408,502,979	23,893,443	
1888	1,419,911,021		28,102,607
1889	1,487,383,027		2,790,277
1890	1,647,139,093	68,518,275	
1891	1,728,397,006	39,764,614	
1892	1,857,680,610	202,875,686	
1893	1,714,064,116		18,735,728
1894	1,546,947,153	237,275,407	

This table goes back far enough to cover all the years of great excess of exports over imports. The figures given are for merchandise alone, but there has also been an excess of exports of silver over imports of $37,100,000, and

Tenders for City Debentures

CITY OF CALGARY, ALBERTA.

SEALED TENDERS Endorsed Tenders for Debentures, will be received by the undersigned up to noon of the first day of August, 1894, for the purchase of Debentures of the Corporation of the City of Calgary, Alberta, amounting to $40,000, in sums of $1,000 payable in thirty years from the first day of August, 1894, and bearing interest at the rate of 4½ per cent per annum, payable half yearly, principal and interest payable at the Office of the Molsons Bank in the City of Calgary.

Tenders must state the price net that will be paid at the Molsons Bank in Calgary. Purchaser to pay interest to the Corporation at 4½ per cent from the first day of August, 1894, to whatever time the purchase money is received by the Corporation.

The Corporation does not bind itself to accept any tender.

Mayor's Office,
Calgary, Alberta, Canada,
June 30th, 1894.

WESLEY F. ORR,

TENDERS FOR DEBENTURES.

SEALED TENDERS endorsed "Tenders for Debentures," will be received at the office of the undersigned up to 4 p.m. on the First Day of August, 1894, for the purchase of Debentures of the Corporation of the City of Victoria, B.C., amounting to $35,000, or its sterling equivalent at the rate of $4.86⅔ to the one pound sterling, in sums of £1,000 or sterling equivalent as aforesaid, payable in fifty years from the First of August, 1894, and bearing interest from that date at the rate of 4½ per cent. per annum, payable half-yearly, with principal and interest payable as aforesaid at the office of the Bank of British North America either in London (Eng.), New York, U.S.A., or Montreal, Canada.

The Corporation reserves to itself the right to redeem and purchase these debentures on paying the amount thereof and the interest due thereon, at the date of such purchase, to the holder or holders thereof, at any time after twenty-five years from the date of issuance of such debentures.

The tenderer must state the price net at Victoria which he will pay.

In addition to the net price the purchaser will have to pay the Corporation the interest at 4½ from the First August, 1894, to whatever date the money is received by the City Treasurer.

The above Debentures are issued under authority of "The Provincial Royal Jubilee Hospital Aid By-Law, 1894," with principal and interest secured by a rate on all ratable land and improvements in the City of Victoria.

The Corporation does not bind itself to accept any tender.

WELLINGTON J. DOWLER,
City Clerk.

City Clerk's Office, Victoria, B.C.,
30th May, 1894.

this is the largest on record by more than $10,000,000. It compares as follows with the other years of large excess of merchandise exports over imports.

	Excess of silver exports over imports.
Fiscal year 1878	$8,000,000
" 1879	5,700,000
" 1881	6,200,000
" 1892	12,800,000
" 1894	37,100,000

Including silver as merchandise, therefore, it will be seen that the excess of exports over imports for the past fiscal year has been the greatest in our history.

The record of the gold movement is of more than ordinary interest. The bureau reports that the gold export for June was $23,300,000 and the import $900,000, but that for the twelve months the import and export has been pretty well balanced, or $77,000,000 of exports and $72,400,000 of imports.

The export is the largest on record, with the exception of the years 1864, 1891 and 1893; the amount having been $100,600,000 in 1864, $86,300,000 in 1891, and $108,600,000 in 1893; and the import is the largest in our history, with the exception of the years 1880 and 1881, when it was $80,700,000 and $100,000,000 respectively. The gold export of the fiscal year just closed has been $30,000,000 less and the import $50,000,000 more than for the year preceding. The comparison for twenty years has been as follows:—

Y'r end'g June 30.	Exports.	Imports.	Excess of exports over Imports.	Excess of imports over Exports.
1875...	$66,980,977	$13,696,793	$53,284,184	.....
1876...	31,177,050	7,992,709	23,184,341	.....
1877...	26,590,374	26,246,234	344,140	.....
1878...	9,204,455	13,330,215	.....	4,125,760
1879...	4,587,614	5,624,948	.....	1,037,334
1880...	3,639,025	80,758,396	.....	77,119,371
1881...	2,565,132	100,031,259	.....	97,466,127
1882...	32,587,880	34,377,054	.....	1,789,174
1883...	11,600,888	17,734,149	.....	6,133,261
1884...	41,081,957	22,831,317	18,250,640	.....
1885...	8,477,892	26,691,696	.....	18,213,804
1886...	42,952,191	20,743,349	22,208,842	.....
1887...	9,701,187	42,910,601	.....	33,209,414
1888...	18,376,234	43,934,317	.....	25,558,083
1889...	59,952,285	10,284,858	49,667,427	.....
1890...	17,274,491	12,943,342	4,331,149	.....
1891...	86,362,654	18,232,567	68,130,087	.....
1892...	50,195,327	49,699,454	495,873	.....
1893...	108,680,844	21,174,381	87,506,463	.....
1894...	77,038,729	72,453,066	4,585,663	.....

While the excess of exports of merchandise and silver is the largest on record, the excess of gold exports over imports is small compared with last year. The great so-called "balance of trade" in our favor, unlike that of other years of large excess of exports over imports, is more largely due to the restriction of imports than to the expansion of exports; and such increase of exports as has occurred has been more largely due to the depression of prices of manufactured articles than to great movements of agricultural products.—*New York Daily Bulletin.*

OUT OF WORK.

One is now so accustomed to read of the "great unemployed" that very little notice indeed is taken of their doings by the majority of those living under more favorable circumstances. We hear a great deal concerning the large and well-organized trades unions, and at times one is apt to become weary of listening to the grievances of their members. But how many are there who, belonging to no union, have suddenly, through no fault of their own, found themselves out of employment. Why, thousands! Many pathetic stories might be told under this head if individual cases were brought to light. The newspapers now and again give us a short paragraph recounting an attempted suicide or robbery, but in many instances, were all the facts relating to the affairs laid bare, the delinquents would be found more deserving of pity than reproach. Have you never known a man, respectably dressed, and showing a cheerful face to the world, whose heart all the time has been well nigh breaking? Persons who, through drink and various other causes, have lowered their status in life, are common enough. Yet there are instances (and they are by no means rare), where men have fallen through sheer ill luck, and, sorry to relate, never recovered their former position. Of course, this depends, to a great extent, on the character of the luckless ones. Some people, when once down, have not the heart to try and raise their fallen fortunes, but simply cry out against the decrees of fate, whilst in others it has the opposite effect—tending to increase their exertions to the utmost. The following came under the writer's notice a few months ago:

Jack Shaw was a pleasant young fellow of 25, living in a Yorkshire village, with his widowed mother and sister, being their sole support. He was engaged to a young lady in a neighboring town, and the date of the marriage was almost fixed, as recently he had been promoted to the post of traveller for the colliery at which he was employed. Suddenly, however, without the slightest warning, owing to litigation on the part of the owners, the pit was laid idle, thus throwing Shaw, with many others, out of work. He was naturally very anxious, on account of those dependent on him, but tried to make the best of matters. At first he confined himself to writing to some of his friends (?), near relatives he had very few, but all replied in the same strain. They were very sorry and sympathised with him in his trouble, but hoped things would soon turn out brighter. Then he took to answering every suitable advertisement he saw; but all to no purpose. Meanwhile the engagement was broken off, and the money saved for his marriage was fast dwindling away in household expenses. Finally, after five weary months had gone by, he obtained a situation as book-keeper at a warehouse in a large Lancashire town at a salary barely sufficient to provide him with the necessities of life. His sister was obliged to go into service, and the mother succeeded in earning a pittance by sewing. When Jack had been at work about three months, through long hours, close confinement, worry, and trouble, he fell into a fever, and was three weeks in hospital. His position, meanwhile, had been filled up, so that when convalescent he again found himself stranded. Then he became despondent, and seriously contemplated suicide, but this was happily avoided by his shortly after receiving a letter, in answer to one of his numerous applications, offering him the position sought for. Shaw is now almost on his legs again, but doubtless he will never forget his bitter experience when out of work.—*Manchester Grocers' Review.*

PETROLEUM OIL.

The Dominion Government, desiring to better the quality of oil made in Canada, has acceded to the request of refiners and reduced the flash test of illuminating oil from 90° to 85°. Just what effect this will have upon the market remains to be seen. In the natural course of events the price of crude should advance a few cents per barrel, but at present oil matters are in such an apathetic state that it is exceedingly doubtful whether the full increment of value will be realized in higher prices. Shipments from Petrolia during the month of June were as follows:—

GRAND TRUNK RAILWAY.

Crude.	Refined.	C. Equiv.

ILLUSTRATED circulars and factory price lists on application. Address Canadian Office and School Agency, No. 56 King Street W., TORONTO, sole agents for Toronto, Montreal, and Manitoba.

the larger factories estimate their aggregate business so far at about 75 per cent. of what it was in 1893. The state of affairs with Quebec manufacturers is said to be much the same. It is possible that there may be some making up in the volume of orders later on.

CEMENTS AND FIREBRICKS. For cements there is but a sluggish demand. English is quoted at $1.90 to 2.00, though $1,85 would doubtless do a round lot. Belgian, $1.75 to 1.90. Bricks are also dull and slow of sale. We quote $14.00 to 19.00.

DAIRY PRODUCTS.—Cheese shipments last week were somewhat short of the corresponding week last year, being 80,381 boxes, as compared with 91,334 boxes in 1893, but the aggregate to date is away ahead of last year by as much as 62,000 boxes; the total for the season thus far is 618,041 boxes. Prices for choice white and colored range from 9¼ to 9½c. per lb., with a slight tendency to easiness. In butter there has been no export business doing this season, the total shipments being only 2,563 pckes. The market is quiet but fairly steady at 18 to 19c. for creamery; Townships 16 to 17½c.; Western 14 to 16c. per pound.

DRY GOODS.—Cautious buying on the part of all country retailers is by general admission the strong feature of the moment, and commercial travellers now offering fall goods are in many cases requested to call again some weeks hence. There are some evidences of a stiffer feeling in woolen fabrics in Europe. Continental as well as British manufacturers have written stating that they will not guarantee prices. This is doubtless largely due to the free admission of wool into the United States, which has stiffened prices of the raw article. Linens are firmer, and it is said that a number of American buyers are on the other side of the Atlantic only awaiting the adjustment of the tariff to buy largely.

GROCERIES.—No change has yet developed in sugars. One of the local refineries is said to be very anxious to advance the price; but the other concern prefers to await a definite settlement of the much-vexed sugar question in the United States. At the moment, the regular factory quotation for granulated is 4 3-16, though round lots are done at 4¼c., yellows, from 3½c. up. Molasses is being offered at 26c. per gal., net cash for Barbadoes in round lots, jobbing price is 29 to 30c. Receipts have been larger than anticipated, some 8,000 puncheons to date, and some 1,500 puncheons more are due early in August. Nothing very definite has yet been heard from Denia regarding new crop Valencia raisins. Stocks of old fruit are completely exhausted here, and there are none in bond in New York. This scarcity has induced the buying of some fair lots of Californian loose muscatels, a taking fruit which is being jobbed at 6½c. in 50 lb. boxes. For teas there is rather more enquiry, and importers indulge in more or less speculation as to what will be the effect on the market of the reported complications between China and Japan. Salmon are reported advanced 15c. a case on the coast, said to be due to a heavy English demand.

HIDES.—Little that is new can be reported in the hide market. Dealers have now got the price of No. 1 inspected pretty well established at 4c., though tanners held off some time, trying to buy at 3½c. per lb., which is the figure dealers have themselves to pay. Heavy steers are quoted at 5 to 5½c. to tanners. Very few calfskins are now coming in. Lambskins are worth 25 to 30c. each.

LEATHER.—Business in this line shows no notable improvement, and shoe men are not making any selections of consequence. Quotations remain unaltered. Advices are to hand of some moderate soles of Canadian splits in England at fair prices, but the market on the whole is still quiet there. We quote: Spanish sole B. A. No. 1, 18 to 20c; do No 2 to B A, 16 to 17c; No 1 ordinary Spanish, 17 to 18c.; No. 2, 15½ to 16½c.; No. 1 slaughter, 18 to 20c.; No. 2 do., 17 to 18c.; American oak sole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do., heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 15c.; do., small, 10 to 12½c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 25c.; buffed cow, 9 to 11c.; extra heavy buff, 12½c.; pebbled cow, 8 to 12c.;

METALS AND HARDWARE.—A circular from Kidston & Co. just to hand states that the position of the pig iron market in Glasgow is much the same as it has been for some time, and that there is nothing particularly cheerful in the outlook. Although the Scotch colliers' strike is now regularly on, pig iron is not likely to advance materially, because although a number of furnaces are damped down the consumption is naturally much curtailed, owing to the cessation of operations by many manufacturing works and foundries. In tin, the same circular says, the tendency is downwards, if anything, sales being reported in the East at lower figures. Lead is reported as strengthening, with sellers scarce. In the local market there is little doing. Some moderate transactions are noted in Summerlee iron at $19.25, while others hold at $19.50. No. 1 Siemens has been quoted at $16.25 in fair lots. Galvanized sheets, No. 28, have sold at $4.15. We quote:—Coltness pig iron, none here; Calder, No. 1, $19; Calder, No. 3, $18; Summerlee, $19.25 to 19.50; Eglinton, $18.50; Gartsherrie, none here; Langloan, none here; Carnbroe, $18; Shotts, none here; Middlesboro, No. 3, $17; Siemens, pig, No. 1, $16.25 to 16.50; Ferrona, No. 1, $16.50; machinery scrap, $14.50 to 15.00; common do., $10.00 to 12.00; bar iron, Canadian, $1.70 to 1.75; British, $2.25; best refined, $2.40; Low Moor, $5.25; Canada plates—Blaina, or Garth, $2.15 to 2.20; all polished Canadas, $2.75; Terne roofing plate, 20 x 28, $6.00 to 6.25. Black sheet iron, No. 28, $2.40; No. 26, $2.25; No. 24, $2.10; tin plates—Bradley charcoal, $5.25 to 5.50; charcoal I.C., $3.50; P.D. Crown, $4.00; do. I.X., $4.75 to 5.00; Coke I.C., $2.85 to 3.00; coke wasters, $2.75; galvanized sheets, No. 28, ordinary brands, 4¼ to 4½c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5⅞ to 6c.; tinned sheets, coke, No. 24, 6 to 6¼c.; No. 26, 6½ to 6⅝c.; the usual extra for large sizes. Hoops and bands, per 100 lbs., $2.30 to 2.35. Steel boiler plate, ¼ inch and upwards, $2.10 to 2.15; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.85; heads, $2.85; Russian sheet iron, 10½ to 11c.; lead, per 100 lbs., pig, $2.60 to 2.75; sheet, $4 to 4.25; shot, $6.00 to 6.50; best cast steel, 10½ to 12c.; spring, $2.50; tire, $2.50 to 2.75; sleigh shoe, $2.40; round machinery steel, $3; ingot tin, 17 to 18c.; bar tin, 25c.; ingot copper, 9½ to 10c.; sheet zinc, $.00 to 5.25; spelter, $4.50 to 4.75; American do., $4.50 to 4.75. Antimony, 10½ to 12c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs.; annealed do., $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3¼c. Coil chain, ¼ inch, 5c.; ⅜ in., 4½c.; 7-16 in., 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., ¼c.; ¾ in., 3¼c.; ⅞ in., and upwards.

OILS, PAINTS AND GLASS.—Turpentine is from a cent to a cent and a-quarter firmer in the South, owing to the factors trying to control the market, and it is said they have some 40,000 brls in store. Local prices may advance next week. Oils are without change. Dry white lead is advanced ten shillings a ton in England. Other lines unchanged. We quote: Turpentine, 46c. per gal. for single barrels; two to four barrels, 45c. Linseed oil, raw, 54c. per gallon; boiled, 57c.; 5 barrel-lots, 1c. less; olive oil, machinery, 90c.; castor, in cases, 6½ to 7c.; tins, 7½c.; Nfld. cod, 38 to 40c. per gallon; Gaspe oil, 38c. per gallon; steam refined seal, 42½ to 43c. in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00; No. 1, $4.50; No. 2, $4.25; No. 3, $4.00; dry white lead, 5c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 45 to 50c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50. Window glass, $1.20 to 1.25 per 50 feet for first break; $1.30 to 1.35 for second break; third break, $2.90.

TORONTO MARKETS.

TORONTO, July 26th, 1894.

DRUGS AND MEDICINES.—We cannot find much to base a report on this week. Business appears to be on the quiet side, and there is no excitement in any article; opium is quoted lower; morphia has been easier under former advices about the condition of the opium market, but affected by later opium advices morphia has stiffened; essential oils are reduced under the altered tariff to 10 per cent. duty, instead of 20 per cent., which will have the effect of lowering

These prices are wholesale by the car-load

quotations; the alteration of salicylic and carbolic acids under the new schedule from 20 per cent. duty to putting them on the free list will also presently lower their price; we quote carbolic 22 to 40c.

FLOUR AND MEAL.—With a gain shown in the visible supply of wheat on 21st inst. of almost a million bushels since the previous week no improvement in flour could be looked for, and none has come. Straight roller sold early in the week at equal to $2.75 ber bbl. Toronto, and purchases might have been made since, it is said, at 10c. less; nothing doing in other grades. Oatmeal steady and quiet; a car could probably be had at $4.20 per bbl. Bran quiet and lower; car lots can be had at $12 to 12.50; retail lots, $13.50.

GRAIN.—Once again wheat has touched, in the States, "the lowest point known," 52c. for July. A sale was made here yesterday of No 2 white at 60c. in store, the lowest figure within the memory of young men. Odd cars of Manitoba hard are selling at outside points at our quotations, and even below them. Yesterday's rates are 70c. at points west of Toronto, and 71c. at points east. The only barley in market is sold for feed at 42 to 43c. Oats are weaker; holders outside seem to wish to get rid of their stocks. A good request exists for peas, which sell at 56c. at outside points west and 60c. in city. No rye or buckwheat offering. Very little corn in market, the price 47c. outside, 53 to 54c. in city.

STOCKS IN STORE.

The following table shows the stocks of flour grain in store at Toronto on Monday morning, July 23, and like date 1893:—

		July 23, '94.	July 24, '93.
Fall wheat,	bush.....	58,853	106,077
Red wheat	"	nil	nil
Spring wheat,	"	2,895	33,107
Hard wheat,	"	2,527	5,038
Goose wheat,	"	1,523	400
Oats,	"	47,202	13,016
Barley,	"	46,688	34,607
Peas,	"	1,670	700
Rye,	"	nil	nil
Corn	"	nil	480
Total grain, bush.....		161,358	193,435

The stocks of grain in store at Port Arthur on July 14th, were 1,355,317 bushels. During the week there were received 75,706 bushels, and shipped 179,352 bushels, leaving in store on July 20th, 1,251,671.

THE VISIBLE SUPPLY.

A comparative statement of the visible supply of grain in Canada and the United States for the week ended July 21st, 1894, is as under, with the quantities for the previous week of the current year, and also for the corresponding weeks of 1893 and 1892, as prepared by the secretary of the New York Produce Exchange. The returns are given in thousands:

	1894.	1893.	1892.
	Bush. July 21.	Bush. July 22.	Bush. July 23.
Wheat	54,072	58,904	23,068
Corn	3,049	7,601	6,857
Oats	1,372	2,168	530
Rye	208	377	430
Barley	92	282	215

GREEN FRUITS, ETC.—Owing largely to the Toronto grocers' picnic there was not much doing on the market, but prices were generally firm. New potatoes are in very brisk request, and tomatoes are also active and firm, bringing 55 to 60c. per small box. Gooseberries are in and meet with ready sale at 55 to 60c. per basket; raspberries have advanced to 6½ to 7½c.; watermelons and muskmelons are in sufficient supply, so are currants, while cherries are not so active; peaches are firm and in better supply.

GROCERIES.—The improved feeling mentioned last week continues, and orders are coming in freely, both from Ontario and the North-West. The demand does not appear to lie in any particular direction, but is for general groceries. There is a steady feeling in sugar which moves out very fairly, but a lull must be looked for in August, for then comes a time between the berries and the peaches or pears, when there is no fruit to can; molasses, West India, is steady; New Orleans offers in barrels at all the way from 25 to 40c. per gal.; among dried fruits, Valentia raisins, off stalk, are quoted lower at 5½ to 6½c.; fresh, off stalk, 6¾ to 7c.; there appear to be no figs in market at the moment, probably because only small stocks were laid in. In canned goods we make some changes of quotation, some upward—some downward, corn and tomatoes are both higher and very firm, the latter ruling at 90c.; beans are scarce for this fortnight past; peaches are firm and higher; apples whether dried, evaporated or canned seem to be out of market.

HIDES AND SKINS.—The American market for hides is looking up somewhat, probably because of the labor troubles. There is no change in price here, but a little more enquiry, green being bought at 3c. and cured sold at 3½c. per lb. Although tanners are buying only from hand to mouth, there appear to be takers for all good hides, plenty of poor ones are offering, however. Skins are unchanged, the demand is slack owing to the low price of wool. Tallow is plentiful; a good share of it reaches the city in bad condition owing to the warm weather.

LEATHER.—There is less doing in sole than is usual at this time of year; some enquiry comes from the East for export use; upper and black leathers can be had at shaded prices for cash; we hear of a sale of glove grain to Montreal parties at 8 cents per foot, a figure that does not leave much profit for the tanners.

PROVISIONS.—The market cannot be called active, but there is a moderate demand in certain lines. In dairy products the call is for really choice butter, only the best being taken; best brands choice creamery being 22c. per lb.; choice dairy, 16 to 18c. The supply is pretty good, and if there were any export demand prices would have to decline materially. Cheese appears to be weaker in outside markets; the jobbing price here is from 9¾ to 10c. There is rather a firmer feeling in hog products, and some lines of meats are running low in stock; lard is quiet and unchanged; long clear bacon, 7⅞c.; rolls, 8½c.; hams, 11c.; Eggs are in free receipt, but the quality is indifferent and demand poor; we quote 10 to 10½c. per doz Hops are quiet and lower, say, 14 to 15c. for new and 10 to 12c. for yearlings; no life in the market. In beans there is only a local trade at $1.10 to 1.30. Dried apples and evaporated are out of market.

WOOL.—There is more wool coming into this market than for many a day before, and at extremely low figures. Fleece wool that in 1870 would bring 50 to 54c. is now bought for 17c. per pound. None of the mills, large or small, appear to want any wool at the moment, but now that the United States tariff is settled in that respect, some transactions may be expected when trade revives across the line.

THE GREAT-WEST LIFE ASSURANCE CO'Y.

Head Office, Winnipeg.

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

Agents wanted in unrepresented districts. Application may be made to the Head Office, Winnipeg, or to

THE HARTFORD FIRE INSURANCE COMPANY.

The Hartford Fire Insurance Company was chartered by the Legislature of 1810, and organized on June 27th of the same year, but its real origin is to be found as far back as the year 1794, when a private association using the same name issued policies through Sanford & Wardsworth, a firm of Hartford merchants. To understand this, it must be remembered that early insurance was largely an individual matter: one or more persons underwrote the policies, and they or some third party placed the insurance.

The development of the Hartford Fire was probably much like that of the Philadelphia Contributionship, the history of which is well known, and is worth telling briefly in this connection. This association was formed April 13, 1752. The associates were called contributors, and organized under a deed of settlement with the title "The Philadelphia Contributionship for the Insurance of Houses from Loss by Fire." This society was commonly known as the Hand-in-Hand, this being the title of a popular fire company, the membership of which was largely represented in the contributors to the new association, which has since developed into one of the great companies of the country.

The charter provided for a capital of $150,000, ten per cent. of which was to be patd in cash within ninety days from the passage of the Act, the remainder being secured by notes of the stockholders, the expectation being that these would be paid out of the profits of the company. The security, which would be ridiculous now, proved safe. The subscribers were generally solid men, but a more important fact was that the volume of business was small, and that with reasonable good fortune the cash capital might be expected to more than meet all demands for some time to come. As a matter of fact, no loss occurred until 1812, and the total for that year was $112.10. Only $136.13 was paid out on this score in 1813, and $173.61 in 1814. Soon after this the paying in of the remaining capital began. On June 6, 1816, it was voted that the stockholders should pay twenty-five per cent. of their dues on the next renewal of their notes, and twenty-five per cent. at each subsequent renewal, "until the whole of the note be paid."

The first trial balance ever made for the company is on file. It shows on the debit side, bills receivable (third instalment) $135,000, bills discounted $12,140, and Hartford bank stock at par (they paid a premium of 4 per cent.) $5,600. The other side shows $150,000 stock, a bank overdraft of $71.34, bills due $1,168.66, and dividend unpaid $1,500. The two sides balance at $152,740. It will be seen that the transactions of the first half year were few and simple. The record shows that during this year $2,784.51 was received in premiums, and that there were no losses. The next year the premiums were $3,542.25, and the losses $112.10. For the first ten years of its existence, the aggregate premiums were $46,586.45, and the losses only $13,357.61. In the following two years the premiums were $14,327.84, and there were no losses. Soon after, however, the tide turned. Although many agents had been commissioned and the receipts increased greatly, a succession of heavy losses occurred, and in 1828 no dividend was declared, nor was there another until 1841.

Almost at the beginning of its existence the "Hartford" saw the need of working through agents to develop business. The local field was wholly insufficient for the hopes even then entertained, and although the beginnings were feeble enough as compared with modern experience, they were doubtless considered rather enterprising at the time they were undertaken. Aside from the surveyors, as they were called, who merely examined property and reported applications, the "Hartford" in its second year took the then novel step of appointing a man at a distance with authority to countersign policies for the company. He was Ebenezer Norton, of Canandaigua, N.Y., and was commissioned to act in and about that place. It is probable that this was the first instance in this country of such delegation of authority. In taking this step the company may have felt some hesitation, but they doubtless builded better than they knew, for the experiment they then tried has proved the foundation of an enormous business which could not have grown up under other conditions. For many years, however, Mr. Norton and those appointed with the same authority received *no commissions*. Their payment came from the survey of the property to be insured and from a policy fee, both these charges being paid by the insured. Thus on June 8th, 1814, Ephraim Kingsbury was appointed at Haverhill, Mass., the record reading that he is given "authority to receive proposals for insurance, to determine the premiums, and to issue policies for the company, and to retain for his services the cost of the policy." The cost of the policy was the two items above mentioned. A specific sum as commission was first allowed to Hooker & Brewster, of Middlebury, Vt., who were appointed substantially in the form above cited, but were authorized to retain *fifty cents* on each policy for their services. Three years later a commission of *five per cent.* was paid, and then the rates gradually increased. From about 1820, the records of the directors' meetings for several years are full of the appointments of agents.

It was about this time that a sheet of instructions to agents was issued, which contained this notable passage:

"It is to be hoped that the agents of the Hartford Fire Insurance Company will not descend to the ruinous practice of underbidding other offices to obtain business. There is a point below which if we descend our annual receipts will not equal our losses. So great folly ought to withdraw from us that public confidence which should give us preference over other offices at equal rates of premium. Our premiums should not be higher than to yield a fair profit for the hazard we incur of losing our capital by extraordinary fires."

In spite of the activity indicated by the appointment of agents and other matters of record, the company did not make the progress in its second decade that had been hoped and expected. Heavy losses came in quick succession, and for the five years 1826 to 1830 inclusive, the losses were $157,846, as against premium receipts of only $136,257.29. During this period several new directors were put on the board, this fact indicating that sttockholders dissatisfied with the course of events were preparing to try the usual remedy of a change of management.

The new board chose Eliphalet Terry president, and James C. Boles secretary. About a month later the company for the first time indulged in the luxury of a clerk. The records show that on July 3, 1835, Mr. Christopher C. Lyman was appointed clerk for half a year "to assist the secretary in matters proper for a clerk to transact." Mr. Lyman deserves a word of mention. Within a few months he was given authority to sign policies and countersign cheques as assistant secretary, and soon after was elected to this office, in which he continued for forty-three years. He declined all offers of advancement and in his later years steadfastly refused any increase of the salary which he had long drawn, with the characteristic remark that it was as much as any assistant secretary ought to have.

Under the new management there was an immediate improvement of business. Efforts to extend the field were begun, and six months later, in the middle of December, a supper was given to celebrate the success of the business. The next day came news of the great fire of Dec. 16, 1835, in New York. It was an appalling calamity. It swept the business part of the town, taking in all between Wall, South, and Broad streets and Coenties slip. It was a cold night; the only water to be had was that from the river, and the water froze in the hose so as greatly to impede the work of fighting the flames. A strong northwest wind was blowing and the fire was not checked until a number of buildings had been blown up. No calamity of the sort at all equal in extent had then been known in this country. It caused a veritable panic; most of the insurance companies confessed themselves unable to meet their obligations; merchants saw nothing but bankruptcy before them. The loss was afterwards reckoned at $20,000,000, but at the moment it seemed even greater, as men looked at the space where 648 buildings had been destroyed in a night. Here was a great opportunity for the Hartford Fire Insurance Company. When the news arrived, Mr. Terry, the president, and Mr. Bolles, the secretary, started in a sleigh for New York. The mercury was below zero, and the journey was long and arduous, but it was well worth the while, for it resulted in establishing a reputation for the "Hartford" which was invaluable. Mr. Terry had pledged his own property to the Hartford Bank as additional security for the money he proposed to draw for the company. When he arrived, and in the midst of the panic and distrust announced that he was there to pay all losses of his company in full, and to take new insurance, he probably did the greatest stroke of business of his life. It was not merely the burned-out merchants who found solid relief in his appearance, but also the multitudes outside the burned district who had begun to feel that they had no security since the companies in which many of them were insured had failed under this disaster. Here was a company that paid, and that wanted new risks. The advertisement was worth the anxiety and physical inconvenience that it cost. The company paid out for losses by this fire $64,973.54, but it gained a standing that was worth all it lost.

THE FIRST SYMPATHETIC STRIKE.

The method of the "sympathetic strike" is that of the old woman in the nursery tale who was unable to persuade her pig to jump over the stile, said the Rev. W. E. Barton in a recenf sermon. She commanded the dog to leave his ordinary duties and bite the pig; upon the refusal of the dog, she commanded the stick to beat the dog. Then as refusal followed refusal, she ordered the fire to burn the stick, and the water to quench the fire, and the ox to drink the water, and the butcher to kill the ox, and the rope to hang the butcher, and the rat to gnaw the rope, and the cat to kill the rat. Here, by reason of the old-time animosity of the cat against the rat, she succeeded. The cat began to catch the rat, and the rat, to save its life, began to gnaw the rope, and the rope to escape destruction began to hang the butcher, and the butcher to save his neck began to kill the ox, and the ox began to drink the water, and the water to quench the fire, and the fire to burn the stick, and the stick to beat the dog. Thereupon the dog proceeded to bite the pig, and the pig jumped over the stile, and the old woman went on her way rejoicing. This was the first sympathetic strike on record. It succeeeded, but the ethics of the system are totally bad. "No old woman," said Mr. Barton, "has a right to set the universe in array against itself for the sake of getting her pig over the stile.—*Boston Transcript.*

ECCENTRICITIES OF FIRES.

We have often heard it stated by fire insurance managers that very frequently, while fireproof, sprinklered, and other first-class risks would burn like a box of matches, extra hazardous risks would go on from year to year at a high premium without even the slightest suspicion of a spark. Quarries and graveyards have been quoted as instances in point, and so far from the above being altogether an exaggeration we remember a case last year of a fire at a quarry, when a lot of fencing was burned and considerable damage done. The above view is borne out by a rather curious fire which took place at Wandsworth on the 26th instant, among the property of the Midland Railway Company. A small corrugated iron building, of all things in the world, first took fire, and the flames then attacked a much larger building used as a store, afterwards spreading to some adjacent railway trucks, which were heavily laden with hay and straw. Six steamers were eventually set to work, but the fire could not be overcome until the two buildings had been destroyed and the twenty-one trucks practically gutted. All originated with a corrugated iron building, which might have been considered at least good enough to hold a fire until the brigade could extinguish it. After all, quarries and tombstones don't seem to be much of an exaggeration.—*Insurance Observer, London.*

—Believing that "cleanliness is next to godliness," and that vermin are to be extirpated with fire and sword, Mrs. J. S. Ransom, who lives in the handsome Knox flats on Greenwood avenue, poured gasoline on the kitchen floor and mouldings last Tuesday, and set fire to it, for the purpose of destroying cockroaches. She succeeded admirably. Before she could tell just how it happened, the fire was chasing the roaches through the roof of the building, and the fire department was making an awful clatter not at all pleasing to a weak woman's nerves. When a final inventory was taken it was found that the Ransom flat was minus seventeen cockroaches, $2,000 worth of furniture, and other people were discommoded and damaged to the extent of $7,100.

Deposit at Ottawa, $3,541,617 00

ISSUES policies both on the Mutual and on the Stock plans. Its Stock, or low-level rate policies, are at lower rates than purely stock companies, and its mutual, or with profits policies, are not equalled by any "purely mutual" life insurance company for lowness of cost, produced by annual cash dividends upon identical policies.

W. H. ORR & SONS, Managers,
Cor. Toronto & Court Sts.

Oldest Stock Company in America . .

Insurance Company of . . . NORTH AMERICA OF . . . PHILADELPHIA

FIRE Insurance written . . . at Lowest Rates.

Capital, $3,000,000. Assets, $9,432,249.80

Brains and Capital

In every partnership there are two factors of great importance the managing brain and the capital employed, and if death removes either, the business must suffer. It often happens that the brains belong to one man and the capital to another. If the manager dies the capital is worth less than before; if the capitalist dies and his capital is withdrawn, the manager is crippled. It is clear that each has an insurable interest in the life of the other because the profits of each depend in part upon the life of both. The firm should, therefore, take one of the Unconditional Policies of the Manufacturers Life, which are free from all restrictions as to travel, residence or occupation, and are **absolutely indisputable on any ground whatever after the FIRST YEAR.** Get the rates and all particulars from any of the Company's Agents or from Head Office.

Manufacturers Life Insurance Co.,
Toronto, Canada.

E. A. MEREDITH, LL.D. JOHN HOSCIN, Q.C., LL.D. } Vice-Presidents.

The Company acts as **Executor, Administrator, Receiver, Committee, Guardian, Trustee, Assignee,** and in other fiduciary capacities, under direct or substitutionary appointment.

The Company also acts as **Agent for Executors and Trustees,** and for the transaction of all financial business; invests money, at best rates, in first mortgage and other securities; issues and countersigns bonds and debentures; collects rents, interest dividends, &c. It obviates the need of security for Administrations, and relieves individuals from responsibility as well as from onerous duties.

The services of Solicitors who bring estates or business to the Company are retained. All business entrusted to the Company will be economically and promptly attended to.

DECISIONS IN COMMERCIAL LAW.

DONOGH V. GILLESPIE.—The Court of Appeal decides that bankers are subject to the principles of law governing ordinary agents, and therefore bankers to whom as agents a bill of exchange is forwarded for collection, can receive payment in money only, and cannot bind the principals by setting off the amount of the bill of exchange against a balance by them due to the acceptor.

REID V. BARNES.—In action under the Workmen's Compensation Act and at common law for damages for injuries sustained by the plaintiff while engaged in digging a drain upon the defendant's farm, it did not appear that the plaintiff engaged with the defendant to do any particular work, but that he was first put by the defendant at mason work and then at digging the drain. Held, by the Court of Appeal, that it was a question for the jury whether the hiring of the plaintiff was as a servant in husbandry within the meaning of the amendment to the Workmen's Compensation for Injuries Act, excluding a servant in husbandry from the definition of a workman for the purposes of the Act, and whether the work he was engaged in was in the usual course of his employment as such, and also whether the danger was known to the defendant and unknown to the plaintiff, or the converse.

KENNEDY V. PROTESTANT ORPHANS' HOME.—Where a testator devised and bequeathed all his real and personal estate to his executors and trustees for the purpose of paying a number of pecuniary legacies, some to personal legatees and others to charitable associations, and provided that the residue of his estate should be divided *pro rata* among the legatees, the Court of Queen's Bench held that it was the duty of the executors to deduct the succession duty payable in respect to the pecuniary legatees before paying the balance over to the legatees respectively, and they had no right to pay such succession duty out of the residue left after paying the legacies in full.

BOULTON V. SHEA.—The Algoma Trading Co., one of the appellants and plaintiffs, leased certain crown lands to the respondent Shea, the lease containing a covenant by Shea, not to remove gravel or sand from the premises. Shea afterwards ascertained that no patent for the land had been issued to the company, and applied to the Crown Lands Department for a patent thereof to himself, and also sold gravel off the premises to the Canadian Pacific Railway Co. The plaintiff company then pressed the claim they had previously made to the department, and the Commissioner of Crown Lands ruled that it should issue to them on payment to Shea for his improvements. Shea refusing to agree to any terms of compensation, the company served him with a notice of arbitration, and an award was eventually made which was not taken up, as Shea refused to pay his share of the arbitrator's fees. The company having assigned their patent to the plaintiff Boulton, an action was brought by him and the company against Shea, claiming arrears of rent, payment for use and occupation, damages for breach of the covenant not to remove gravel, and delivery of possession. The Supreme Court of Canada affirmed the decision of the Court of Appeal that the plaintiffs were not in a position to bring the action until Shea had been paid for his improvements.

CANADIAN PACIFIC RAILWAY COMPANY V. CHALIFOUX.—The Supreme Court of Canada held, reversing the judgments of the Superior Court and Court of Queen's Bench for Lower Canada, that where the breaking of a rail is shown to be due to the severity of the climate and the suddenly great variation of the degrees of temperature, and not to any want of care or skill upon the part of the railway company in the selection, testing, laying and use of such rail, the company is not liable in damages to a passenger injured by the derailment of a train through the breaking of such rail.

CANADIAN INSCRIBED STOCK

An article on this subject appears in the London *Economist*, of July 14th. It appears that the Government of Canada applied, that week, to the Stock Exchange authorities in London, for the appointment of a settling day for an issue of £1,513,100 of Canadian three per cent. inscribed stock, which was taken up privately. We learn from the journal quoted, that inasmuch as the application conveyed to the market the first intimation that such an issue had been made, the action of the Government gave rise to some adverse comments. "It is true that, once at least before, the Canadian Government made a private allotment of stock; but the comparative largeness of the issue recently made has drawn attention to what, in some quarters, is regarded as a departure from sound principle."

"Without taking up that attitude," says the *Economist*, "or joining in the suggestion that the Stock Exchange should refuse the settling day asked for, we would point out why, in our opinion, private issues of this kind are undesirable. In the first place, the chances are that the borrowing Government, by inviting public tenders and by bringing into play the competition of those who have money to invest, would be able to raise its loan upon more advantageous terms than by allotting it to a few private tenderers. Against this it may be said that there is the standard provided by the current quotation of the inscribed stock, and that it is to be assumed the Canadian Government has not accepted a lower price than that. But, in the second place, it is never wise to disturb a market by permitting a feeling of nervousness to spread lest the indebtedness of a colony may be secretly growing at a greater rate than appears on the surface."

THE ENGLISH GRAIN CROP.

A summary is made by the London *Times* of July 11th of crop reports from correspondents in all parts of Great Britain. From this summary it is learned that the average will compare favorably with that of the same period for the two previous years.

As to the cereal crops, the average condition for Great Britain as a whole works out above 100 for wheat, barley, and oats alike. More than nine-tenths of the wheat area of Great Britain is found in England alone, and in this section of the kingdom the condition of the wheat crop last week was as high as 102. In the eastern counties of England in which the cultivation of wheat reaches its maximum, we see such numbers as the following: Bedford, 103.5; Cambridge, 100.5; Essex, 105.5; Hertford, 103; Huntingdon, 107; Lincoln, 100.5; Norfolk, 98; Suffolk, 97 Excepting the last two all these are above average; in the two extreme eastern counties the wheat plant suffered much from the May frosts.

Peas are almost exclusively an English crop, and the condition for England works out at 102, the extremes being 120 in Notts and Stafford, and 88 in Wilts and 87 in Bucks.

In the case of hops the condition is denoted by 83, or 17 points below the normal; wireworm and cold winds kept the crop back in Kent; while in Herefordshire, the hops are short, much blighted and irregular in growth

Mercantile Summary.

WALKERVILLE has gas mains laid in her streets which supply natural gas from the Kingsville wells.

STILL another convention to be held in Canada is that of the Philatelic Association, to be held in Montreal late in August.

IT is stated on reliable authority, says the Winnipeg *Free Press*, that there is still 750,000 bushels of wheat of the 1893 crop in store west of Winnipeg.

A NEW steam ferry boat, 115 feet in length, intended to ply between, Charlottetown and Southport, has been launched at Mount Stewart, P.E.I.

HAY and oats are reported over an average crop in Nova Scotia; potatoes rather under average. There is also a good outlook for fruit in that province.

THE Toronto Industrial Fair will open this year on Monday, 3rd September. The entries thus far made are stated to be greater in number than ever before.

MR. JOSEPH RICHARDSON, a much respected citizen of Montreal, of the old firm of Hua & Richardson, was killed near Longueuil last week on the railway track. Being very deaf, he did not hear the approach of an engine, although the whistle was blown and everything done to avert the accident, but without avail.

Mercantile Summary.

IT is stated by the *Advertiser* that F. X. E. Gauthier, of L'Orignal, has sold out his business to B. J. Jamieson, of Vankleek Hill, who intends continuing it in the same store.

OFFER is made of Galt public school debentures, with thirty years to run, to the extent in all of $11,000. They bear 4 per cent. interest and are offered in parcels of $1,000 or over.

MR. J. S. BOUSQUET, of La Banque du Peuple, is president, and Hon. J. R. Thibaudeau, of Montreal, a director of a company which is to build an aqueduct for the town of Campbellton, N.B.

A NEW steel cruiser for the use of the Government of Canada, the "Aberdeen," has been built on the Clyde, and is expected by 10th August at Halifax. She cost, according to the Halifax papers, about $87,000.

PURCHASES have been made by the Canada Eastern Railway Company of 30,000 hemlock, cedar and spruce ties, to be used on the extension from Chatham to Black Brook and building the loop line to Nelson, N.B.

CALGARY had a gala week recently, when business was practically suspended and everybody went to the races or to the fair. The afternoons of two days, Tuesday and Wednesday, were declared holidays by the mayor, but the people took nearly the whole week.

Mercantile Summary.

DEBENTURES have been ordered by the town council of New Glasgow, N.S., as understated: Sewerage, $8,000; water, $8,000; street, $7.000. Total, $23,000. These were authorized by ratepayers in meeting assembled on June 20th, and have the authority of the legislature.

MR. EDMUND WRAGGE, local superintendent of the Grand Trunk Railway at Toronto, tells the Montreal *Gazette* that the new union station now being built in Toronto will be finished in about a year. The cost, which will be about $750,000, will be shared by the two roads, the G. T. R. finding the money and the C. P. R. paying interest on half of it.

SOME weeks ago a receiver was appointed to look after the interests of the creditors of Doty Bros. & Co., Toronto. A number of meetings have been held and resulted in the firm assigning with liabilities of $20,000 and nominal assets of $14,000.——In December, 1892, the firm of Mullin & Co. purchased the Bloor street lumber yard of Robert Thomson & Co. for $11,160, giving a chattel mortgage to secure the amount. In December last this was renewed for $14,300, and now it has been foreclosed and the concern sold out.——The grocery business of Hickman & Co., Parkdale, is carried on by his wife Annie W., and she has assigned. The concern usually carried a stock of $3,000, and with but little if any paid thereon.

Mercantile Summary.

THE firm Mills & McKellar went into business together as builders, etc., in Hamilton, in 1878. Eight or ten years afterward the latter retired and John Mills continued. But he has not succeeded in making money enough to retire upon, indeed he now assigns.——A dealer in shoes at Harrow, named F. W. White, assigns. He will not owe much.

ON Wednesday the sheriff entered the premises of James Eaton & Co., Toronto, with a judgment, but it was not operative, as an assignment had already been made to W. A. Campbell, who was in possession as receiver ——The creditors are in possession of the cigar store of John Kerr, Toronto. It was only in November last that he opened shop.

BY many persons the position of the Reliance Electric Mnfg. Co., of Waterford, has been considered doubtful. In the fall of 1887 it succeeded Slaght & York, having a capital of $100,000, about one-half of which was represented by patents, and about one-half fully paid. L. H. Slaght, the principal stockholder of this company, was also a member of the private banking firm of L. Becker & Co., who failed about four months ago. Since this failure the company, as we then intimated, became embarrassed, and has since been unable to make progress. An assignment has followed in due course.——At a meeting of the creditors of Newton Challen, wagon maker, of Simcoe, held last week, no arrangements were made, and he assigned ——A tinsmith at Barrie named C. J. Lane has struggled for a number of years for an existence, and now assigns.

57 Bay Street
Toronto

LISTOWEL'S grain elevator has been burned.

BORING has been resumed at the Hamilton gas well.

THE first oil well at Thedford, Lambton county, proved a dry hole. Another is being put down about two miles from the first.

IN Paris, when a local shopkeeper advertises to sell at cost he must keep his word, or the Government will compel him to tell why.

A BY-LAW will be submitted to the citizens of Aylmer, Que., to authorize the borrowing of $33,000, with a view of placing a waterworks system in the village.

FOUR additional crews have recently been placed on the Michigan Central Railway, and there are now the largest number of crews on the road since last winter.

GORDEN & IRONSIDES, of Pilot Mound, have secured 6,000 head of cattle in the West, and commence next week shipping them to the English markets.—*Manitoba Liberal.*

BANK bills raised from $5 to $50 have been discovered at Point St. Charles and Hochelaga, Montreal. The Bank of Montreal and the Merchants' Bank of Canada were the banks whose bills were so treated.

RECEIPTS of Customs duties at the port of Montreal, for last month, were $542,155, which is $92,672 less than in July 1893. The Inland Revenue, at Montreal, was $162,789, where in the previous July it was $188,228.

THE harness stock of John Heppler, who failed a short time ago at Poole, will be sold on the 20th inst.——The Toronto Fringe and Tassel Co.'s stock, Toronto, was sold the other day to F. Youngblutt at 26¾ per cent.

AN offer is made to his creditors by Wm. McElroy, general dealer, Richmond, Ont., of 40 cents in the dollar, and he intends going out of business. As one of the firm of W. & J. McElroy, he was unsuccessful in years gone by.

THE Dominion Blanket and Fibre Co., of Montreal and Beauharnois, whose embarrassment we noted in a late issue, have decided to ask an extension at six and twelve months, and if successful in obtaining the same, will reorganize.

THE general store business of J. A. Stewart has been sold, shop and all, to Mr. Andrew, of Usborne, and Mr. Stewart goes to live in Egmondville. Also, the *Expositor* says, Mr. D. D. Wilson has sold the oatmeal mill in that town to Mr. Walter Thompson, the former proprietor.

THE Provincial Exhibition of Nova Scotia will open in Halifax on the 25th September and be continued the three following days. New horse sheds and a carriage building are being erected and the grounds being otherwise improved.

AT Northport, Nova Scotia, Spencer & Tucker, a small lobster-canning concern, are reported to have assigned. Their plant has been under chattel mortgage to the Portland Packing Co. for advances.——W. Gustafson, peddler, etc., Halifax, is reported insolvent.

FROM St. John, N.B., the failure is reported of W. N. Flewelling, who began as a grocer in 1891, on a capital of a few hundred dollars. ——At Moncton, in the same Province, H. G. Wadham, who has been doing a tea and crockery business, has assigned.

LAST year the Western Telephone Company imported from Germany a cable half a mile long, and stretched it across the Fraser River at Brownsville. The great freshet of the present summer broke one end loose, and in trying to haul it in the end was lost. It is found to be embedded in sand and clay and doubtful of recovery.

THE Ontario Forge and Bolt Co., limited, has gone into voluntary liquidation. It was incorporated in 1885 as the Ontario Bolt Co. In 1891 the nominal capital was increased to $200,000 and the name changed as above. Of this sum $115,000 was paid. The company show a surplus and it is expected that creditors will be paid in full.

THE Masonic Mutual Benefit Association of Ontario is to be wound up. It is an assessment institution which had a fair success for some years. As the members grew in age, however, the assessments increased in number, and membership ceased to be a profitable investment. The story has been heard before, and is likely to be heard again. Its moral is that cheap insurance is very apt to be unreliable insurance.—*Montreal Gazette.*

A FIRM of cigar manufacturers in a small way at Ottawa, Goldstein & Goldstein, who began business only two years ago, and who assigned in July, are now offering 20 per cent. cash, on liabilities of $3,400; this is an amendment to a former offer of 15 per cent.——R. A. Starrs & Co., wine and liquor jobbers, of the same city, are in the hands of the sheriff. The firm was in trouble in 1891, and the stock has been pretty well chattel-mortgaged for some time past.

AN improvement in the activity of building is perceptible in Toronto of late. The building permits issued by the city commissioner during July aggregated $201,875, as against $88,805 for the corresponding period of last year. Still, for the seven months of the present year the value of permits granted amounted to less than for the same time for 1893.

QUEENSLAND has shot ahead tremendously with her sugar production, which in the past season is estimated at 80,000 tons—of the value of £1,000,000 sterling. This bountiful crop has virtually saved the colony from the disastrous effects of the floods and bank failures which threatened to give Queensland a blow from which she might not recover for a very long time.

As a result of United States tariff regulations American sugar buyers have searched all parts of the world for sugar supplies, and from Alexandria, Egypt, the steamer "Monkseaton" brought 37,000 bags of crystallized sugar for a New York firm. This is the first arrival of Egyptian sugar in the United States within a year. London is the chief market for supplies from that source.

THE Industrial Fair at Winnipeg in the third week of July was creditable to the progress of Manitoba and the enterprise of Winnipeg. And the attendance, ranging as it did from 3,000 to 5,000 per day, was a tribute to the efforts of the managers. The dairy exhibit, the cattle, the poultry, all had their admirers, but in the section representing the domestic arts and ladies' work there does not appear to have been the display which was reasonably to be expected.

THE G. H. Harper Milling Company, Dundas, purchased the Webster Mills for $16,000 in September, 1891. Since then, as every one in the trade knows, flour milling business has been generally unsatisfactory, and it is not surprising to hear that the company named has not made any money. They now assign, and the business will be wound up. Their banker is the chief creditor.——About a year ago Kelly Bros., dealers in dry goods, etc., in Ontario, dissolved partnership, J. J. continuing the business. His methods of managing business have not been calculated to inspire confidence, still he obtained credit for $2,000, and now assigns. ——Daniel Hicks, who keeps the Brunswick House at Brighton, surprised his creditors the other day by making an assignment. He owes $3,500; of this sum $1,000 is preferred claims. It is thought his assets may realize about $2,000.

CLOTHIERS' TRIMMINGS
59 Front St. West Toronto

An extension of time is asked by A. Allan & Co., dealers in dry goods at Calgary. Ten years ago the business was started by Rankin & Allan. They dissolved partnership in 1891, the latter continuing. A good surplus is shown, and as trade is expected to improve shortly after harvest, he should be able to pay in full. ——The mortgagees are in possession of the clothing stock of T. M. Graham in Victoria, B.C., on a claim of $2,000, and stock will be sold.

F. O. Lamarche, a quite extensive hay dealer at Berthierville, who was a heavy creditor of Marsan & Brosseau, Montreal, finds himself seriously embarrassed, and it is understood his country creditors are willing to accept 50 cents cash.——Henry Brown, trader of Longue Pointe, formerly of Quebec, has assigned on demand, and owes $7,880.——A demand of assignment has been served upon A. J. Dubuc & Co., dry goods dealers, St. Hyacinthe, formerly of Drummondville, where they were unsuccessful.

It is just nine years since Hamilton & Durnford bought the general stock of Brown Bros. & Co., at Tottenham, amounting to $4,700. The price paid was 30 per cent. discount. One-third of the purchase was paid in cash and the balance secured. In Feb., 1890, Durnford retired from the firm, after which Hamilton took his nephew into partnership and traded under the style of Hamilton & Co. The nephew retired about a year ago and Mr. H. has since continued the business. Last month he sold the stock to Sheppard & Co., and now asks creditors to accept 60 per cent. of their claims in settlement.

Montreal failures for the week are reported as follows: Mrs. A. Beauchamp, milliner, has turned her assets over to the assignee, and owes $1,100.——Ranger & Co., who have been doing an instalment-plan furniture business for about two years, have called their creditors together. ——The liabilities of W. R. Fee & Co., furniture, reported failed last week, are $8,050 general, $4,300 privileged.——Fred. Lawton, doing business in lamp goods, &c., under the style of Dougall & Lawton, has had to assign; liabilities are $7,179.——Cote & Lafleche, a dry goods concern, in business since May, 1893, have closed up with liabilities of about $10,000.

In the Province of Quebec, the failure list for the week is substantially as follows: P. C. Blouin, of St. Jean, Isle d'Orleans, formerly a navigator, in which capacity he is supposed to have made money, but of late years keeper of a general store, has been in poor financial shape and frequently sued for the last year. He is now trying to arrange a settlement at 40c. on the dollar.——A. I. Gravel, general dealer, Louiseville, lately reported failed, is offering his creditors 60 cents on the dollar, in quarterly instalments spread over a year.——H. Larocque, in the boot and shoes business at Hull since 1891, has assigned. Liabilities $2,426.——T. Thibaudeau & Co., storekeepers at Deschambault, have compromised with their creditors at 25 cents cash.

A circular from Messrs. James McMillan & Co., of Minneapolis, gives some good advice to collectors of furs and skins. They say, for example: "Dry hides will continue dull, and some of the receipts are moth eaten." "Dry hides, as well as deer skins and furs, should be beaten frequently during the warm weather to keep out the bugs which will destroy them." As to ginseng and seneca root they say: "Prices are higher for ginseng and dull and slightly lower for seneca. Some predict seneca will decline to 20c. per pound on account of the large receipts. We do not believe it will happen very soon, if at all. Advise diggers to dig all the ginseng and seneca they can, particularly seneca, as these are hard times, and the more they dig the more money they will get. Wash the root clean, dry it thoroughly and ship it in promptly."

—The renting of portions of the sidewalk in Paris to proprietors of cafes, who set out tables there, brings in a rental to the city of 900,000f a year.

—A Winnipeg paper, the *Nor'-Wester*, edited by Mr. Luxton, has the boldness to say this: "There is no tariff issue in the Northwest. We have got nearly all the concessions we asked for, and perhaps quite all we could reasonably claim. We have been given free lumber, and the duty on agricultural implements, binder twine and coal oil has been reduced. The tariff has been taken off the list of issues, so far as this portion of the country is concerned."

THE SITUATION.

War has been declared between Japan and China over the Corean embroglio, but before this was done acts of war were committed for which each belligerent blames the other as the aggressor. Though the evidence is not complete, it points to Japan as having needlessly struck the first blow. By an extraordinary blunder, a British vessel carrying Chinese troops was sunk by the Japanese. An apology for the outrage has been volunteered, and damages must in due course follow. If there is to be intervention, the Russian press claims the first right for Russia, but this might not be accepted by the powers interested. Japan may win victories at first, but China has the greater resources and power of endurance.

Whether any tariff bill will be passed at Washington this session is still a matter of doubt. The items on which the differences between the two Houses are most pronounced are sugar, coal, and iron ore. Charges are openly made that Senators have taken bribes from the Sugar Trust, and the Senators who hold the fate of the tariff in their hands are precisely those on whom suspicion fastens most readily. If bribes have been given, the Senators who received them are not likely to give way; this is the meaning of the boast that there will be no change in the sugar question. The Sugar Trust is trying to hit back in the form of a charge that the Nova Scotia coal combine was formed on a promise of the free entrance of their product into the United States. It is obvious that no assured promise could be made, because no one was in a position to see it carried out.

An extension of the Patron of Industry organization to the cities has more the look of a political than an economical move. So long as it was confined to farmers it included only proprietors and tenants of farms. In the city of Toronto, to which Mr. Mallory has extended the operations of the order, it will be confined chiefly to men whose labor is their principal or only resource. In the country, the Patrons represent capital, employers of labor; sometimes of their own labor, sometimes that of others. Unless one rule be applied in the town and another in the country, labor and capital will henceforth be both represented in the organization. How will they settle their differences? The city Patrons have agreed to confer with the Socialists. Here they are on ticklish ground. If Socialism is to enter the organization of the Patrons of Industry, the order will need a new programme, and if it gets one, it will henceforth enter on a new and perilous career. The average farmer is not prepared to fraternize with the Socialists. As the owner of property, he is, as a rule, as wide apart from the Socialist as any two men can be from one another.

There are men among us whose public spirit is taking the form of a call for an international convention, which is to look to the improvement of the water-way that divides Canada and the United States. International canal enlargement is their object. An international convention, without authority from the two Governments, would exhaust itself in talk; it would have no power to do anything. It is very doubtful whether it would succeed in inducing the two Governments to take the enterprise in hand. Though the open water-ways are common to both countries, the canals have to be made in the territory of one or the other of them, chiefly Canada. Could we admit the partnership of a foreign government in our canals? That is the question for us. It is very doubtful whether the United States has any constitutional authority to make an extra national expenditure of this kind, or rather it is very certain that it has not. Before anything could be done by them, an amendment of the federal constitution, always a difficult matter, would have to be made. It is easy to discourse upon international canal improvement; it needs vast courage to carry into effect a movement of the kind contemplated.

No sufficient evidence has been obtained to show that the American steamer "Louise," of Sandusky, seized at Pelee Island last week by the Canadian authorities, had been guilty of a breach of the Canadian fishing laws, and she has been released. The captain is said not to have strictly complied with our coasting and customs laws, but he had done nothing to warrant the detention of the vessel. No full report of the facts of the case had been laid before the Ottawa Government, at the time of the release, and it is said that Inspector McMichael is to make such a report, after the event. In the absence of the facts it is impossible to understand the merits of the case. Apparently, the over-zeal of the local official has been at fault; and perhaps the Ottawa Government has felt that it was desirable to take a lenient view of the alleged misconduct of the "Louise." The local officials should not capture foreign vessels for any cause, unless they are quite sure of their ground; in the present instance there seems to have been room for doubt.

Strong opposition is made by the Ottawa Government to the British death duties on property in Canada, the amendment of the Chancellor of the Exchequer not being accepted as satisfactory. This fact is signalized in a telegram from Sir John Thompson to Sir Charles Tupper. Sir Charles, in a communication to the Marquis of Ripon, points out that no revenue will be obtained from these duties, because the colonies will increase their death duties so as to make them equal to the British, and in that event the British treasury will, under the new law, be entitled to nothing. But while this is likely to happen, Sir Charles points out that the question of the right of the Imperial Parliament to tax property in the colonies is likely to be raised, and if so it would take a serious form. If the colonies had been in an irritable mood at the time the proposal was made, the question would at once have come up. Under the Confederation Act it would be difficult to maintain the right of Great Britain to levy duties on property in Canada; and it so happens that death duties had become a resource of which several provinces had availed themselves.

After considerable delay, the necessary money for the completion of the Chignecto ship railway is said to have been raised. And there is a prospect of work being resumed at an early date; all that is necessary being that the Canadian Government agree to extend the time for the completion of the railway. Extensions that have taken place in the past, and if there is to be another, it ought to be on the distinct understanding that the work will be completed within the time named. What is the prospect of this being done? An English firm of contractors, Messrs. Pearson & Son, after having caused an examination of the work to be made, are said to be prepared to assume the contract for its completion. Mr. A. D. Pownell, a member of the British House of Commons, for a Glasgow district constituency, is at present at Ottawa, sounding the Government on the subject. The subsidy of $250,000 a year for 20 years, granted by our Government, is, in any case, to become active on the completion of the work. There seems to be no good reason for not giving the necessary time for the execution of the work. We have always thought it unfortunate that the experiment of a ship railway should have been made on so large a scale; but the venture having been made and much work done, it is too late to draw back.

A new reading of the treaty restrictions against trade preference was given in the House of Commons, on Monday, by Sir Edward Grey, of the Foreign Office. They do not, according to this interpretation, prevent Great Britain discriminating in favor of the colonies, but they prevent the colonies reciprocating the favor. Whether Great Britain would exercise that power is another matter; the colonies that took part in the recent conference at Ottawa, ask the right to discriminate within the Empire. They desire to do so reciprocally. The Chancellor of the Exchequer would probably class this form of reciprocity among the "fads and fallacies" of the day, and the chances are that his colleagues would agree with him. In his recent speech at the Chamber of Commerce, he expressed agreement with Sir Albert Rollit, in his advice to people "not to have recourse to fads and fallacies, like fair trade, retaliation and reciprocity;" and he would almost certainly class preferential trade under that head. And he joins in the advice that "whatever may be the temporary depression or difficulties, not to have recourse to these fads and fallacies."

DANGEROUS DELAYS.

After such a disastrous year for fires as 1893 has proved, it is not surprising that the Canadian Fire Underwriters' Association, in casting about to see how the ratio of loss may be lessened, is instructing its inspectors to look with some strictness to the fire appliances of towns and cities. It is natural to suppose that where a low ratio of fire loss prevails, the insurance authorities may allow conditions to exist which they would not feel justified in permitting when fires increase in number and destructiveness. But when the residents of certain places are warned by the people who carry insurance on their property that owing to the increase of fires all over the country, certain improvements of fire-fighting apparatus must be made or the companies cannot carry the usual risks without an increase in average rates, these residents are annoyed and begin to call the underwriters names. This may not be philosophical or business-like, but it is human nature. Hence we find, as has been repeatedly stated in these columns of late, that the visits and requirements of the fire inspectors have disturbed the minds of citizens in various places in Canada. And letters or editorials in a number of journals have denounced the underwriters as arbitrary, as "autocrats," or "extortioners," or even "robbers," because they seek to make the rates and conditions of insurance such as will show a profit in the business.

We find in the Amherstburg *Echo* of last week an editorial article of so savage a nature that we have made enquiry into the circumstances which brought it about. The complaint of the people of Amherstburg, as voiced by the journal named, may serve as a specimen, we doubt not, of quite a number of others in different provinces. The *Echo* calls the C.F.U.A. an arbitrary combine, and its officials dictators; says it has bullied Amherstburg beyond bearing, and finally, through its inspector, made "tyrannical threats;" and then the *Echo* menaces the underwriters with some action by the Ontario Legislature to control them if they do not mind what they are about. What terrible fellows these underwriters must be, to be sure! To us it seems the most natural thing in the world for the people who insure property from fire to say, when they find the fire losses of the country rising to unprecedented proportions: "Gentlemen who control municipalities, we must ask you to take extra pains in providing against fire in order that our loss may be less severe. Either this, or we shall be compelled to charge your residents higher rates for insuring their property." If insurers are tyrants and bullies for doing this, bankers are tyrants when they ask higher rates for discounting one note than another—manufacturers are bullies when they charge more for goods on credit than for cash.

Now to look into the case of Amherstburg. As long ago as 5th July, 1893, the report of the C. F. U. A. inspector noted several deficiencies from the then standard of fire appliances applicable to towns of the same rating. A copy of this report was sent, we find, to the Amherstburg authorities 19th August last year, and these officials were told what must be done to maintain their rating. All September passed without a sign, and not till 5th October did a reply come, after repeated reminders, from the town, which made no demur to the request of the association and found no fault with its requirements. They said, in effect, "we will do so-and-so if it is necessary," and they were told it was necessary. The autumn and the winter passed, the spring came and Amherstburg had not got the required appliances. Finally, in July, the town was notified that because it had neglected the precautions desired its rating would be lowered on August 1st. *Then* the clerk wired (24th July), not a line in reply having reached the C. F. U. A. in the meantime: "Have got Fire-king extinguisher, hose, fire buckets. Will this make us O K?" And what they asked for having been done, the underwriters at once withdrew the order lowering the town's rating.

What is plain on the very surface of things is that it was neither business-like nor just for the officials of Amherstburg to leave the letters of the association unanswered, and virtually to say by their silence and inaction, "We won't get the things you suggest, and we won't answer your letters." And this fault of tardiness in answering correspondence is one unhappily common to many Canadian towns and villages. The associated underwriters are sellers of fire insurance. They make known the rates and terms on which they will underwrite. And if they make contracts to indemnify insurants on certain conditions, they have a right to hold their customers to these conditions. If in doing this they assume a needlessly dictatorial tone, let them be rebuked. If they make flagrant overcharges, let them be restrained. But it is poor argument and weak policy for municipalities to neglect the regulations upon which their contracts for the price of insurance are based, and then call the underwriters names for reminding them of their duty.

COUNTERFEIT LIFE ASSURANCE.

THE RECORD FOR TEN YEARS.

We now give the figures of the remaining twenty-nine societies out of fifty-nine whose record we have kept for a series of years. Our last week's list of thirty began with the A.O.U.W. Grand Lodge, San Francisco, and ended with the Knights and Ladies of Honor, Indianapolis. During the past year only twenty-seven of these fifty-nine societies succeeded in making any increase in their membership, and in more than half of these cases the increase amounted to a practical stand still, with the chances largely against their ever again making any increase. No less than thirty-two retrograded in membership—began to go down hill. From several of these there is no report as to the year's death losses, which may be taken as an evidence, in most cases, that many of the certificates are unpaid, and that there is a "last man" in sight, or perhaps several hundred of them keeping out of sight. See illustrations of this in the case of Nos. 15, 35, 54, 57 and 58. It will be observed that Nos. 14, 17, 22, 23, 24, 42, 43, 46, 50, 52, 53 and 56 all show a strong inclination to go in that direction too, despite all their officers have said and written about the power of the reserve in the pockets of the members.

A year ago we mentioned the names of sixteen societies from among the sixty which would be good ones for any of our readers to keep out of. All of them were among the most prosperous and hopeful, five or six years ago. Five of them are now practically out of existence, and of the other eleven, not one has had its outlook improved by the

addition of another year to the age of each of its members. Take two of the largest—the Chosen Friends (No. 17) and the Equitable Aid Union (No. 22). From 37,644 and 37,460, their respective membership has fallen to 35,892 and 31,194. Together these two societies have had over sixty thousand years added to the combined age of their members by the one year's operations. No wonder that in both cases the death calls have increased.

Perhaps we cannot better close this review of the ten years, than by giving a partial list of the assessment societies which have flourished in our own vicinity within the ten years, but which have now gone the way all the rest are bound to go in due time, if something more substantial than pocket reserves are not provided:

The British N. Am. Benev. Association, London.
The Canadian Mutual Aid, Toronto.
The Canadian Educational Endowment, Toronto.
The Canadian Masonic Mut. Ben. Ass'n, London.
Dominion Mutual Benefit, Toronto.
Dominion Provident Endowment, Stratford.
Equitable Provident Society, Toronto.
Equity Life Reserve Fund, Toronto.
Industrial Union of B. N. A., Toronto.
Mutual Relief Society, Yarmouth, N.S.
Provident Mutual Ass'n of Canada, Montreal.
Provident Association of America, London.
Provident Life and Live Stock Ass'n, Toronto.
Reserve Fund Accident Association, Toronto.
Toronto Life and Accident Association, Toronto.
Tontine Mutual Benefit Association, Toronto.

If any reader of the above list happens to be the possessor of a certificate in any of the above, or in any other defunct assessment or life insurance society, we should be glad to have it mailed to us, to place in our museum of such certificates. He will get a receipt for it by return mail, and it will be taken good care of, so that it may be had again, if ever wanted.

DOMINION BUILDING AND LOAN ASSOCIATION.

The fourth annual statement of this company was published last week, and like its predecessors, represents the company as very prosperous and "on a sound basis." Mortgages and interest now reach the sum of $489,738, being an increase of $113,892 over the previous year. Stock loans $7,280. Among its receipts we find $82,344 stated as being derived from instalments on ordinary shares, and $50,415 derived from prepaid shares. Fines added $1,506 to the company's coffers. These three sums make $134,265. On the other side of the account the following items appear among the payments, and we take them as a measure of the confidence its investors have had in the company. Ordinary shares withdrawn amount to $25,963, prepaid shares withdrawn to $14,600. Interest on withdrawals is placed at $2,851. Expenses on prepaid shares withdrawn $89, or a total of $43,503, or equal to about 33 per cent. of the amount received on stock sales for the year.

In the circular issued by the company last year, containing its annual statement, we find on page 13, under the heading "On Withdrawals," the admission that the withdrawals of members caused an expenditure by the company in three years of no less than $111,172.87. This must be added to the $43,503, and thus makes $154,675 withdrawn in the four years.

From this proportion of lapses it would appear that the public is slowly learning to have less faith in the future of the concerns that promise so much. On page 7 of this company's yellow and green literature is an illustration of "How 16 per cent. profit is made." Now, all this company claims to have made in the three years 1890 to 1892 is 11.96 per cent. and in 1894 about 12 per cent. Have they lost faith in their own methods?

The treasurer's trip to the Pacific Coast, inspecting loans, is referred to as satisfactory, also that of "our travelling representative," who made similar investigation. It is a little surprising to us how these gentlemen travel. We cannot think they walk to such remote points as the company's operations cover. Still we look in vain among the payments of expenditure for these items of outgo for travelling, etc. Does it come out of expenses on prepaid shares, $3,561? We have repeatedly said, and the conviction grows stronger, that it is impossible for the management to fulfil their promises to investors. During the three first years of this company's existence it made less than 12 per cent. At this rate how can its shares mature in eight years as promised? It is impossible to do business over so much territory without heavy expense and great risk. The management takes credit for "making a further reduction in expenses" by lopping off from its list of managers the names of the old president, Mr. F. A. Hall, and two directors, who were undoubtedly too conservative in their ideas to work harmoniously with the present management.

CANADIAN BANKERS' ASSOCIATION.

The third yearly meeting of the Canadian Bankers' Association which as our readers know was arranged to be held in Halifax, took place in that city on Thursday and Friday of last week, the 26th and 27th July, in the Chamber of the Legislative Council. The president, Mr. B. E. Walker, general manager of the Canadian Bank of Commerce, took the chair at noon on Thursday, when the following banks were represented by the gentlemen named:—

Merchants' Bank of Canada, J. C. Moore.
Molsons Bank, H. Markland Molson.
Bank of Toronto, J. Henderson.
Imperial Bank, B. Jennings.
Bank of New Brunswick, George A. Schofield.
Banque Jacques Cartier, A. de Martigny.
Union Bank of Canada, E. E. Webb.
Bank of Ottawa, George Burn.
Bank of Nova Scotia, Thomas Fyshe.
Bank of Hamilton, H. M. Watson.
Merchants' Bank of Halifax, D. H. Duncan.
People's Bank of Halifax, John Knight.
Union Bank of Halifax, E. L. Thorne.

The following associates were also present:—Messrs. E. L. Pease, Montreal; E. P. Winslow, Almonte, Ont.; E. D. Arnaud, Annapolis, N.S.; E. M. Saunders, Thorold, Ont.; F. H. Arnaud, Charlottetown, P.E.I.; R. S. Williams, Goderich, Ont.; W. F. Mitchell, Fredericton, N.B.; W. J. Wallace, Picton, Ont.; R. C. Macpherson, Paris, Ont.; W. H. Gossip, North Sydney, N.S.; G. C. Wainwright, Ottawa; D. H. Charles, Woodstock, Ont.; Vere Brown, Toronto; M. Morris, Seaforth, Ont.; J. F. Blagdon, A. E. Ellis and D. R. Clarke, Halifax; H. B. Melville, Colonial Bank, Barbadoes, W.I.

After the opening of the meeting, Mr. John Knight, manager of the People's Bank, of Halifax, made the address of welcome on behalf of the Halifax bankers, which was responded to by B. E. Walker. We print the remarks of these gentlemen elsewhere. The report of the executive council, the report of the editing committee of the journal, and the reports of the Winnipeg and Ottawa sub-sections, were presented and adopted.

At the afternoon session the following associates attended, in addition to those named above: W. M. Botsford, S. J. Home, G. W. G. Bonner, V. G. Gray, N. R. Burrows, W. B. Torrance, all of Halifax; W. S. Stevens, Meaford, Ont. The outgoing auditors—Messrs. M. J. A. Prendergast and E. T. Pease, of Montreal, were re-elected, and there were discussions of various questions related to banking. The president's address was delivered, and will be published in full in the journal of the association.

At the morning meeting on Friday, papers were read on some half dozen subjects of interest to the bankers.

The session closed in the afternoon, with the election of the following officers:

Honorary Presidents—Hon. Sir Donald A. Smith, president of the

Bank of Montreal; J. Stevenson, general manager of Quebec Bank, Quebec.

President—B. E. Walker, general manager Canadian Bank of Commerce.

Vice-Presidents—George Hague, general manager Merchants' Bank of Canada; Duncan Coulson, general manager, Bank of Toronto; D. H. Duncan, cashier Merchants' Bank of Halifax; G. A. Schofield, manager Bank of New Brunswick.

Executive Council—Messrs. E. S. Clouston, general manager Bank of Montreal; R. R. Grindley, general manager Bank of British North America; F. Wolferstan Thomas, general manager Molson's Bank; W. Farwell, general manager Eastern Townships Bank; J. S. Bousquet, cashier Banque du Peuple; Thos. Fyshe, cashier Bank of Nova Scotia; D. R. Wilkie, cashier Imperial Bank of Canada; R. H. Bethune, general manager Dominion Bank, and George Burn, general manager Bank of Ottawa.

Secretary-treasurer—W. W. L. Chipman, Montreal.

The editing committee and corresponding committee of the journal of the association were elected. It was resolved to recommend to the executive council that the next annual meeting of the association be held at Quebec. The visiting bankers were given a dinner at the Halifax Hotel, on the evening of Friday, 27th July, and on the following day the harbor was enlivened by the Bankers' Regatta. The visit was one which the western members at least will long remember with pleasure.

COMBINATION.

FOR THE DEVELOPMENT OF THE RESOURCES OF THE COUNTRY.

(*Communicated.*)

The establishment of boards of trade throughout the country will be of great benefit to the people of the Dominion if they are managed for the purpose of promoting the development of the resources of the various localities and districts in which they are situate. But, if their purpose is merely that of combination for the personal benefit of the individual members, or, if these members are split up into cliques and sections, each combining in the warfare of Arabs with their hands against every man, the every man's hand should be turned against them without delay or compunction.

There are possibilities and opportunities for the performance of great and continuously good work by local boards of trade, but these possibilities and opportunities would be very greatly increased if they had a common centre, free from private or merely local feelings and influences, and at which centre, whether by a United Chamber of Commerce or under the presidency of the Honorable the Minister of Trade and Commerce, the resources of the several localities and the requirements for their development would be discussed and considered with a view to necessary action.

Let us, however, consider how this combination of information and action could be extended and its influences increased.

The Governments of the Dominion and of the Provinces have great interest in the welfare and in the continuous progress of the country; each of them have officers of intelligence to seek for and the means of obtaining and disseminating information, which could be utilized for the common benefit. Each of these could act as do the United States consuls in every station to which they are appointed.

The railway companies depend to some extent for their welfare upon continuous development of local traffic, yet they do very little towards its development, but concentrate their energies upon the less profitable through traffic, in which they are often subject to ruinous competition.

The chartered banks have agencies everywhere, which are in the charge of gentlemen trained in financial matters, who should be in sympathy with the best interests of the people of the districts in which they are located.

The educational departments of the several provinces have men and women whose eyes and ears should be open to the requirements and facilities for improvement and development around them.

There are throughout the Dominion many other men and women who are advantageously situate; who have means and leisure of ascertaining, studying, and intelligently commenting upon the peculiarities, the natural productions, the indications and the facilities of their various surroundings.

All these could be utilized for the common welfare; there is no limit imaginable to the extent of the good which could thus be effected. But this would require an organization for the collation, promulgation and utilization of the information obtained, and it would be necessary that all persons engaged in the work should fully comprehend not only that the welfare of every individual is a factor in the general good, but that the general good will reflect itself upon every individual.

Is it not possible that the Honorable the Minister of Trade and Commerce could utilize this idea, and thus give an impetus to the development of the many capabilities of Canada by directing the attention of investors and of our young men to them?

Of course this would require the approval and the co-operation of the principals in each department of the trade and commerce of the country, but this is so obviously for the benefit of every merchant, manufacturer, banker, farmer, railway, etc., that we might illustrate it by the station master of a railway who might be made to understand that his services would not be required longer than his efficiency is demonstrated by the continuous increase of the profitable business of his station.

DOINGS OF MANUFACTURERS.

Mr. John Smith, Brampton, has resigned the position of liquidator of the Haggert Bros. Manufacturing Company's estate, and a meeting of the shareholders has been called to appoint another.

On Saturday last the Pemberton and Atlantic mills, at Lawrence, Mass., were closed for four weeks each, and the Phillips & Burnhardt mill for an indefinite period. Nearly 8,000 people were thus thrown out of work.

Mr. E. A. Small, vice-president, occupied the chair at a meeting of the Dominion Blanket and Fibre Co., Limited, in Montreal, on Tuesday. The creditors expressed their willingness to give further time, and it was decided to take steps to increase the capital stock and to extend operations.

In his opening address at the seventeenth annual convention of the American Paper Manufacturers' Association, at Saratoga, N.Y., President Warner Miller revealed the gratifying fact that large exportations have been made, and that several European journals are now being printed on American-made paper.

The Londonderry Iron Works, of Nova Scotia, have closed for a few weeks in order to make necessary repairs to the furnaces. The furnaces have been in constant use for three years and a half. It is customary to close down every two years in order to make repairs, which takes about from six to eight weeks.

The statement is made that a trial order for paper for newspaper purposes has been given a Canadian manufacturer by a Melbourne, Australia, firm. The instructions are that the goods shall be shipped by the cheapest route via Vancouver or London and Suez. A sample order of wooden ware is to be sent over at the same time

The St. Croix *Courier*, of St. Stephen, N.B., says that a car load of moss litter from Mr. W. F. Todd's works at Moss Bank, Musquash, reached that town by Shore Line. "By persistent energy, in the face of many difficulties and disappointments, Mr. Todd has succeeded in perfecting the apparatus for drying moss, and we hope it will prove a profitable investment."

The Montreal shoe manufacturing firm of Ames, Holden & Co. has been formed into a joint stock company, named the Ames-Holden Co., Ltd. The following officers and directors were elected at a meeting on July 24th: J. C. Holden, president and general manager; E. F. Ames, vice-president; W. A. Matley, secretary; R. C. Holden, treasurer; H. B. Ames, W. G. Norris, A. C. Flamerfelt, S. H. C. Miner, James Redmond, and J. Bonnick.

A. G. Van Egmond's Sons, of Egmondville, Ont., write to the Seaforth *Expositor* protesting against some misstatements made about their custom business. They say: "We are prepared, at all times, to do our custom work, in all branches, as usual. . . . As to our hands leaving, some of those mentioned have not been in our employ for over two years, and others have only taken temporary jobs. There is no fear but we will have a full complement of help whenever we require them."

An offer has been made to the Amherstburg council by George Middleditch (formerly of that town), of Ridgetown, to re-open his machine shop on Dalhousie street, Amherstburg, and employ as many men as work can be found for. He will agree to put in a new boiler and engine, two lathes, an iron planer, two upright drills and other machinery. He will also, if business warrants, equip his foundry and make iron and brass castings. As an inducement, he asks for free water and ten years' exemption from taxation.

When the rich merchants of Montreal feel an impulse to be generous they have a practical as well as a princely way of carrying that impulse into effect. We have just heard a little story about one of them, Mr. Andrew Gault, which may illustrate this. Having occasion to be often in Valleyfield visiting the mills, in his capacity as president of the Canadian Colored Cotton Co., he made enquiry as to what the town stood most in need of. He was told that Valleyfield was in need of better school facilities, so he offered to give $16,000 for this purpose, and the cotton company has given the site for the school.

The management of the Penman Manufacturing Company, at Paris, Ont., is wise in its generation. It arranges for a yearly outing of the employes, with which event it allows nothing to interfere. The

1894 outing consisted of a trip from Paris to Toronto. The first part of the journey was by rail to Hamilton, but from Hamilton to Toronto the route was by boat. Although the morning was cloudy and unfavorable, which kept many from joining, there were about 500 men, women and children who took it in. Messrs. Dewar, Henderson, Thomson and many others took an active part in order to see that all were looked after and made comfortable.

We learn that the valuable property of the Midland & North Shore Lumber Co. at Parry Sound has just been sold for $25,000 to Wm. Peter, a wealthy lumberman of Bay City, Michigan. Mr. Peter is now engaged in repairing the machinery and boilers of the mill preparatory to manufacturing last season's cut of logs, and in the fall will fit up almost throughout with new machinery. We understand that it is Mr. Peter's intention also to establish mills for the manufacture of all the refuse that now goes to waste in the other two mills. The opening of these enterprises in Parry Sound should mean an addition to the population of that town of, at least, 400 people.

DRY GOODS JOTTINGS.

The first gloves made by the new Berlin factory were turned out last Saturday.

A letter from Manchester, Eng., says that trade done on Canada account is very limited.

It is the opinion of English manufacturers that the autumn will witness a considerable revival in the demand for velvet.

Berlin manufacturers are making mohair braid in circular designs, with stars and cubes of velvet. Braid with tinsel figures is also shown.

The popular color for thin summer gowns and evening dresses in France, Germany and England is pink, which is closely followed by yellow.

Bathing suits, whether in store window or at seashore, always prove attractive. In one case they form the show, in the other they show the form.—*Economist*.

M. Casimir-Perier, the newly-elected President of France, is wearing a turned down collar, and the all-important question of course is, will Parisians follow the example?

A new mohair braid is trimmed on both sides with very small feather curl. This feather trimming is also added in the middle. Very narrow crimped cock's feathers are used for this purpose.

Wife—"How people gaze at my new dress! I presume they wonder if I've been shopping in Paris." Husband—"More likely they wonder if I've been robbing a bank."—*New York Weekly*.

With the wholesale houses the last two weeks, so far as the actual trade movement is concerned, business has been quiet, dull in fact, and there is little to promise renewed activity during the next two weeks.

The continued hot weather has had the effect of increasing the sales of fans. Odds and ends have been pretty well cleaned up, and this should leave the hands of both retailer and importer free to begin an early season in 1895.

Every season, says the *Economist*, the question as to what will be the correct dress length confronts us. The lengths which will be bought for the coming autumn and winter months will be eight yards of 40-inch and six yards of 54-inch materials.

The very latest hot weather collar in New York is of the Byronic roll, and is reversible. Thus, when one side of the collar is soiled, it can be turned inside out and worn again as an ever-clean collar. It should be popular with excursionists and unpopular with the laundry men.

This is the outing season; people are stealing off into the wilds of Muskoka, taking a trip up the lakes, or making preparations to spend August at a fashionable seaside resort. You can sell goods to all those leaving town wherever they go. Dress your windows with fanciful campers' hats and caps, duck suitings, yachting suits and light dress goods for summer evening wear.

A course of conduct suited to making purchases for one department may be entirely at fault in another department. For instance, it may be wise policy to lay in a good stock of dress goods early in the fall, but ribbons, on the other hand, should be bought only as wanted. Some little delay will at times result, but this will not be a very serious matter, and is certainly counterbalanced by having clean shelves ready for the next novelty that comes along.

Manufacturers and wholesale jobbers are undoubtedly making very cautious preparations for the fall trade in dress goods. If retail merchants pursue the excessively timid course which characterized their operations last fall, some one is going to get left. If the season opens up with anything like a normal demand from consumers, repeat orders will pour into the wholesale centres, only to find that the goods are out of stock. In making purchases there are two extremes, and to follow one is almost as productive of evil consequences as to follow the other.

The following, taken from the "Wide awake retailing department" of the *Dry Goods Economist*, appears to us to have the right ring for this season of the year: "Now is the time to step onward and upward. If trade languishes, and the wheels of commerce move slowly during these bright summer days, don't let your energies relax or your interest wane, brother or sister laborer in the great field of dry goods. There never is a time when you allow yourselves to be seen to greater disadvantage than during the quiet months of the year. Now, when customers are fewest, when stocks are lightest, when your work is easiest, your ambition sinks out of sight, dries up with the summer heat and blows away, as it were. The little work you have to do is undertaken as though the labors of Hercules were before you, but without a shadow of that hero's determination or enthusiasm. The mistakes you make are numerous, ridiculous and inexcusable. Far more numerous than when you are "rushed to death" with business. Ridiculous, because you would never dream of being so thoughtless or doing such careless things when you are in your normal state. Inexcusable, because you rarely have so much to do these days but what you can and ought to give good and careful attention to it."

FOR GROCERS AND PROVISION DEALERS.

Don't wait until you get ashamed of your windows before washing them.

The July catch of mackerel does not appear to have come up to expectations.

"Love," sings one of the old poets, "is an internal transport." So is a lake steamer.

See that your competitor is not the first to get that "new line" of goods. It is not necessary to buy a car-load.

"I just heard of a man who struck for longer hours." "Great Scott! Who was he?" "Sample taster in a liquor store."

The bakers of Minnedosa, Manitoba, according to a local exchange, are at war. One advertises 25 loaves for a dollar and another 26 loaves.

It is stated that the agitation at Mission, B.C., to organize a company for the purpose of erecting a canning establishment and jam factory is likely to take definite shape shortly.

Massachusetts courts have enjoined the Sugar Trust from doing business in the State until it complies with the law requiring corporations to file annual statements of their financial condition.

Don't tell the man at the "phone" that you "Haven't got it, and don't know where he can get it." Remember that you can get it easier than he can, and possibly make a customer.—*Michigan Merchant*.

The catch of salmon this year will exceed that of last season by several hundred. The Pisarinco fishermen are still making good hauls, and one day recently brought about 200 fish to the city.—*St. John Telegraph*.

Mrs. Yeast—Do you believe that fish makes brains?

Mrs. Crimsonbeak—Of course I do! Why, when my husband goes fishing, the next morning his head is that big his hat won't fit him. —*Yonkers Statesman*.

Ships laden with sugar have been crowding into American ports for some days in hot haste to escape the apprehended duty on the raw material laid in the new Tariff Bill. Philadelphia harbor is filled with cargoes of this character as never before.

From a bushel of corn, an American statistician says, a distiller gets four gallons of whiskey, which retails in the States for $16. Of this the government gets $3.60, the retailer gets $7, the distiller gets $4, the railroad gets $1, the farmer who raised the corn gets 40 cents.

Latest advices from Astoria, Oregon, regarding the salmon prospects on the Columbia River, are to the effect that the pack of Chinook will be considerably short of last year's, but the pack of bluebacks and steelheads will be larger, which will bring the total pack up to last year's.

Woodstock's Board of Trade has in consideration a project to secure a new industry for the town in the shape of a beef and pork packing establishment. It is thought there will be no difficulty in forming a joint stock company and getting the necessary capital subscribed.

It is very likely a sign of the times when we hear of an unusual demand for cheap goods. Our Montreal correspondent tells us, for example, that an especial demand exists for cheap Japan tea, whose wholesale price ranges from 14 to 17c., and which is usually retailed at 25c. per pound. "Of such tea," said one dealer, "I could place a thousand packages before night if I had it."

The berry season, now rapidly drawing to a close, has been, says the Chatham *Planet*, the greatest in the history of Leamington, in Essex county. It is estimated that sixty-two tons of berries have been

shipped from there up to date, thirty-six tons over the Lake Erie road and the rest over the Michigan Central. This amounts to 80,000 baskets, for which $7,500 were paid into the hands of the fruit men.

The retail grocers of Toronto had, as usual, a most pleasurable time at their annual pic-nic. The excursionists went by the morning steamers to Queenston. There they separated, many going on to Buffalo for the day, while most of them took a trip up the electric railway line to Chippawa, or visited the many points of interest in the neighborhood of the Falls. The only feature of regret about such events is, that they occur but once a year.

WHIFFS FOR TOBACCO STORES.

Advertise a special camper's mixture.

An inveterate smoker—a curer of hams.

A skilful cigarmaker in Germany can make an average of $2.86 per week.

A Montreal man has offered to establish a cigar factory in Kemptville if he receives a bonus.

Cigarette smoking killed a Kensington boy yesterday. He was too near a keg of powder.—*Philadelphia Record.*

A conductor said to a young woman getting on at the rear end of a car; "These seats are for smokers;" and the young woman said: "Dear me! Must I smoke?"

Jack—"And you are going to marry that widow after all! And I hear you are going to give up smoking!" Fred—"Yes. She gives up her weeds and I give up mine."—*New York World.*

Cigars are stored to best advantage in a perfectly dry and well ventilated cellar. They should not be moistened except when wanted for the show-case, and then care should be taken not to over-moisten them.

The County of Essex is still growing tobacco. It did so 100 years ago. L. Wigle, of Leamington, has set out twenty acres of tobacco plants. The crop last year on the same field fell a victim to early frosts.

The "Egyptian cigarette" is, strictly speaking, a misnomer, for the cultivation of the tobacco plant in Egypt has been forbidden by decree since 1890; hence "cigarettes made in Egypt" would be a more truthful description. Nearly all the tobacco used in making Egyptian cigarettes comes from Turkey.

A fresh cigar is never so good as one that has laid awhile. Certain properties in tobacco require that a certain time shall elapse before the manufactured cigar shall have its best aroma. Years ago, in Germany, dealers were wont to advertise the fact that they had five-year-old cigars, and they kept them stored well up under the ceiling—the popular impression having been that age helped tobacco just as it does wines and liquors. It is needless to say that the practice was long ago discontinued.

Kentucky raises 300,000,000 pounds of tobacco every year, half of the crop of the United States. Most of it is marketed in Louisville. About a dozen long leaves are tied into what is called a "hand," and these hands are compressed in hogsheads varying from 600 to 2,000 pounds in weight. Ten years ago all this tobacco was of a dark brown or black color. Now the greater portion of it is a bright yellow. The dark colored article sells at from three to seven cents a pound; the light from ten to twenty cents a pound. The latter is sweet; the former is strong and bitter.

ITEMS FOR DRUGGISTS.

The new crop of Dutch caraway seed is estimated at about 50,000 bags.

Shippers of Canada balsam fir appear to be holding back stocks, in anticipation of better prices.

Advices indicate a strong feeling in primary markets for all desirable brands of cod liver oil.

Large quantities of senega root continue to be shipped from Manitoba, and prices are slightly easier.

It is stated that the yield of California mustard seed will not be more than one-half the crop of 1893.

Stocks of menthol in London and New York are firmly held, both markets being practically controlled by one party.

Mail advices from Calcutta say of shellac that the Bysacki crop is reported as good, but the Kushmi crop is a small one.

Reports indicate a short crop of colocynth apples this year. Cable advices from London report an advance to 16d. for Trieste.

To clean a greasy sponge, soak it in warm water, to which a little citric acid has been added. The sponge should be well rinsed when clean.

With new crop Angostura tonka beans now available, $1 75 to 1 85 is now quoted in New York for the limited supply of 1893 crop remaining on hand.

Aunt Surplice—How peacefully still and solemn it always is on Sunday! Little Nephew—Yes'm; that's because so many children's papas is at home.—*Good News.*

The *Drug Reporter* lists opium and quinine as having advanced, and the following drugs as having declined: Pepsin, Angostura tonkas, Mexican sarsaparilla, American saffron.

The shipments of bleaching powder to the United States from Great Britain for the first half of the year were 17,802 tons, as compared with 38,353 tons for the same period of 1893.

The next public sale of cocoa butter will be held in Amsterdam on the 7th instant, when 60 to 65 tons will be offered. The London offering will occur on 14th inst., with 25 tons catalogued.

The best camphor comes from Borneo and Sumatra. It is found in solid masses two or three feet long in the trunk of the *Diplerocarpus camphora*, and the tree has to be felled and split in two to obtain it.

There is talk of a firmer market in Chinese essential oils as the result of the Corean embroglio. But inasmuch as the bulk of the shipments are received from Hong Kong—a British port—and all the oil is sent in British ships, it is difficult to understand how any delay can result.

Manufacturers of German quinine are credited with making heavy purchases of the salt in the London market, their object probably being to lessen the available supply outside, and to reap the advantages that a subsequent advance in the price would yield.—*N. Y. Bulletin and Journal of Commerce.*

The odor of iodoform, creasote, or guaiacol upon the hands can be overcome by washing with linseed meal. Articles having an odor of iodoform may be washed in tar water to which oil of wintergreen has been added. The taste of pills of creasote can be disguised by means of a little powdered coffee. The odor of iodoform or guaiacol in rooms can be dissipated by burning coffee.—*Deutsche Medizinal Zeitung.*

SHOE AND LEATHER NOTES.

To be in the swim these days, a man's face should match in color, his russet shoes.

Toronto shoemakers enjoyed a pic-nic at Niagara Falls on the 28th ult. The excursion was well attended.

Messrs. Simpson Bros. have started a machine shop in Montreal for the manufacture of shoemaking machinery.

The retail trade is now beginning the annual quiet season, and but little activity may be looked for until September.

As a general rule better results are obtained by keeping well sized up on a few standard lines than by having in stock a large assortment of lines which are broken in sizes.

Be cautious when tempted to buy extreme styles of footwear. A shoe to sell for any considerable time must have about it some sensible features to ensure a continued request.

"It is strange, but true," said a retailer the other day, "that in times of depression women are the first to ask for cheap shoes. Cheap footwear appears to have become a fad with the women nowadays."

At the summer resorts bathing shoes are largely worn this season. They protect the feet from stones, and, besides, some women object to showing their bare feet. A popular shoe is made of white canvas, with a flexible rubber sole.

Salesman—You will sell five pairs of these shoes to one of any other make.

Merchant—They seem to me to be poorly made, and of very flimsy material.

Salesman—That's just it. They're made to wear—out. See?

In a recent issue the Fredericton *Gleaner* devoted some little space to description of the new sole leather tannery at Poquiock, owned by Messrs. Shaw, Cassils & Co.. The output of the tannery amounts to two tons daily. The tannery at the present time employs about 25 hands, besides those employed in peeling the bark. The company have a rotary saw-mill in connection with the tannery. They are building at present three new houses. A new engine has just been set up, and the company are putting in an electric light plant to light the tannery and all the houses as well.

There are trade manias of various kinds, and one more especially seen in young merchants is that of "buying big." They reason that by taking a large amount of stock, they are making a good impression upon the house with which they deal. But not so; in nine cases out of ten they are looked upon by the wholesale merchant with suspicious eyes as men worth watching. And then, when a man is told that

Jones across the street has taken so many pair of these shoes, and Brown around the corner has bought even a larger number, there steals into the heart a feeling of jealousy and a desire to appear bigger than either Jones or Brown. When buying stock for the fall trade, if you must err in judgment rather be over cautious than too venturesome.

SOME FRENCH SECURITIES.

A calculation of the market prices of a large number (134) of the principal French securities dealt in on the Paris official market on June 30th last, has been made by *L'Economiste Europeenne* and compared with the prices of Dec. 30th, 1893. These stocks and shares are divided into eight groups thus:

STOCKS AND SHARES.

	Francs.	£
1. French Rentes of a nominal capital of	26,176,676,200	1,047,067,048
2. City of Paris bonds (nominal)	1,555,098,650	62,203,946
3. Bonds of the Credit Foncier and other mortgage banks (nominal)	5,445,415,700	217,816,628
4. Shares of the ten leading joint-stock banks, paid-up capital	755,500,000	30,220,000
5. Eleven principal railway shares, nominal capital paid	1,510,572,300	60,422,892
6. Railway debentures guaranteed by the State (nominal)	16,663,888,625	666,555,545
7. Twenty-five principal industrial companies, nominal capital paid	560,056,500	22,402,260
8. Debentures of principal industrial companies (nominal)	781,698,100	31,267,924
Forming a total of	53,448,906,075	2,137,956,243

Their market value on the 30th December last was 56,248,023,947f. or £2,249,920,958, and on the 30th June 56,126,944,695f. or £2,245,077,788, a decrease of 121,079,252f.. equal to £4,843,170 in the half year. It is learned from this compilation that French Rentes increased in value 469,450,000f. (£18,778,000), in spite of the conversion of the four and a-half per cents into three and a-halfs. On the other hand, the depreciation in shares of the great railway companies was from 4,359,789,000f. (£174,391,560) to 3,978,192,000f. (£159,127,680), a loss of £15,263,000, or between eight and nine per cent. Railway debentures only declined £1,216,760; bank shares, £2,833,040; industrial companies, £3,377,000 in their shares, and £1,436,080 in their debentures.

BRITISH COLUMBIA SALMON PACK.

Late mail advices serve to enlighten us but little as to the extent and prospects of the salmon canning industry in British Columbia. Our latest reports say the run on the Fraser is not as yet very large but that the big run is being daily expected. Preparations have been made for a big pack, and 1,400 fishing licenses have already been taken out, while application is constantly being made for others. Last year but 1,100 licenses were granted, and this was then regarded as an excessively large number. The canneries on the Skeena are, as we noted last week, making shipments for immediate distribution. The first car load of the season to go forward from New Westminster this season was sent by Messrs. D. J. Munn & Co. to parties in Halifax. In all there will be twenty-eight canneries packing on the Fraser this season. The first vessel of the season's salmon fleet has arrived—the "City of Glasgow"—and up to date 6,012 tons have been engaged. It now appears that reports concerning the damage done to the traps and canneries by the floods were greatly exaggerated. And although in individual cases the pack may be lessened, it is not thought that the total pack will be materially affected in consequence of the recent high waters of the Fraser.

SEALING INDUSTRY OF THE BEHRING SEA.

Not a little interest centres in this year's operations in the Behring Seas. Although many predictions have been made as to the effect which the new sealing regulations will have upon the catch, time alone will disclose the effect of the new international arrangement. The close season expired on Tuesday, July 31st, and the first day of August found the fleet sailing for their fishing grounds. It is probable that there will be something over twenty British Columbia sealing vessels in the North Pacific this year.

—The president of the National Insurance Commissioners' Association, Mr. James F. Pierce, of New York State, advises the insurance commissioners of the United States by circular that the twenty-fifth annual convention of that body will be held at Alexandria Bay, St. Lawrence River, on the 5th September next. The sessions of the convention will be held at the Thousand Island House. Mr. Pierce wishes for a large attendance at this convention and expresses the hope that every State having a supervising insurance official will be represented.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, August 2nd, compared with those of the previous week:

Clearings.	Aug. 2.	July 26.
Montreal	$9,594,647	$15,028,446
Toronto	4,804,455	4,851,884
Halifax	1,100,315	1,129,687
Winnipeg	760,623	892,033
Hamilton	605,662	542,956
Total	$16,865,702	$22,445,006

Aggregate balances this week, $2,881,407; last week, $3,020,874.

—Among the sums voted by the last Parliament was $130,000 for new construction on the Trent Valley Canal. The supplementary estimates contain special grants in addition to the above exceeding $20,000. The Central Railway of New Brunswick has been granted a subsidy of $3,200 per mile for a distance of fifteen miles, or $48,000 in all. This is to be applied on the extension from Chipman to Newcastle Bridge. Upon completion of the remaining section to Gibson the Newcastle coal fields will be more accessible. About 6,000 tons yearly is mined, says *The Gleaner*. The St. John and Barnsville Railway will be subsidized for a distance of ten miles, and when completed will connect St. Martins with St. John and western points. A subsidy of $64,000 was also voted for a line of railway twenty miles to run from a point on the Intercolonial between Norton and Sussex to Havelock.

—An excursion was organized by the Charlottetown Board of Trade some days ago in honor of the head of the Canada Atlantic and Plant line of steamers. The party, numbering between forty and fifty, went to Summerside, P.E.I., by train, and were driven to St. Eleanor's. Dinner at the Clifton House, Summerside, was a feature of the excursion. Addresses were made by Lieut.-Governor Howlan; by Mr. Plant, the guest of the day; by Mr. Blake, president of the board of trade, and by various members of the press. The *Journal* expresses the hope that the visit of Mr. Plant to Summerside will result in this port being included in the regular route of the steamer "Florida," thereby giving that town direct steamboat communication with Boston.

—It is evident from the pains taken by the management of the Great West Life Assurance Company in the selection of local directors, that this company intends to have the best available men for the purpose. The general manager has just been down in the Maritime Provinces and has organized three provincial agencies in Halifax, St. John, and Charlottetown. The Halifax board consists of Adam Burns, John Y. Payzant, and Thos. Fyshe, of Halifax; J. D. McGregor, of New Glasgow; and Prof. Tufts, of Wolfville. The New Brunswick board, of Geo. A. Schofield, G. W. Merritt, and J. Dewolfe Spurr.

—We note the appointment by the President of the United States of Messrs. Carroll D. Wright, Labor Commissioner, Nicholas E. Worthington, of Peoria, Ill., an ex-judge, and John D. Kernan, of New York, lawyer and ex-railroad commissioner, as members of the commission to investigate the recent strike trouble. The appointments appear to be well made. All are lawyers, who have given long study to labor and economic problems. And, according to an American journal, nothing demagogical need be feared in their inquiry.

—At the half-yearly meeting of the Bank of British Columbia, held in London, Eng., on July 11th, a dividend of 3 per cent. and a bonus of 1 per cent. was declared for the half year. Sir Robert Gillespie, the chairman of the meeting, said that in looking back over a period of nearly sixty years he did not remember any such depression. "But Canada has gone through this trial so triumphantly that her banks have stood firm, and her securities at the present moment stand, I believe, at the highest in the market."

—The Calgary Board of Trade, which has, for some time past, shown but little sign of life, intends to resume its functions with some degree of activity, and a meeting has been called by the president to discuss future operations. It is pleasing to learn from the *Herald* that the crops are looking well all through northern Alberta. Indeed they promise to be quite as heavy as in 1893. Hay is plentiful, too.

—It is two hundred years last Friday since the Bank of England was founded, the date having been 27th July, 1694. We may be allowed to wish "The Old Lady of Threadneedle Street" many more years of prosperity and exemplary living.

—The city of Montreal has obtained for two millions of its 4 per cent. bonds a good figure, 101 1-5. The next lowest tender to that accepted was 101 and eleven-eightieths, on behalf of an Edinburgh firm.

AGRICULTURAL CONFERENCE FOR NEW BRUNSWICK.

The officers and members of the Farmers' and Dairymen's Association and of the agricultural societies of New Brunswick, and all others interested in agriculture, are invited to attend the Governor-General's agricultural conference at Fredericton, on Thursday, August 16th next. This is a provincial affair, and every man interested in the promotion of agriculture in the province should feel that he is in part responsible for its success. His Excellency the Governor-General will be present and address the conference. Hon. W. D. Hoard, ex-Governor of Wisconsin, an eminent agriculturist, has also been invited to attend and deliver an address. Prof. J. W. Robertson, Dominion Dairy Commissioner, will also be present, and other eminent speakers. It is the wish of the central committee to make this conference the greatest agricultural demonstration ever held in the province. All the railway and steamboat lines will give reduced excursion rates.

THE HUDSON BAY COMPANY.

The report submitted to the annual meeting of the Hudson's Bay Company, which took place in London, England, on the 16th July, stated that, including a sum of £29,116 8s. brought forward last year, the profits amounted to £75,029 5s. 9d. Out of this it was recommended that a dividend of ten shillings per share, free of income tax, be paid, which will absorb £50,000, leaving a sum of £25,029 5s. 9d. to be carried forward. The furs sold by the company this spring were somewhat less in quantity than in 1893. A heavy fall of prices occurred in all the most important descriptions. This is attributed to the depressed state of trade in England, as well as to the financial crisis and scarcity of money which existed in America throughout the past winter. The sale-shop business of the company is steadily becoming more important, and, notwithstanding the prevailing depression, is giving satisfactory results.

The land account for the year gives the receipts from instalments, rents, interest on sales, etc., at £28,849 7s. 9d., compared with £39,027 3s. 11d. in the preceding year. The sales have been :—Farm lands, 7,526 acres, for $48,225, averaging $6.40 per acre ; town lots, 70 lots for $38,585 ; total, $86,810. In the previous year they were :—Farm lands, 16,837 acres for $100,405, averaging $5.96 per acre ; town lots, 195 lots for $57,841 ; total, $158,246. This great diminution in the sales of farming lands, and in the collections of instalments and interest is attributed to the unprecedentedly low price of wheat and the general depression affecting all agricultural interests. Full information has not yet come to hand from all the districts, but it is expected that the quantity of furs received this season for sale in 1895 will be up to the average. There are indications of improvement on the extremely low prices realized on the sales last spring.

The governor, Sir Donald Smith, occupied the chair, and said that the reduction in profits, as compared with last year, was due to the disastrous state of affairs in the States, and to the depression in Canada. The collection of furs was smaller and the price lower. Still, there should be no cause for complaint when they have been able to earn £45,912 17s. 9d. in the year. If they have been able to do so well, they may reasonably expect when trade revives a fair increase in profits. Some of the shareholders expressed doubt as to the future profits of the shops. Sir Donald, in reply, said : "They had cause for pride in the fact that the Hudson's Bay Company bore such an excellent name for fair and honest trading throughout the whole of Canada. The prestige of the company was such that he thought they might go on with their shops, and might expect from them as fair profits as they had had in the past. Looking at the great decline in the prices of fur, he was sure that had it not been for the shops, the directors would not have been able to offer half the dividend they did now. As regards Mr. Logan's question relating to the land account, the receipts for lands were now included in the dividends year by year. Formerly they were given to the shareholders as a return for capital, and, as Mr. Logan was aware, the capital had been reduced from £20 per share to £13. The land sales, it will be noticed, are much less than in the foregoing year. The receipts are less by £10,177 16s 2d , while the sales of town lots and farm lands are reduced by $71,451, say, £11,680. This is in a great measure owing to the unprecedentedly low price of wheat. Never before in America —nor, I think, in this country—has the price of wheat been so low as during the past year."

In view of all circumstances the shareholders should not find fault upon receiving a dividend of ten shillings per share, which absorbed £50,000, and left a balance of £25,029 to be carried forward to next year. The funds of the company are now £4,088 less than one year ago.

LATTER DAY HABITS.

The economies and financial management of the present day are very different from those of two or three generations ago. Buying on the instalment plan, from being a temporary resort to tide over hard times, has become the regular rule, and so much is it in force at the present, that, in some instances at least, the man who pays ready cash is actually at a disadvantage. The modern method, without any exaggeration, would make a philosopher of the Poor Richard type turn over in his grave, but anything as bad as the following, from a contemporary, would cause him to rise up in protest :

Father—"This is a fine house you have bought. I don't see how you raised the money."

Son—"I am buying it on the instalment plan."

"Oh! but where did you get all this handsome furniture ?"

"Buying that on the instalment plan too."

"Humph! Must cost something. I don't see how you can spare so much for clothes. Your wife dresses like a princess."

"Yes, get our clothes on the instalment plan."

"Won't do, won't do at all. Suppose you should die ?"

"I can be buried on the instalment plan easily enough."

"But your wife won't have any money to pay the instalments,"

"Yes ; she'll have plenty. I'm insured on the instalment plan—pay every week."

CHANGING THE BAIT.

"*Change your bait!*" This terse bit of advice given by an old fisherman to a less experienced angler, is suggestive. The ancient disciple of Walton became the object of the other's envy because of the rapidity with which the finny game was transferred from the water to the old man's basket, while the young fellow sat in disgust, waiting in vain for a nibble. At length, in despair, the unhappy angler appealed to his neighbor and received for answer the words quoted. That young fisherman is a type of scores of men in trade. They throw advertisements into the business stream and await results. In many cases customers are caught at once and the anglers think their bait is all right, so they let it lie. After several months have passed with scarcely a bite, they begin to curse their luck and conclude that advertising doesn't pay. The fact is the fault is neither with luck nor with the theory of advertising. The trouble is with the way they advertise. They should change the bait.—*Helper*.

A PAIR OF SHOP HINTS.

The question is frequently arising in my mind as to whether shafting for shop purposes is not doomed to go. Isn't it going to be cheaper to string a copper wire to a tool, have a small motor built in with it and drive by electricity than it is to turn a long line of shafting several hundred feet in length and keep it revolving day in and day out, whether there is any work being done at the other end of it or no ? Some large shops have answered "Yes," but the art is still in an experimental stage and no one really knows. It seems reasonable, and I am rather disposed to believe it. But whether the electrical breakdowns of the motors will more than counterbalance the mechanical breakdowns of shafting and belts remains to be seen.

Taking care of patterns, keeping them catalogued and allowing for depreciation is one of the troublesome tasks of foundry work. An apprentice or the foreman usually has the run of the loft ; he knows where everything is, and his head is the only catalogue. But when a pattern is needed that has not been used for several years, it is usually found to be so dried and the glue has parted in so many places that the rush job has to wait until the pattern maker has had a chance to do a day's work on the pattern. But the pattern loft is under the roof and to say that the air is hot and dry is to express it mildly. I have found that good ventilation contributes mightily to the welfare of the patterns, and if a large, shallow pan be placed there and kept filled with water a still further improvement will be noted. In one case I had a window in my pattern loft opening directly opposite the exhaust from the engine, and the steam blowing in at the open window kept the air moist and the patterns free from injury through checking. Next to this the shallow pan is the thing, but above all let there be good ventilation.—*Dixie*.

MILK AND CHEESE AS BRAIN FOOD.

Is skim milk or cheese brain food ? A paper by M. Becamp, which M. Friedel has read to the Paris Academy of Medicine, gives an affirmative answer. M. Becamp, apparently, has for some time past been devoting himself to the study of casein. He has found that it chemically differs from all other albuminoids with which he is acquainted. One of its properties is, when burnt pure, to make no ashes. He experimented on burnt casein, not with the view of coming to the conclusion he now enunciates, but to an opposite one, mainly, that there is no phosphorus in casein. In a number of experiments he found that absolutely pure casein contains 753 parts out of 1,000 of organic phosphorus. He has also demonstrated the presence in casein of sulphur, and therefore that this substance is made up of carbon, hydrogen, nitrogen, phosphorus, sulphur, and oxygen. Milk and cheese are, accordingly, brain restorers.

BIRKBECK BUILDING SOCIETY

We learn from an English exchange that the forty-third annual meeting of the English Birkbeck Society has recently been held at the offices, 29 and 30, Southampton Buildings, Chancery-lane, London. The report adopted stated that the receipts during the year, which ended 31st March last, reached £10,014,003, making a total from the commencement of the society of more than one hundred and seventy-three millions of pounds sterling (£173,311,217) The deposits received by the society amounted to £9,102,698, and the subscriptions to £218,366. The gross profits amounted to £220,833 The surplus funds have been augmented by £176,148, and now stand at £5,903,479, of which £1,732,248 is invested in consols and other securities guaranteed by the British Government, and the cash in the hands of the bankers is £449,814. A further sum of £25,000 has been added to the Permanent Guarantee Fund, thus bringing up the amount to £175,000, and the balance, £155,439, making together £330,439 in excess of the liabilities, the whole amount being invested in consols. The subscriptions and deposits withdrawable on demand amount to £6,053,681.

We do not quite understand how it is explained, but the account from which we quote states that while there are only 54,392 shares of the company in existence, there are altogether 69,206 shareholders and depositors on the books. Manifestly, then, the society has depositors who are not shareholders. It is stated that the fourteenth triennial bonus on investing shares has been allotted, and the amount placed to the credit of all shares in existence at the close of the 43rd year is £52,237. The surplus funds (which are invested in convertible securities) are sufficient to pay the depositors 111⅓ per cent. on the amount of their deposits. The new accounts opened during the year were 11,096 in number. Since its establishment the society has returned to the shareholders and depositors more than one hundred and forty millions (£144,460,220), the whole amonnt having been repaid upon demand. The amount advanced to borrowers has been £2,536,343, and the amount of interest and bonus paid to investors and depositors is nearly two-and-a-half millions sterling, the exact figures being £2,458,987

—By the terms of the French treaty, Nepigon trout can be shipped to Algeria That's something.—*Winnipeg Free Press*

WHEN HE STOPPED PAYMENT.

The bullying manner sometimes assumed by certain barristers in cross-examination, in order to confuse a witness and make his replies to important questions hesitating and contradicting, is notorious, and many are the tales told of "cute" witnesses, who have turned the tables on the persecutors. The following relates to a case of this kind. In a civil action on money matters the plaintiff had stated that his financial position was always satisfactory. In cross-examination he was asked if he had ever been bankrupt. "No," was the answer. Next question was, "Now, be careful; did you ever stop payment?" "Yes," was the reply. "Ah," exclaimed the counsel, "I thought we should get at it at last. When did that happen?" "After I paid all I owed," was the answer. This produced a roar of laughter, in which the learned judge heartily joined; even the usher was unable to call "Silence!" being seized with such a fit of merriment that he had to be carried out. After that the court adjourned for luncheon.

HOW TO COLLECT ACCOUNTS.

The following pithy "dun" is from a circular sent out by a printer in Moline, Illinois, and speaks for itself: "My dear Sir,—I want to ask you a plain question. Suppose you were as poor as Job's turkey, and had invested $15,000 or $16,000 in an enterprise, which you designed to make an exclusively cash business; suppose you had trusted your work all over the country, until your funds were played out; suppose you had claims coming against you in the hands of business men who had accommodated you in good faith, and needed their money; suppose you had some pride in you, and meant to be 'square-toed' and 'punctual,' and hated to see a man who you owed when you hadn't the legal tender in your trousers to pay his just and lawful demands, worse than you would see an injin or the devil; and suppose those whom you had accommodated came into town and left without even paying a part, 'what would you do?' Would you let your debts go,

> 'And smile, and smile, and smile,
> And be a villain all the while?'

or would you sue every mother's son of them that didn't pay you, if he were the last man you ever transacted business with? If you were an honest man, you would do the latter, and that's just what I'll be compelled to do, and 'will do.' I don't want money to look at; I don't want any to salt down (I never could make it keep); but one or two thousand trusted out, I humbly want a 'few hundred,' and I'll be bound if I won't have it, or an execution returned *nulla bona*. And now 'I want what is owed to me;' it is a small amount to you, but it means hundreds of dollars to me. I will be found at my office, ready to inform you of the amount of your indebtedness, and to square up. Get my receipt for your account, and my soul, as well as yours, will rejoice. I love you myself as a mother loveth her firstborn, but I love to pay my debts better than I love any man, woman, or child, on the face of this earth, and by the Great Continental Congress I propose to do it, if I have to make costs for every man in Rock Island County. Now, let's have the 'Spondulix,' and see how sweetly and prettily I can smile on you."

BRITISH AND FOREIGN PRODUCE.

Another aspect of this question of the competition of foreign with home produce was disclosed recently in the House of Commons, when Sir U. Kay-Shuttleworth, in his official capacity as Secretary to the Admiralty, confessed that nearly £1,000 worth of butter had been purchased for use in Her Majesty's navy from Denmark, in preference to any derived from home sources. The explanation was that butter hitherto made and tinned at home had failed to hold its own against the butter selected by a committee for use in officers' mess. The Secretary to the Admiralty appeared to think that some apology was needed for the apparently unpatriotic admission, and he proceeded to hope that "the attention now being paid to butter-making, especially at the instance of agricultural societies and county councils, will soon result in our tinned butter being at least equal to that of any other country." The admission thus made in high quarters that foreign butter has been found better prepared in at least one form than English, coincides with opinions which have frequently shaped themselves of late amongst trade organizations, that while in Great Britain and Ireland there are plenty of well constructed dairies fitted in a way to enable them to hold their own against the world, there are thousands of butter makers who fail to bring their commodity up to a high class marketable standard. Their want of success is due, in the opinion of many, more to carelessness than to any real want of ability; and, if so, it is to be hoped that the remarks of Sir U. Kay-Shuttleworth will help to awaken dealers of this class out of the apathy they display towards so important an industry.—*Grocers' Review, Manchester.*

MONTREAL COAL PURCHASES.

There is a great increase in the import of coal from the lower ports during the past month over the two preceding months, says the Montreal *Gazette*. During the month of May there arrived in the port of Montreal 50,600 tons, during the month of June there arrived 92,140 tons, while last month there arrived 135,345 tons, which is double the amount received during the month of May. It must, however, be taken into account that during the month of May there were only 25 trips made, while last month there were 56 trips and included several vessels of regular lines which coming from the Old Country in ballast as far as Sydney loaded there large cargoes of coal for this port.

A tabulated statement for past three months is then published giving the name of vessel, tons of coal carried and to whom consigned. We can only give the totals here:—

May	25 cargoes.....	50,600	tons.
June	38 "	92,140	"
July	56 "	135,345	"
Total	.....	278,085	"

THE SITUATION AT WASHINGTON.

There is evidence from trustworthy sources that the firmness of the House and of the President, backed by the sentiment of the nation, is telling on the three or four senators who have been threatening to kill all tariff legislation if the Sugar Trust be not satisfied. These men now see that they are in grave danger of being taken at their word. So far from frightening the representatives of the people, these threats only expose the men who make them to public indignation. When Gorman, and Smith, and Brice fully understand that if the tariff bill fail, they will be responsible, they waver and hesitate. None of them, nor all of them together, can stand against the House, the President, and the people. That is what they must do or give up their servile obedience to the Trust. They cannot shift the burden. They tried to put it on the shoulders of the Louisiana senators, and the Louisiana senators threw it back. Every day that the settlement is deferred the position of these men becomes more untenable. It must in the end be abandoned.

Nor can these lonely and generally despised Senators even flatter themselves that it is in their power to serve their masters if they had the nerve to stand out against an agreement with the House. If by so doing the McKinley law could be secured for the Trust, they might possibly find their wages sufficient. But they can secure no such result for the Trust. The House would not give up and go home. The majority know that if they did they might never, as a majority, come back again. They would instantly pass a single, simple bill, putting all sugar on the free list, and that bill would go through the Senate. As an original measure much criticism could be passed upon it, but its ultimate supreme advantage, compensating all else, would be that it would rebuke and defeat the plots of the Sugar Trust, its Senators, and its lobby. It would clean the Capitol, and no Senator within its walls would ever again try to sell to that gigantic monopoly the power by taxation to enrich its shareholders anid its bribe-takers beyond the dreams of avarce.

It was the decided opinion of Wall Street that the refusal of the Senate's conferrees to make any concessions on the sugar schedule was proof that the grip of the Trust on its Senators had not been relaxed, and while the general tendency of other securities was downward, those of the Sugar Trust were buoyant. It is in these conditions precisely that the Trust finds an opportunity secretly to confer wealth upon those who, in public life, consent to do its bidding. It is a shameful thing that a large part of the operations of Wall Street should be simply wagers on the successful corruption of a branch of Congress.—*New York Times.*

TEA AND THE EASTERN TROUBLES.

The New York importers of tea declare that so far the price of the fragrant leaf has not been affected by the hostilities between China and Japan.

"Unless the ports of the two countries are blockaded," said a representative of Carter, Macy & Co., the tea importers at No. 142 Pearl street, New York, "the war will have little effect upon the tea market. The thing most to be feared is that the Japanese will blockade the Straits of Formosa, as the French once did. At that time the supp y of tea was almost cut off. It is not likely, I think, that this will occur. With the great Chinese tea depots of Shanghai, Fou Chow and Amoy hemmed in by the Japanese, and Yokohama and Hiogo in Japan blockaded by the Chinese, the tea market would be demoralized. The season for the importation of tea is now at its height. Many of the first cargoes of tea are already here. Most of the Japanese tea has been received, and great quantities are yet to be shipped from China. The supply comes about equally from the two countries."

The tea merchants of New York have not been able to send any despatches in cypher to China, the cable companies refusing to accept any messages not written in English or some other known language.

—Chief Engineer Arthur gave the Brotherhood of Locomotive Engineers some good advice when he said "that during the past winter all of the people were taxed to their utmost to feed the poor and unemployed. It is wrong for any man, even though he has the authority, to order out thousands of workingmen who have large families to support. I would rather be blamed by the men for not ordering a strike than to order them out and then receive their condemnation. It is not the right time to suspend work when the men have positions to fill and are entirely satisfied with their work." The poor striker in the town of Pullman puts the matter in a pathetic form when he says:—"'Ungry we get up and 'ungry we go to bed, and the men wat ordered us out and the millionaires wat employed us get along just as well as ever." He then sensibly concludes that there must be some better method of settling labor troubles than strikes.

—For the quarter ended with June the tonnage of shipping turned out of British yards was 718,204, which is 103,000 tons in excess of the product of the same period of last year. The total tonnage ordered but not commenced is 166,000, which is 126,000 tons less than this time last year. The shipping now under construction is more than last year. On the river Clyde there is an increase from 215,000 to 239,000; on the Tyne, from 113,000 to 131,000: on the Wear, from 79,000 to 112,000; at Middlesboro and Stockton, from 45,000 to 69,000; at Hartlepool and neighboring points, from 33,000 to 54,000; at Barrow and neighboring points, from 19,000 to 24,000. Belfast, however, shows a decrease from 75,000 to 56,000.

—The Northwest Navigation Company's steamer "Colville" was burned to the waters edge at her dock, Grand Rapids, Man., at 4.30 on Sunday morning, the 15th inst. It is said that a quantity of mail matter was burned with her.

—"John," said an American manufacturer to his head clerk, "advertise for a legal adviser for a corporation, and put in 'good knowledge of the law required.' That will shut off half the ex-judges and misfits that apply."

—With a sardine factory and a factory for the canning of finnan haddies and other fish established in St. Andrews, it begins to look as if a new era was beginning to dawn for us—says the *Beacon*

COMMERCIAL AILMENTS.

At night the weary old doctor sat down and noted, as usual, the condition of his patients. The ragman, picking up; the editor, rapidly declining; the dentist, may pull through; the postmaster, must go; the deaf mute, still complaining; the painter, more bad signs; the miser, barely living; the major, rallying; the cashier, gone; the actor, on the last stage; the butcher, less fat on bones; the cobbler, mending; the jail prisoner, will soon be out; the lawyer, speechless; the two grocers, on the verge of dissolution; the musician, toning up; the carpenter, improving; Jones' boy, bad, and growing worse; the barber, saved by a close shave; the banker, failing; the bootmaker, will not last long; the pugilist, striking improvement.

—The London *Miller* says: "The Canadian Government is represented at the Royal Agricultural Show this year as usual. The Dominion exhibit includes specimens of grain, in straw and in bulk, in great variety, part of them being from the experimental farms established in many parts of the country. A fine collection has been sent from the Royal Agricultural College at Guelph. These exhibits should convince British farmers that if they wish to change their abode they can find favorable conditions for a new beginning in Canada."

—It appears that the Chinese are not very slow to learn the lessons of progress from the western peoples with whom they are brought in contact. Some Chinese mechanics who appear to have been to the United States, were engaged with a large number of others in making some extensive repairs to the Government buildings in Pekin, and it struck them that it would be a good thing to get up a strike for short hours and long pay, "allee samee Melican man." They proceeded to persuade their fellow-workmen, and organized the strike. But they soon found that it would not work in that country. The Emperor published an edict, ordering the police and military to arrest everyone who presumed to attempt preventing "scabs" from working. The walking delegates were ordered to be strangled to death on a charge of high treason, and the remainder were banished for three years

City of Winnipeg Debentures

SEALED TENDERS marked "Tenders for Debentures," addressed to the undersigned, will be received at the office of the City Comptroller, Winnipeg, up to 12 o'clock noon on Friday, the 24th August next, for the purchase of $98,500 of Debentures, as follows: $18,000 6%'s maturing 8th January, 1899; $7,000 5%'s maturing 16th June, 1900; $6,700 5%'s maturing 24th Aug., 1901; $8,300 5%'s maturing 20th Aug., 1906; $14,500 5%'s maturing 6th April, 1911; $14,000 5%'s maturing 30th April, 1899; $30,000 5%'s maturing 29th Dec., 1910.

Interest payable in Winnipeg half yearly.

Tenders may be for the whole or part. No tender necessarily accepted. Further information can be obtained from the City Comptroller.

R. W. JAMESON,
Chairman Sinking Fund Trustees.

Winnipeg, Manitoba, 11th July, 1894.

The average watch is composed of 98 pieces, and its manufacture embraces more than 2,000 distinct and separate operations.

—It is just like an extravagant young man to want to spend his vacation as soon as he earns it.—*New Orleans Picayune*

—All crops give promise of being unprecedentedly large in Nova Scotia. The hay crop averages one hundred and ten per cent., oats one hundred and one, and potatoes ninety-nine per cent. of a full crop, whereas last year these staples were twenty-five per cent. below an average crop.

Commercial.

MONTREAL MARKETS.

MONTREAL, Aug 1, 1894

ASHES.—Receipts have each month been a little ahead of last year, the increase for the seven months thus far being about 300 barrels, but a falling off is now apparent; for three days last week none came to hand. Values are if anything a little firmer, but not quotable above $4 yet for first quality pots; some few lots of poor tares were recently bought at $3.90; seconds are held at $3.70, and scarce; no late

TENDERS FOR DEBENTURES.

SEALED TENDERS marked "Tenders for Debentures," and addressed to the undersigned will be received up to 12 o'clock noon on **Saturday, the 11th August, 1894**, for the purchase of debentures of the Corporation of the town of Galt, for public school purposes, amounting to **$11,000** (eleven thousand), in sums of $1,000, payable within thirty years, and bearing interest at the rate of 4 per centum per annum, payable half-yearly, on the 31st day of December and 30th June, at the Merchants Bank of Canada, Galt.

No tender necessarily accepted.

THOMAS McGIVERIN,
Chairman of Finance.

transactions in pearls; the last few barrels in sold at $6. The steamer "Rosarian," now loading, takes 500 barrels of pots to London, and there have been some other small shipments to Europe.

CEMENTS AND FIREBRICKS.—Cements are still dull. There are no very large receipts, but the demand is slight to what is usually looked for at this time of the year. We quote English cement $1.85 to 2.00 as to lot and brand; Belgian, $1.75 to 1.90. Firebricks are also quiet at $14 to 19.00.

DAIRY PRODUCTS.—Cheese values just stand on about the same level as last week. Business, however, is slow, and some easing off in prices is not improbable in view of the accumulation of stock here. We quote finest western colored 9⅜ to 9½c., white do. 9¼ to 9½c., finest eastern 9 to 9¼c.; under grades 8¾ to 8⅞c. There is still an absence of export movement, and the fair local jobbing consumption is hardly sufficient to take up all the make. Quotations remain about the same, with an easy undertone. We quote creamery 18 to 19c.; townships 16 to 17c.; western 14 to 15½c. per lb. Eggs 10 to 11c. per dozen for strictly fresh.

Flour	.....	38,857

GROCERIES.—A better movement is reported, and orders for general groceries for the last half of July are said to be better than for some time past. Sugars remain about as they were. Granulated is up another eighth in New York, making a difference of 5-16c. between that market and this, but our local refiners have as yet made no move, and quote granulated at 4⅛ to 4 3-16c. per lb.; yellows, from 3½c. up. Refiners say they are not pressed with orders, but there is a steady outgo in moderate lots. Molasses as quoted last week. Syrups not in active request, but the stock available is quite small. Teas are in active demand; particularly is this true of Japans, ranging in price from 15 to 17c., a tea usually retailing at 25c., of which one dealer said he could place 1,000 packages before nightfall were they available. New goods are coming forward slowly, and a good many have been sold to arrive. Agents for Japan houses are now taking orders subject to conditions, owing to the complications in the East. London reports speak of a heavy trade doing in blacks, and everything is advanced somewhat from the very low prices that have been ruling. It is the impression that a speculative movement will be soon evident. Coffees show only a moderate movement. We quote Rio, 18 to 21c.; Java, 25 to 30c.; Mocha, 26 to 30c.; Jamaica, 19 to 22c. per lb. The combination has not yet made prices for new pack of vegetables and fruits. Salmon sells at $1.25 to 1.30 for choice brands; lobsters, $6 to 6.50 the case. Nothing very definite has yet been heard from Denia regarding new crop Valencia raisins. California loose muscatels now on the market are selling well at 6½c., and are a superior fruit.

HIDES AND TALLOW.—There is not a great deal doing. No. 1 green hides are being bought by dealers at 3½c. per lb., and 4c. is the regular price to tanners. In the United States prices are stiffer than they were, at 3¾ to 4⅛c. For heavy steers dealers are paying 4½c., and sales of cured to tanners are reported at 5½c. Some calfskins are still coming in, and bring 5c.; lambskins 25 to 30c. Tallow is dull at 5½c. per lb.

LEATHER.—Trade in this line shows no signs of livening up, and, indeed, is hardly expected to until after the very hot weather abates. Boot and shoe men, not having the usual run of fall orders, are seemingly disposed to take matters very easy. Prices rule fairly steady, all things considered, and tanners are not making as much stock as usual, so that stocks are not rolling up. Some American sole has been sent into this market, and is now being offered at same prices as Canadian. We quote: Spanish sole B. A. No. 1, 18 to 20c; do. No. 2 to B. A., 16 to 17c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 15½ to 16½c.; No. 1 slaughter, 18 to 20c.; No. 2 do., 17 to 18c.; American oak sole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do., heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 15c.; do., small, 10 to 12½c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 25c.; buffed cow, 9 to 11c.; extra heavy buff, 12½c.; pebbled cow, 8 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 11c.; rough, 16 to 18c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—The market has shown no notable increase in activity nor variation in values of any consequence. There is very little Scotch iron here of any kind, and for Summerlee $20 has been asked *ex*-yard, and $19.50 to arrive. A few sales of domestic iron in small lots are reported at $16.50. Bars and plates of all kinds are unchanged. Russia iron is being sold at slightly shaded prices. Antimony is easier, and sales of lots have been made at 9½c. net cash; in an ordinary way we quote 10 to 12c. We quote:—Coltness pig iron, none here; Calder, No. 1, $19; Calder, No. 3, $18; Summerlee, $19.50 to 20.00; Eglinton, $18.50; Gartsherrie, none here; Langloan, none here; Carnbroe, $18; Shotts, none here; Middlesboro, No. 3, $17; Siemens, pig, No. 1, $16.25 to 16.50; Ferrona, No. 1, $16.50; machinery scrap, $14.50 to 15.00; common do., $10.00 to 12.00; bar iron, Canadian, $1.70 to 1.75; British, $2.25; best refined, $2.40; Low Moor, $5.25; Canada plates—Blaina, or Garth, $2.15 to 2.20; all polished Canadas, $2.75; Terne roofing plate, 20 x 28, $6.00 to 6.25. Black sheet iron, No. 28, $2.40; No. 26, $2.25; No. 24, $2.10; tin plates—Bradley charcoal, $5.25 to 5.50; charcoal I.C., $3.50; P.D. Crown, $4.00; do. I.X., $4.75 to 5.00; Coke I.C., $2.85 to 3.00; coke wasters, $2.75; galvanized sheets, No. 28, ordinary brands, 4¼ to 4½c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5¾ to 6c.; tinned sheets, coke, No. 24, 6 to 6¼c.; No. 26, 6¼ to 6½c.; the usual extra for large sizes. Hoops and bands, per 100 lbs., $2.30 to 2.35. Steel boiler plate, ¼ inch and upwards, $2.10 to 2.15; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.85; heads, $2.85; Russian sheet iron, 10 to 10½c.; lead, per 100 lbs., pig, $2.60 to 2.75; sheet, $4 to 4.25; shot, $6.00 to 6.50; best cast steel, 10½ to 12c.; spring, $2.50; tire, $2.50 to 2.75; sleigh shoe, $2.40; round machinery steel, $3; ingot tin, 17 to 18c.; bar tin, 25c.; ingot copper, 9½ to 10c.; sheet zinc, $5.00 to 5.25; spelter, $4.50 to 4.75; American do., $4.50 to 4.75. Antimony, 10 to 12c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs.; annealed do., $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3½c. Coil chain, ¼ inch, 5c.; ⅜ in., 4½c.; 7-16 in., 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., ¼c.; ¾ in., 3½c.; ⅞ in., and upwards.

OILS, PAINTS AND GLASS.—Comparatively little is doing in these lines. Turpentine, which was expected to advance here, has dropped back to about its former position in the South. Linseed is just as it was last week. Fish oil dull with no transactions in new stock

yet reported. Castor is easy at 6¼ to 6½c per lb. in large lots, 6¾c. for cases, and 7c. for tins. Glass prices are easier on account of lower quotations for fall shipments, and we amend quotations slightly. We quote:—Turpentine, 46c. per gal. for single barrels, two to four barrels, 45c. Linseed oil, raw, 54c. per gallon; boiled, 57c.; 5 barrel-lots, 1c. less; olive oil, machinery, 90c.; castor, in cases, 6¼ to 6½ to 6¾c; tins, 7c; Nfld cod, 38 to 40c per gallon; Gaspe oil, 38c. per gallon; steam refined seal, 42½ to 43c. in small lots. Leads (chemically pure and first-class brands only), $4 50 to 5 00; No. 1, $4 50; No. 2, $4 25. No 3, $4 00. dry white lead, 5c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 45 to 50c. Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1 75; spruce ochre, $2 25 to 2 50 Window glass, $1 20 per 50 feet for first break; $1.30 for second break; third break, $2 80.

WOOL.—The London sales closed firm, with 70,000 to 75,000 bales carried over. Locally a little more business is doing, and a few fair sales of Cape are reported at 14 to 15½c. per lb. Some greasy Australian is available at 14½c.; B.A. scoured, 26 to 32c New North-West is not coming in yet, and old stock is pretty well cleaned out. Millmen are reported to be buying fleece in the country at 16c. A cargo of Cape is now on the way to this market, and will be due in four or five weeks.

TORONTO MARKETS.

TORONTO, Aug. 2nd, 1894.

DRY GOODS.—Wholesale houses are now in the midst of the quiet season, at least so far as actual movement of merchandise is concerned The last two weeks have been inactive, and it is impossible to expect much improvement until the closing weeks of the present month Fall orders are coming in slowly and merchants are evidently none too hopeful as to the outlook for the next season's trade. Values show no marked change, but so soon as American markets recover from their present lethargy a general hardening of values is looked for

FLOUR AND MEAL.—In sympathy with the slump in wheat prices of flour have declined, and this in the face of many merchants who said that prices were already at a point below which they could not go. We give the revised quotations: Manitoba patent, $3.50 to 3.65;

AGENTS—WM. HEWETT, 30 Colborne Street, Toronto. DAVID KAY, Fraser Building, Montreal. M. H. MILLER, Winnipeg. **JOHN HALLAM**, Toronto, Special Agent for Beam Warps for Ontario.

Mills—New Brunswick Cotton Mills. St. John Cotton Mills.

St. John, N.B.

Manitoba strong bakers, $3.35 to 3.40; patent, $3; straight roller, $3.65 to 3 80; extra, $2.50. Oatmeals remain unaltered, with transactions only seasonably large; car lots selling at $4.20 and broken lots at $.4.40.

GRAIN.—The situation in wheat has gained no strength during the lapse of a week's time, and quotations remain at previously "unrecorded" figures. A fair quotation for cars of old winter at western points on the G.T.R. would be 55c., while new winter is held at 53½c. Some new wheat is being bought in Western Ontario, but purchases as yet are exclusively confined to millers. One or two lots of wheat went from Montreal by way of export during the week. Oats are dull and everything points to lower prices. It is now past doubt that new crop barley will be light in Eastern Ontario, and in many instances will not weigh over 40 lbs. to the bushel. Peas are scarce and wanted. No rye or buckwheat is offering. Corn remains inactive.

The stocks of grain in store at Port Arthur on July 20th, were 1,251,671 bushels. During the week there were received 113,515 bushels, and shipped 165,042 bushels, leaving in store on July 28th, 1,200,144.

GROCERIES.—Reports from New York state that operators in coffee are complaining of dull times. The dried fruit market has witnessed little change. First shipments of new crop currants will not, according to the regulations of the Grecian Government, be made before the last of August. We hear of nothing doing in new crop Valencia raisins for forward shipment. Sugars on the local market are moving rather slower; granulated has weakened somewhat, but yellows remain unchanged. The market has now received supplies of new Japan and Congou teas. In canned goods corn and tomatoes are steady, peas are active, with possibilities of higher prices.

HARDWARE.—At this season of the year there is nothing special doing with wholesale houses dealing in hardware and metals. But at present trade appears to be more than seasonably quiet, and the volume of movement is greatly reduced. In regard to the fall trade all, of course, are hoping for improvement, but when asked upon what grounds their hope and expectations are based seldom is a satisfactory answer received. We do not wish to infer that trade has come to a standstill, for this is not the case. Every day brings to the city houses a fairly large number of orders. But what we do intend to express is that while the present low prices are being obtained for farm produce, and the farming classes form by long odds the bulk of Canadian consumers, the demand for manufactured goods must of necessity be curtailed. In the cities, too, building operations are limited, and in Toronto are almost nil.

HIDES AND SKINS.—Only a fair movement is taking place in hides; 3c. per lb. is still paid for green, and car lots of No. 1 cured are selling at 3½c. Offerings of skins are moderately large; an advance of 5c. has been made in the price of shearlings, and both lambskins and shearlings now stand at 30c. Calfskins remain unchanged in price, and without life. Only a quiet trade is doing in tallow; prices are steady, with dealers paying 5c. for rendered in barrels, and 5½c. for rendered in cakes.

PATTERSON & CORBIN

ST. CATHARINES, Ont.

400 ACRES choice farm land for sale in the township of Romney, Co. of Kent, which is the Garden of Canada. These lots are situated on either side of the main road leading southward from Tilbury Centre toward Lake Erie. A portion of the land is within two miles of the lake and a half mile north of a station on the new Detroit River and Lake Erie Railway. It is also about five miles south of Tilbury Centre on the Canada Southern and Canada Pacific Railways. The Grand Trunk is still one mile farther north. On either of these roads a person may reach Detroit in less than one hour. The soil, which is deep and rich, thoroughly drained, is covered with ash, elm, hickory, basswood, etc. Terms to suit purchasers. **EDWARD TROUT,** Cor. Church and Court Sts., Toronto.

LEATHER.—It would hardly be correct to say that the week has brought with it no improvement for the leather trade. The volume of movement has increased with the advancement of the season, but is not yet anything like what it should be in the normal condition of things at this time of the year. Orders are coming in for 50 sides of leather from houses where last year 200 sides were wanted. Some leather is being sent to eastern factories, while the country jobbing trade is buying more frequently, but all parcels are small.

PROVISIONS.—Trade is quiet. Offerings of butter are more liberal, and country prices range from 16 to 17c. There is no export movement. Cheese is jobbing in a slow, quiet way at unchanged values. There appears to be a firmer feeling in hog products in consequence of an increased demand. Long clear bacon is selling at 7¾ to 8c., hams at 11c., and rolls at 8½ to 8¾c. Lard remains unaltered. A few dressed hogs continue to arrive daily, and strictly choice stock brings from 6.50 to $7. Supplies of eggs are very liberal, and quotations at 10c. are weak. Some of the stock is running very poor, and some lots have not brought more than 8c. per dozen.

WOOL.—The quantity of wool offered is large, and values remain nominally unchanged. Dealers are paying 16½ to 17c. per lb. for merchantable fleece, 14c. for rejects, and 9½c for unwashed. However, at this season of the year but little unwashed is offered. Although no change in price has been made, some merchants regard the situation with apprehensive eyes, and one large firm inform us that they will buy no wool during the coming week. The new clip is now pretty well out of farmers' hands, and that which is not in the city's warehouses is held by country dealers. Some of these merchants are inclined to hold, and we hear of several instances where transactions have not been closed because of ½c. per lb. difference in the views of buyers and sellers. There is practically no outward movement from the warehouses, as the mills are either buying direct from growers or through country merchants. Supers are quoted at 18 to 19c., and extras at 21 to 23c. per lb.

BRITISH MARKETS.

The report of James Watson & Co. on the British iron trade, dated Glasgow, 20th July, says: The deadlock in the whole iron trade of Scotland, caused by the colliers' strike, continues and there are as yet no signs of an early settlement being arrived at. In warrants there is practically no business doing and prices have not fluctuated 3d. per ton in the course of the week.

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

CANADIAN BANKERS IN SESSION.

At the first session of the Canadian Bankers' Association, held in Halifax, N.S., on Thursday, 26th July, Mr. J. T. P. Knight, manager of the People's Bank of Halifax, on behalf of the representatives of the city banks, heartily welcomed the visiting bankers. In the course of his address of welcome he said:

Mr. President and Gentlemen of the Bankers' Association:

I say to you, Mr. President, that while we down by the sea are unable to express ourselves in graceful periods, and can give you no well-rounded sentences to show our joy, we are nevertheless ready at a moment's notice to accede to any request of yours, and to say that if there is anything that you see and we do not offer it to you, it is only necessary for you to ask for it. You can take away anything we have to present—providing you give us suitable security. (Laughter.)

When at the meeting at Toronto last year, as the only representative from the maritime provinces, I suggested to the members of the association that Halifax would be a pleasant meeting place for the association in the year 1894. I made this suggestion at the request of the local giants of the financial arena. I explained to you then that I was not quite certain whether these gentlemen who instructed me to suggest Halifax were in earnest or not, and I am not at liberty to disclose what they said to me on my return when I announced that I had been absolutely successful in working up the association to the belief that we had a city down here worthy of your attention. (Laughter). Deplorable as it is for me to admit that the invitation I extended to you was extended only in the form of a pleasantry, I am bound to say that I am certain that those gentlemen of the association who suggested Halifax as your meeting-place had no idea that you would thus respond to our wishes. (Laughter.) But we are heartily pleased that you took in earnest what was intended in jest, and I can only say to you that when I had suggested to you my doubt as to the invitation being in earnest, the suggestion was simply based on their fear that we were not qualified to properly entertain you. Before you leave our city, we hope to give you some evidence either at early morning or late at night of our desire that you should enjoy yourselves.

We are unable to present to you the freedom of the city in a silver casket, but we say to you sincerely that you are welcome to our clubs and to our homes, and the invitation to our homes is presented to you most enthusiastically by those of us who took the precaution to send their families to the country. (Laughter.)

I trust that the visiting members of the Bankers' Association will consider Halifax the most pleasant and beautiful summer city in British North America. A gentleman on my right, Mr. Scofield, insists on interpolating the words "St. John." Well, we can meet at St. John next year and then you can make comparisons of fun-making and fog, &c. I want to remind the association that when your president of 1893 apparently demurred at the mention of Halifax as a meeting place on account of the distance it was from Toronto, civilization and Christianity—(laughter)—I then suggested that it was just according to the point of view, &c. We think Toronto is a long way off and you regard Halifax as "being quite a distance." But you have come that distance and we ask you to make yourselves thoroughly welcome. We will do our best to see that every member enjoys himself in our way; of course, it must be in our way, a simple and innocent way.

Mr. President, on behalf of the members of the association in the city, I would like to say that it gives us great pleasure to extend a welcome to you personally. We know the value of your services, and we sincerely trust that you may be president for many years to come. (Applause.) I know that without you a great deal of useful work would be neglected, and I take great pleasure in expressing this as the sentiment of the whole association. (Applause.)

Before closing I want to refer to the loss that the association has recently sustained in the death of Messrs. Brodie and Murray Smith. I made the acquaintance of the former gentleman last year in Toronto. While it is right to infuse as much pleasure as possible into life, we all have to recognize the streaks of sadness in it, and I cannot but recall the quickness with which friendship sprang up between Mr. Brodie and myself, and that I was looking forward with pleasant anticipations to meeting him again when the sad news of his death reached us. He was one of those warm-souled, lovable men whose presence a great many members of this association must personally miss. I think it is a severe loss to the association when two such men as Mr. Brodie and Mr. Murray Smith are recorded on the death roll of their institutions.

I wish I could put in more graceful and forcible language what every member of the Bankers' Association resident in Halifax feels in desiring to make you all thoroughly welcome, and in hoping that you will take nothing away with you—(pause and laughter)—nothing but the most pleasant recollections of your visit to Nova Scotia. (Applause.)

Mr. B. E. Walker, general manager of the Canadian Bank of Commerce, president of the body, in reply to this address, said:

Mr. Knight and fellow-members of the Canadian Bankers' Association:

If we had any doubt a year ago in Toronto as to the seriousness of the invitation of the representatives from Halifax, and especially any doubt as to the Christian quality of the community down at Halifax, it was perhaps owing, not to the manner of the speaker, but to the actual words used by Mr. Knight in giving the invitation. He did not say, "Come to Halifax," or "Come unto us." He said, "Go to Halifax." and then he entered into an elaborate explanation to show that he did not mean what most people in the western world do mean when they say, "Go to Halifax." (Laughter.) Perhaps I ought to say that I think that even if there had been no invitation from Mr. Knight, the meeting would have taken place here in Halifax this year. This association is nothing if not co-operative, and if not animated by a desire to bring together in friendly conference the various bankers of the Dominion of Canada. It we are to co-operate and become united for the furtherance of good financial legislation and the advancement of the business interests of the banks, we all know that we must know each other personally, and that we cannot accomplish the best purposes of the association by correspondence. It is just as true in banking as in the business world that personal contact is worth any amount of correspondence. If we wish to do the greatest amount of good to the association as individuals, we certainly should meet in friendly personal conference. The mere publishing of papers is one thing, but the friendly discussion and the attrition of mind characteristic of our annual convention is another and better thing. The association would have met in Halifax this year, even without Mr. Knight's kindly invitation. Geographically this was in a certain sense the turn of the Maritime Provinces.

While the number of members who have come here from Quebec and Ontario is not as large as I desired, it must not be forgotten that there were several difficulties to be confronted. In the first place Mr. Chipman, our energetic secretary and treasurer, worked daily for a fortnight to get the railways to name their reduced fares, but when the railway companies eventually did state the fares, it was too late for many members to take advantage of them. Most of the younger associates in Ontario had already arranged for their holidays, and it was not practicable for them to alter their arrangements. As for many of the senior members it was almost too much to expect them to take their holidays in participating at such a gathering. To them long meetings are wearisome, and it was hardly to be expected that some of them should come so far. Some of them were in England, and others were in the Northwest making the annual journeys that men must make who have large interests in that section of the Dominion. However, there are about fifty members present at this meeting, and after all that is a good many bankers to bring together in such a comparatively small country as Canada.

As for what Mr. Knight says about the lack of gracefulness in his periods, and the want of fitting words to express his sentiments, I think we all remember the fact that our meeting last year would have been very dry but for Mr. Knight, who contributed the humor to our deliberations needed to make them interesting and enjoyable. I sincerely hope that no matter what his duties to his own institution may be, he will always attend our meetings, and even if we should go to Winnipeg, we should take care that Mr. Knight attends, even if the association has to engage a special car for him. (Laughter.)

Mr. Knight complains that we do not take him seriously. But we do. We realize that with the executive ability and firmness that is necessary in a banker to enable him to say "No" and sometimes perform unpleasant duties, there are other qualities quite consistent with those which enable us to lead an entirely different life outside the bank. We all wish that we could lift care from the brow and throw ourselves into the pleasanter side of life as readily as he does.

On behalf of the gentlemen from Ontario and Quebec, and especially on behalf of those who have been detained at home, I desire to thank the Halifax gentlemen for the hospitable spirit manifested by them. I think that in future, in Montreal and Toronto, we shall have a different conception of what a convention of this association should be, and we shall give more consideration to pleasures outside of our meetings. We are, perhaps, a little too serious in Toronto and Montreal, and do not relax ourselves from business cares as easily as we should.

Gentlemen of Halifax, I thank you again very heartily for the hospitality that we have received and are to receive at your hands during our visit. (Applause.)

FINANCIAL MATTERS.

All business men at all attentive to New York news must have known Henry S. Ives, broker of that city, who died lately. His was indeed a strange career, which exhausted life to him on the top wave in short order. At eighteen he was a poor janitor; at nineteen, in a broker's office at $10 a week; at twenty he began a brief but brilliant course of "cornering" stocks. Soon after, he got control of a Western railroad. By manipulation, in about a year and a-half he gathered in three-quarters of a million dollars and began banking. Secured control of another railway system, and captured in a short time some two millions. He managed by speculating and other methods to get rid of money as fast as he made it, and before he was thirty he was under restraint, his millions gone, and is now, at a young man's age—dead! Such are the possibilities and the dangers of our wonderful brain-urging time and its facilities for using up mental powers.—*Bankers' Monthly*.

A COUNTER CHECK.—The Market Street National Bank of Philadelphia, which recently opened a "change counter" for public convenience, has introduced a safe-guard against the misuse of blank checks, which are usually placed on the public desk in banking houses for the convenience of depositors. This new form of check, as in some other banks, has plainly printed on its face in large type "Counter Check," and it also has printed on the end the following words: "This check is only payable at counter, and not to be used outside bank." The object of this form of check is to prevent strangers carrying the blanks away from the bank, as they will be useless elsewhere, and thus an inducement for probable forgeries is avoided.—*Rhodes' Journal*.

When a man is worried about the money market his wife is apt to be worried about the market money.

Some idea of the work involved in coinage at the British Mint may be gathered from the fact that in the year ending the 30th ult. 86,731,281 pieces of all denominations were struck.

HOW IT OPERATES.

An official report of State Comptroller Roberts, of New York, shows that the state tax on inheritances yielded last year $3,297,418. The leavings of the dead paid over three million dollars towards public purposes. And who was the worse of it? The heirs of the dead did not miss the 5 per cent. taken out of the properties which were their windfalls. Some will even argue that a public service was rendered apart from the value of the revenue to the state, for they will hold that it is a public service when overgrown accumulations of wealth are sliced off somewhat for public purposes as they pass into new private hands. At any rate, there is no doubt that the inheritance tax is one of the most convenient and least burdensome yet devised.—*Ottawa Journal*.

—A Boston woman speaks of a dirt wagon as a "real estate conveyance."—*Yonkers Statesman*.

Canada Life ASSURANCE COMPANY

Sun Life Assurance Co. of Canada . . . . . .

Head Office—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

R. MACAULAY, President.

Brains and Capital

In every partnership there are two factors of great importance the managing brain and the capital employed, and if death removes either, the business must suffer. It often happens that the brains belong to one man and the capital to another. If the manager dies the capital is worth less than before; if the capitalist dies and his capital is withdrawn, the manager is crippled. It is clear that each has an insurable interest in the life of the other because the profits of each depend in part upon the life of both. The firm should, therefore, take one of the Unconditional Policies of the Manufacturers Life, which are free from all restrictions as to travel, residence or occupation, and are **absolutely indisputable on any ground whatever after the FIRST YEAR.** Get the rates and all particulars from any of the Company's Agents or from Head Office.

The Investment Annuity Policy
—OF THE—
North American Life Assurance Company

Provides that at death, or if on the Endowment Plan, at the maturity of the endowment period, the Company will pay the amount of insurance in 20 or 25 equal annual instalments, the first of such to be paid on the occurrence of the event or at the expiration of the endowment period. This plan at once secures to the beneficiary an absolute guaranteed income for the period selected.

The particular features of this plan are not embodied in any other policy of insurance offered to the insuring public of Canada. It contains elements which no company has yet offered to the insured.

A much lower rate of premium is chargeable on it than on the other plans of insurance, on account of the payment of the face of the policy being extended over a period of twenty or twenty-five years.

The favorite method of accumulating the profits is equally applicable to this plan of insurance as to the other investment plans of the Company.

For further particulars apply to any of the Company's Agents, or to

DECISIONS IN COMMERCIAL LAW.

THE FORT WORTH CITY COMPANY v. THE SMITH BRIDGE CO.—According to the Supreme Court of the United States, corporations have only such powers as are granted and the powers incidental thereto. A corporation created for the purpose of dealing in lands, and to which the powers to purchase, to sub-divide, and to sell, and to make any contract essential to the transaction of its business, are expressly granted, possesses the incidental power to incur liability for building a bridge to secure better facilities for transit to and from the lots or lands which it is its business to acquire and dispose of; where a corporation has power to enter into a contract, and the contract has been fully performed by the other party, and the corporation has had the full benefit thereof, the latter cannot be allowed to say that the power was not properly exercised. A corporation having received benefits at the expense of the other contracting party cannot object that it was not empowered to perform what it promised in return, in the mode in which it promised to perform, and would still remain liable on its contract, otherwise within its lawful powers.

WOLLENSAK v. SARGENT & CO.—The Supreme Court of the United States cannot import into the claims of a patent elements that would operate to so enlarge its scope as to cover an invention not indicated upon its face. Common contrivances for opening and closing apertures at a distance from the hand of the operator have no patentable character. A patentable novelty must be a novelty in the means or mechanical device and not in the use to which the combination is put. Where the claim in a reissue is merely expanded, a delay of two years or more in applying for the reissue invalidates it, unless excused by special circumstances which show it reasonable. The excuse for a delay in applying for a reissue of a patent, that the patentee followed the advice of his solicitor and therefore did not apply within due time, will not do.

CHICAGO, MILWAUKEE & ST. PAUL RAILWAY COMPANY v. LOWELL.—The Supreme Court of the United States holds that a railway company does not discharge its entire obligation to the public by a notice in its cars of a certain rule; if it permit the rule to be generally disregarded, and an accident occur, the company cannot rely exclusively upon a breach of its rule. In an action against a railroad company for damages for negligence, proof that the plaintiff violated the regulations of the company, even without the excuse of a cogent necessity, will not as a matter of law debar him from a recovery.

MILLER v. THE EAGLE MANUFACTURING CO.—The Supreme Court of the United States holds that two valid patents for the same invention cannot be granted to the same or to a different party. No patent can issue for an invention actually covered by a former patent, especially to the same patentee, although the terms of the claims may differ; in such case the second patent is void. Where the second patent covers matter described in the prior patent, essentially distinct and inseparable from the invention covered thereby, and claims made thereunder, its validity may be sustained, if for a separate invention. A single invention may include both the machines and the manufacture it creates, and in such cases, if the inventions are really separable, the inventor may be entitled to a monopoly of each. An inventor may make a new improvement on his own invention of a patentable character, for which he may obtain a separate patent. A later patent may be granted, where the invention is clearly distinct from, and independent of, one previously patented. A patentee cannot split up his invention for the purpose of securing additional results, or of extending the life of any or all of its elemental parts. Patents cover the means employed to effect results. A single element or function of a patented invention cannot be made the subject of a separate and subsequent patent. That which infringes a patent, if later, anticipates it if earlier. Where an invention is one of a primary character, and the mechanical functions performed by the machine are, as a whole, entirely new, all subsequent machines which employ substantially the same means to accomplish the same results are infringements, although they contain improvements in mechanism. The interchangeability, or non-interchangeability of the devices of two patents is an important test in determining the question of infringement.

ANGLE v. THE CHICAGO, ST. PAUL, MINNEAPOLIS AND OMAHA RAILWAY CO.—The Supreme Court of the United States holds that if one maliciously interferes in a contract between two parties and induces one of them to break that contract to the injury of the other, the party injured can maintain an action against the wrong-doer. Where one railroad company by its wrongful conduct induced another railroad company to break its contract with a contractor for its construction, it is liable to him for the damages sustained thereby; *a fortiori* when it not only induces a breach of the contract by the latter company, but also disables it from performance.

FAMOUS SMITH v. THE UNITED STATES.—An Indian cannot in a U. S. Circuit Court be convicted of the murder of another Indian in the Indian territory, according to the Supreme Court of the United States. Upon the trial before the Circuit Court of an indictment for murder committed by an Indian in the Indian country, if no other reasonable inference be drawn from the evidence than that the person murdered was an Indian, defendant is entitled as a matter of law to an acquittal. On the trial for murder committed in the Cherokee Nation by an Indian, where several witnesses swore that the murdered person was a Cherokee Indian, of Indian blood, and recognized as an Indian, and was enrolled and participated in the payment of "bread money" to the Cherokees, and there was no legitimate testimony to the contrary, the United States Circuit Court, before which the trial was, had no jurisdiction.

NAVIGATION RECORDS.

A Washington dispatch says: "The records of the Bureau of Navigation, Treasury Department, show that during the past fiscal year there were built in the United States and officially numbered 538 wooden sailing vessels of 87,718 tons and 308 wooden steam vessels of 44,158 tons. During the same period 3 iron or steel sailing vessels were built of 4,750 tons and 45 iron or steel steam vessels of 47,776 tons. These sailing vessels aggregated 451 in number and 42,460 tons in measure. The steam vessels aggregated 353 in number and measured 91,934 tons. The entire number of vessels built and numbered was 849, the tonnage being 134,394. Unrigged vessels were not included in the above statement."

—The work of construction on the Canada Eastern Railway has been begun, says the St. John *Globe*. The village of Nelson, by this extension, will have direct communication with the rest of civilization. After this link is completed, the extension to Black Brook will be commenced.

Mercantile Summary.

IN Toronto, F. A. Smith, stationer, has assigned, with small liabilities.

THE *Record* says that many Philadelphians are sojourning in Nova Scotia and Newfoundland.

A CONSOLIDATION of electric companies has taken place in Ottawa. The Chaudiere and the Standard companies are now absorbed by the Ottawa Electric Light Company.

IT is stated that the average number of telegraphic messages passing through Heart's Content, Nfld., daily, is somewhat over three thousand. This gives nearly one million one hundred thousand annually. The office is never closed.

IT is generally known, says the *Planet*, that Hiram Walker & Sons have been leasing or buying all the available land located on the gas belt at Gosfield. This has aroused Kingsville people and several of them are endeavoring to secure enough of the gas fields to supply fuel for their manufactories.

THE statement was made by the *Free Press* recently that all men with trades had no difficulty in finding work in Winnipeg. This is denied by several city mechanics, who say that many of the city's painters and carpenters are preparing to enter the harvest fields, being unable to obtain other employment.

Mercantile Summary.

NEWMARKET merchants have agreed to close their stores at 9.30 on Saturday evening. Quite late enough this hot weather, we should say.

THE Outremont and Cote des Neiges lines of the Montreal Park and Island Railway Company were formally opened to the public last week.

THE British Columbia Automatic Lighting and Oil Company has been incorporated, with a capital of $350,000. Its head office is in Vancouver.

THE Imperial Oil Company has purchased a portion of the McKechnie property at Dundas, and a barreling station will shortly be erected, says the *Spectator*.

THE Stratford *Beacon* says that James Beattie, of Seaforth, has this week shipped about 26,000 lbs. of wool, having become tired of holding it for the American tariff bill to pass.

A DRY goods firm in St. Lawrence, a suburb of Quebec city, named Villeneuve & Frere, who have been established since 1886, have found trade so dull and cut up in their quarter of the city that they have been compelled to make an offer to creditors of 70 cents in the dollar, payable in three, six, nine and twelve months, which will most likely be accepted. Liabilities about $36,000 and assets nominally the same.

Mercantile Summary.

MANITOBA promises to yield from fifteen to twenty bushels of wheat to the acre.

THE Windsor *Record* appears in new dress, which will no doubt be gratifying to its many readers along our western frontier. It is evidently keeping fully abreast of the times.

SEVERAL hundred employees in Tucker's Rope Works at Brooklyn were locked out by the United States Cordage Company, in an effort to lessen the production of rope and enhance prices.

THE Bell Telephone Co.'s new copper metallic line between Amherstburg and Windsor is completed. New switch boards, with all the latest improvements, will be put in the central offices in Windsor and Amherstburg, and everything will be in working order in a few days.

IT has been found necessary by the Merchants' Bank of Halifax to issue a new $5 note, to replace the old one which had been raised to $20 and circulated in Montreal. The new notes are very neat and legible; on the right hand corner of the bill is a portrait of President Kenny, and on the left that of Cashier Duncan, both very life-like. The notes are not unlike those issued by the Bank of Montreal. They were engraved by the American Bank Note Co. and are dated 1st June, 1894.

We have made large clearing purchases from the Magog Mills, which we offer below manufacturers' prices.

Sole Agents for Canada for PRIESTLEY'S well-known DRESS FABRICS and CRAVENETTES.

Mercantile Summary.

LAST week we stated that Hickman & Co grocers, Parkdale, had assigned. This we much regret. The person who assigned was Annie Hickman, Bloor street, who carries on a small grocery managed by her husband, James Hickman. The Parkdale establishment, we are told, is doing a very nice trade, and we should be sorry to hear that it had suffered by a confusion of names as printed in our columns last week.

THE Armstrong Photo. Engraving Co., of Montreal, Mrs. J. L. Armstrong being sole proprietress, has assigned, with liabilities of about $2,300. Business was managed by Mrs. Armstrong's husband, who was formerly in the photographic business with different parties for short periods, but without success.

SIX years ago Graham & Reid started the dry goods business in Trenton, but not getting along amicably they assigned, in order to bring about a dissolution of partnership. After this J. B. Graham arranged with creditors to continue the business, but has never been able to gain any surplus. Now he assigns.

J. M. MARTIN, in the restaurant business in Montreal, has assigned, owing $5,900. Mr. Martin had only a business career of two and a half years, but could not attract sufficient trade to make it pay, and had to succumb.

A. I. GRAVEL, Louisville, Que., whose troubles have been already noted in previous issues, has succeeded in effecting a settlement at 60c. in the dollar, payable in three, six, nine, and twelve months, secured.

PETERBOROUGH'S rate of taxation has been fixed at seventeen mills.

Type Presses Printing Material

GWATKIN & SON
57 Bay Street
Toronto

HOLIDAY traffic on the railways is very heavy at present.

D. E. DECOSSE, dry goods, Hull, Que., has assigned, with an indebtedness of about $6,500. He has been in business since spring of 1892, but trade in Hull is overdone in his line.

ANOTHER dry goods firm, Robert & Jodoin, have assigned with liabilities of about $20,000. They purchased the stock of F. X. Morsan a couple of years ago, but appear to have undertaken too much for their small capital, and were not strong enough to withstand the keen competition that exists in their line.

RANGER & Co., of Montreal, who sold furniture, pictures, etc., on the instalment plan, had a meeting of creditors on August 1st, when it was decided to grant them an extension of time spread over 12 months. They owed some $3,200, but showed a surplus of between $2,500 and $3,000; this, however, was mostly in book accounts of a weak class.

THE assignment is noted of Bazinet & Deslieres, dry goods, Montreal, of which firm Theophile Bazinet was the only member. He owes somewhere about $17,000, and only started last spring. He was supposed to have had a very fair capital to commence with, and his assignment, after such a short career, has been a surprise, as well as causing some comment.

DURING the month of May there arrived in the port of Montreal 50,600 tons of Nova Scotia coal, and during the month of June 92,140 tons, while last month there arrived 145,345 tons, double the amount received during the month of May. It must, however, be taken into account that during May there were only 25 trips made, while last month there were 56 trips.

W. CONVEY & Co., dealers in dry goods, Chatham, have assigned. Last January Mr. Convey obtained an extension of fifteen months on liabilities of $8,800. His nominal assets were $11,000. Owing to bad trade this season he has been unable to live up to the terms of settlement, consequently an assignment became necessary.——The estate of Wm. Petch, blacksmith, at Crosshill, has assigned, with small liabilities.

A FOUNDRY firm, with headquarters in Beauharnois, Que., and a branch at Montreal, namely, E. A. Manny & Co., have, through insufficient capital to carry on their business, been forced to assign, with liabilities of about $40,000. E. A. Manny, who is at present the only party interested, started business a number of years ago, but got into difficulties in 1881, compromised at 20 cents on the dollar cash and continued business, having different parties as partners at various periods, and a short time since tried to put his business into joint stock shape, the creditors being approached to take stock in the company, but the project fell through.

THE following failures are noted in the Maritime Provinces: Robert Cox, a general storekeeper at Kingsboro, N.S., has failed.——J. H. Gillespie, a dealer in shoes, Yarmouth, N.S., assigns.——R. H. Coalfleet & Co., Windsor, N.S., started a grocery in the fall of 1893, afterwards going into grist milling and giving up groceries, but the capital was too small to operate a mill, and they had to assign.——The suspension is also announced of E. C. Gooden & Co., general storekeepers of Bay Verte, N.B., who appear to have disposed of considerable goods, but evidently the business was not a profitable one, as they were obliged to take the above step and will likely have to assign.

THE engine manufactory of Stevens, Turner & Burns, London, was changed into a joint stock company in 1882 with a paid capital of $150,000. About four years later Turner retired from the company; since then the business has been conducted under the style of Stevens & Burns. About six months ago their statement showed assets of $268,000 and liabilities of $151,000. Their trade was pretty well spread out, having a branch in Winnipeg, where they did a large business, having over $60,000 of paper outstanding in the west. Now they find that they owe their bankers $90,000. If these are pretty well secured, and when their claims are satisfied there will be but a small dividend to their general creditors. In view of these facts, their assignment now cannot be any surprise.

IN Vancouver, B. Simon, tailor, is in difficulty, and it is probable that his premises may be closed by his mortgagee, to whom he owes $1,900.——York & Pilling, general storekeepers at Mission City, have made an assignment. They have nominal assets of $30,000, with liabilities of $5,000 less. They have been doing a good business, and claimed a surplus of $10,000 in the early part of the year.——About six years ago J. A. Caldwell started a men's furnishing store in Nanaimo. About six months ago he confined his business to tailoring. Of late he has not been prosperous, and endeavored, without success, to sell out his business. He now assigns.

IN June last Pat. T. Patton, a hotel-keeper in Victoria, assigned. Now we hear that his landlord has sold out the furniture, etc.

AFTER being in business about eighteen months, Mrs. Nap. Ouellette, Bic, Quebec, found trade very dull, and assigns. — Another failure is that of T. Sylvester & Co., grocers, Montreal, who found that they could not make any progress.——An offer of 60 per cent. cash is made to the creditors of H. Larocque, shoe dealer, Hull, and 25 per cent. cash by L. M. Jocks, general storekeeper, Caughnawaga

MR. RICHARD TEW has been appointed to look after the old general store business of Joseph Schaffer, Paris. The statement presented showed nominal assets of $10,000, and liabilities of $3,500. The assets consist of $3,800 of book debts, $1,500 equity in real estate, and the balance stock in store. This failure is attributed to old-time methods. The assignee will retain possession till the creditors are secured.

THE bailiff is in possession of the premises of Wm. Livingstone, hotel keeper, Hamilton. His license was cancelled a short time ago.——McBean Bros., grocers and liquor dealers, London, have been somewhat careless in their manner of doing business. Now they are involved and have assigned.——Another assignment is that of Arthur Munro, grocer, who has been a long time in business at St Thomas. His liabilities will not be large.——The Reform Club in this city becoming involved, owing to excessive rent ($2,400) and lack of bar patronage, had to assign, and its furniture, etc., has since been sold by auction. Inspectors, with Assignee Clay, have been appointed to look after the final disposal of the estate.

A MEETING of the creditors of D. G. Stephenson, the decamped warden of this county, took place just after we had gone to press last week, and his affairs were found to be in a much worse position than was at first supposed. Claims were made by bankers reaching the sum of $17,000. He owed several firms for lumber, etc., over $3,000. Then there were some twenty individual claimants in sums varying from $7,945 down to less than $50. They are composed of farmers, laborers, domestic servants, widows, spinsters and orphans. The aggregate of these debts will be in the neighborhood of $35,000. In some instances the life savings of the family are gone and the dupes left in penury. Seldom have we witnessed such a flagrant betrayal of the confidence so many innocent people reposed in him.

Wyld, Grasett & Darling

J. J. SCHRAGGE & SON, dealers in clothing, etc., Winnipeg, are in difficulty, and a judgment has been obtained against them for $1,883. In March last they suffered a loss of several thousand dollars by fire.

SEVERAL partnership changes have been made by John McMaster, general storekeeper, Perth, before settling down alone to business in the summer of 1891. Since then he has been attentive, did a steady trade, met his paper pretty well, but at the same time it was not generally supposed that he was increasing his capital. Now we hear of his assignment to W. A. Campbell with assets of about $20,000, and liabilities of $5,000 in excess of this sum.——Spicuzza Salvatore has been in the fruit business in Hamilton about four years, but does not appear to have made much progress. While he was enjoying a holiday trip to his native home in Italy several months his son had charge. In the spring he returned. Now we hear that he has decamped owing $7,000.

C. HERBERT & SON, dealers in hay and grain at Stottsville, Que., are in trouble. Some years ago the father admitted the son as partner and for a time they made money, but not sufficient to stand the shrinkage in values. Now an assignment is in order.——After having for about eight years conducted a tailoring business in St. Johns, Que., Isaie Hevey has found it necessary, owing to severe competition, to ask his creditors to write off 60 per cent. of their claims.——Many changes have been made by A. J. Dubuc, dry goods dealer, St. Hyacinthe, since he first became a trader, but they have not always proved to be profitable ones. He has been at Nicolet and Drummondville, and has previously assigned. For a time he traded as Dubuc & Co., his wife being understood to be the sole partner. Now we again hear of another failure with liabilities of $9,000. The disposition to extend trade beyond his means has always been a source of weakness in character.

ABOUT seven years ago Charles Stevens, grocer, started business in Fergus, but was unsuccessful and assigned five years later, owing $1,400. His creditors were kind enough to settle at 70 per cent. discount. He then gave a chattel mortgage of $500 to secure his landlord and this has been foreclosed.——E. Tomlinson, hotel-keeper at Beeton, has been sold out by his landlord a second time.——A Goderich restauranter named M. C. Lloyd, who started business a few months ago, has had his premises closed under the power of a chattel mortgage. ——An assignment is made by J. Kievell, baker, Hamilton. He will not owe much.——Hugh Maclean, shoe dealer, Niagara Falls, being somewhat irregular in his habits, has assigned ——One of the oldest traders at Stoney Point is Wm. Walsh, grain dealer. A short time ago he claimed a surplus of over $6,000; now he assigns, with liabilities estimated at $50,000. Quite a number of Grangers will suffer through this failure.

IN 1888 E. J. Fawcett bought the hat business of Langley, Neill & Co. here. Three years later he moved to Toronto Junction, where he admitted one Baker into partnership, and has since continued the business under the style of Fawcett & Baker. But, apparently for want of capital, they made no progress, and we now hear of their assignment.——William Hutchinson is continuing the general store business of his father at Alliston, who traded under the style of George Hutchinson & Son. During the heavy fire there in 1891 they lost over $5,000. Creditors then allowed a discount of 25 per cent. off their claims. This evidently was not sufficient to allow them any working capital, and Feb., '93, they were obliged to call a meeting of their creditors. Their statement then showed stock and book debts amounting to $15,000, and liabilities $12,000. A settlement was arranged at 75 per cent. secured by a Montreal firm. But since then Mr. Hutchinson has found the load too heavy to carry, and now we hear of his assignment to Henry Barber.

——"The Clantys does be slow returnin phwat they borry," said Mrs Dolan. "Yis," replied Mrs. Rafferty, "Oi niver will forgit the throuble Oi had gettin' back the flat-oirons Oi lint 'em wanst out o' the koindness av me heart." "An' how did yez git 'em?" "Oi sint me b'y Teddy to holler out that the Clantys wouldn't be in this counthry on'ly St. Pathrick chased the snakes out av Oireland. Thin the oirons cem over the back fince fasht enough: All Teddy had to do wor to dodge 'em."

THE SITUATION.

In the eastern war, Japan continues tohold the balance of advantage. Both the billigerents are anxious to buy ships and materials of war from Europe, and in this race Japan appears to be getting the best of it. The efforts of Russia and England in favor of peace are reported to have definitely failed. Russia is charged in some quarters with a desire to capture a Korean port as the terminus of her trans-Siberian railway.

A Government inspector is reported to have found tuberculosis rife among cattle near Vancouver, no less than thirty animals belonging to one herd being affected. Large tumors were found in some of the animals. The city council of Vancouver recommends the scalding of the milk used there, as a matter of precaution; and to tell the truth, the advice might be of service elsewhere. The herds of the Dominion Government have been found similarly affected. And the disease is equally found in the neighboring Republic. Of thirty Jerseys examined at Rome, N.Y., a few days ago, every one was found to be affected. As this disease is the mother of consumption in the human subject, this information suggests other precautions than the one mentioned against the spread of the disease through milk. Beef would be equally liable to spread the infection. What guarantee have we that the great packing establishments, and for that matter the small butchers, never supply to the public meat which cannot be used as human food without great danger? Some system of inspection would seem to be necessary. A large establishment could be inspected if time were allowed; but the whole process of the killing and the preparation of the meat is so rapidly executed that efficient inspection would seem to be impossible, unless under a change of methods. The inspection of a number of small butcheries would be difficult, but not impossible. But there is something more required, and that is, if possible, to stamp out the disease.

After a period of great anxiety and many adjournments, the Legislature of Newfoundland has passed the Revenue Supply Indemnity bills. The necessity for this legislation arose out of a political complication which followed the overthrow of the Whiteway Government and the formation of a new one which could not command a majority in the House. In the meantime, the revenue laws expired, and the Government had to face the alternative of collecting taxes without the authority of law or going without revenue. It chose the former, and now gets indemnity for the irregularity. The Whiteway cabinet was not only defeated; its members were driven out of the House and disqualified by the courts on charges of corruption in connection with the late elections. The charges included one of a novel character, the expenditure of public money on roads, but the fact that this expenditure was unauthorized gives it an extraordinary stamp. The new Government has got its majority by the unseating of members of the Opposition. The Whiteway following is said to contemplate raising the question of federation with Canada. Success could only be got if a majority were in favor of union with Canada. An utterly discredited party cannot, till it has time to recuperate, if there be resurrection for it, effect anything. Federation with Canada could only be brought about by the consent of the two parties, and neither of them would be in a position to claim all the credit of the achievement.

Five sealing vessels are reported to have been found tied together and abandoned, in Behring Sea. There was some ammunition, but no provisions in them, and they bore no names by which they could be identified. The story comes from San Francisco, and appended to it is the theory that the abandoned boats belonged to the "Sayward" of historic fame. The "Sayward" is reported to have been seen off Japan, with 688 seal skins on board; and the loss of her boats is attributed to fog and storms. Japan is a long way from Behring Sea, though the latter lies in the homeward direction of a vessel which has British Columbia for its home. The fact that there was no name on the boats would tend to show a secret purpose. Whether they drifted from the vessel to which they belonged or set out on some expedition with crews on board, is a question. The latter is most probable; and on this supposition the question arises, what became of the men: were they taken up by some vessel, or did they escape on some island and afterwards lose their boats? If they had died of hunger some of the bodies would probably have remained in the boats. If they had been rescued by some vessel the boats would probably have been taken on board or in tow. With the present limited information, the mystery cannot be cleared up. The whole story has somewhat the smack of a *canard*, but it is rather too bald to pass as a first-rate manufacture even of that kind.

Not till long after it was practically ended was the great strike at Chicago officially declared off. Then the authorities thought they might remove the extra precautions and leave the preservation of the peace to the police; but no sooner was this done than rioting was renewed. What has occurred during this strike seems to show that the United States made no mistake when they awakened to the necessity of putting some curb on immigration. They showed too much hostility to the Chinaman, who has only just now learnt American methods sufficiently to dream of the realization of a laundry trust. The outrages which accompanied the strike, and for which there is no excuse, were chiefly the work of foreigners; and one result must be to strengthen the opposition to the indiscriminate admission of foreign immigrants. What other lessons have been learnt from the strike remains to be seen. Debs professes to have had enough of this mode of warfare, and perhaps he has, but it is possible that this alleged conversion may be intended to operate as a plea in abatement of punishment. The folly of sympathetic strikes was made conspicuous, and it wisely stopped at a certain point. The

attempt to cripple the whole industry of the Republic and to bring it to a stand was a signal failure, and it is probable that it will be a long time before it is tried again. In a limited strike the strikers can be supported by sympathy taking a substantial form; but a general strike, if such a thing were possible, would reduce whole working populations to beggary in two weeks.

Illegal whale fishing, by American vessels, at the mouth of the Mackenzie river, is a discovery of recent date, and already demands for its abatement are made. Not that we can claim an open sea in that region, but we may fairly object to open violations of territorial rights along the Canadian coast. Illegal whaling and fishing in Hudson Bay have been going on longer, and as yet no remedy has been applied. But the question attracted the attention of Parliament at Ottawa last session, and the Opposition, by the mouth of Mr. Mills, called as loudly as a Government suporter could call, for some scheme of protection. Mr. Mills was afraid that unchecked usage might confer rights, but this apprehension the Government did not share. Another mode of depredation, in a third quarter, is in the form of smuggling into Canadian territory through the Yukon River. This river has its outlet in American territory, and Canada has the right of navigating the American portion, under the Treaty of Washington, as Great Britain once before had under treaty when Alaska belonged to Russia. The North American Trading Company has a fleet of steamers on this river, and smuggling craft encroach on its business. Last winter this company urged the Canadian Government to send a representative to the upper section of the Yukon, which is Canadian, armed with magisterial powers to keep the smugglers in check. An Inspector of the Mounted Police has gone up there to investigate and report. Smuggling will not long be wholly unchecked, even in that distant region.

Lord Jersey expresses the hope that the late Intercolonial Convention, which he attended as the British representative, will bear "practical results" beyond its present features, which he thinks were all that could be desired. General expressions of this kind give us no real information. We shall know nothing of importance till we learn what action the Imperial Government takes on his report.

COMMERCIAL EFFECTS OF THE KOREAN WAR.

It is hardly possible that the Chinese-Japanese war should have any serious effect upon Canadian commerce. Our trade with the belligerent powers has not, unfortunately, attained any considerable dimensions; its volume is far less than our geographical position and shipping facilities should warrant. The principal commodities imported into Canada from these countries are tea, rice, silk, spices, drugs, and novelties of various descriptions, while our exports consist mainly of cottons. Almost the entire trade of China is carried on through the treaty ports, and Japan has been given to understand that she must respect their neutral character. China, of course, would be very willing to strike a blow at the foreign commerce of Japan, but she lacks the naval strength. If the war be prolonged the values of some eastern goods may advance. Operatives will be drawn from the silk factories, and laborers from the tea plantations, to feed the armies of the belligerents. But, on the other hand, the very fact of industrial inactivity will necessarily increase the demand for goods of foreign manufacture. Military supplies of all kinds will be in request, and in the furnishing of food products, more especially, Canada should obtain a large share of the trade,

But the effect of most consequence will not be realized until peace be again established. The Chinese people have been most stupidly conservative in their treatment of foreigners. The folly of their action will be made apparent before the war has been concluded. China has no railroads with which to move her troops to the seat of military operations. Her means of telegraphic communication are of inferior character, her forces ill disciplined and armed in a primitive manner. Japan, on the other hand, is most progressive, and has with eagerness adopted the methods of civilization. The wisdom of this course has been demonstrated by a series of rapidly gained victories. Even if China in the end make a greater population tell in her favor, she will probably have learned a lesson from her smaller neighbor. And should China open all her ports to foreigners and enter upon an active industrial career, it is impossible to say in what rank among commercial nations a dense and thrifty population would place her. In Japan there is a large faction dissatisfied with the progressive policy of their rulers, and it is said that the Japanese Government has been forced into war to turn this reactionary party aside from revolutionary plottings. The war may be the one thing necessary to further open up and develop these great eastern countries.

THE DRY GOODS TRADE.

The first weeks of August are of more than usual interest to the dry goods trade, since during this period a considerable amount of paper matures. In Montreal and Toronto notes due on the 4th and 5th of August have, in consideration of the times, been satisfactorily met. So far as Ontario and Quebec accounts are concerned, payments are, it is thought, quite up to those of last year. It is unnecessary to add that the last two years have fallen short of the standard which in the normal condition of things should exist, and were characterized by universal complaints concerning the scarcity of money. On Manitoba account payments have been rather disappointing. The farmers of this almost exclusively agricultural province trust too much to wheat, and this cereal is now selling at hitherto unrecorded low prices. But a movement is now taking place throughout the province looking to the more general establishment of creameries and cheese factories, and should these prove successful better things may be expected of Manitoba.

It is an ill wind that blows no one good, and the stringency of the last few years has performed a service to trade in weeding out many weak merchants. A large number of these men have been carried by wholesale houses for a long period of time, but this course of action is more difficult in times of depression, and in many instances proving to be an impossibility, assignments have necessarily been made. "In commerce," as the principal of a large dry goods house justly remarked, "we must have our years of expansion and our years of restriction. We are now on our years of restriction, with the result that importations are light and credits are determined with great prudence and care. The trade will be much more healthy on account of restricted trade. There will be no surplus stock for slaughter. The probabilities therefore are that the sales may be lighter, but trade will be more profitable in two ways—in profit on goods sold and in less loss from bad debts."

Although there may be differences of opinion as to the advisability of a protective tariff for Canada, merchants who are Liberal in their politics, as well as those who adhere to the Conservative party, are ready to acknowledge the services performed by the National Policy in shielding

us from the full effects of the crisis in the United States. Our high tariff has prevented American wholesale merchants from making Canada a dumping ground for goods which they could not sell in their own country. And Canadian retail merchants along the border lines have found the barriers imposed by the National Policy a relief against the bankrupt stocks which have in the last few months been so frequently disposed of in American border towns and cities. We also know of instances in which retail merchants have only been prevented from removing to Canada with their stocks by the tariff regulations of this country. These incidental effects do not alter the nature of the tariff, considered from another standpoint.

The spirit of prophecy is a gift which few possess, and it is with extreme diffidence that we venture to speak of the outlook for the coming fall and winter. Merchants throughout the country, with here and there an exception, are showing commendable caution in giving orders for the fall trade. Goods, it may be safe to say, will be purchased later in the season than usual, and in many instances they will not be bought until actually required. It may be wisdom to suggest that there may be such a thing as too much caution. Wholesale jobbers are not carrying large stocks, and should certain lines of dress goods, for instance, run low, considerable delay may be found in filling repeat orders. There is every prospect of abundant crops in Canada, and although the prices received for certain cereals are very low, partial compensation may be found in the satisfactory state of the dairy industry in various provinces of the Dominion.

THAT FAILING DEMAND FOR GOODS.

In a country such as Canada, where the agricultural classes make up the largest part of the population, the consumptive demand is of great elasticity. Prices of farm products, with wheat at 60c. and wool at 16c., have reached a low ebb, while the expenses of farming have decreased little, if any, during the last several years. The introduction of improved agricultural machinery has only served to divert the farmer's money from one channel into another. It is true that the prices of goods which the farmer must buy have at the same time declined. But the most important element in the falling values of these articles has been the lower prices at which it is possible to obtain raw material from the tillers of the soil, and this, of course, affords the farmer little satisfaction. The wages of labor have been well sustained; men apparently will work at their former wages or not work at all. The rate of interest has not been subjected to any considerable decline, although profits of management are far from what they were a few years ago. Thus the products of the manufacturer have not fallen so low in value as the produce of the farmer, a fact for which the tariff is partially responsible, and the purchasing power of the latter is in consequence relatively diminished.

This fact has long since been apparent on the farm and economy has become the watchword. It is a sorry day for merchants when farmers take it into their heads that they cannot afford to spend money. There is plenty to eat and drink on the farm. Blue-jeans are good enough for six days in the week, and by absenting himself from church, they may even tide the farmer over the seventh day. Boots bought a year ago and full of holes are all that is needed in hard times. And so on throughout the category of articles that are used to clothe the farmer, and go to make up his house furnishings and stable fixtures. Economy may be practised by an urban population, but for true rigid abstinence from the use of manufactured goods, we refer you to the farmer.

TRADE IN BRITISH COLUMBIA.

A very few years ago the trade of British Columbia was an inconsiderable factor to the Dominion. But with the advent of the Canadian Pacific Railway this ceased to be the case, and the commercial and industrial progress of this Province is carefully watched by the business community of eastern Canada. British Columbia has not escaped the depression so prevalent in old and new countries alike, and the depression has been even the more intense since many districts throughout the Province have been struggling with the reaction that sooner or later follows every real estate boom. But the future of the Province is of great promise, and Victoria, Vancouver and New Westminster are probably as good cities for investment as any in the whole Dominion.

The Vancouver *News Advertiser*, in a review of provincial trade matters, says: "We cannot regard the present trade situation in the Province as showing much improvement over the position two months ago. Compared with the state of things on the Coast to the south of us, we may, however, congratulate ourselves." The salmon industry, which means so much to the Province, is, at the time of writing, in an uncertain condition, so far as the season's pack is concerned. The harvests in many parts of the Province will be good, notwithstanding the gloomy outlook earlier in the summer. The lumber trade is depressed. Mining operations, especially in the Cariboo district, where several companies are opening out large hydraulic works, promise to display renewed activity in the near future.

CO-OPERATION.

In Vancouver, B.C., there is a society whose most serious occupation has hitherto been the circulation of co-operative propaganda. But the society believes that it has now passed the primary stages, and contemplates going a step beyond store-keeping, the most usual form of practical co-operation. It is proposed to secure one of the many fertile islands along the Pacific coast for purposes of colonization, and a deputation has waited upon the Provincial Minister of Lands and Public Works with this end in view. The Government, it is said, has promised to assist the project. The co-operators intend to engage in fishing and agricultural pursuits.

One cannot look over the history of co-operation without a feeling of admiration for the men who have struggled so persistently against the principles underlying human nature. Plato was among the first of chronicled co-operators, and since his time, commensurate with amount of energy expended, little advance has been made. In England co-operation for purposes of distribution has met with partial success, but in no country have attempts at industrial co-operation given satisfactory results. One of the great difficulties of industrial co-operators has been to keep their pet scheme distinct, on the one hand, from profit sharing, and, on the other, from communism. But the fundamental cause of failure is the fact that deep down in the heart of every man there lies planted a spirit of individualism which sooner or later must make its presence known.

TORONTO TRADE FIGURES.

There are several reasons why the foreign trade of the port of Toronto for the past few months is not so great as that of the same months a year ago. The falling off in our dry goods imports is a significant fact and indicates either that our merchants are giving more liberal patronage to Canadian manufacturers, or else they are expecting a re-

stricted fall trade. It may be that both of these influences are at work. The recent railway strike in Chicago and similar industrial disturbances in the United States have probably done much to lessen our imports.

Following is a list of dutiable imports for the month ending 31st July, and also a comparative list for the same month a year previous:—

	July, 1894.	July, 1893.
Cotton goods	$ 63,543	$ 86,477
Fancy goods	48,228	46,329
Hats and bonnets	11,390	13,559
Silk goods	86,769	118,509
Woolen goods	270,831	386,451
Total dry goods	$480,761	$651,325
Brass and manufactures of	$ 4,196	$ 8,510
Copper, "	126	921
Iron and steel, "	77,469	142,247
Lead, "	2,829	3,369
Metal composition, etc	9,485	13,342
Total metal goods	$ 94,105	$168,389
Bicycles	5,934	.....
Books and pamphlets	15,607	24,572
Coal, bituminous	11,472	33,128
Drugs and medicines	17,842	14,513
Earthen, stone and chinaware	18,981	28,508
Fruits, green and dried	8,559	12,483
Furs and fur skins	9,853	14,310
Glass and glassware	21,765	31,171
Jewellery and watches, etc	25,475	24,841
Leather and manfrs. of	11,979	15,525
Musical instruments	6,833	10,936
Oils of all kinds	7,485	9,703
Paints and colors	7,941	7,473
Paper, envelopes, etc	25,409	26,621
Spirits and wines	4,646	7,129
Wood and manufactures of	10,208	13,473

In looking over the above list it will be observed that 21 items out of a total of 25—bicycles, which were not in the 1893 list, being excluded—show a reduction in the quantities imported as compared with our foreign purchases a year ago. Some of the more noticeable reductions are in cotton, silk, and woolen goods, books, earthenware, fruits, and glassware. Metal goods show a decrease in every line, but it must be borne in mind that many of these goods, which were formerly dutiable, are now on the free list.

In order that our readers may see clearly what items are affected by additions to the free list, which change serves to give the impression that there has been an enormous falling off in imports, we give the following list of free goods received, with values as for the month of July, 1894:—

Coal, anthracite	$111,324
Fruits, bananas, pine apples, &c.	17,869
Furs and skins, not dressed	7,628
Metals, brass and copper	13,477
" iron and steel	4,700
" tin and zinc, and others	12,204
Oils, vegetable	2,490
Wool, &c.	1,796

The exports were a good deal less than a year ago. The chief items were, as with the previous month, horses, dead meats, iron and wood. The following list speaks for itself:—

Produce of	July, 1894.	July, 1893.
The Mine	$50	$46
" Fisheries	96	422
" Forest	4,458	55,372
" Field	1,502	14,566
Animals, etc	117,811	118,794
Manufactures	70,843	71,135
	$194,760	$260,335

AUGUST.

Divine Providence intended the present month to be a period of rest for the busy toilers in the world of commerce. In many branches of trade quietness is holding sway almost supreme. Commercial and banking houses, insurance and brokerage offices are in part deserted; their occupants have stolen away to revel in the beauties of nature.

"The quiet August noon has come,
A slumbrous silence fills the sky,
The fields are still, the woods are dumb,
In glassy sleep the waters lie."

Canada is a veritable paradise to the pleasure seeker. Mighty rivers, shady streams, inland seas and peaceful lakes are all enfolded within Canadian domain, while those who find most pleasure in the rolling surf may have their hearts' content on either our Atlantic or Pacific coasts. The past year has been a trying one, and although improvement is confidently looked for in the approaching fall, every one should make the most of the holiday season, gaining strength to meet the uncertainties of the future.

DOMINION MILLERS' ASSOCIATION.

On Tuesday last a large number of prominent millers assembled at the Toronto Board of Trade building on the event of the annual meeting. The president, A. H. Baird, Paris, occupied the chair. The treasurer's report for the year showed receipts $1,458.18, with the balance from last year of $223.11, making a total of $1,681.29. The disbursements were $1,479, leaving a balance now on hand of $202.29. This report was adopted.

Among the subjects that received attention was that of export freights. Underbilling, fraught with so much mischief, was reported to have been nearly stamped out. Probably the most important matter before the meeting was the question of freight rates. The grievance is that railways do not allow the same rate for export on flour as they do on wheat. It is claimed that as a result the farmers of Ontario are not in so good a position as those of Michigan. On the contrary, the railways contend that while the steamships charge a higher rate for flour than wheat, the matter cannot be remedied.

The president in his annual address stated that: "Whilst the year just ended has been exceptionally trying, still the Canadian millers had much to be thankful for since the country has been free from the financial disasters which visited other countries. With reference to the crop prospects for this year, they were very good. He drew attention to the fact that foreign governments were encouraging the milling industry. In Germany the miller can import any quantity of foreign wheat and escape paying duty by exporting a like quantity of native grain. Thus they are enabled to obtain any desirable quantity of foreign wheat for grinding or mixing purposes free of duty. A similar rule obtained in Portugal, Italy and France."

Mr. James Goldie, of Guelph, read a very interesting paper on chattel mortgages on farmers' grain. He gave his experience in a suit he had with a farmer, and where he would have had to pay for the wheat twice except for a technicality in the mortgage. As the law stood at present, the man who had a mortgage on the wheat could make the buyer pay for it even if the farmer had been paid.

An interesting paper was read by Mr. M. McLaughlin on our export trade. In the discussion that followed Mr. Plewes said that there was no use in Canadian millers trying to export flour at a profit as long as they paid New York prices for wheat. The millers were paying far too much for their wheat, and the farmers were getting all the benefit out of the tariff. He advised the millers to pool together so as to be able to make large shipments of flour at one time. On small lots they had to pay excessive freights.

In the evening session some discussion took place about grain buying. A number of papers were also read, after which the election of officers took place, which resulted as follows: Mr. Harold Barrett, Port Hope, president; Mr. Alexander Dobson, Beaverton, first vice-president; Mr. James Hood, Stratford, second vice-president; Mr. William Galbraith, Toronto, treasurer.

Executive Committee—Messrs. J. L. Spink, Toronto; J. D. Saunby, London; A. H. Baird, Paris; M. McLaughlin, Toronto; James Hood, Stratford; John Goldie, Guelph; Robt. Noble, Norval.

Following is the personnel of the Arbitration Committee—J. S. Stark, Paisley; W. D. Galbraith, Allandale; J. Goldie, Ayr; J. C. Vanstone, Bowmanville; W. H. Baldwin, Aurora; A. Wolverton, Wolverton; G. Hamilton, Toronto.

THE JULY FIRE LOSS.

The fire loss of the United States and Canada during July, as compiled from the records of the *N.Y. Journal and Bulletin of Commerce*, aggregates the enormous sum of $16,307,000. The following table of losses by months demonstrates how unusually serious the July losses were:—

	1892.	1893.	1894.
January	$12,564,900	$17,958,400	$10,568,400
February	11,914,000	9,919,900	11,297,600
March	10,648,000	16,662,350	9,147,100
April	11,559,800	14,669,900	11,540,000
May	9,485,000	10,427,100	10,777,800
June	9,265,550	16,344,950	8,282,300
July	11,530,000	12,118,700	16,307,000
	$76,967,250	$98,101,300	$77,920,200

It will be noted that the losses for the first seven months of 1894 exceed those for the same period of 1892. There were 233 fires in July

of a greater destructiveness than $10,000 each. They may be classified as below:

$10,000 to $20,000	72
20,000 to 30,000	54
30,000 to 50,000	36
50,000 to 75,000	30
75,000 to 100,000	10
100,000 to 200,000	20
200,000 to 1,350,000	11
Total	233

Lumber fires have been the most prominent factors in the record of late, and since July 1st about three million dollars' worth of lumber has been destroyed. The month of August has opened very badly, the losses to the 6th inst. being $3,950,000.

PRESIDENT DEBS.

Notwithstanding the recent defeat of President Debs, this would-be autocrat cannot keep still. Doubtless Mr. Debs has learned some lessons from the late disastrous strike, and this appears to have emboldened him for further operations. His latest idea is to form a labor organization that will include not only railway people, but all classes of artizans and laborers. This society is to be known as the American Industrial Union, and is designed to absorb the American Federation of Labor and the Knights of Labor. In a word, all laborers will be eligible to membership. Such is the plan as outlined at a preliminary meeting held in Chicago on Saturday last. The further consideration of the question is postponed until the fate of the leaders in the great railroad strike is known. After the trial, which will take place some time next month, a general convention of labor will be called to arrange the details of organization. In the meantime a strong appeal is made "to the citizens of the Republic" to come to the rescue. The meeting also passed resolutions deploring the condition of the Pullman employees before the strike, and stating that the workmen in the Pullman shops owed $70,000 for rent and were in a worse condition "than workingmen in the times of chattel slavery." The General Managers' Association is also badly scored for coming to the aid of the Pullman Company. All responsibility for rioting is disclaimed. "All the acts of violence were committed contrary to the orders of the officers and the members of the American Railway Union, and in most cases, we believe, by persons who were either irresponsible because of some mental perversion, or who were acting directly under orders of the enemies of the workingmen." The conduct of Governors Altgeld, Hogg, Waite, Pennoyer and Lewelling, and the course of Mayor Hopkins, of Chicago, are spoken of in the most praiseworthy manner.

ARE THERE TOO MANY COMMERCIAL TRAVELLERS?

To bear the name of commercial traveller is to be passed as a prince of good fellows; a ready wit, long head, and persuasive tongue go to make up the characteristics of the successful travelling man. No further testimony is required as to the value of the training received on the road than the fact that the majority of those who to-day preside over our large business firms were once on the road. But one can have too much of a good thing, and we certainly have too many commercial travellers. Sussex, in King's county, New Brunswick, is a village of some 1,000 population, with six general stores and a number of smaller shops. In one day recently, according to an exchange, there were in this place ten representatives of dry goods houses, four representing boot and shoe firms, two from grocery houses, three with fancy goods, one handling teas, and two others carrying odd lines, making twenty-two in all. This was, of course, an exceptional circumstance, but the fact remains that there are too many commercial travellers. What is the consequence? Each man, filled with the laudable desire of selling more goods than a rival, is compelled at times to actually force goods upon an unwilling buyer. Merchants, it is very true, should know better than to overload themselves with stock. But too often does their better judgment give way before the eloquence of the man with many trunks. Nor do they alone bear the consequences of their ill-advised action. For if this conduct be long continued, their names must at last figure in the columns of a commercial paper among the list of failures, and the very house in whose interest the traveller has spent his zeal must share in the losses. Each firm is the best judge of how often it is expedient for their representative to visit the patrons of the house; however, we can but think that the longer trips with more extended territory and fewer visits would in the long run yield better results.

—In New York city eight savings banks received from depositors during the year ending June 30th no less a sum than $13,162,353, and paid to depositors $3,377,205 in excess of that amount. In five Brooklyn banks, during the same period, the withdrawals exceeded the deposits by nearly 25 per cent.

THE NOVA SCOTIA FISH INDUSTRY

A commercial treaty has been arranged between Spain and Sweden and Norway by which the fishing products of the latter two countries are, after August 15th, to be admitted free of duty into the island of Cuba and possibly into Porto Rico as well. Should this arrangement go into effect, and there appears to be little chance that it will be invalidated, it must prove a serious blow to the fishing industries of our maritime provinces. The Halifax Board of Trade considered the matter at a special meeting on Monday last, and passed a resolution which was forwarded to the Dominion Government: "The board desires to draw the attention of this very important fact to the consideration of the Dominion Government, and to urge upon them in the very strongest possible way the necessity of prompt action to defend our trade with the islands referred to. Porto Rico is the only market for our bank, bay, and Labrador fish, and should this treaty come into force, it will place our trade at a great disadvantage, having to compete with free importation from other countries. It is evident our fishermen will be compelled to change their occupation and retire from the prosecution of an industry which has been of great profit to themselves and a great advantage to the commerce of the Dominion at large." The present duty on codfish in Cuba is $1 per quintal, and for Porto Rico fifty cents per quintal. The import of fish into the Island of Cuba reaches about 100,000 quintals per annum, and into Porto Rico about 170,900 quintals per annum. Canadians have now an excellent opportunity to study the principle of a preferential tariff, although their position is such that the study is not likely to prove an agreeable one.

CANADIAN FRUIT BUYERS' AND EXPORTERS' ASSOCIATION.

The first annual meeting of this association was held on Tuesday of this week, and a large number of fruit-buyers were present from all over the country. This society was organized in February last, and a president and executive committee then appointed. The committee met several times in the course of six months, and collected the material which was to occupy the attention of this meeting. The first work of the convention was to adopt a constitution and by-laws. The following resolution was submitted to the meeting by the committee and unanimously adopted: "Resolved, that the practice that has existed in the past, and which has become so general, of engaging assistants in buying and packing on commission, should be discontinued, and in future all assistants or help shall be paid by salary, by the day, week, month or season, as can best be arranged, and any member of the association found violating the same in the future shall be subject to the censure of the association." The resolution explains itself, for it is evident that buyers, if placed on salary, will be more careful in choosing what they buy, as the possibility of increasing their earnings by large purchases would not exist.

Another resolution passed was, "That we, as members of this association, pledge ourselves not to purchase apples on the plan known as 'so much and the rise,' or to give what is called a bonus, and to use, so far as it lies in our power, the form of contract adopted by the association." The following resolution was also carried: "That the members of this association faithfully agree not to accept any 'shipper count' or 'more or less' bill of lading when shipping apples, but to insist on receiving clean bills of lading." Another matter of some importance decided on was that the farmer should be forced to supply barrels. A main feature of the evening session was the reading of crop reports from all parts of Ontario on apples. That crops will be large and prices low is the prospect. There will be very little export to the United States, the crops in New England being also very plentiful.

The election of officers which took place resulted as follows:—President, W. Dixon, Hamilton; vice-president, A. E. W. Peterson, Cobourg. Executive Committee:—J. M. Shuttleworth, Brantford; J. C. Smith, Burlington; David Cantelon, Clinton; Sam. Nesbitt, Brighton; Thomas Seldon, Ingersoll. At the close of the general meeting the executive committee met and elected Mr. J. M. Shuttleworth chairman, and Mr. Thomas Seldon vice-chairman

BRITISH COLUMBIA SALMON PACK.

Four days later than ever before in the history of the industry, the big sockeye run struck the Fraser River on August 1st. A report from Point Roberts says that in the first night the traps contained 10,000 fish, and boats at the mouth of the river were able to take from 100 to 250 fish each. Fraser River canners were beginning to be pretty well discouraged and inclined to regard the outlook as hopeless. Now that the run has struck in, all the canneries will be busy attempting to make up for lost time. The Indians assembled to engage in the salmon fishing had become very restless and threatened to take their departure. They have been living for the most part on credit obtained from the

canners, and while the outlook for a big catch was good, the canners allowed the Indians to draw liberally on their prospective earnings; but after the fish had hung off so long a time, the canners, in self-protection, were obliged to greatly reduce the credit system, and this caused much dissatisfaction.

Advices from the north, dated July 30th, report that fish are plentiful on the Naas River and Rivers Inlet, but on the Skeena the run is only moderately good, the canneries averaging about 6,000 cases each. On the Naas, the two canneries of the Federation brand have put up 13,000 cases. The B. C. Canning Company, Rivers Inlet, report that they were nearly finished on Thursday, 26th, with a pack for their two canneries of 25,000 cases. The Wannuck Cannery, Rivers Inlet, is reported to have filled 12,000 cases.

Three thousand cases of canned sockeye salmon, packed by Messrs. D. J. Munn & Co.'s Sea Island cannery, have been shipped overland to the Atlantic, billed to Liverpool and London, England, and will reach Great Britain, it is expected, in thirty days. It will be the first of the salmon pack of 1894 to be placed on the English market.

THE SEALING INDUSTRY.

The Marine Department has received a report that the spring catch of the Canadian sealing fleet amounts to 44,669 skins, an average of 1,276 skins per schooner. They were all taken in the Japan Sea. Before proceeding north of the Japanese archipelago the vessels took the precaution to ship their catch direct to Victoria. Writing before this news was received, the Vancouver *News-Advertiser* says: "The seal fishery this year has peculiar interest, because to a very considerable extent it has to be conducted under novel conditions. So far, however, as advices from the sealing fleet have been received, the gloomy prognostications of the ruin of the industry, as the result of the regulations made by the Tribunal of Arbitration at Paris, are not likely to be realized. Fair average catches, at all events, appear probable from the hunting on the grounds which is permitted up to this period of the year. The result of the autumn season—which is the most important change in the conduct of the industry—has yet to be seen. Were it not that the prices of skins are low, and likely to remain so, as the result of the general commercial depression, the outlook for the seal fisheries would not be anything like as discouraging as some foretold a year ago that it would be."

"SHOEMAKER, STICK TO YOUR LAST."

The incentives to speculation are always strongest in prosperous times, but a warning against the evils attending speculation is never out of place. The old proverb, "Shoemaker, stick to your last," should be ever present in the merchant's mind. We know of some merchants who have made fortunes by investments outside their legitimate business interests, but we have chronicled the downfall of hundreds who have attempted to follow in their footsteps. The few have succeeded, while the many have failed. In nearly every instance a merchant's business is capable of increased development by the application of brains and attention. Outside investments withdraw capital from the business which created it. The mind of the merchant is distracted and his physical frame overworked. A business which receives the sole, undivided attention of a man will seldom, in return, lead him to bankruptcy.

CLOAKS FOR THE FALL OF 1894.

Jackets will, from present indications, be a popular garment with the ladies during the coming fall and winter seasons. That very excellent paper, the New York *Dry Goods Economist*, summarises the leading ideas as to cloaks for the fall trade, and we repeat a portion of the article. "A careful survey and investigation of the samples shown by the leading manufacturers of cloaks reveal the following main characteristics of the season's productions: The jackets are mostly tight fitting, although there are some loose front English reefers being shown. Among the plainer effects the Prince Albert and fan backs are shown exclusively. The lengths range from 34 to 42 inches, but the 36-inch will be most popular in the lower and medium-priced jackets. The materials are of the rougher effects, such as cheviots, kerseys and chinchilla, which bid fair to be very popular and are shown in all the leading colors, such as blue, brown, gray and black. Some very pretty covert cloths are made up in plain and also very dressy effects with appliqué of material, and are handsomely trimmed with fur."

—Representatives of the Hamburg-American steamship line interviewed the Minister of Trade and Commerce in Ottawa last week. The object of their visit was to arrange for the establishment of a direct line of steamers between France and Montreal upon the same basis as the present service between that city and Hamburg. Mr. Bowell promised to discuss the matter with his colleagues.

MONEY AND SHARES.

The actual transactions in shares during the week have been rather limited in number. But this has been more the result of hot weather and the holiday season than a lagging confidence in the commercial situation. For we are inclined to think that the features of the financial market are just a little brighter than they were one week ago. Inquiries for shares have been numerous, indicating that although people may not yet be in a position to purchase, they regard the outlook with some degree of confidence. The brighter prospects for a settlement of the American tariff question, the recent flurry in the Chicago corn market, and the near approach of the fall season, may, in part, account for an improvement in the general situation. Call money in London stands at ½ per cent., short bills 9-16 per cent., and three months' bills ⅝ per cent. Money on call in New York is steady at 1 per cent. On the local market money is offering at 4½ per cent., and it is the impression of not a few that this rate will soon be reduced to 4 per cent. Bank and assurance shares are steady, with the stocks of some institutions gradually stiffening; Ontario Bank stocks, however, have sold slightly lower at 108½. Bell Telephone has advanced two points, while Toronto Incandescent is stronger. Commercial Cable is firmer. But probably the most satisfactory feature of the street is an advance in Canadian Pacific Railway. Last Thursday 63 was bid for stock which now stands at 66½ bid, with sellers holding 67. This certainly forms a marked contrast to the position of transcontinental railway lines in the United States at the present time.

ANSWERS TO ENQUIRERS.

SUBSCRIBER, St. Mary's, asks: "When, or by what Act, does the *drawer* of a cheque payable to order acquire the notice of forgery of *indorsement* spoken of in section 24 of the Bills of Exchange Act? Does the time limit from such acquired notice hold in the case of the forgery of the signature of the *drawer* of the cheque?"

[ANS.—The notice of forgery spoken of in section 24 of the Bills of Exchange Act means actual notice. The section of the Act has no application to cases of cheques where the drawer's name has been forged; it applies only where the endorsement has been forged.]

J. B. L., Quebec.—Apply to the Ontario Department of Agriculture, Toronto, which will doubtless supply you with the information desired. We have seen no later bulletin of the kind than 15th June. The information about "Labor and Wages" of which you write must be that with respect to the wages paid and the demand for labor on the farm. It does not pretend to give a synopsis of the remuneration in different trades.

S. S., Owen Sound.—No, you need not send it; we do not think it worth while. Life is too short to enter into such quarrels. The company is dead, and so should be its animosities.

AGENT, City.—Word came to us by circular from the proper official. There was nothing secret about it. If you call, you may see the notice.

DRY GOODS JOTTINGS.

Ribbons in satin effects are leaders for the season

The proper place for back numbers is the bargain table.

The man who hoes the soil must expect to soil his hose.

There is a lack of new styles in the Nottingham lace trade.

Every yard of stuff sold increases your capacity for the fall trade.

To judge the quality of gloves it is only necessary to turn them inside out.

It is not improbable that we are to have a big black dress goods season this fall.

In gloves the best sellers during the coming season will be plain goods in staple assortments.

Lavender, lilac, glycine, violet, heilotrope, white and cream are mentioned as good shades in ribbons.

The coming fall and winter will, from present indications, be a good season for velvets in the millinery department.

Gros de Loudres, a fine ribbed cloth, is being made in a variety of mixtures by Manchester mills for next spring's trade.

The coming styles in silk ties give less prominence to figures, the designs being principally in stripes and neat effects.

A shipment of Canton flannels from the St. Croix mill was recently billed direct from St. Stephen, N.B., to Shanghai, China.

A novelty of the season is embroidered silks. In these the design is in open work, shown over a lining of taffeta of a contrasting color.

"I'll tell you what," said McSwatters the other evening, "if you want to bring out what's in a man give him a sea voyage."—*San Francisco Post.*

Manchester textile mills are making a variety of small check effects for the coming season. They are somewhat similar to small surahs and taffetas.

A novelty in lace is made with a ground of three different materials—guipure, net and gauze. Another variety is in two shades of color, cream and butter or cream and coffee.

There are 42 cotton spinning mills in Japan, with a total number of 538,000 spindles. There is some difficulty in securing operatives, and successful strikes are of frequent occurrence.

How easy it is to succumb to that tired feeling in August, and the clerks will not be slow to follow your example. The hotter the day, the greater the effort to look cheerful and keep things moving.

Will the Chinese-Japanese war affect the silk market? The developments of the next few days can alone answer. From the two countries something like 15,000,000 lbs. of raw silk is exported each season.

How about overcoats for the boys this winter, for the hot weather will not always be with us? Is your stock complete, kilts, capes, reefers, single and double-breasted coats? Go easy on the fancy styles; children will have to go without them this winter.

"So you think there is no hope of her recovery, doctor?"

Doctor.—"None; the disease baffles me. It is something new."

"Tell her so, doctor, and I don't think she'll mind when she knows it's something late."—*Chicago Inter-Ocean.*

The New York *Dry Goods Record* announces that twenty-nine cotton mills have shut down or are preparing to close. The mills have 1,440,000 spindles and 39,000 looms. It is added: "It is a beginning that will amount to considerable before the month of August is over."

Laces should sell well this fall. That patterns in Vandyke point effects will lead is, according to the *Economist*, beyond doubt. These styles are introduced in black silk laces, principally in Plauen and St. Gall makes, as well as in laces similar in shade to the lines which were sold extensively during the spring and summer seasons.

The time is near at hand when the boys will be going back to school. Are you prepared for a demand for children's clothing. How would it do to give a fanciful cap or belt with each suit? The practice of giving presents to purchasers is not a good one, but if there is a case in which it is good policy it is in selling children's clothing.

English gloves, says the New York *World*, are at once the cheapest, most serviceable and most fashionable just at present. They are made of selected skins in dog, lamb, kid, buck and castor, with gored thumbs, strong gussets and horn buttons, that don't come off. They look clumsy, but they also look reasonable; the fit being easy, does not destroy the usefulness of the hands. The fashionable colors are red and yellow tan, mahogany, gold and gray.

A correspondent writing from Toronto to the *American Carpet and Upholstery Trade*, says: "At no time in Canadian history has more attention been given to carpetings and kindred goods than now. Like the mother country, Canada believes in good carpets, and it is for this reason that the English have found her such a large and profitable outlet for Brussels carpet especially. The appearance here twice a year of the most prominent English three-quarter men, proves clearly the tastes of our people and the general value of the market as well. These on their last trip did remarkably well, the times considered."

FOR GROCERS AND PROVISION DEALERS.

A ringing speech—a proposal of marriage.

Flies by the million infest the sugar refineries.

Orchards around Berlin are in a promising condition.

The end of a fruitful life—death from cholera morbus.

It seems strange that a man should get hot over an ice bill.

Winnipeg milkmen contemplate striking as a protest against a new license fee.

The first carload of fresh salmon this season was shipped east from New Westminster on July 31st.

"It's always easy to count the cost," says the Manayunk philosopher, "but it's not easy to pay it."

An estimate of 35,000,000 lbs. is given as the probable amount of the California prune crop this year.

St. John, N.B., merchants have advanced the price of cornmeal 25c. a barrel within the last two weeks.

The baker shouldn't complain of hard times. He usually has a roll about him.—*Philadelphia Record.*

Will wheat go higher? Probably. Will wheat go lower? Possibly. Don't speculate.—*Milling World.*

The cod fishing is reported to be exceedingly good this year on the north shore of the Gulf of St. Lawrence.

A Collingwood man has patented a cold storage apparatus in which the temperature is reduced by snow instead of ice.

The Delhi Canning Company intend starting their branch factory at Niagara next week. W. H. Whiteside will act as manager.

It will take yet about a month before currants and raisins can be shipped, and probably two months before Persian dates are received.

A company composed of eastern men is being organized in New Westminster, B.C., to go into the halibut fishing business in the fall.

"A bad boy seldom gets his badness from his father, says the Manayunk philosopher. "The old man usually hangs on to all he has."

St. John, N.B., merchants have advanced the price of salt. The advance is due to the scarcity of the article, and the fact that no cargoes are expected to arrive before next month.

Mr. Wm. Hudson has received word that the lobsters put up by him on the Richibucto North Beach were awarded first prize at the late San Francisco exhibition.—*Richibucto, N.B., Review*

The world's visible supply of coffee has just been made up, and shows 2,259,920 bags, against 2,146,423 bags last month, an increase of 113,497 bags, and compares with 3,086,450 bags one year ago.

To ship codfish to Newfoundland appears about as unlikely an occurrence as shipping coals to Newcastle, nevertheless a New York firm are now finding a profitable market for their shredded codfish in Newfoundland.

Are you selling goods to build up a business and make money, or to kill a rival down the street? The latter is poor policy and an expensive luxury in which few can afford to indulge. Yet, how many wreckers there are in trade!

Have you a lot of canned meats on hand? Many grocers are taking advantage of the campers' season to send their stocks out into the country. An appropriately dressed window will be of invaluable assistance in this direction.

According to official returns, the exports of canned salmon from the United States in the year ending June 30, 1894, show a decrease of more than 50 per cent. The totals given are 10,726,622 pounds for 1894, and 22,052,043 pounds for 1893.

There is an abundant but not an extra good crop of early peaches around here this season, and they are selling at low prices. As a matter of fact, they are as cheap as green apples, and a basket of ripe tomatoes is worth two bushels of the best early peaches.—*St. Catharines Journal.*

"Fact is," said the grocer, "there is no money in coffee nowadays." "That's a comfort," replied the customer; "but there is almost everything else in it. In the last pound I got there were eight beans, three peas, six shingle nails and a handful of gravel stones."—*Boston Transcript.*

The falling off in exports of dried apples, due chiefly to high cost consequent upon moderate supply last season, is remarkable. In twelve months ending June 30, 1894, only 2,846,515 pounds were sent abroad. In the preceding fiscal year the export amounted to 7,966,819 pounds.—*N. Y. Bulletin and Journal of Commerce.*

To wash windows, dissolve a little washing soda in the water, if the glass is very dim with smoke and dirt. Do not let it run on the sash, but wash each pane with old flannel; dry quickly with a soft, clean towel, wiping the corners with especial care. Polish with chamois skin or newspapers rubbed soft between the hands.

Never recommend anything that you cannot honestly guarantee to be good. There are two ways of selling goods, on their merits and on their price; sometimes one must be adopted and sometimes the other, but the former gives most satisfaction to merchant and customer. An honest grocer or butcher is a jewel, and some people are not slow in showing their appreciation of the fact.

The movement of fresh fruits from the State is growing to a big volume these days. The capacity of the roads will be taxed for a month to come. The fact that the season is a fortnight late is largely offsetting the effects of the strike. To be sure the apricots had to suffer and so the early peaches, but the later peaches and the pears are in their prime now.—*California Grocer.*

James Mills, of the Ontario Agricultural College, says it is better, for the pork trade and for the farmers that hogs should be sold alive, rather than killed and dressed at home. When packers get the pigs alive they can kill, cut and cure them uniformly so as to meet the demands of their trade, and for that reason they can afford to pay proportionally a higher price for living than for dead animals.

Mail advices from Yokohama to July 16 report the tone of the tea market quiet, with a moderate steady business passing. The natives have been willing sellers, and this joined to conservative buying has caused prices to tend in buyers' favor. Comparisons of tea exports for

this and corresponding past seasons from Yokohama and Hiogo down to July 16:

	Current Season.	1893-94.	1892-93.

PRESCRIPTIONS FOR DRUGGISTS.

Cables from China report an advance in cassia buds.

Winnipeg commission houses sometimes receive as much as $4,000 worth of seneca root in one week.

Sponges weighing 110 tons and valued at £50,591, were exported from Tunis last year, mainly to France.

A manufacturer of anti-fat pills who has read in the Bible that "all flesh is grass," calls his medicine "Lawn Mowers."—*Philadelphia Record.*

The principal articles affected by the disturbances in the far east are cassia buds, cantharides, camphor, menthol, anise and cassia oil, and Japan wax.

Contrary to general expectations, the sale of cacao butter in Amsterdam on August 7th passed off at materially higher prices, the lay down cost in New York being equal to 31½ cents.

Iodoform, it is said, can have its disreputable odor successfully masked in the following combination: Iodoform, powdered benzoin, powdered cinchona and magnesium carbonate, equal parts, and a little oil of eucalyptus.

An ointment consisting of twenty-five per cent. of ichthyol and seventy-five per cent. of lanolin, is the very best remedy for erysipelas. Ichthyol is also useful in rheumatism, in the form of an ointment consisting of equal parts of lanolin and ichthyol.—*Modern Medicine.*

The situation in China and Japan is considered sufficiently serious to impart a strong tone to the market for products of those countries, and the upward tendency of values is reflected by an advance of two cents per pound in camphor.—*N. Y. Shipping and Commercial List.*

The New York *Drug Reporter* lists the following drugs as having advanced in price: Opium, menthol, oil anise, American saffron, lovage root, Mex. sarsaparilla, foreign millet seed, camphor, Canada fir balsam. These drugs have declined: Alcohol, cacao butter, ergot, balsam Peru, oil peppermint, canary seed.

The London *Chemist and Druggist* of the 28th ult. says: "Our Constantinople correspondent, writing on July 21, observes: The arrivals of the opium crop here and at Smyrna, as compared with last year's, point to a very heavy yield, but it must be taken into account that this year's crop is three or four weeks ahead of last year's, and besides this the early producing districts will yield above the average. The same, of course, does not apply to other Anatolian districts, where the output will be considerably below an average. We cannot help thinking that as stocks accumulate prices will recede.

United States special officers, says the *Reporter*, are exerting every effort on the Canadian side of the line to locate the source of supply and the channels through which such large quantities of smoking opium are finding their way across the border without the payment of duty. In 1880 the total quantity of crude opium imported into Canada was only 5,000 pounds. In 1885 this had increased to 80,000 pounds, and in 1890 to 130,000 pounds. In 1893 it ran up to 155,000 pounds, the maximum point. The impression in official circles is that the refining, which was formerly done in British Columbia by the Chinamen, is now being done in Montreal, where the refined material is nearer a market than on the Pacific coast.

INDUSTRIAL NEWS ITEMS.

The output of the McNeill mine at Canmore, N.W.T., is now 200 tons daily.

The labor organizations of London will have a celebration on September 3rd.

The Ottawa Granite Company will lay $15,000 worth of pavement in Belleville.

A company has been formed in Hamilton to make a hand propeller for small boats.

The gross earnings of the railroads of the United States for 1892 were nearly $1,250,000,000.

The other day a big Cornishman knocked a three story house down with a single blow from a hammer. He was an auctioneer.

A number of Ohio stave mills have closed in sympathy with the action of the Canadian mill men.

Krug's furniture factory in Berlin is closed down for a few weeks while a new boiler is being put in.

The Canada Screw Works at Hamilton have closed down for a few weeks during the hot weather.

Old Lady—"Poor man; so you've been living on water for three days. Here's a quarter." Rollingstone—"Yes'm. I was working my way on a canal boat."—*Philadelphia Record.*

Willy—"Yes; but I am just trying to show you to-day that you got the worth of your money yesterday."—*Puck.*

Mother—"I gave you 10 cents to be good yesterday, and to-day you are just trying to show how bad you can be."

The annual meeting of the Nova Scotia Steel and Forge Co., Limited, will be held in New Glasgow, N.S., on August 22nd.

Dr. Selwyn, director of the Dominion Geological Survey, has gone to Athabasca Landing, N.W.T., to superintend the location of borings for petroleum.

Berthallet made the discovery of a new bleaching process by accidentally noticing the corks with which he had stopped the bottles containing chlorine gas.

Proprietor of Mountain Resort—"This is truly a lovely clime." Puffins—"That's what I don't like about it." Proprietor—"What?" Puffins—"The lovely climb."

The platinum mines of the Ural Mountains, which constitute the world's chief source of supply, are being worked to their fullest capacity with orders two years ahead.

The Hamilton Bridge Company has received a number of large orders, and its works will be opened again before long. The draughtsmen are now busy on the new work.

Stranger.—"What price do you set on that red cow of yours?" Mr. Hatcede.—"See here, mister, air you an assessor, or has she been run over by the railroad?"—*Indianapolis Journal.*

The Gurney-Tilden works in Hamilton have been shut down for nearly three weeks owing to lack of good coke. A supply has been secured and the foundry is now in operation.

It is reported that the Canadian Pacific Railway proposes to use electricity for moving its trains over the Rocky Mountain division o the line. The method is to be tried first at Kicking Horse Pass, where there is ample water power.

James Watson & Co., Glasgow, say in their weekly report: "We regret to have no change to report in the position of affairs this week. The colliers' strike appears to be as far off settlement as ever, and the iron trade of Scotland, in consequence, continues paralyzed. Warrants have again remained stationary."

Magnetized steel corrodes more readily by about 3 per cent. than unmagnetized iron. This result was determined by immersing bars under both conditions into solutions of cupric chloride for some hours and afterwards weighing the bars. The magnetized bars invariably lost more than the unmagnetized.

Shipments of pig iron from centres in Great Britain since the beginning of the year are as follows: Scotland, to July 21st, 156,903; Middlesbro', to July 27th, 537,334; Cumberland, to July 21st, 214,156 tons. Shipments made during a corresponding period in 1893: Scotland, 178,254; Middlesbro', 503,458; Cumberland, 147,869 tons.

The market for tin plates is inactive, says the London, England, *Iron and Steel Trades Journal*, but prices are maintained at 10s. 3d. to 10s. 6d. for Bessemer cokes, f.o.b. Swansea. Disputes with the men are frequent, and not much is being done towards re-opening idle works. The mills in operation are more than sufficient to meet the present needs of the market.

The carriage makers of Montreal are taking steps to form an association with a capital of $100,000. They say that the Montreal market is overloaded with the product of Ontario manufacturers, and they wish to be in a better position for competition. The following is the organization committee:—Messes. Felix Mercier, president; M. A. Lamarche, vice-president. Directors, Messrs. Ledoux, Berard, Major and Dansereau.

LUMBER AND TIMBER PIECES.

A St. John River lumberman thinks the year's cut is 30,000,000 to 40,000,000 less than in ordinary years.

Nine rafts have gone down to Quebec from the Upper Ottawa this summer. This includes two that were left over from last year.

The lumber shipped to the United States from the Ottawa district during the quarter ending June 30 amounted in value to $460,584.57.

The Department of Crown Lands will hold an examination of candidates for licenses as cullers of sawlogs at Callendar, Ont., on August 14th.

A logging railway at Grief Point, B.C., is in course of construction for the Moodyville Mill Co., and will, it is expected, be completed by the middle of the month.

The drive along the Ottawa has been very successful this year. The heavy rains last month raised several of the creeks, freeing logs which might otherwise have been unable to reach the Ottawa.

The value of the lumber exports from St. John, N.B., during June was $367,837, the chief items being: Long lumber and lath, $325,286; shingles, $22,650; birch timber, $7,100; pine timber, $1,725; piling, $3,789; tan bark, $2,758.

The recent floods in British Columbia interfered greatly with the shipment of lumber, and it was not until the second week of July that any cars loaded with lumber were sent east from the Pacific coast. However, when the road was opened up business came with a rush, and the C.P.R. had orders for 75 cars for immediate loading.

At a meeting of the Cooperage Association, in Chatham, it was resolved that manufacturers having old logs on hand be at liberty to run and cut up all old stock. It will be remembered that the association some weeks ago decided that, in view of the present depression in trade, the factories in the association should close down for a short time.

The Liverpool *Timber News* of July 31st says: The greater quantity of spruce deals from the New Brunswick and Nova Scotian ports have so far gone straight into consumption, very few having been yarded. A few cargoes have gone up the Manchester Ship Canal to Runcorn, Saltport, and Manchester, several being dealt with by Manchester merchants.

The *British Timber Trades Journal*, referring to the Canadian market, says: "Most of the deals being carried this year by steamers, has naturally brought them forward at a much earlier date than is nsually the case when sailers formed the fleet, and we think now that the importation has subsided, the marked difference noticeable in the figures of this and last year will soon disappear."

As a general proposition the hardwood trade appears to be in better shape than that in white or yellow pine, though there is abundant room for improvement. Of the staple house finish woods, stocks are not excessive, and the fall trade is beginning to make itself felt. The furniture woods, however, continue slow sale, with little prospect of immediate improvement.—*Northwest Lumberman.*

A Fredericton correspondent writes to the St. John *Globe* that Mr. Donald Fraser's new mill will be started in a few days, and will be operated for the remainder of the season night and day, two separate crews being employed. It is expected nearly one hundred men will find employment in this mill. Mr. Fraser has three million feet of lumber, which he is determined to saw before the closing of navigation.

Messrs. Hale & Murchie's mill, at Fredericton, which was announced as closed down for the season, is running again, sawing for Messrs. Alexander Gibson & Sons, Marysville. The Gibson mill has been shut down for a week or two in consequence of the low water in the Nashwaak, and Mr. Gibson has been unable to provide enough lumber to load the vessels he has chartered at St. John. It is said he will keep Hale & Murchie's mill running steadily for the remainder of the season.

The Peterborough *Review* says: "The Gilmour Company's drive of 60,000 logs is being taken through Sturgeon Lake this week. The drive is one of the largest that has ever passed down the lake, and the apparent ease with which it is handled by the alligator boat which accompanies it, is marvellous. The drive is kept moving day and night; at night the operations are conducted by the aid of an electric light on the alligator boat. The men eat and sleep on shore in well-appointed tents."

At the last auction, Canadian pine, which was offered in rather large quantities of the more expensive grades, met with a fair demand, and realized prices which, upon the whole, may be considered satisfactory. White Sea goods also met a good market, especially for the wide dimensions. Nine-inch deals, as was anticipated, showed considerable weakness owing to the large quantities assumed to be yet unsold. Since our last report the wood trade generally shows no special feature to call for comment.—*London, Eng., Timber Trades Journal.*

Mr. Wm. Mackey, of Ottawa, is, according to the *Journal*, the only lumberman in Canada who has been continuously in the square timber business for half a century. In a recent issue of the *Journal* a report is given of an interesting conversation with Mr. Mackey: "I made my first raft of red pine during the winter of 1844-5 on the Madawaska river, there being no demand for white pine in those days," said Mr. Mackey. "I have held the license and paid the ground rent on the limit on which I made my first raft for nearly fifty years. Yes, prices for timber and supplies have varied much. When I commenced first I paid as high as 25 per cent. interest on moneys advanced to purchase supplies, etc. The average wages for men were from $10 to $14 per month. Hewers got $20 per month, and these were the highest priced men. There was far more square timber taken out then than now, for this was long before the era of sawlogs. I have known of 100 rafts passing here in one season. This year 10 rafts will be the limit."

INSURANCE MATTERS.

Requests for increased fire service have been laid before the fire, water and light committee of the Winnipeg city council.

Smith, Davis & Co., Buffalo insurance men, are reported as estimating, roughly, that there is over $20,000,000 worth of vessel property on the lakes this year on which there has not been placed a dollar of insurance.—*Marine Review.*

At a monthly meeting of the board of directors of the Brant County Mutual Fire Insurance Company, James Geddie was elected president to fill the remainder of the term of the late L. B. D. Lapierre. Dr Patten was elected as a member of the board of directors.

The National Assurance Company of Ireland, which was established in Dublin, in the year 1822, has made a good choice in connection with the management of their Toronto business in appointing Mr. J. H. Ewart, of Toronto, as general agent for Ontario.

Among the measures sanctioned by the last Parliament of Canada were bills incorporating the companies whose names follow:—The Canadian Railway Fire Insurance Company; the Canadian Railway Accident Insurance Company; the Northern Life Assurance Company of Canada, and the Colonial Mutual Life Association. Amendments to their chartered powers are sought by the St. Lawrence Insurance Company and the Ontario Mutual Life Assurance Company.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, August 9th, compared with those of the previous week:

Clearings.	Aug. 9.	Aug. 2.
Montreal	$10,110,153	$9,594,647
Toronto	4,864,292	4,804,455
Halifax	1,240,723	1,100,315
Winnipeg	985,321	760,623
Hamilton	593,921	605,662
Total	$17,794,410	$16,865,702

Aggregate balances this week, $3,832,396; last week, $2,881,407.

—A handsome cover, a greatly enlarged paper, and a circulation that will place a copy in the hands of every business man in Canada, are some of the features of the "Special Edition" of this journal to be issued on the 31st. With the new type which has recently been placed in this office, it is the intention to get out the best trade special edition yet seen in Canada. But it is not our intention to allow a splendid cover and a tasty arrangement of type on the inside constitute its chief feature. The greatest possible attention will be paid to have the reading matter of the most excellent and varied character. Our advertisers will do well to see that any changes they may wish made in their advertisements in this issue are sent to us not later than Monday, 27th August.

—This city is fortunate in having each year, in September, a Fair conducted to her credit. Thousands of people flock to Toronto from all over Canada both for the purpose of seeing the exhibition and visiting Toronto merchants. From present indications the Toronto Industrial Exhibition will be up to its usual standard of excellence this year, and, with favorable weather, there is no doubt the attendance will exceed that of former years. Although times are hard, it should not keep the country merchants from taking advantage of the cheap rates and visiting Toronto in September.

—The recent death of Mr. Murray Smith, manager of the Montreal branch of the Bank of Toronto, has caused a number of changes in that institution. His place has been filled by the appointment of Mr. Thomas F. How, manager of the London branch. Mr. John Pringle, of the Brockville branch, succeeds Mr. How at London, while Mr. T. A. Bird, of the King street west branch, Toronto, goes to Brockville.

—La Banque du Peuple has declared a dividend of three and a half per cent. for the last six months, payable on and after 3rd September next. This is the 116th dividend declared by this banking institution.

—A half-yearly dividend of 3½ per cent has been declared by the Union Bank.

EXAMINATION QUESTIONS.

The following questions submitted by Mr. William Houston, Lecturer on Political Economy at the British American Business College in this city, will give our readers some idea of the class of work students are required to perform in that institution :

1. Define the term "Value" in connection with exchange, and specify the conditions on which "Value" depends. Define clearly the various terms you use in your answer.

2. Show the relation between "Value" and "Price." Show whether it is possible to have a general rise or fall in prices, and what such a change would really mean.

3. Give a brief account of the operation of the law of Supply and Demand in determining prices, and define accurately the terms "Supply" and "Demand."

4. Define "Money" by describing clearly the various functions it performs in exchange

5. Walker says, in his treatise on Political Economy, that anything which performs the money function is money. Assuming the correctness of this dictum, what various means of effecting exchanges in Canada would you include under the term "Money," and why?

6. Define the term "Currency." If you regard it as differing in scope from the term "Money," describe clearly the difference between them

7. Public confidence is essential to a currency of any kind. Show how it is possible to maintain confidence in (1) coin that contains a cheap alloy, (2) Government notes, and (3) bank notes.

8. Define the terms "Seignorage" and "Intrinsic value" in relation to coinage, and in the same connection state and account for what is call "Gresham's law" of circulation of currency.

9. Irredeemable government notes may be kept at par by proper precautions, as experience has shown. What precautions are necessary to prevent depreciation? If such notes can be kept at par, state the arguments in favor of and against such a currency as compared with one made up of government or bank notes, or both, redeemable in gold.

10. Explain how a high degree of "Elasticity" of issue along with a high degree of security to note-holders has been effected under the Canadian bank note system.

11. In relation to "Commercial Paper," define the terms "Maker," "Endorser," "Notary Public," "Bearer," "Order," and "Payer."

12. A cheque, a draft, and a bill of exchange are all orders to pay. Explain clearly the differences between them in form and in actual use.

13. Describe clearly the difference between an ordinary promissory note and a bank note, with a view to explaining why the one is completely "Current," while the other is only partially so, if current at all.

14. Define briefly what is called a "Clearing House" in relation to the banks of a city.

15. Describe the method by which foreign or international exchanges are effected, showing (1) the agency of the banks in the process, and (2) the conditions which make it possible for the banks to deal in "Exchange."

16. Enumerate and briefly define the various functions of a "Bank," showing which of them are performed by other parties and which are confined to chartered banks.

17. Show how the issue of currency by a bank is connected with its general business, and the conditions which determine the amount of its note liability.

18. What is the total amount of "Currency" that the Canadian banks are collectively authorized by law to issue? How much was in circulation at the close of the last financial year—June 30, 1894?

19. What amount of currency is the Government of Canada authorized by law to issue? How much has it put in circulation?

20. State as clearly as you can the points of difference between the banks of Canada and the National banks of the United States in relation to the issue of "Currency," with the respective advantages and disadvantages of the two systems.

—Miss Skrumchus.—"I was so disgusted to see people take up their ear of corn in their fingers. I always use a knife to detach the corn from the ear." Mrs. Homespun.—"Well, I suppose a knife answers right well where one has no teeth."—*Boston Transcript.*

THE APRICOT CROP.

The San Francisco Fruit Exchange is organizing the trade in dried apricots. This is one of the most important of the Pacific coast fruit industries, representing a product worth several million dollars, according to the condition of the markets. It is a product of which California has a practical monopoly. The dried and preserved apricots of Damascus are well known to oriental travellers, and apricots are grown as wall fruit in Western Europe, but the dried apricot of commerce is not produced to any extent outside of this State. The crop here is very variable. Some years ago it was reported, on evidence which was not wholly reliable, that a crop of 12,000 tons had been gathered. In 1891 there is good reason for believing that the crop amounted to 6,000 tons; this year a crop of 8,000 to 10,000 tons is generally expected

Like the fig and the prune, the apricot is usually marketed in a desiccated or sugared state. A few carloads of green fruit reach the East and generally realize a handsome profit to shippers, but the bulk of the crop goes to the dryer and the canner. Dried or canned, there seems to be no limit to the possible consumption of the apricot in the East and in Europe. When the trade is thoroughly organized, so that the actual consumer gets the dried fruit or the preserves at a minimum cost, they will probably figure on every well-provided breakfast table, and 10,000 tons will not begin to supply the demand; for, of all the saccharine fruits, the apricot is the only one which improves by preserving.

People talk of the losses of fruit-growers and of the difficulty of making money by fruit-raising. These untoward happenings result to more or less extent from the want of knowledge and skill and experience in those who lose money. They would occur in any trade. There is money in making boots and shoes; but if a man should embark in the shoemaking business with no more apprenticeship than the apricot-growers and apricot-preservers think it necessary to acquire, his stock would soon be in the hands of the sheriff.—*N. Y. Shipping and Commercial List.*

STATISTICS OF VESSELS BUILT IN THE UNITED STATES.

Although statistics relative to ship building in this country, prepared by the commissioner of navigation at the close of the treasury department's fiscal year, which ends with June 30th, do not usually appear until the commissioner's report is issued in November or later, Mr. Chamberlain has this year given out some advance information on the subject

Records of the bureau of navigation, treasury department, show that during the fiscal year ended June 30th, 1894, there were built in the United States, and officially numbered, 538 wooden sailing vessels of 37,719 gross tons, and 308 wooden steam vessels of 44,158 gross tons. During the same period three iron or steel sailing vessels were built of 4,750 tons, and forty-five iron or steel steam vessels of 46,776 tons Sailing vessels, wood and iron, aggregated 541 in number and 42,460 tons in measurement Steam vessels, wood and iron, aggregated 353 in number, and measured 91,934 tons. The entire number of vessels built and numbered was 894, the tonnage being 134,394. Unrigged vessels are not included in this statement.—*Marine Review.*

CHEESE.

The cheese market is steady, and so far as present indications go, it does not look as though there was to be any radical decline in the near future. The buying of Julys in the country at full figures continues, and the present week will very likely see the balance of the make of the month cleared out of first hands. The operators, therefore, who worked the June deal, and closed it up with a whirl, have made good their intention of preventing competitors from getting July goods for less than their June cheese cost them. What the ultimate outcome will be is, of course, problematical. One thing is certain, the quantity of cheese in cold storage on this continent must be unusually large. In view of this it will be interesting to see how the August make will go. Opinions conflict as to whether buyers will be able to purchese it at a lower cost comparatively than the June and July make. It is worthy of note in this connection that the ruling cost in the country at present is fractionally lower than for the same date last year, and also that general opinion concedes that the last half of the July make is better value at the money than the June goods. This is quite probable, for there was some exceptionally hot weather in June, whereas the last fortnight of July was comparatively cool. This latter fact, no doubt, has had an influence on the values which have ruled in the country during the present and preceding week. If the present weather continues, the expectation is for a fine August output also. But whether the optimists or the pessimists are right with regard to the future it is difficult to say. Of course, if the regular demand picks up, which it does not show much signs of doing just now, the former will have their hands strengthened in any manipulations they undertake. In any event they may be expected to exert their influence in preventing any radical decline, and if it comes to a struggle, whether they can do so or not, depends upon whether their present obligations are too onerous or not. Of course, nobody but themselves can speak with any authority on this point. In the meantime the actual new business passing on spot at the moment is inconsiderable and prices are difficult to quote. It can be assumed with safety, however, that any buyer with an order to fill would have to pay in the vicinity of our quotations —*Montreal Gazette, Aug 9th*

EXPANSION OF RAILS IN INDIA.

It is stated that on a portion of the Rajputana Railway—from Gurhi-Hurseroo Junction to Furucknuggur salt works—several miles of the permanent way were laid with Belgian rails which were all right in the morning, but exhibited a serious change during the heat of the day, the rails deflecting in and out fully 3 inches in a length of 20 feet: yet the expansion plates used had been increased from ¼ to ½ and ¾ of an inch, but to no purpose. Perhaps the numerous derailments recently reported may be attributed to the same cause.—*Railway Review.*

MISTAKES ABOUT TEA

The reasons why one kind of tea is green and another black have been often and variously explained. One of the causes for the green color that the champions of black tea seem to firmly believe and enjoy is that the color is the result of drying the tea on copper pans. Mr. Joseph Walsh, who knows all about tea, says there is not the least foundation for this, nor for many of the other opinions, but the real reason for the different color and flavor is that in the green tea of commerce the leaves are cured and dried as quickly as possible after they are picked and rolled, while the leaves that are intended for black tea are exposed to the action of the sun and air for at least twenty-four hours before being fired, being meantime raked and tossed about until they become soft, flaccid and pliant, and again after being fired they are exposed to the oxidizing influence of the atmosphere in a moist state for hours previous to being fired a second time. The leaves are then fired over a slow fire. The method of curing also accounts for the effect that green tea has on some persons, caused, it is believed, by the greater quantity of volatile oil that the rapid process of curing leaves in the leaves.—*Boston Journal of Commerce.*

—To clean a mackintosh, plain warm water is very inefficient for removing the mud stains. Dip the garment in cold, soft water; then, with a scrubbing brush and yellow soap, proceed to scrub it all over, having spread it flat on the table. When the dirt is removed dip the cloak in repeated waters to get rid of the suds, but do not wring it. Hang up in the air or any airy room to dry, but do not put it near the fire. Paint or grease spots must be removed by spirits of turpentine, but common soap will perform the rest. The dirtiest parts will require most scrubbing. In cleaning a mackintosh always avoid hot water.—*Boston Journal of Commerce.*

—Machinery is being set up at Newark, N. J., for manufacturing ammonia from atmospheric nitrogen.

—The downfall of water over Niagara is 10,000,000 cubic feet every minute.

RAISE THE MARKET VALUE OF OUR MACKEREL.

T. S. Whitman, writing to the Halifax *Chronicle* about mackerel, says: "One great drawback to the sale of Nova Scotia mackerel in the United States is the careless manner in which the fish are struck or salted when taken from the sea. Often left exposed to the sun hours before they are split and dressed, they become soft, and result in inferior ragged fish. But the great fault is in not properly washing the blood from the fish, or salting them in bloody pickle. This gives the fish a dark color, which once set in with pickle can never be removed, and I have known this fault to reduce the value of the fish in the New York market $2 to $3 per barrel. I have seen No. 2 Gloucester inspected mackerel selling alongside of our Nova Scotia No. 1 inspected mackerel for more money.

"A very large percentage of the fat mackerel sold in New York are taken from first hands by the smokers and smoked as they do salmon, but this trade will not take these red or dark colored N. S. mackerel as long as they can get good light colored fish such as are cured by the U. S. fishermen. The packages, too, of Nova Scotia, as compared with those of United States, Norway, or even Irish mackerel, are very much at fault, and cause at times heavy losses to the dealer owing to their not holding the pickle."

—A cat's head has a regular partition wall projecting from its sides inward a considerable distance, an excellent provision against concussion of the brain.

In scheduling this great big world
No thing received a slight;
For every dog there is a day,
For every cat a night.
—*Buffalo Courier.*

—In Mongolia, close to the borders of Russian Siberia, is Maiwatchin, and it is the only city in the world peopled by men only. The Chinese women are not only forbidden to enter this territory, but even to pass the great wall of Kalkan and enter into Mongolia. All the Chinese of this border city are exclusively traders.

City of Winnipeg Debentures

SEALED TENDERS marked "Tenders for Debentures," addressed to the undersigned, will be received at the office of the City Comptroller, Winnipeg, up to 12 o'clock noon on Friday, the 24th August next, for the purchase of $96,500 of Debentures, as follows: $18,000 6%'s maturing 8th January, 1899; $7,000 5%'s maturing 16th June, 1900; $6,700 5%'s maturing 24th Aug., 1901; $8,300 5%'s maturing 20th Aug., 1906; $14,500 5%'s maturing 6th April, 1911; $14,000 5%'s maturing 30th April, 1899; $30,000 5%'s maturing 29th Dec., 1910.

Interest payable in Winnipeg half yearly.

Tenders may be for the whole or part. No tender necessarily accepted. Further information can be obtained from the City Comptroller.

R. W. JAMESON,
Chairman Sinking Fund Trustees.

Winnipeg, Manitoba, 11th July, 1894.

Young Lady (in music store)—"Have you 'A Heart that Beats with Love?'" Clerk (blushingly)—"No miss. I would consider it highly imprudent at a salary of 21 marks a week."—*Wespen, Berlin.*

—It is said that, during a fire in the British navy-yard buildings on Ireland Island, in the Bermudas, an admiral directed the operations of the fire department by telegraph from Halifax, N S.

—France has a population of 38,000,000, consumes daily 20,847,920 kilograms, or 45,969,000 pounds, of bread. The chief article of food throughout the country is bread. In the cities and towns fine wheat bread is used, and only the poorest townspeople and rustics eat rye bread.

—It is announced by the Commercial Cable Company that the Eastern Chinese Telegraph Company gives notice that private messages in plain English can again be accepted for stations north of Shanghai. Messages for Japan are accepted at sender's risk only.

—The Dear Pastor—"I hope you never go fishing on Sunday, my dear child?" Young Hopeful—"Oh no, sir." The Dear Pastor—"That's right, my child. And now tell me why you do not?" Young Hopeful—"Because papa says he doesn't want to be bothered with me."

TENDERS FOR DEBENTURES.

SEALED TENDERS marked "Tenders for Debentures," and addressed to the undersigned will be received up to 12 o'clock noon on **Saturday, the 11th August, 1894**, for the purchase of debentures of the Corporation of the town of Galt for public school purposes, amounting to **$11,000** (eleven thousand) in sums of $1,000, payable within thirty years and bearing interest at the rate of 4 per centum per annum payable half yearly, on the 31st day of December and 30th June, at the Merchants Bank of Canada, Galt.

No tender necessarily accepted.

THOMAS McGIVERIN,
Chairman of Finance.

WORLD'S COPPER OUTPUT.

The production of copper throughout the world in 1893 has been given at "17,250 tons for Germany, 160 tons for the Argentine Republic, 1,425 for Austria-Hungary, 7,500 for Australia, 2,500 for Bolivia, 4,000 for Canada, 6,090 for Cape Colony, 54,270 for Spain and Portugal, 147,210 for the United States, 21,350 for Chili, 400 for England, 2,040 for Newfoundland, 2,500 for Italy, 18,000 for Japan, 8,480 for Mexico, 460 for Peru, 5,000 for Russia, 750 for Sweden, and 2,850 for Venezuela. This makes a total of 303,975 tons, against 310,845 in 1892, 279,491 in 1891, and 269,630 in 1890. The average price per ton was 1,093 francs in 1893, 1,150 in 1892, 1,277 in 1891, and 1,135 in 1890.

MILLIONS CARRIED ON NEW YORK FERRIES.

The *Marine Review* says: "It is estimated that the yearly passenger trips on ferryboats between New Jersey and New York number 70,000,000; that the total for all New York ferries will exceed 170,000,000; that the number of boat trips equals 1,800,000, and the number of teams carried 5,000,000. All this immense traffic is carried on with remarkable safety. The lamentable accident to a State Island ferryboat some twenty years ago, and a single collision, afford the only cases of death from accident on record among North River ferry passengers."

Commercial.

MONTREAL MARKETS.

MONTREAL, Aug. 8, 1894.

ASHES.—Receipts this month have been very light; only a few barrels came to hand and very little business is being done here, but this is the slow season. Values remain firm at $4 for first quality pots, and seconds still held at $3.20. The latest sales in pearls have been at $6. Fifty barrels of pots have just been shipped to London; other late shipments have been very small.

CEMENTS AND FIREBRICKS.—Cements show little life. Receipts are small but demand is not larger, and prices are cut very fine. We still quote English at $1.85 to 2.00, as to lot and brand. Belgian, $1.75 to 1.90. Firebricks, $14 to $20 per 1,000.

DAIRY PRODUCE. — The cheese market is showing more firmness, and a fairly good trade passing during the week. Orders have come in freely for finely colored goods, and on all perfect lots receivers have been able to obtain full prices, and occasionally an ⅛ more than our outside quotations. In white cheese the market has not given signs of any change, and values remain as last reported. Country markets are keeping firm, and all offerings of colored goods have been quickly picked up. All round there is a more promising feature to the future of the market, which encourages buyers to take hold more freely. Butter in sympathy with the States markets. There is a much better feeling to note in this market during the past week, and values show more steadiness; quite a few orders have come forward, principally for dairy goods, and several large sales have been made of finest Western for September shipment at 16 and 16½c. There has also been more enquiry from Lower Province buyers, who picked up several parcels at from 15½ to 16c., and the latter price being paid for strictly finest. There are several orders in the market for finest Township dairy, but owing to scarcity of best qualities buyers have been unable to fill their orders. We quote finest Township dairy scarce and firm at 17 to 17½c. In medium and low grades there is nothing doing of moment, the market ruling extremely dull for these qualities. Egg receipts continue large, principally from Prince Edward Island district, the quality of which is running very stale and poor, and receivers are having great complaints from customers, and heavy shrinkages are in order. Sales this week have ranged at 9½ to 10½ loss off. For strictly fresh from the new crop the market is showing more firmness, and firmer prices have been made. Sales to-day from 11 to 12c.

DRUGS.—Trade continues quiet; orders coming in are small, but fully up to last year at this time. Camphor and opium much firmer, and quinine a little higher, and likely to go up further before long. Other lines remain as they were before reported. Very little, if any, improvement to note in payments.

DRY GOODS.—Trade in this line is somewhat better, and travellers in all directions report more buoyancy and a disposition on the part of the country dealers to order more freely in the near future. Local trade somewhat interfered with, so many people being out of town, but the suburban trade is very fair this month. Manufacturers, with one or two exceptions, are well employed. Money is coming in a little more freely, but payments on the whole are still far from satisfactory.

MONTREAL STOCKS OF GRAIN IN STORE.

	July 30, '94.	Aug. 6, '94.
Wheat, bushels	547,104	587,607
Corn, "	.....	.....

Peas "	112,102	86,301
Barley "	6,089	5,181
Buckwheat "	498	.....
Total grain	929,450	823,616
Oatmeal	207	182
Flour	.....	38,994

GROCERIES.—Some improvement is noticed this week, and a still further increase in sales is expected before very long. Granulated sugar still quoted at 4⅛ to 4 3-16c.; yellows, from 3½c. up; molasses same as last week; syrups also remain as before reported. Teas are pretty active, Japans ranging from 15 to 17c., and firm at this. London reports a slight advance in blacks. Coffees about as last week; Rio 18 to 21c., Java 25 to 30c., Mocha 26 to 30c., Jamaica 19 to 22c. per lb. Salmon $1.25 to 1.30 for choice; lobsters $6 to 6.50 per case. California loose Muscatel raisins selling at 6½c. per lb.

HIDES AND TALLOW.—Trade still continues quiet, but there is a demand for all that is coming in, and some orders have been cancelled. Lambskins have advanced, and prices in other lines are firmer. No. 1 green hides are still bought at 3½c. per lb. by dealers, and 4c. tanner's price. In the United States prices are firmly maintained at 3¾ to 4½c. For heavy steers dealers are still paying 3½c., and sales of cured to tanners still reported at 5½c. Calfskins bring 5c. Lambskins 30 to 35c. Tallow still dull at 5½c. per lb.

LEATHER AND SHOES.—The leather trade has been very quiet indeed; the wants of the shoemen are small, and they will only buy in small quantities for immediate use. Some of them report orders as fair, but the buyers are in no hurry for their goods and trade will be later. Hides are much firmer at an advance of ½ to 1c., and some pretty large lots have been picked up east and west of Toronto by American buyers who have not been purchasers of Canadian hides for some time, and this is considered a sign of improvment. Tanners in Canada have been making very much less leather for some months past in black leathers, and any movement in trade would cause an advance in prices, as stocks are not large. Some large shipments of black leather have been made from Boston to England, and prices are a little firmer in consequence. Our quotations are unchanged and quoted: Spanish sole B. A. No. 1, 18 to 20c.; do. No. 2 to B. A., 16 to 17c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 15½ to 16½c.; No. 1 slaughter, 18 to 20c.; No. 2 do., 17 to 18c.; American oak sole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do., heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 15c.; do., small, 10 to 12½c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 25c.; buffed cow, 9 to 11c.; extra heavy buff, 12½c.; pebbled cow, 8 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 11c.; rough, 16 to 18c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—The market has shown no notable increase in activity nor variations in values of any consequence. No change in Scotch pig iron is reported either in Glasgow or here. Scotch warrants remain steady at 42 shillings, and makers' prices are unchanged since last week. The same may be said of do-

mestic pig iron. There is very little Scotch iron here of any kind, and for Summerlee $20 has been asked *ex*-yard, and $19.50 to arrive. A few sales of domestic iron in small lots are reported at $16.50. Bars and plates of all kinds are unchanged. We quote:—Coltness pig iron, none here; Calder, No. 1, $19.50; Calder No. 3, $18.50; Summerlee, $19.50 to 20.00; Eglinton, $18.50; Gartsherrie, none here; Langloan, none here; Carnbroe, $18; Shotts, none here; Middlesboro, No. 3, $17; Siemens, pig, No. 1, $16.25 to 16.50; Ferrona, No. 1, $16.50; machinery scrap, $14.50 to 15.00; common do., $10.00 to 12.00; bar iron, Canadian, $1.70 to 1.75; British, $2.25; best refined, $2.40; Low Moor, $5.25; Canada plates—Blaina, or Garth, $2.15 to 2.20; all polished Canadas, $2.75; Terne roofing plate, 20 x 28, $6.00 to 6.25. Black sheet iron, No. 28, $2.40; No. 26, $2.25; No. 24, $2.10; tin plates—Bradley charcoal, $5.25 to 5.50; charcoal I.C., $3.50; P.D. Crown, $4.00; do. I.X., $4.75 to 5.00; Coke I.C., $2.85 to 3.00; coke wasters, $2.75; galvanized sheets, No. 28, ordinary brands, 4¼ to 4½c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5⅝ to 6c.; tinned sheets, coke, No. 24, 6 to 6¼c.; No. 26, 6½ to 6¾c.; the usual extra for large sizes. Hoops and bands, per 100 lbs., $2.30 to 2.35. Steel boiler plate, ¼ inch and upwards, $2.10 to 2.15; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.85, heads, $2.85; Russian sheet iron, 10 to 10½c.; lead, per 100 lbs., pig, $2.60 to 2.75; sheet, $4 to 4.25; shot, $6.00 to 6.50; best cast steel, 10½ to 12c.; spring, $2.50; tire, $2.50 to 2.75; sleigh shoe, $2.40; round machinery steel, $3; ingot tin, 17 to 18c.; bar tin, 25c.; ingot copper, 9½ to 10c.; sheet zinc, $.00 to 5.25; spelter, $4.50 to 4.75; American do., $4.50 to 4.75. Antimony, 10 to 12c.; bright iron wires, Nos 0 to 8, $2.65 per 100 lbs.; annealed do., $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3½c. Coil chain, ¼ inch, 5c.; ⅜ in., 4½c.; 7-16 in., 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., ½c.; ¾ in., 3½c.; ⅞ in., and upwards.

Oils, Paints and Glass.—There is no improvement to note in these different lines, not many goods moving, and trade on the whole called quiet; prices unchanged and quoted: Turpentine, 46c. per gal. for single barrels; two to four barrels, 45c. Linseed oil, raw, 54c per gallon; boiled, 57c.; 5 barrel-lots, 1c. less; olive oil, machinery, 90c.; castor, in cases, 6¼ to 6½ to 6⅝c.; tins, 7c.; Nfld. cod, 38 to 40c. per gallon; Gaspe oil, 38c. per gallon; steam refined seal, 42½ to 43c. in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00; No. 1, $4.50; No. 2, $4.25; No. 3, $4.00; dry white lead, 5c.; genuine red do., 4½c.; No. 1 red lead, 4c., putty, 2c. in bladders per brl. London washed whiting, 45 to 50c. Paris white, 90c. Venetian red, $1.50 to 1.75 yellow ochre, $1.50 to 1.75, spruce ochre, $2.25 to 2.50 Window glass, $1.20 per 50 feet for first break; $1.30 for second break, third break, $2.80

Wool.—London sales are still reported firm, and local business is still fully up to what it was a week ago Cape still sold at from 14 to 15½c per lb., a cargo is now on the way and will reach here in about three or four weeks. Some greasy Australian is yet to be had at 14½c.; B.A. scoured, 26 to 32c. New Northwest not in yet, and old stock well cleaned out. Fleece still being bought in this market at 16c

TORONTO MARKETS.

Toronto, Aug 9th, 1894

Drugs.—Although no marked improvement in trade conditions can be reported, we are inclined to the opinion that a firmer feeling exists. The one drawback to a better situation is the fact that there is a great deal of cutting of prices going on. This has existed for some time back, and appears to be becoming worse. Should this suicidal practice cease, in time there is every prospect of a good, or at least improved, trade this fall. Cream tartar is firmer. Quinine is strong in its statistical position, and several American operators have for the time withdrawn stocks from the market, believing that prices in manufacturing centres will advance soon. The situation in opium is generally regarded as a strong one. Camphor holds firm. Carbolic acid is a shade easy. Glycerine has lost strength. Arabic gum is cabled firm abroad.

Dry Goods.—The principal interest of the trade has centered this week in the paper which fell due on the 4th and 5th of August. That payments have been most satisfactorily met we cannot unfortunately report, but they are quite up to the expectations of those who have taken into consideration the character of the times. The greater part of the failures to meet paper are the outcome of sales made previous to the present year. It is the general opinion that many of the weak accounts are now weeded out, and trade during the coming year should be upon a firm basis.

week in Toronto, has been the principal subject of conversation among millers since our last report. The market is very easy, and it is difficult to see how it could be otherwise with wheat quotations on their present basis. Oatmeals remain steady and unchanged. Mill feed is in fairly good request, with prices unaltered.

GRAIN.—When compared with last week, quotations of wheat are fully 2c. a bush. lower, and now stand as follows: Winter No. 1, 57 to 58c.; No. 2, 55 to 56c.; No. 3, 53 to 55c.; spring wheat, No. 1, 58 to 59c.; No. 2, 56 to 57c.: Man. hard, No. 1, 69 to 70c.; No. 2, 67 to 68c.; No. 3, 62 to 63c. Some offerings of the new crop have been bought at 53 to 54c. at outside points, principally in the western peninsula. Crops in Manitoba, from all reports, will turn out well; prospects in the Territories are not equally as bright. Oats are dull and declining; the new crop is coming forward, and sales of new oats have been made as low as 31c. Peas are scarce, and wanted; they are of more value in the market than wheat, since quoted at 60 to 62c. Nothing new has transpired in barley, and trade must remain quiet until the new crop begins to move.

The stocks of grain in store at Port Arthur on July 28th were 1,200,144 bushels. During the week there were received 138,165 bushels, and shipped 160,885 bushels, leaving in store on Aug. 4th, 1,177,424.

GROCERIES.—The week has brought with it a fair amount of business, and trade is considered in fairly satisfactory shape. The Grecian currant crop now being harvested is estimated at from 140,000 to 150,000 tons, against a crop of 175,000 tons in 1893, but the large surplus carried over in the German and American markets fully offset the shortage in the new crop. The crop of Brazil nuts has proved to be very large. The growing crop of Tarragona almonds is reported decidedly short of last season's outturn, but the surplus carried over from 1893 will give all consuming markets a full supply. Paper shell almonds are offering at the lowest prices ever seen, and the prices for new crop rule equally low. The new crop of Jordan almonds is estimated at about 25 per cent. short of last season; however, the surplus carried forward will fully compensate for any shortage. Naples walnuts are very scarce. Latest advices from Marseilles say that this year's crop of Grenobles will be very short, and on this account the trifling stock of 1893 crop now remaining in that market is held at extreme figures. There is a fair general demand for new Japan teas, and it is not thought likely that prices will be advanced in consequence of the Korean war. Sugars remain unchanged in price; the consumptive demand, in consideration of the fact that the fruit season is now on, is rather disappointing. Canned peas have been advanced 5c. by the association. Corn and tomatoes are in fair request. Elsewhere we give details concerning the salmon pack.

HIDES AND SKINS.—There is practically little that is new to relate of this market. Some car lots of No. 1 have exchanged hands at 3½c., but operations are of a limited character. Calfskins are dead, and values move neither up nor down. Lambskins and shearlings both remain at 30c.; the usual season's movement is taking place. Tallow is in moderate supply, with stocks about equal to the demand.

LEATHER.—A larger volume of trade is doing this week. The country jobbing trade has gained considerable strength during the last few weeks and some large houses are even pressed for stock to meet the peculiar requirements of the trade. But factory sorts are quiet. There is more doing east and some fair sized parcels have been sent to Montreal during the week. Ontario factories confine themselves pretty much to making high-class goods, and it is a significant fact that they are making very limited demands upon the stocks of merchants. Taking the trade all around things are just a little more hopeful, although the season was late in commencing.

PROVISIONS.—Trade remains quiet. Receipts of butter have been liberal again this week; best grades of dairy are selling at 16 to 17c., while creamery rolls are quoted at 22c. and tubs at 20c. per lb.; the demand for creamery stock is very slow. The jobbing trade in cheese is quiet and without special feature. Eggs are in a demoralized condition; the consumptive demand is very weak, even for this time of the year; best stock is worth but 9c., while inferior qualities are not taken at any price. The tone fo the hog product market is one of firmness; long clear is selling at 7¾ to 8c.; hams at 11½ to

These prices are wholesale by the car-load.

12c.; rolls at 8¾ to 9c. The general export trade, with the exception of cheese and hog products, exhibits but little activity.

WOOL.—As the season advances receipts of fleece, of course, are becoming less. Prices remain unchanged, although some merchants report the feeling to be easier. One prominent house reports that they have all the stock on hand that they wish to carry, and rumor on the street says that they have bought in the neighborhood of 1,000,000 lbs. on hand. A Winnipeg trade report says: "Locally, wool is steady; 8c. is about the idea for ordinary unwashed fleece, and 6 to 7c. for chaffy and burry wool. Pure down would bring a little better, but there is very little of this class. A local dealer reports the purchase of a lot of ranche wool at 6¾c. in the west, which is considerably under prices paid earlier in the season for this class of wool."

BRITISH MARKETS.

Messrs. S. W. Royse & Co., Manchester, in a circular dated July 27th, report as follows:

CHEMICALS.—There is no special feature to record in the chemical market during the current month. The orders held back from the close of the half year ending June, have, on the whole, maintained prices steady. Buyers continue timid in their purchases, only covering their immediate requirements; this policy may be continued too long. There has been a somewhat better demand for carbolic, but sellers have been disappointed in their expectations. The orders from the districts on the continent where cholera is reported to be prevalent have only been moderate. It is difficult to find an outlet for the quantity of ammonia alkali on the market, even at tempting figures, but caustic soda maintains its position fairly well. Small concessions are granted for important business. The exports of alkali for the six months ended June 30th last, as compared with the corresponding period of 1893, are as follows, viz.: 1894, 135,430 tons, value £782,858, equal to £5 15s. 6d. per ton; 1893, 169,197 tons, value £1,095,450, equal to £6 9s. 6d. per ton. The above shows a decrease in weight of 33,767 tons, in value of £312,592, and a fall in price of 14s. per ton. Bleaching powder has maintained its price, and at present meets with fair enquiry. The Board of Trade returns for this are also unfavorable, there being for the six months ended June 30th last a decrease in weight of 10,720 tons, and in value of £100,591, as compared with the corresponding period of last year; this shows a fall in price of 7s. 6d. per ton. The ultimate result of the tariff legislation in the United States is being keenly watched by the manufacturers of these products, and when things settle down there is certain to be a considerable improvement in the exports of bleaching powder, caustic soda, etc. Business for 1895 is already being discussed, and buyers would do well to consider the question, even at this early date. Prices are very low; any material reduction is unlikely, and there is room for a considerable advance, especially with the extra demand almost sure to come from the States before very long. Pitch maintains its position, and sellers are able to command full prices. In naphtha there is more offering, and prices are a shade easier. Sulphate of ammonia remains steady, but for forward business lower prices are accepted. The price for acetate of lime is well maintained in America, and with increased freights in the near future, we may see a higher range of values established in this market.

MINERALS.—So long as the iron and general trades of the country remain depressed there is no hope for minerals. The coal strike in Scotland has not re-acted so beneficially in this district as might reasonably have been anticipated. This, no doubt, is chiefly owing to the large stocks of coal at the various pits. High qualities of iron ore are in somewhat less demand, and the poorer qualities are neglected. Manganese ore of high percentage and good quality readily finds a market. The quantity of low-grade ore is abundant and very difficult of sale, even at tempting figures. More business is being done in foreign brimstone, the imports for the six months ended 30th June last showing an increase in weight of 600 tons, but a decrease in value of £827, as compared with the corresponding period of 1893. The large quantity now being produced by the recovery process is likely to keep prices low. There is more demand for chrome ore, and good qualities would find buyers at fair figures. Stocks of China clay, even of the best qualities, are heavy, and until business improves in the United States this condition of things is likely to continue. Producers would do well to curtail the output.

METALS.—The iron market has not been affected by the Scotch coal strike to anything the extent anticipated, which is strong evidence of the great depression now prevailing over the country, and the disinclination on the part of speculators to operate. During the six months ended 30th June last, there has been a decrease in the exports of pig iron of 14,108 tons, and in value of £95,027; a greater decrease was looked for by many. Notwithstanding the increase of about 1,500 tons in the visible supply of copper, the market has remained steady, with somewhat more business passing. The present low price for tin is not attracting buyers and the market closes weak; buyers would do well to watch the tin market closely. Lead is steady, and more business is reported at full figures.

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

KOREAN AFFAIRS.

An article written by the Hon. George N. Curzon, M.P., on Korean affairs, and published in the London Chamber of Commerce *Journal*, may prove of interest to our readers:

The present situation in Korea, in which Japanese and Chinese troops are confronting each other, and in which foreign powers are offering advice or mediation with the view of preventing conflict, has really been brewing for some time. It has arisen out of disturbances in Korea itself; disturbances which hardly deserve the name of revolution, but which are really only a more violent and formidable outburst of the popular discontent that is always simmering below the surface. This is due, in the main, to the utter impotence of the Korean Government to supply the people with any of the essentials of fair or orderly administration and the oppression which the poorer classes have long suffered at the hands of the aristocracy, who have a monopoly of all the higher official positions, and who treat the people with great severity and injustice. These feelings against the Government are to some extent inflamed by the agitation which it is always so easy to get up in an Oriental country against any sort of intrusion or predominance of foreign interest. In Korea there is no particular hostility to foreigners as such, and certainly no hostility to Europeans; but, on the other hand, it is always easy for so-called patriots to represent the troubles of their country as due to its opening up to foreign nations, and, in Korea itself, the particular foreign influence which is most potent and also most aggressive in its direct effects upon the lives of the people is that of Japan. The Japanese have, moreover, 8,000 subjects in Korea, almost entirely engaged in trade of the export branch, of which they practically have a monopoly. Their manners towards the people and their attitude towards the Government are not of a character to excite any popularity. There is a traditional and unexhausted antagonism between the two nations which has more than once found vent in war, and at any time a popular commotion—whatever, indeed, of anti-foreign feeling may be slumbering below the surface—is easily fanned into a flame by those who point to the ever-increasing ambitions and ascendancy of Japan.

It was the outbreak of some such commotion as this, and alleged necessity of protecting her representatives and her subjects from outrage, that provided Japan with an excuse for interference upon the present occasion, and for sending a large body of troops to Korea. She is said to have, at the present moment, 10,000 men in the peninsula. They are in armed occupation of Chemulpo, the port of the capital—from which it is distant about twenty-five miles—and of the capital itself. And, although the independence of the king's person cannot be said to have been actually compromised, yet, in view of the armed strength at the disposal of the Japanese, the palace may be said to be at their mercy.

China, for her part, although she was caught napping in the preliminary stages by the more rapid diplomacy of Japan, has retorted in a similar fashion. She has also sent, by land and by sea, a considerable body of troops, who are separated by but a slight distance from their Japanese rivals.

Japan absolutely declines to retire unless she receives guarantees of certain reforms in Korean administration, which are, of course, intended to emphasize and increase her own influence. China would be willing to withdraw her troops, but is naturally prevented from doing so by a feeling of pride, by her position as suzerain, and her legitimate suspicions of the intentions of Japan.

This is the point at which matters now stand, and at which it is announced that foreign powers have intervened, with the view of promoting a peaceful settlement. As regards the rights of the case, there can be little doubt that, of the two parties, Japan has the less good excuses to offer for her conduct.

Nine years ago, after the last revolt in Soul, when both Chinese and Japanese troops were landed for the protection of their respective peoples, Count Ito, the present Japanese Prime Minister, concluded a convention at Tien-tsin with the Chinese Viceroy Li-Hung-Chang, by which both parties undertook to withdraw their troops at that moment in Korea, and only to send them again, in the event of future disturbances, upon the one party giving prior notice to the other. But it certainly was not contemplated at that time that any such local disorder as has recently taken place should be made the excuse for armed intervention on a large scale by either party, and certainly not by Japan, who, not being suzerain of Korea, has not the immediate excuse for interference which China's undoubted position entitles her to claim. Japan has therefore stolen a march upon China on the present occasion, and has acted in a manner which it would be difficult to justify upon the strictest principles of international law.

At the same time Japan has excuses to offer which it would be unfair to overlook. Though, for some hundreds of years, China has been the nominal, and during the past fifty years in particular the practical, suzerain of Korea, Japan can never forget that she has also historical claims to the same position, which was formerly acknowledged by the kings of Korea alternately, if not simultaneously, with the acknowledgment of similar relations on their part to the court of Japan. Then again, there is in Japan at the present moment a very powerful Jingo party, who have for long been agitating for a more forward policy in Korea, and who are burning for some opportunity of winning laurels for the army and navy of resuscitated Japan. This movement has, on the whole, been treated with considerable discretion by the present Japanese Government; but, placed as the latter is, in a very difficult, if not impossible situation by the attitude of the Diet of Japan, which renders its parliamentary existence not merely a nightmare, but an impossibility, it may have felt some desire to conciliate the opposition of which it is the victim, and to rally round itself the various antagonistic elements by whom, in domestic policy, it has so far been opposed, by embarking upon a more forward national policy which would satisfy the patriots of every school of thought.

The astonishing weakness and vacillation which have been shown by China in her previous relations with Korea, and more particularly in her encouragement of that State to conclude treaties on an independent basis with various powers, have further given Japan a technical opening, of which it is not surprising that she should have taken advantage.

Finally, Japan, who is burning to distinguish herself in the path of civilization and reform, can point with perfect justice to the utter rottenness of the Korean Government and to its inability to discharge the elementary functions for which governments are constituted Japan can also say with some truth that while she is anxious and willing to wield the new broom, it is China who declines either to take hold of it herself or to allow anyone else to do so instead; and that this dog in the manger policy is causing the ruin of the peninsula. . . . . .

British interests are undoubtedly concerned in maintaining the semi-independence of Korea under Chinese suzerainty, both because of our considerable trade with Korean ports, and because no events could be regarded by us with equanimity which would be likely to place Russia in possession of the open ports of the Korean coast. The Siberian railway, when completed, will revolutionize the destinies of the northern half of the Asian continent; the possession by Russia of Korea in addition, would seriously affect and might ultimately revolutionize the balance of power in the Pacific.

If it be true that the mediation of the British Government has been either invited or proffered, this would seem to be a wise solution of the difficulty; since Great Britain, for the reasons I have already enumerated, has no interest in promoting the ambitions of any one of the three powers more immediately affected in opposition to the others, but is really concerned, so far as may prove feasible, in preserving the balance of interest and in maintaining peace.

WHAT RETAILERS ARE SHOWING IN NEW YORK.

As the majority of them are busy taking stock, we see many marked down goods, this being a real bargain time in the cities.

The clerks are taking their vacations and every one is apparently loafing, though in reality the bright merchant and buyer are busy preparing for the fall trade, which is expected to be an improvement on the spring. Lay plans now, and, what is more to the point, do not be frightened off from carrying them out.

Gaiterettes of white pique.

Blouse waists of Roman striped moiré.

White and colored duck suits as low as $1.98.

White chip hats trimmed with black tulle and wings.

White canvas ties trimmed in tan colored leather.

Millinery passementeries showing iridescent green effects.

Small bonnet tops of gold-colored wax beads and cloth of gold.

Stick pins with a little enamelled turtle, frog or lizard for the head.

Dressy costumes of check silk trimmed with lace and satin ribbon.

Small bonnet shapes made entirely of jet spangles on bobbinet.

Changeable silk having an effect resembling frost for blouse waists.

High-back Spanish combs of tortise shell having two short teeth.

Gilt frames consisting of a wreath of oak leaves for photographs.

Silk and canvas belts with immense oxidized and bright silver buckles.

Folding fans of natural gray ostrich plumes, having "real" shell sticks.

White dotted Swiss suits trimmed with white satin ribbon and Bréton lace.

Blouse waists of accordion plaited chiffon over silk, made with elbow sleeves.

Louisine silks in small checks and also irregularly shot patterns for blouses.

Black kid slippers, having perforated toe and open-work straps heavily jetted.

Sets of snake-skin, including chatelaine bag and belt, cardcase and change purse.

Yokes of alternate rows of satin ribbon and insertion finished with a chiffon ruffle.

Boys' suits of white pique trimmed with a binding, collar and cuffs of blue drill.

Chatelaine bags and belts of white canvas, trimmed with tan-colored or black leather.

Outlined checks of black and white in Louisine and taffeta, for both costumes and blouses.

Plain white surah, gros grain and moire parasols of a large size with celluloid ball handles.

Chatelaine bags of lizard, crocodile and seal kid of a square shape, having the envelope flat.

Rough-and-ready sailor and "Vigilant" hats trimmed with a band and lining, for 25 cents and 48 cents.

Black moiré sashes to be worn as a loose belt knotted on the left side with two long ends and one loop.

Jetted quills of the natural feather covered with jet powder; also, of lace covered with jet spangles.

Lace boas of black and white lace resembling an immense jabot, which hangs to the bottom of the dress.

Long hatpins having violets, cornflowers and such small blossoms in the natural colors of enamel for a head.

Silk parasols showing alternate rows of lace insertion and puffs of chiffon, with a ruffle of chiffon on the edge.

Pale-green kid gloves with white or black stitching to match, with the seaside costumes of white and pale-green.

Velvet bodices, in any color, trimmed with cream guipure, to be worn with skirts of any material for demi-toilettes.

Gowns for second mourning made of Liberty satin, trimmed with two deep flouncings of Grecque net edged with jet.

Sets of white pearl imitating buttons, even to showing the thread supposed to sew them on, for sleeve links and shirt studs.

Ladies' shirt waists of solid pink or blue trimmed with a row of white embroidery down the centre and white shirt studs.

Blouse bodices of chiné taffeta in light colorings, having the sleeves and corselets of satin covered with flounces of chiffon.

Shot silk petticoats trimmed with flounces of accordion-plaited chiffon, which are edged with three rows of narrow satin ribbon.

Many costumes decorated with rosettes or bows of ribbon on the side of the corsage, with long ends which extend nearly to the bottom of the skirt.

—A *Star* reporter says that twelve wealthy Japanese merchants arrived from Vancouver, last week, over the Canadian Pacific, passing on immediately to New York, where they will live in future. They all could speak English, several having been in business in Ceylon and India. It is also stated that a large number will follow, and that at least six out of one party will settle in Montreal. The Japs are bright people, and will be welcomed in Canada as their future home.

ISSUES policies both on the Mutual and on the Stock plans. Its Stock, or low-level rate policies, are at lower rates than purely stock companies, and its mutual, or with profits policies, are not equalled by any "purely mutual" life insurance company for lowness of cost, produced by annual cash dividends upon identical policies.

W. H. ORR & SONS, Managers,
Cor. Toronto & Court Sts.

Brains and Capital

In every partnership there are two factors of great importance the managing brain and the capital employed, and if death removes either, the business must suffer. It often happens that the brains belong to one man and the capital to another. If the manager dies the capital is worth less than before; if the capitalist dies and his capital is withdrawn, the manager is crippled. It is clear that each has an insurable interest in the life of the other because the profits of each depend in part upon the life of both. The firm should, therefore, take one of the Unconditional Policies of the Manufacturers Life, which are free from all restrictions as to travel, residence or occupation, and are **absolutely indisputable on any ground whatever after the FIRST YEAR.** Get the rates and all particulars from any of the Company's Agents or from Head Office.

WHAT IS THE 7% Guaranteed Income Bond

OF THE

North American Life Assurance Company ?

It is a contract that may be secured by the payment of 15 or 20 annual premiums, and should death occur within the period selected, the full face of the Bond becomes payable.

If living at the maturity of the Bond, the guaranteed cash value, as also the surplus, may be withdrawn, or a paid-up Bond (payable at death) taken out for its full face, and in addition a 7% Guaranteed Life Annuity secured; in which case the surplus is also payable.

Pamphlets explanatory of this admirable plan will be given on application to any of the company's agents, or to

WILLIAM McCABE,
Managing Director.

British Empire Mutual Life Assurance Company Of London, Eng.

AN ANTI-BURGLARY INSURANCE PROBLEM.

A case of considerable interest to householders who insure against loss by burglary has been submitted to the arbitration of Messrs J. F. P. Rawlinson and J. A. Price, barristers, at 3, Harcourt-buildings, Temple, the chambers of Mr. Edward Pollock, who sat as umpire. A Mr. Malcolm Rae, a clerk, who, with his brother, resides in a house in Sotheby-road, Highbury, rented by his mother, effected a policy of insurance in his own name with the National Burglary Insurance Corporation. In December last the house was broken into, and property to the value of about £46 was stolen. The property, consisting of engineers' tools and mathematical instruments, did not belong actually to Mr. Malcolm Rae, but to his brother. Mr. M. Rae sought to recover in the Clerkenwell County Court; and, finally, arbitration was agreed upon. Mr. Derham, for Mr. Rae, contended that the policy, though taken out in the name of Mr. M. Rae, was (and that to the knowledge of the corporation's agent, and so to the knowledge of the corporation) really a contract of indemnity covering all property belonging to the mother and two sons in the house in Sotheby-road. Mr. Morse held, for the corporation, that there was no liability save for property belonging to the person effecting the policy; and further urged that inasmuch as the policy issued by the corporation distinctly specified that indemnity was guaranteed against loss by the policy-holder and wife (or husband) and children, all other persons, such as mother or brother, were implicitly excluded. A contract of indemnity such as a policy of insurance, he argued, was only to be modified by specified provisions, which in this case were not shown. After hearing evidence, the arbitrators reserved decision.—*Insurance Record.*

A REMARKABLE SETTLEMENT.

The deadlock in Congress over the tariff bill has been broken by the absolute surrender of the House to the Senate, the Sugar Trust, the coal-hauling railroads, and the great combinations of Lake Superior ore producers. The action of the House in coupling with its surrender the passage of bills making sugar, coal, ore and barbed wire free, adds no dignity to its descent. It only brings to mind the angry boy who is unable to conceal the fact that he has been thrashed, and seeks a petty satisfaction in making faces at his conqueror.

The situation is a peculiar one, one of the most peculiar in the history of Congress. The Constitution gives the House of Representatives the exclusive right to originate revenue bills for the same reason that the battle for the rights of the people resulted in conferring a like exclusive power upon the House of Commons. Yet in the present instance the Senate not only radically amends the bill passed by the House, but, almost or altogether without precedent, it has for six weeks refused even to compromise the differences between it and the House, and has challenged the latter to pass a revenue bill as the Senate shaped it or not at all.

The nature of the contest that has been waged has been most remarkable. It has been between the high tariff and the low tariff Democrats, and the latter seem to have been in a considerable majority in both branches. Yet the victory is with the high tariff Democrats, who cut no figure in the House and do not seem to have numbered over half a dozen in the Senate. Mr. Gorman's attitude towards tariff reduction is the same that it always has been, but what means have he and Senators Brice and Smith employed to keep such radical tariff reformers as Faulkner, and Daniel, and Vest, and Morgan, and Mills and Cockrell in line with them? A truthful history of the recent contest would indeed be, in the famous phrase of Horace Greeley, "Mighty interesting reading."

The main aspiration of the Senate in its unusual contest against the House of Representatives, and, we believe, the people also, came from the Sugar Trust, whose power in the National Government is now proved to outweigh everything else. Next to this, probably, may be ranked the interests of the coal railroads, and the ore interests make the third in order of potency. But an influence of a very different character must be recognized. Most of the Democratic Senators are on very bad terms with the President. Several of them have been at loggerheads with him for years, and did their best two years ago to prevent his renomination. His lately published letter may have been calculated to increase the House's disposition to resist, but it did not placate the Senators, who now have their revenge. Such a contest as the Senate has made could never have been brought about over trifling questions of political principle or the public welfare; these would have been compromised. Only considerations of personal benefit and satisfaction could have held the Senate in the position it has occupied for six weeks.

The passage of the bill disposes of the tariff question for some time. In view of the destructive effects of this struggle public sentiment will not encourage the speedy reopening of the question. Men may now buy and sell and manufacture and contract with a knowledge of what the customs will be when their engagements mature. For this the country has reason to be profoundly grateful, and we believe the conditions are now present for a very marked recovery of business. This tariff bill, however, will go down into history as one of the most disgraceful pieces of legislation on record.—*N.Y. Bulletin and Journal of Commerce.*

THE MANUFACTURE OF PAPER STOPPERS.

"It would be a wise oracle, indeed, who could tell when the wonders of wood pulp would cease," said F. A. Perry, of Bangor, recently. "Of course, it is well known that the paper upon which all the newspapers of America are printed is made from wood pulp, and it is also said that pulp car wheels will shortly take the place of the steel and papier-mache articles now in use. Up in Gardiner, Me., a manufactory has been started to make stoppers out of wood pulp, with the intention of displacing the use of corks for a similar purpose. As the new style of stopper can be made at four-fifths less cost than cork, the new industry will doubtless be very profitable, as no less than $12,000,000 a year are now expended in this country for cork stoppers alone." *Boston Journal of Commerce.*

THE HUMAN FAMILY.

The following are the latest published figures. The human family living on earth to-day consists of about 1,450,000,000 persons in round numbers. Of these only about 500,000,000, or one-third, are even properly clothed; 250,000,000 habitually go naked, 700,000,000 have only middle part of their bodies covered, only 500,000,000 live in houses, 700,000,000 in huts or caves, while the remaining 250,000,000 have no home or shelter whatever.

Peru has an area one-seventh as great as that of all Europe, but the population does not exceed 3,000,000, more than half of whom are Indians.

D. Morrice, Sons & Co'y.

MONTREAL & TORONTO.

MANUFACTURERS' AGENTS AND GENERAL MERCHANTS.

The Dominion Cotton Mills Co., Montreal—Mills—Hochelaga, Coaticook, Chambly, Brantford, Kingston, Halifax, Moncton, Windsor, N.S., Magog, (Print Works).

Mercantile Summary.

THE first paper manufactured by the mills at Alberni, B.C., has been marketed.

THE Western Ontario Travellers have decided to do without their usual picnic this year.

FELIX DANSEREAU, laundryman at Longueuil, Que., and formerly a hotelkeeper in Montreal, has come to grief.——Chas. Racicot, a small grocer in Montreal, has assigned. So has Ranger & Co., furniture dealers.

IT is understood, says a western exchange, that the Walkers will bind themselves under a penalty of $100,000 not to pipe gas out of the counties of Essex and Kent if other companies are denied the privilege.

THE Dominion Government, according to a Winnipeg despatch, has decided to set apart all heavily timbered lands in Manitoba, west of the Red River, as permanent timber reserves, which will be conserved as the sources of fuel supply for settlers.

THE business being done by the Victoria, B.C., Street Railway Company this season is reported as far in advance of that done last year, or any previous year since the cars commenced to run. It is understood that the receipts for the first six months of the present year exceeded the receipts for the same months last year by several thousand dollars.

Mercantile Summary.

AILSA CRAIG has a new paper—*The Banner*.

CHINA'S immigration into Canada last year was 2,109, compared with 2,249 in the former year.

WE are told of the following failures in the Maritime Provinces: E. C. Goodeve & Co., general dealers at Baie Verte, N.B., as predicted last week, have assigned.——R. A. Murdoch, dealer in dry goods at Chatham, N.B., has made an offer of 40c. in the $, cash, or 50c. payable in four months.——Emery Sewell, storekeeper and tug-boat owner at Maugerville, N.B., has suspended, and Victor Albert, hotelkeeper at St. Hilaire, in the same province, has assigned.——T. H. Lavers, grocer, St. John, has compromised at 50c. on the dollar.

AN old fruit merchant in Bonsecours market, Montreal, Denis McCarthy, has been obliged to make an offer of compromise. He lost his health and was unable to attend to business closely of late years. And so the competence he had laid by is gone. His indebtedness amounts to some $8,000, and assets, consisting mainly of real estate, to between $6,000 and $7,000.——H. David, dealer in shoes, Montreal, has assigned with liabilities of $3,796. Too much competition and dull trade are the attributed causes of trouble. He began only last autumn.

Mercantile Summary.

THE Canadian Oil Company, it is said, intend rebuilding the burned works at Sarnia on a larger scale.

THE Great Northern, according to the Manitoba *Free Press*, is looking for a feasible route to the Rainy Lake gold region.

AFTER the first of September the extensive pork-packing business of George Matthews, which is being done at Peterboro and Ottawa, will be carried on by a joint stock company with a capital of $200,000. Peterboro is to be the chief place of business; George Matthews will be president, and his son, R. C. Matthews, secretary.

THE sheriff is offering for sale the effects of Oscar E. Konkle, lumberman, Hamilton. Some time ago Mr. K. was heavily pressed for money and gave a chattel mortgage for $4,800; this instrument has been the means of closing his business.——In the same city the assets of Wm. Livingstone have been sold by the bailiff.——An assignment to a private banker has been made by Henry Laundry, general store-keeper at Tweed. The banker held a chattel mortgage of $1,900. Early in this month Laundry was burnt out, and claimed that his stock exceeded $9,000, on which there was an insurance of only $5,000. Creditors will not receive a very large dividend.

Mercantile Summary.

THE Cumberland Railway and Coal Company have shipped from Parrsboro, N.S., from the 1st of January to the 31st of July, 81,455 tons of coal, an increase of 22,803 over the corresponding period last year, and there is yet a large quantity to ship, as the fall orders are just coming in.

IN the city of Quebec a dry goods concern named P. Gosselin & Co. has assigned. It has existed only since the spring of 1893, and the managing partner, P. Gosselin, was previously a grocer, and not a successful one.——An offer of 40 cents on the dollar, ready money, was made the other day to the creditors of Mrs. N. Arpin, grocer, etc., at Lanoraie, Que., and it is likely to carry. She owes about $2,800.

ROBERT HAMILTON has been in business as a grocer in Toronto for many years and was well regarded. Now we hear of his assignment to A. V. Delaporte.——The record of the Nolans, furniture dealers, etc., in this city, is not a gilt-edged one, and we have often wondered how they obtained goods on credit so freely. In 1888 James Nolan failed with liabilities of $82,000 and nominal assets of less than half this sum. After this his wife started under the style of Nolan & Co., managed as before by her husband, and in 1893 she assigned. Then the business was transferred to her son James. On Tuesday he called a meeting of creditors, and an offer of 30 per cent. was refused. If no better proposal is made, it is probable that the chief creditor, Copp Bro's. Co., will take over the estate and liquidate it

Type Presses Printing Material

GWATKIN & SON . . . . .
57 Bay Street
Toronto

BUSINESS in Montreal shipping circles is very dull.

THERE is a great demand for harvest hands in Manitoba at present.

GALT clerks get their weekly half holiday on Thursday afternoons, all the stores closing at one o'clock.

THE London Board of Trade will not meet again until September. No business and warm weather have caused the adjournment.

THE tailoring stock of N. Wilson & Co., London, realized 57 per cent.——The assets of G. H. Harper, miller, Dundas, are to be sold to-day.

THE promoters of the Quebec electric railway have paid up ten per cent. of their subscribed stock and expect to commence operations on the work before winter sets in.

AT the annual meeting of the New Brunswick Electric Telegraph Company, held at Rothesay, N.B., the directors elected were Messrs. C. W. Weldon, president; L. J. Almon, J. J. Tucker and D. M. Sutherland. Mr. D. C. Dawson is the secretary.

MR. LAECHLER, agent of the International Steamship Company, says that this season has been the best for tourist travel since 1885. Previous to 1885 the Yarmouth line was not running and the I.S.S. then had its palmy days. In one week this summer $10,000 were taken in at the Boston office.—*St. John Record.*

IT is stated that a joint stock brewing company, with a capital of $100,000, is being formed in Hamilton. Thirty thousand dollars of stock has, according to the *Times*, been already subscribed. Mr. George Schnabel, formerly with the Grant-Lottridge Brewing Company, is the leading spirit in the scheme

SOLE & JOHNSON have been about twenty years in Guelph as grocers, etc., and have never been able to make much progress. Of late they could not meet their payments as they became due, and now assign.——Other assignments are those of F. A. Rider, machinist, at Staples, and H. C. Haight, butcher at Canifton.

SHIPMENTS have commenced of the binder twine produced by convict labor at the Kingston penitentiary. About 300 tons will be available for this year's harvest, and during the succeeding months manufacture will be kept up at a rate that is expected there will be an output of 600 tons by harvest time next year. This quantity will represent about 10 per cent. of the total consumption of binder twine in the Dominion.

A PRESS despatch from Moncton, N. B., says that an effort is to be made to raise the debt of $22,000 on the Y. M. C. A. building at that place. If the amount cannot be raised the building will sooner or later pass into the hands of the mortgagee.

GROWING tired of fighting the battle of life, A. J. Rowbotham, a grocer in Victoria, B.C., attempted his own destruction, but was not successful. Since then he has assigned, with liabilities of $12,000, and nominal assets about half this sum.——About a year ago Jas. A. Caldwell dissolved partnership with one Lewis and began tailoring on his own account at Nanaimo. Now we hear of his assignment, owing $5,000. He has nominal assets of about an equal sum, and proposes to pay 50 per cent. to his creditors if they will let him off with that.

THE creditors of Homer Laberge, of St. Louis de Gonzague, Que., met on Friday last. Homer is a hotel-keeper, who also has done quite a trade in hay and grain as well. Indeed he is said to owe as much as $30,000, a portion of which, however, is secured by mortgage on his real estate. Being more pushing than prudent, he got beyond his depth. Doing too large a trade, he met with some losses in hay which crippled him. It is understood that he made an offer of 25 per cent.——Another hay dealer has succumbed, C. H. Hebert, of the parish of St. Bernard de Lacolle, Que., who assigned last week.

SOME time last month W. G. Ibbotson, grocer, Edmonton, Alberta, gave a chattel mortgage. Since then a couple of writs have been issued against him and he has assigned ——The bailiff is in possession of the hotel premises of H. C. Charlton, at Brandon, Manitoba. Some time ago he mortgaged his assets, and this mortgage is now foreclosed.——The stock and fixtures of Richard Bourbeau, boot and shoe dealer, Winnipeg, amounting to $4,400, were sold under a chattel mortgage to Sink Bros., of Brandon, at 55 per cent.——The creditors of J. J. Schragge & Son, clothiers, Winnipeg, have arranged a compromise with creditors and dissolved partnership.

WE hear of the assignment of a tailor named Victor Girouard in Montreal, owing about $6,500. He was at one time of Hurtubise & Girouard, and bought in the estate of that firm for 60c. in the dollar. But having started a general store at St. Polycarpe, he became widespread, and in March, 1886, assigned. Resuming in his wife's name, he met with no better success, and in January, 1890, settled at 10 cents on $.——A clothier in the same city, named H. Friedman, makes a cash offer of 60 cents in the dollar. He began business five years ago, but sustained a pretty heavy loss by fire recently. At first he proposed merely to ask an extension, but finding the stock saved was more damaged than expected, and being unable to carry out terms of extension, he makes the foregoing offer later. He has assigned.

THE figures submitted by the secretary to the Harbor Commissioner at Montreal the other day, show that the commercial dulness which prevails the world over has affected the revenues of the harbor. The total revenue, from the opening of navigation to August 1, this year, was $106,105, against $118,655 for the same period in 1893. The number and tonnage of sea-going vessels which arrived in port from the opening of navigation to August 1 during the following years was:

	Ships.	Tonnage.
1891.....	335	442,094
1892.....	373	520,933
1893 :.....	401	570,861
1894.....	344	525,363

The number of inland vessels that arrived in port for the same dates was 2,475, 2,466, 2,505, and 2,360 for the same four years.

A BAILIFF took possession of Alex. Hay's fruit store in Hamilton recently, and his stuff has been advertised for sale.——An assignment is made since our last by W. J. Adams, builder at Brantford.——In 1890 John F. McEwen, formerly of the foundry firm of D. McEwen & Sons, at Kingston, moved to Collingwood, where he started a foundry. Of late a number of his contracts have not been quite satisfactory, and consequently he has gone behind in his payments. Now we hear that the bailiff is in possession of the premises.——A.Y. Polley kept a general store at Simcoe for many years, but on so small a scale that he barely made a living. Now he offers creditors 40 per cent. and assigns, having only small liabilities. ——Since 1892 Charles O. Self has been keeping hotel at Fort William, but being slow pay he gave the Hudson Bay Co. a chattel mortgage about a year later. Several writs have since been issued against him and now he assigns.

ON Wednesday morning last a special general meeting of the shareholders in the Richelieu and Ontario Navigation Company was held. Its purpose was to authorize the directors to redeem all the outstanding bonds by a new issue, which would also cover all the floating debts of the company, which to-day stand at $400,000, against $537,000 at the close of the

previous year. This step was authorized by a vote of 11,770 shares, which is much more than was required. Messrs. Thomas McDougall, manager of the Montreal branch of the Quebec Bank, and Adelard de Martigny, managing director of La Banque Jacques Cartier, were chosen trustees. A statement submitted by the general manager, Mr. Gildersleeve, showed the state of the company's finances to July 31. The gross receipts were $321,682.99, against $277,855.94 during the same period in 1893, an increase of $43,827.05. The running expenses of the steamers were $144,447.37; and the proportion of repairs, outfit, and fixed charges $74,476.76, leaving a net balance of $102,758.86. The increase of earnings for the first twelve days in August was $15,931.70, making a total increase of $59,758.75 from the opening of navigation. Mr. Gildersleeve stated that the traffic by the company's boats was now at its heaviest. All the incoming and outgoing boats were "full up" each trip.

We find in the London, Ontario, *Advertiser* the following paragraph: "In order to correct a misapprehension which appears to exist in the minds of some, it is as well to state that the Birkbeck Loan Company of this city has no connection whatever with a company of similar name in Toronto, or with the Birkbeck Building Society of London, England. Our local company, which is in excellent hands, was the first to obtain their charter in Ontario, and the Toronto company followed, using the name 'Birkbeck' also." And we have received from London, England, under date 30th July, the following letter, which is signed Francis Ravenscroft, manager, and bears the heading of the well-known English Birkbeck Building Society, 29 and 30 Southampton Buildings, Chancery Lane, W.C.: "The attention of this society having been drawn to the circumstance that there are several societies in Canada that have recently adopted the title of 'Birkbeck,' I am desired by my directors to ask you kindly to state in your columns that we have *no agencies or branches whatever*, either in Canada or elsewhere. We are led to ask this favor in order to prevent misapprehension on the part of the public in Canada, where we have many members and depositors, who may not unnaturally suppose that the societies to which I refer are in some way connected with ourselves." We must warn Mr. Ravenscroft that he had best beware the ire of Mr. Cross, the actuary of the Toronto Birkbeck. It will seem an insulting thing to that gentleman that a little company in London the Less should dare to advertise "No connection" with the Toronto concern. And, surely, a still more intolerable thing that the big company in London the Great should disavow both, loftily, it is true, but indiscriminately.

CARE OF BRUSHES.

A number of little things in the care of one's brushes determines the length of their service and the condition in which they last. For one thing a hair brush should be washed often enough to keep it thoroughly cleansed. For this soda water or ammonia water must be used, and then the wet bristles set downward—do not turn it on its back—and left in the sun to dry. A nail or tooth brush should never be left in the holder with the bristles uppermost. It stands to reason that water will soak into them in time with such treatment, and that discoloration and general demoralization will follow.—*Boston Journal of Commerce*

The well known firm of Krupp of Essen, Germany, has, it is reported, acquired some land on the Elbe, on which to erect a branch establishment.

TORONTO, FRIDAY, AUGUST 17, 1894.

THE SITUATION.

Acceptance by the House of the Senate bill is the final outcome of the struggle over the tariff at Washington. The Sugar Trust has got its way, and respectable journals openly state that this great organization purchased enough votes to secure success. Not many were required. Mr. Wilson believes, on evidence that convinces him, that the Sugar Trust felt so sure of the passage of the sugar schedule as to make it safe for it to buy, and it did buy $112,000,000 worth of raw sugar, on which he estimates the profit at $40,000,000. He practically admits, however, that the basis of his calculation is not certain, when he says that with ad valorem duties it is not possible to ascertain the direct gains of the sugar monopoly. The purchase of the Senate, which once ranked the equal in honor of any legislative body in the world, marks the decadence and the danger of the Republic. It also signalizes the source of the danger, and raises the question whether the Republic can continue to exist with the great corrupting Trusts in its loins. The bribed Senators will escape other punishment than the withdrawal of the public esteem, of which they have showed themselves unworthy. So long as the Sugar Trust and other corrupt influences can shape tariff legislation, no substantial reform will be possible. After the struggle over the tariff bill ended, bills to make sugar, iron and coal free were introduced into the House and passed; but except as a cover for the defeat of the House bill, the movement is not likely to have any effect, for these bills will meet the same fate as the tariff bill in the Senate.

What the contention for free iron meant will be better understood when we consider that the Senate bill puts seven-tenths of one cent per pound on iron $14 a ton, which is more than untaxed iron is worth. The burden which such a tax imposes on railways and agriculture is extremely onerous. The effect is to handicap American produce and compel it to compete at a disadvantage in the markets of the world. The duty on bituminous coal is only 15 cents per ton, but as far as it goes it lays under tribute all production to this extent, which depends upon steam power. Mr. Carnegie can stand it, in consideration of the much greater duty upon iron. Free raw material is the basis of a sound tariff policy, and in the near future it will be strange if the great American nation do not, with President Cleveland, insist on the enjoyment of this privilege. Logs and sawed lumber are free; the latter item is a gain for production, and will be especially valuable on the treeless prairie.

Secretary Carlisle does not favor free sugar, for the reason that it would mean a loss of over $29,000,000 of revenue and cause a serious deficit. And economically there is a conceivable distinction between free sugar and free coal and free iron. If a selection from these articles for duty had to be made for revenue purposes, sugar would most properly bear the burthen. Coal enters as an element in all manufactures; iron plays a great part in reproductive industry. Threats were made, by Mr. Wilson, that if it were proved that the Sugar Trust had purchased Senators, Congress would sit till next term, in the attempt to make sugar free. But this may not be found possible, or on consideration advisable. The cry is started by the menaced interests that free sugar means free coal and free iron. It was scarcely necessary to say this to rally all three interests to join in a united effort to defeat the bills. Free coal and free iron are possible without creating a deficiency; but if sugar were added, the gap in the revenue would be serious.

What may be the full significance of the rich gold discovery in Western Australia cannot at once be foreseen. When each of half a dozen men get $16,000 worth of the precious metal in a few days, it is plain that the supply is, for the moment, plentiful. But does this abundance indicate a permanent source of supply? Some of the gold was got from boulders, which might have travelled great distances. A ledge of surprising richness, in which gold was found, is spoken of, but in such terms as to make it doubtful what is meant. A ledge of rock would mean much, but it is doubtful whether this is meant. At first blush it does not look as if this new discovery would have great permanent effects, but until more is known the probable outcome must be surrounded with the doubt usual in such cases. If prolonged gold production were to follow, on the scale of the opening venture, we might in time witness a state of things in which some new Chevalier would arise to predict that a fall in the relative value of the yellow metal was inevitable. California and Australia, in the past, have probably reached the high water mark in gold production, and it is not likely that the experience of all time is now going to be reversed. Generally speaking, whoever gets gold from the mine will have to give for it about as much labor as it is worth.

If Canada has got less than half her usual number of immigrants, from the British isles, this year, up to date, it may be some consolation to know that they are not going elsewhere in the accustomed numbers. This result may be due to three causes: a decline in the number of persons available for emigration, hard times, and an increase in the cost of removal. Emigrant passages were, in the beginning of the season, much higher than they had been in some previous years. Later on there was a reduction. The Canadian Government had withdrawn some aid which it formerly gave, and this may have been the reason of an increase in the cost of emigrant passages. To the United States only about half as many British emigrants went during this as last year. But the States can better afford to dispense with immigrants than we can, since they have not like us a vast territory available for occupation.

Sir Charles Tupper is authority for the statement that the treaty between Spain and Norway, intended among other things to secure the free entrance of Norwegian fish

and lumber into Cuba and Porto Rico, has not yet gone into effect, $1 per quintal being levied on fish in Cuba and 50 cents in Porto Rico. This announcement contains little comfort, for it does not afford any assurance that the discrimination of the treaty will not soon be felt, the present delay in putting in force the treaty, which was negotiated a little more than a year ago, being in all probability due to the necessary observance of certain formalities by the contracting states. To the two Spanish possessions in question Canada sends 270,000 quintals, the larger part of it, 170,000 quintals, to Porto Rico. Canadian lumbermen are interested in this treaty as well as Canadian fishermen, but not to the same extent. Here is a case in which Canada, if England had treaties with Norway and Spain which extended to the colonies, would be interested in the most favored nation clause; a proof that it would not be wise hastily to reject the commercial facility of a clause which some special efforts have of late been made to discredit.

GOVERNMENT SAVINGS BANKS.

Such "a poor mouth" is made by a good many people, especially in Toronto, about hard times and lack of work, this year and last, that it is not a little surprising to learn from a Government Blue Book that the amount of money deposited in the Post Office Savings Banks of Canada was greater last year by three-quarters of a million dollars than the year before. Nay, not only this, but the amount withdrawn in 1893 by depositors in these banks was last year *less* than in the previous year. Surely there is something here which goes to disprove the theory of hard times and scarcity of money. If wage-earners are not earning, they not only do not put money in bank, but they are for the most part compelled, when idle, to draw money out of bank. The people who mainly form the depositors in these banks —there are 148,000 of them—are the working or the peasant class, for those who last year placed sums ranging from $1 to $20 in the bank are a majority of the depositors; and if we add those whose deposits ran up to $40 or $50, we have in all these 77.63 per cent., or more than three-fourths of the whole. Some individuals, it is true, had got as much as $400, or $600, or even $1,000 in the banks, but they numbered less than one-tenth, all told. A table will show this:

Government Savings Bank Deposits.	1893. Number.	Percentage.
From $ 1 up to $ 10	53,219	35·75
do 11 do 20	24,906	16 73
do 21 do 50	37,444	25 15
do 51 do 100	18,610	12·50
do 101 do 200	8,380	5·63
do 201 do 400	4,026	2·70
do 401 do 600	1,228	0·83
do 601 do 800	420	0·28
do 801 do 1,000	635	0.43
Totals	148,868	

And the withdrawals in any one of five years immediately preceding were greater in number, as well as in total amount, than those of 1893; the average amount of each withdrawal was smaller, too, last year, than in those years. Of course it must be stated that the number of these banks was greater by thirty per cent. in 1893 than in 1888. But as against this the deposits increased from 145,400 in number and $7,056,000 in amount in 1892 to 148,800 in number and $7,708,000 in amount in 1893.

Then the withdrawals, which were 77,000 in number, and $7,230,000 in amount during 1892, were only, in round numbers, 73,000 in number and $6,631,000 in amount last year, a decrease of $600,000 from the withdrawals of 1893.

The total sum on deposit with the Canadian Government in these banks at the close of last fiscal year was the handsome sum of $24,153,193, which included the interest allowed up to that date, and the average deposit at the credit of each depositor was, including interest, $211.36, which, however, is a smaller average than in 1886 or 1887. It is to be remembered, also, that owing to a reduction of the rate of interest allowed by Government from 4 per cent. to 3½ a few years ago, some 5,000 accounts were closed and $1,800,000 was withdrawn from these savings banks during the years 1889, 1890 and 1891.

A MUNICIPAL QUESTION.

A petition has been filed in the Circuit Court, Chicago, for the purpose of declaring the charter of the Pullman Company void. The petition sets forth that the company's charter never intended it to run theatres, hotels, water works, gas and light plants, etc. And that the act of establishing and conducting the town of Pullman, Illinois, is a violation of the law. In doing so, it is declared, the company is practically doing the work of a municipality, something that was never contemplated in its charter. Since the question has been raised the Pullman Company have, it is said, decided to test the question thoroughly.

In connection with this disputed question the New York *World* tells a remarkable story about the contract of the Pullmans with the Central Transportation Company, which was made in 1870. At this time the Central Company had 119 sleeping cars, and controlled most, if not all, the railway lines leading eastward out of Chicago. These cars, with all the company's franchises, were leased for a term of 99 years at an annual rate of $264,000. This sum the Pullman Company regularly paid for fifteen years, in all, say, $22,176,000. After this Pullman demanded that the annual rate should be reduced to $66,000. In support of this claim he contended that he only received $64,000 a year from the Pennsylvania Railway. However, the matter got into the court, and the Central Company obtained a verdict in its favor. The case was then appealed to the Supreme Court, where it remained for five years before it was finally argued. At this time the defendant set up the plea that the contract was *ultra vires*, in that it was against the public interests, that it created a monopoly, etc., and that it should be declared null and void. It appears that the court accepted this plea. The court of equity has the matter in consideration, and according to the evidence before the Master, the Pullman Company may be required to pay to the shareholders of the Central Transportation Company $3,500,000. In the event of this finding it was argued that the Central Company should be barred by the statute of limitation from recovering anything from the Pullman Company.

COLORED PEOPLE AS LIFE RISKS.

Insurance of the lives of colored people is a matter that has not escaped the enterprise of canvassers in Canada and the United States. No large proportion of our Canadian colored dwellers, however, appears to have made application for life assurance. The average colored man is not considered a desirable risk, though some isolated cases may have proved satisfactory. There are various reasons for this. In the first place it is difficult to get particulars as to their ancestry or even proofs of birth. Then many of them live in an unhealthy way, and their mortality is as a rule excessive. And again, their occupations vary from time to time, and so does their place of residence. These, and possibly other reasons that will suggest themselves, have made life underwriters regard persons of color as undesirable risks.

The larger American companies, we are told, do not issue policies upon the lives of colored persons. Some

English companies do, provided they can get the proper assurances with respect to age and occupation. A Canadian company, again, would be disposed to charge an extra premium, even where the report was reasonably favorable. Those of us who have known fine-looking specimens of intelligent and well-doing mulattoes would naturally expect them to be readily chosen as risks by life companies. But, on the contrary, the prevailing opinion among the companies seems to be that if any person of color is a good risk it is the pure negro. The mulatto or the quadroon is delicate of constitution and unsafe for life assurance purposes. We gather from an article in the *Insurance Herald*, published in Louisville, Kentucky, that when the Sun Life was first established in the Southern States, where negroes abound, its manager, Mr. M. W. Adams, a life underwriter of broad, practical experience, undertook to take up the question of negro lives for a practical experiment. The experience of the company was very unfavorable, and while the Sun Life does not refuse to insure negro risks today, it selects them with the utmost care and will admit only a small percentage of them. "This is not alone due to the excessive mortality of the race, but is due to the uncertainty of the members in their residence and occupation, their lack of providence and purpose. There is no race sentiment or prejudice involved in the question, it is purely the practical results of actual experiment that are sufficient to show that the negro is not yet a safe risk."

It is reported that the American companies doing industrial assurance were about to begin a free acceptance of lives among the colored people of the South. This, in the opinion of the journal quoted, would be an excessively risky business. "The excessive mortality might be provided against in premiums, but the cost of carrying a business that lapses like an avalanche and changes like April days is too great to be overcome. Only recently the Prudential of Newark practically stopped writing negro risks in Kentucky after experimenting in that direction. There is no obstacle," the *Herald* goes on, "to prevent any company from writing an enormous business among southern negroes. As a race they are clannish, grateful and follow each other. A company that would set out on a large scale to make a specialty of such business, or even to treat it on equal terms with white business, would soon have its books full; but the result would inevitably be disastrous." And it gives reasons that appear to justify this opinion. For instance, the impossibility of adequate medical examination and selection puts a great deal of responsibility upon the agent and the insured. The rapid growth of the large companies, the emancipation of agents from direct supervision by the home officers, and the growing eagerness of companies to surpass each other in the volume of business, all tend to make insurers careless. "This carelessness is introducing weak, supple and bad men into the business as agents. It is bad enough when these abuses are nourished among the best class of risks, but if any company should pursue such a course among negroes the results would be ten times worse—disastrous to all the companies."

So much for industrial assurance in the South. It seems to us that in respect of life assurance in Canada there is a not inconsiderable number of well-living, well-doing colored folk amongst us who may properly be the subject of enquiry with regard to their eligibility as insurants. We know of a number who, so far as habits, intelligence and morals go, would not be undesirable. The difficulty, however, would lie in the dimness of their antecedents, in their weakness of constitution, and liability to epidemic or pulmonary diseases. We notice, by the way, in the *Herald's* article, another reason than those we mentioned in our first paragraph why colored lives are undesirable. This is "their lack of providence and purpose." This is not a light reason. Even white folks often lack the resolute purpose to insure their lives, and the providence and self-denial necessary to save the premium.

THE FIRE FIGHTERS' CONVENTION.

The gathering in Montreal this week of the National Association of Fire Engineers from all parts of the United States is a noteworthy event. Although this is the twenty-second of its yearly gatherings—it was formed in Baltimore in 1872—never till now has the association met in any city outside of the United States. The welcome given them in Montreal cannot but have pleased the members, for it was warm and general. The Governor-General wrote a long letter of regret, the Lieutenant-Governor made an admirably eloquent speech and the Mayor presented a formal address of welcome. It is worthy of notice that the local executive committee, in drawing up a programme for the convention, decided that there should be no business sessions at night, a conclusion which was promptly approved by the visitors. Some very felicitous things were said by Governor Chapleau in the course of his address. After announcing that he had been edified by reading the last report of the association and complimenting them on the large scope of the body and the topics treated in its convention, Mr. Chapleau went on as follows:

> You properly say that every government, federal government, local government, municipal government, boards of trade, and every association, should recognize the common duty you perform so nobly, and at times heroically, the duty of protecting property and life. Yes, gentlemen, you protect property in all its forms, from the palace to the most modest tenement, from the bank note to the coal dump. You protect science in protecting libraries from fire; you protect the fine arts in protecting museums; you protect even the laws in protecting legislative assemblies; you protect prayer itself in protecting places of worship in the community; above all that you protect life, of which in the olden times it was said that fire was the origin. Fire was worshipped in the olden times as being the origin of life, as being the creator of generations and of everything in the world. The soldier protects the country, and the legislator regulates society, but each and every one of you does more than that in his modest but heroic work as a fireman I need not enlarge upon that, for my English vocabulary does not contain all the expressions that would be deserving of the work you are accomplishing. Still, I do say that, as every one knows, your work is a noble one, and it is done with a generosity and a sense of duty that can be found nowhere else, not even in the best disciplined corps of the army and navy. (Applause.) Under the crown [the device of the crown upon the badge given the speaker] I see a uniting of the two flags, which all over this wide world should always and everywhere be united—the Union Jack and the Stars and Stripes—(cheers)—two flags, one of which has been created from the blood from the sinews and from the marrow of the noble men everywhere at first carrying the Union Jack, and typical of the two parts of the same family, the two great branches of that Anglo-Saxon race to which the ruling of the whole universe, I may say, is given, because when a man can claim the right of saying he is a British or an American subject everywhere in the world, he has a free pass, is a free citizen, is a free man. (Loud cheers.) . . . You say in your reports that everything should not be left to the heroism of the firemen. It is all very well to admire your courage, as you say, but why should this courage be left sometimes to be useless, because necessary precautions have not been taken by the different bodies that are ruling the citizens generally in the community. The prudence of every citizen, and the prudence of the legislature, should be directed towards framing laws so as to protect property, and especially other people against the selfishness of the man who builds a house, and who, provided he has an insurance upon it, will let it burn and go to ashes, not thinking that, perhaps, sparks from the fire which will give him back his money may set fire to properties around, and may not only destroy property, but also life. The man who has not chosen to take precautions has no right to say that the fire brigade was not equal to its duty; but the law should say he is guilty, and should find means, if not to punish him, at least to prevent him committing such offences.

The welcoming being over, and replies made by Chiefs Humphries, of Pittsburg, and Taylor, of Richmond, ex-Chief Damrell and Superintendent Abbott, of Boston, as well as by Mr. W. W. White, president of the Milwaukee Fire Commission, the association went into business session in the ladies' ordinary of the Windsor Hotel. Letters regretting their inability to be present were read from the chiefs of fire departments in Germany, Glasgow, Brighton, Belfast, London, Hilford, Chelton Heights, N.Y.

The first paper read was on the topic: "Theatre Fire Catastrophies," from the pen of Mr. W. Paul Gerhard, C. E., of New York City. It asserted that it was known that 576 theatres had been burned from 1777 to 1877, and of that number three were a hundred years old or more, but the majority were within five years of their construction, while the Bowery Theatre, of New York, had been burned five times. The most of the fires, the author held, were due to the inflammable nature of the scenery, and the lights; nearly all the fires occurred two hours after the close of the performance. In the case of four fires from 1880 to 1890 no less than 1,500 lives were lost. As remedies against these the author offered many suggestions, among them being fire proof buildings, sprinklers, a fire watch and a host of other things. Mr. Damrell thought that if the paper were analyzed it could be shorn of not a few of its assertions, so it was agreed to discuss it again. The session closed at a quarter to seven on Tuesday. Next week we hope to give some account of the proceedings on the succeeding days.

A CANADIAN RECORD.

Opening at random—for one hardly knows how else to begin—this volume of a thousand pages,* we find, in the sixth chapter, entitled, "Results of a Census," page 158, the rather striking fact that where 41.21 per cent., or nearly two millions of the Canadian population are Roman Catholics, and 56½ per cent., or nearly three millions, are specified as Protestants, the Salvation Army numbers almost fourteen thousand—actual number, rank and file, 13,949. It is clear that if the 4,703,714 persons who are classified as good Catholics, good Episcopalians, good Methodists, Presbyterians, Baptists and what not, were all that they should be, according to their classification, the efforts of the Salvation Army must, to be serviceable, be confined to the 129,525 remaining persons in Canada who are described under the heads: "Jews, Other Denominations and Not Specified." In which case there would be one Salvationist to every ten persons, which would afford a fair opportunity for personal argument by song or persuasion by drum beat on the part of these peripatetic soldiers.

The first 250 pages of the book are devoted to what is termed The Record, containing a brief description of our methods of government, etc., and the remaining three-fourths to The Abstract, a condensation, namely, of the population and resources of Canada. There are seven chapters in the first part and nineteen in the latter part. The table on page 106, giving the forest product of Canada, is a record of millions. Almost everything in the shape of wood, except walnut, spars and telegraph posts, was produced in millions, in numbers, or cords, or feet. White pine, in feet, nine millions; pine and spruce logs, four hundred and eighty-five millions (feet B. M.); tamarack, birch, maple, elm, oak, all millions of feet; firewood, ten and a half millions of cords; fence posts and railway ties, twenty-eight millions and ten millions; shingles, almost a million thousands. But how can the mind contain such figures? It would hardly be safe to transcribe the share of the various provinces and territories, so let us turn to something else.

The ninety pages of the Record which embody the examination of census figures of 1891 are laden with information in a condensed form. The labor bestowed upon them has been enormous. Every conceivable sort of analysis and proportion and ratio and percentage is to be found therein. The sexes of the people, the birth places of the people, the proportions of native and foreign born as compared with other countries, the number of married and single, the percentage of deaf and dumb and blind, the educational status. And here we pause to notice that of the adults 84.65 per cent. can read, while 66.5 p. c. can write. In a comparison of provinces in this respect Manitoba leads the list, while Quebec foots it. Manitoba, says the Year Book, with 93 per cent., is only excelled by Scandinavia with 97 per cent., Germany with 96, and Switzerland with 95 per cent. of her adults able to read and write.

It appears that the census enumerators of 1891 were unable to ascertain the occupations of 1,660,000 of the population of Canada. Of these there were engaged:

In agriculture, mining and fishing	790,210,	or 47.6	per cent.
" trade and transportation	186,695,	or 11.2	"
" manuf'g and mechanic pursuits	320,001,	or 19.3	"
" domestic and personal service	246,183,	or 14.9	"
" professional avocations	63,280,	or 3.8	"
" non-productive class	52,986,	or 3.2	"
Total	1,659,355	100.0	"

It shows how largely we are cultivators of the fields when we find 93 per cent. of the first division agriculturists, and only seven per cent. miners, fishermen and lumberers. Yet it did seem, until the figures appeared, that we must have in Canada more miners than 15,168, more lumberers than 12,756, and more fishermen than 27,079. However, this class of the population, 790,000 in number, is described by Mr. Johnson, the statistician, in his philosophic way, as constituting 47.6 per cent. of the whole number whose occupations are given. "It draws from the field, the forest, the mine and the sea-pastures the products which sustain life and provide materials for shelter and for clothing—the three primal wants of humanity. This class contains the primary producers."

Those in Class 2 are termed the distributors, engaged in trade and transportation. Of retailers there are more than forty thousand (40,714), and of wholesale merchants 1,712. We have 13,928 sailors and 23,552 railway employes—a startling discovery, for most people, considering our sea coast and our lake shores, would not have believed that the "land sailors" nearly doubled the water sailors in number. Then there are 17,409 expressmen, teamsters, draymen, etc. In the same class, as "aiding in the work of distribution," Mr. Johnson places 2,174 bankers, bank officials and agents.

Such books as this are invaluable to the publicist and the politician; they are also useful and should be better known than they are to the manufacturer, the banker, and the merchant. They are "the abstract and brief chronicles of the time," if the compilers will permit the quotation, and for a reason not altogether unlike Hamlet's, they also should be "well bestowed." There are, to be sure, some things in the equipment of a people that cannot be reduced to ratios or expressed by figures. And there are limits which statistics may not with impunity attempt to exceed. But in this Year Book of Canada is given the result of conscientious and ingenious work. And the exhibit made is one that should make Canadians proud.

*The Statistical Year Book of Canada for 1893—issued by the Department of Agriculture. Ottawa: Government Printing Bureau.

—British exports to Canada during July declined 40 per cent., the heaviest declines being in cottons, woolens, silks and iron. The imports from Canada were stationary.

A YEAR'S SHIPWRECKS.

Two hundred and sixty-four steamers of a tonnage of 100 tons or over were wrecked in the year 1893, which means a wreck every day for five days a week all the world round. Such is the record presented by the London Lloyds. The total gross tonnage of these wrecked vessels was 297,950 tons and total net tonnage was 192,299. Of this number 31 vessels were constructed of steel, 210 of iron and 23 of wood and composite material.

Great Britain and her colonies owned nearly two-thirds of the steam tonnage wrecked, the number of their vessels being 152; tonnage, gross, 189,039; net, 118,686. France lost 13 steam vessels in the year, whose total gross tonnage was 21,777 tons, and Spain 11 of 14,117 tons. The United States lost 11 steam vessels, whose total gross tonnage was 14,581 and net 10,203. Norway lost 15 steam vessels, with a total gross tonnage of 8,025 tons. Germany lost 14 steam vessels, whose total gross tonnage was 13,278 tons. The Central and South American countries lost 12 steam vessels, with a total gross tonnage of 8,512 tons. Other countries lost from one to nine, Sweden being especially fortunate, considering her forward rank as a maritime power, in losing only one steamer.

Of sailing craft the loss by shipwreck all the world over was heavy last year, too. Two or three wrecks every day is the proportion indicated by the figures given in Lloyds' register. The total number of sailing vessels lost of all countries in 1893 was 967, whose total tonnage was 445,185. The material of construction used in the sailing vessels lost was: Steel, 13 vessels of 21,162 tons; iron, 52 vessels of 53,133 tons, and wood and composite material, 902 of 370,890 tons. The total number of steam and sailing vessels lost last year is thus 1,231, whose total tonnage was 743,135.

Great Britain and the colonies lost 20 vessels every month, or a total during the year of 242 sailers, with an aggregate tonnage of 128,800 tons. Norway ranks next with a total of 227 sailing vessels lost, whose tonnage was 111,889, and the United States comes third in the list with a total of 158 sails lost, whose aggregate tonnage was 73,611. Italy, like Sweden, lost 52 sail. The tonnage of Sweden's wrecked craft was 15,280, an average of 294 tons per vessel. Germany lost 72 and France 32. Denmark also lost 32 sail. Other countries not mentioned lost from one to 21 sailing vessels each.

In the case of both sail and steam vessels collision was the most fruitful cause of destruction, and under this head are included vessels that were lost through striking sunken wrecks, icebergs, rocks, etc. The losses by fire were not proportionately large, but a considerable number of vessels foundered for reasons other than collision.

Great Britain, including her colonies, lost 37 vessels by collision, 19 foundered, 12 were burned, 25 were abandoned at sea, 60 were broken up or condemned, 45 were reported missing, and 196 were wrecked in manner not specified. The United States lost 11 by collision, 10 foundered, 8 were burned, 16 were broken up or condemned, 23 were abandoned at sea, 22 were reported missing, and 79 were wrecked in manner not specified. Other nations lost for the same causes in about the same proportion.

THE APPLE CROP OF 1894.

A forecast of a growing crop is very often disappointing. There are two sources from which information may be received, the growers and the buyers, one class seeking to bull the market and the other to bear it; and thus reports, to a greater or less degree, reflect the desires rather than the honest opinions of these reporters. The statement given to the press at the recent meeting of apple buyers in this city that "crops will be large and prices low," was undoubtedly of this character, and the strenuous assertions which it brought from some growers that the crop would be almost a failure is of the same description.

From the sources of information which are open to us we incline to the view that the Ontario apple crop will, with continued favorable conditions, be moderately large, but by no means an excessive one. However, since the Americans compete with us in the same market, it becomes of importance to consider the crop possibilities of the United States. In the New England States there is every indication of a good crop. California promises well, as do some other western States. There will in all probability be a big yield in Kansas, while from Missouri come reports of a largely increased acreage. In Indiana and Ohio the crop is almost universally reported as poor. Great things are expected of the Ben Davis apple in some of the States; it ships well and is thus well adapted to the export trade.

A usually well-informed man places the Ontario crop at 1,500,000 barrels. This is of course only an opinion, and may turn out to be very wide of the mark. The best apples in the province will probably be picked in Essex and Kent counties; the apples of these counties are for the most part Greenings and Baldwins, and promise to be of excellent quality. Spies are going to be a medium crop, but in some districts the quality will be poor. The counties of Grey, Middlesex, Oxford, Brant, York and Northumberland have fairly good prospects. A summary of the situation throughout the province gives the following results: summer apples, 75 per cent.; fall apples, 30 per cent.; winter apples, 40 per cent. As yet we have received little information from the other provinces as to the prospects of the apple crop. A correspondent writes from Wolfville, N.S., however, that the yield in Nova Scotia will not be more than half the average amount.

HOPS.

The 1893 season, now drawing to a close, has been full of disappointments. The new crop last year was fully 10 per cent. less than that of 1892, and yet, with comparatively no surplus carried over, the market has throughout the year been a falling one. A cause can be found only in a decreased consumption of beer, due to the general depression and a plethora of industrial disturbances. The prospects for the growing crop are, from a buyer's standpoint, very favorable. Reports from the Pacific coast, including British Columbia, where the acreage is being rapidly increased, indicate a crop fully 15 per cent. in advance of last year. The New York State hop yards are as a rule in excellent condition. From England reports are not so favorable, vermin having made their appearance, while recent unfavorable weather has caused mould in some districts. With the one exception of Belgium, where vermin are doing much damage, the continent promises a large yield, and the quality of German hops will in all probability be excellent. The question of future prices is full of uncertainty, but with an improved industrial situation large crops may not mean low prices.

MANITOBA CROPS

The Manitoba Government issued an official crop bulletin on Wednesday of this week. The total yield of wheat is estimated at nearly 16,000,000 bushels, which is an average of between 15 and 16 bushels to the acre. The average for the whole province has been materially reduced by unexpectedly small yields in the eastern and south-western districts. This has been caused by excessively dry weather. The total yield of oats will be 12,200,000 bushels; barley, 2,200,000; peas, 20,000; flax, 300,000; rye, 54,000; giving a gross total of all crops of nearly 31,000,000 bushels. The hay crop is reported light, averaging 1.52 for the province. The potato and root crop, however, is reported as good. To the bulletin the Government appends this remark: Correspondents have, in general, estimated the grain yield at what might be expected if dry, hot weather continued, remembering how the crops suffered last season just before cutting. The conditions at present are favorable, and the yield will in all probability exceed the estimates.

DRY GOODS JOTTINGS.

The button trade is dead.

Rustic straw hats are popular in Paris.

The color of mourning in Corea is bright red.

Vests are cut closer up, with square pointed collars.

A large business has been done in sweaters this season.

Braids, with fur edgings, are good sellers for trimming purposes.

Are your price tickets soiled? If so, replace them by new ones.

Satin surahs are becoming popular in European centres of fashion.

In Paris white and pearl colored gloves are in use for general street wear.

For winter ribbons remember deep rich reds and glycine or wisteria mauves.

Bonnets are without strings for fall, but have ample bows of silk or velvet ribbon

Overcoats for the coming winter are longer by three inches than those worn last year.

Satin duchesse is receiving considerable attention from the buyers of silks in New York.

Messrs. R. C. Milne and F. Spittal are beginning business in hats and fur goods in London.

Jet trimmings are selling well, but some are inclined to think that braids will outsell them in September.

In gloves you should carry a well assorted stock of black, modes, tans, browns and grays for the fall season.

Messrs. Larue & Picard shipped ten thousand dollars' worth of fur from Edmonton, N.W.T., one day last week

The Indians from the Brant reserve during the last season earned about $1,500 by pulling flax in the vicinity of Embro.

The indications point to higher prices of silks, at least in Asiatic lines, if the Chinese-Japanese war be continued for any considerable time.

School days are a week nearer at hand than when we last wrote. Your advertisements should read "Good Serviceable Clothes for School Wear."

What a difference plate glass windows make in the appearance of a store! If you havn't got them as yet, why not put them in now during the quiet season.

Silk velvets moired in spots, figures and floral designs are a new thing. They are used for millinery purposes mainly, and may be had in all the different shades.

British exports of cottons, woolens and silks to Canada during the month of July show a marked falling off when compared with the July exports of previous years.

Foulard dresses trimmed with lace are greatly in vogue with Parisians for seaside wear. The material is supple, does not crease much, and has the advantage over piqué that it falls better to the figure.

Covert cloths are a good thing in dress goods in the United States, but as yet they have taken no hold of the Canadian trade. This fabric is a smooth-finished worsted, in fawns and greys, but new patterns are constantly being shown.

Something like 200,000 workers of Great Britain, America, France, Austria, Belgium, Denmark and Holland were represented at an international conference of textile workers held in Manchester, England, during the closing week of July.

China linen is a new underwear fabric. It is woven of attenuated threads of ramie, is thin and light, has a marvelous gloss and is as cool as rose leaves next the skin. Its wearing qualities are surprising, and even from the crudest washing it comes out crisp and smooth as satin.

One of the most fascinating millinery novelties of the season in Paris is a hat made of linen, lined with black chip, trimmed with a scarf of chiffon, and chiffon rosettes which cluster round the base of two black quills. This is really charming, whether made in Holland linen, pink, or blue, and is original and *chic* in effect.

In the ready made clothing line the reversible smock is having good sale, especially in Manitoba and the Territories. One side of this coat is made of cottonade, the other of etoffe. Made with double sets of pockets and facings, it may be reversed at the pleasure of the wearer. Thus, the farmer when going to town may drive in a smock protecting him from the weather, and when at his destination may appear on the streets in a good looking coat.

Manufacturers of ostrich feathers, says the *Economist's* Berlin correspondent, are very busy. They have ahead a season such as they have not seen for many years. It cannot be said that any special article in this branch is a leader, everything made of ostrich feathers being good. Long and half-long amazones find a good market. Ostrich feather trimming is liked. In this latter are seen many variations. Chinese and rolled borders have entirely disappeared, but in their place are seen borders made of small feathers in the form of a large strip of ostrich feathers on which are added small tips. This style has so far been brought out in black only.

FOR GROCERS AND PROVISION DEALERS.

The oyster is getting in shape for fall business.

London bakers have held a most successful picnic.

Canadian refiners have advanced prices ¼c. per lb. during the week.

Apples in Nova Scotia will probably give half a crop, pears nearly a full one.

Montreal trade in California fruits is good this year and sales are well attended.

"Fresh Canadian salmon" is now prominently advertised in New South Wales journals.

The shop of a Montreal grocer, Mr. Edward Upton, was entered by burglars last Saturday night.

Cable advices from Amoy report a sharp advance in the cost of black tea, without further particulars.

Recent advices from Greece indicate that the currant crop will be considerably smaller than that of last year.

The Fruit Exchange of San Francisco has adopted four grades for dried fruit—fancy, choice, standard and prime.

Messrs. Hoegg & Co., Fredericton, N.B., expect to can between 50,000 and 75,000 quarts of blueberries this year.

The close season for salmon in the Maritime Provinces began on the 15th inst. The season has been a most successful one.

Mr. A. Ogden, who is in charge of the lobster hatchery in Pictou, has distributed this year one hundred and sixty millions of young lobsters.

The Niagara River Fruit Growers' Association estimate the entire grape crop of that district at 300,000 baskets. The plum and pear crops also are very large.

Six carloads of tea, comprising some 2,651 packages, arrived in St. John, N.B., on the 9th inst. The tea came by the Northern Pacific, in forty-eight days from China.

According to semi-official report there were 11,640 tons of raisins in stock in London on July 31, 1894, against 8,650 tons at corresponding date last year, and 8,300 tons in 1892.

Samples of new Ceylon teas are to hand and the quality is not of the very best description. Advices from Colombo, however, indicate that later shipments will show improvement.

A report from South Carolina says that advices from all parts of the rice district tell of the splendid condition of that crop, as fine prospects as for many years past for large yields, barring loss by storms.

The pecan belongs to the family of hickory, and is found growing in its wild state from the Gulf of Mexico to the Great Lakes, but principally in the rich soil along the Wabash, Missouri, and Mississippi, and many rivers in Texas and Arkansas.

The Department of Marine and Fisheries has been requested to establish a close season for frogs, the petitioners alleging that great injury to the frog fisheries in all parts of the country results from the killing of frogs during the breeding season.

The latest mail advices from Kobe, Japan, are to July 10th, when the rice season was reported closed. The exports for the season amounted to 44,465 tons undressed and 20,401 tons polished, making total of 64,866 tons, and comparing with last season's shipments at 60,641 tons undressed, 32,423 tons dressed, or a total of 93,064 tons.

Woodall's report on the Canadian apple trade in Great Britain says that the prospects for the coming season are even better than in the bonanza years of 1891 and 1892. The report further states that there is scarcely any fruit worthy of attention in the British isles or on the continent, and that the importation of apples must necessarily be heavy.

Arrivals of teas at this port *via* the Suez Canal during the year ending July 31st amounted to 781,279 packages, of which 648,330 were China and 132,949 Japan growth. In the previous year 810,690 packages were received from China and 163,803 packages from Japan. There would thus appear to have been a decrease the past year of 193,214 packages in the movement over that route. The decrease was 162,360 packages China and 30,854 packages Japan. This covers about the entire movement of 1893 crop teas over the Suez route.—*N. Y Journal and Bulletin of Commerce.*

SHOE AND LEATHER NOTES.

Wholesale jobbers and manufacturers are not carrying heavy stocks.

Carson & Shore, of Calgary, have opened a harness shop in Edmonton.

Bolata, the product of a tree in Sumatra, threatens to become a rival of India-rubber and gutta-percha.

These are athletic days, and sporting footwear is in good request. The increased sale of cyclists' shoes is especially marked.

Men are like shoes. When shoes are worn out they are mended. When men are worn out they are men dead, too.—*Philadelphia Record.*

People should never go in the early morning to get boots and shoes fitted. In the latter part of the day the feet are at their maximum size. —*Philadelphia Record.*

Not long ago cork soles were exclusively confined to fine grade shoes. But this, with an increasing demand for these goods, ceased to be the case and all may now enjoy this luxury.

American rubber factories are pushed to their utmost capacity to supply orders. This is a consequent of an agreement among the factories that a 5 per cent. discount would be allowed on goods delivered prior to Aug. 31st.

Glycerine imparts considerable suppleness to leather, but soon sweats out in damp air. To fix it in the leather, it should first be incorporated with four times its weight of the buttery mass made by dissolving beef-fat in warm cod-oil.

The holidays are drawing to a close and school days will soon begin. Are you prepared to meet a demand for children's shoes? Display them, advertise them in your newspaper cards, always making special mention of their durability.

A manufacturer who has two factories, one engaged in making high class footwear, and the other making cheaper goods, says that the demand for low-priced boots and shoes has reached enormous proportions. Retailers are asking for stylish footwear at the lowest possible cost.

Carry few, if any, russet shoes over this winter. In no other line do manufacturers strive more to introduce new styles than in russet footwear, and those who buy these goods are the classes who want the latest styles. Place yourself in a position to handle all the new spring styles.

"Polish?" is now as often as "Shine?" the bootblack's form of enquiry. The change does not result from the spread of education, but from the introduction of the russet shoe. It is a manifest absurdity to talk about shining a thing that was never meant to shine, and so the adoption of the word polish.

Creaking shoes are an intolerable nuisance, yet some shoes will creak, notwithstanding every precaution. For such intractable wear it is recommended to pour a small quantity of linseed or sweet oil upon a flat surface, like a platter, and allow the soles of the shoes to stand in the oil over night. In that way they will not only lose the squeak, but will become saturated with the oil, making them proof against dampness. Another cure may be effected by taking them to a cobbler and having one or two pegs driven into the centre of the soles.—*Shoe and Leather Review.*

Since the style for long, narrow, and very pointed shoes has grown popular, there are a great many badly shod feet to be seen among the fair sex. In order to wear the decided point it is necessary to buy shoes a trifle longer, and the space not occupied bends in after a little wear, giving a very shabby effect to the feet. A bit of cotton batting stuffed in the toes when the shoes are new will avoid this ugly defect. A light colored shoe, particularly white, requires feet irreproachable in shape, as they render the feet very conspicuous.

We referred recently to the great loss in handling patent leather shoes. The *Economist* has the following to say in regard to the care of these goods: "The patent-leather stock should be gone through once a week, thoroughly wiped with a woolen cloth, and, if dull, a little oil of turpentine should be applied and rubbed on briskly with the cloth. This will restore the lustre. A strip of Canton flannel, about ten inches wide and long enough to wrap about both shoes, should be used for each pair. This will keep them free from dampness and prevent their moulding or cracking in cold or damp weather.

Culverwell, Brooks & Co., London, Eng., in their last circular say: "The hide trade has been rather steadier, with a little more enquiry at the low prices current, but no disposition to any marked improvement. The heavy supplies of cheap foreign leather still deter our manufacturers from extending operations. Salted hides have sold to a small extent, the firmness of holders preventing larger transactions. Dry hides have moved rather more freely, the supplies pressing on the market having been reduced. East India kips remain almost a dead letter, and no sales beyond sample bales are reported." Of leather the circular says: "The market for English tannages has been extremely quiet, and at weaker prices no extended business can be carried through. East India tanned kips have met a better trade, and values are ¼d higher all round for Madras, but unchanged for Bombay. Australian sides of common quality have sold very slowly at the lowest quotations, but the better tannages are steady."

INSURANCE MATTERS.

"How can a man be a good citizen," asks an American exchange, "and not carry any insurance on his life?"

Mr. Harry J. Stevenson, W.S., has been appointed secretary of the North British and Mercantile Insurance Company, in succession to Mr. Philip D. R. Maclagan, recently appointed manager of the company.

In commending the Manchester Fire Assurance Company for having issued some desk blotters, bearing a representation of the Tower Bridge across the Thames, the company is declared by an English journal to be "up-to-date" in its advertising media.

Inflammatory extravagance, superinduced by the Rebate Appendicetis! That's what's the matter with life insurance, from the agency standpoint, as near as one can deduce from the debates and the papers and things produced at the conventions.—*Monitor.*

Chicago has a fine collection of undergrounders, most of whom are of Eastern birth. The East allows financial pirates to fit out within its borders for a cruise of plunder in the West. This is unjust to the West and the law abiding corporations of the East.—*Argus.*

The month of July was very hard on the Chicago firemen, says Chief Swenie. During the first twenty-seven days the department had a run every twenty-five minutes, night and day. The alarms during the strike were frequent and it is to the credit of the department that the loss was kept at so low a figure.

The Vancouver *World* of August 8th considers that business men of Nanaimo are in an unfortunate predicament. "Since the fire in May the insurance companies have cancelled policies wholesale, and refuse to renew unless at exorbitant rates. It is thought that if a paid fire department is organized, and an improved water system put in, that will renew confidence amongst the insurance companies. A public meeting will be held to discuss the matter."

Life insurance is a science. When a comparatively ignorant set of men arise and tell you that they can sell life insurance at half price and set at naught the experience of the old and staple companies, their failure is only a question of time. People must die. The claims must be paid and the cardinal principle of these organizations is to get in a lot of new people to pay the claims. For a few years they all live in a fool's paradise. They who die promptly win, they who live have to bear the burden of the increasing assessments until Old Mortality bears upon them all so heavily that a receiver comes to their aid and kindly buries the organization.—*Weekly Statement.*

Not a bad idea, that described by a writer in the *N. Y. Telegram*, of people taking out fresh life assurance in hard times. He tells how hard times help his business, thus: "Owing to depressions in all lines of investments and securities during the last eighteen months, many people have made up the temporary deficiencies in their assets by taking out additional or new life insurance policies. I have had men come to me and say: 'I don't know whether I'm worth $300,000 or $50,000 to-day. My folks believe I'm worth the former figure. I'll try and make it sure by taking out a new big life policy.' The result of this is that business is just as large to-day with us during dull trade times as it was in flush times."

PATENT RECORD.

The following list of United States patents granted to Canadian inventors July 17th, 24th and 31st, 1894, is reported for this paper:

Robert S. Anderson, assignor of one-fourth to J. J. Beatty, Toronto, Ontario, pneumatic tire.

Job Dudley and R. E. Gibson, Toronto, Ontario, ticket punch.

James R. Gordon, Sudbury, assignor of one-half to A. W. Fraser, Ottawa, Ontario, ore crusher.

James C. McNabb, Montreal, Quebec, stop cock for air brake systems.

Thomas Parker, Wingham, Ontario, pump.

George N. Pearson, Huntsport, Canada, thill coupling.

Henry Sewrey, Barrie, Ontario, metal driving belt.

William Taylor, Carman, Ontario, band cutter and feeder for threshing machines.

William E. Stafford, Shedden, Canada, riding attachment for plows.

Oliver W. Ketchum, Toronto, Ontario, sheet metal pulley; design patent for 14 years.

Thomas H. Bell, Brampton, Canada, fruit cleaning machine.

Richard T. Brooke, Paris, Canada, boiler tube cleaner.

Colin C. McPhee and L. E. Brock, Chatham, Ontario, chair cot.

LIVES OF WOMEN AND MEN.

The relative longevity of men and women is a subject in which interest has long been taken. Some statistics bearing upon it are furnished by Mr. Brandreth Symonds, an insurance company's medical officer in the old country. From these it appears that the toughness of the elderly woman, which has become a proverb, is a fact as well, and exists indeed throughout later life.

The female makes a better showing, in the matter of longevity, than the male. It appears from Mr. Symonds' figures that even from birth the mortality of boys is greater than that of girls, the lines crossing at one point only during a critical period of development from twelve to sixteen. At that age the mortality among girls is 1.68 per 1,000, and of boys only 1.18. From sixteen to twenty, however, the position is reversed, the mortality being 1.70 for females and 2.21 for males. From that point onwards the difference is gradually diminished, and at the age of forty-six years the sexes are practically neck and neck, the mortality being 11.11 in each. The record of the decade which follows is curious, as being unexpectedly bad in the case of men, and unexpectedly good in the case of women, for whom it is usually supposed to represent another critical period. They fall off, however, in the race for longevity, between 55 and 60. After this the men are nowhere in the struggle for existence and women (especially widows and pensioners) are easy winners in the comparison.

OIL MATTERS.

Midsummer dulness, says the *Petrolea Topic*, reigns paramount in the oil business. Drilling is dead, we had almost said dead and buried, but nothing half so energetic as buried has happened to the business. Drilling has stopped; just died a natural death. It will require nothing short of a miracle to resurrect it, for a time. With the general resumption of business in the fall, and the consequent increased circulation of money, and the probable higher price of oil, we may hope to hear the music of the drill again, but not till then. The "dynamitards" or shooters are all taking their holidays, having nothing to shoot. In the producing circles the price remains firm at 95 cents for Petrolea and 96 cents for Oil Springs crude, with a good demand, and generally firm feeling abroad.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, August 16th, compared with those of the previous week:

Clearings.	Aug. 16.	Aug. 9.
Montreal	$9,373,868	$10,110,153
Toronto	4,112,562	4,864,292
Halifax	1,298,980	1,240,723
Winnipeg	845,289	985,321
Hamilton	535,869	593,921
Total	$16,166,568	$17,794,410

Aggregate balances this week, $2,208,400; last week, $3,832,396.

—A matter of considerable importance to trades unions, and which arises out of the strike last year on the Lehigh Valley Railway, will shortly be ventilated in the United States courts. It appears that Mr. Clark, grand chief of the Order of Railway Conductors, ordered some forty of the men on that road to quit work. At his request they "went out." During the time of their enforced idleness, they claimed, they lost from $200 to $250 each in wages, and after the strike was over they demanded compensation for the same from the Grand Lodge. As this was denied, they are bringing the matter before the courts. The theory of their complaint, according to the *Inter-Ocean*, is that when a man, a firm, a corporation, or "an order" engages or employs men to do a thing beneficial to the engager or employer, liability for compensation of the engaged or employed begins. The forty-eight conductors who obeyed the orders of the Grand Lodge of Conductors were working for the Grand Lodge. The question is as to the liability of the lodge to its servants, for such all who went on strike at its command were. Should a favorable decision be given the plaintiffs, we shall have fewer strikes, and when a strike is ordered "the lodge" will require to be in funds.

—In a paper contributed to the August *Forum*, on "How the Bills of Socialism will be Paid," Mr. Sylvester Baxter asks whether the editor of the *Post*, Mr. E. L. Godkin, would not qualify the following statement: "It makes no difference to me where I get my gas, or water, or transportation, provided I get it good and pure, provided I am not forced to take it if I do not want it, and provided I am not compelled to pay for anybody else's supply?" Mr. Baxter says it should make a vast difference to a friend of good government whether he obtains these supplies from sources that rank with the chief causes of the corruption of government—as do the great lighting, water and transportation corporations, as a rule. "I am not sure, however, that to allow the city government of New York to do things which it is perfectly safe to let the corporation of Birmingham or Berlin do, would be extremely foolish. On the contrary, I am inclined to hold that because it is not permitted to do these things is precisely the reason—or at least one of the main reasons—why the New York government is so bad."

—Not every business organization whose members go upon as pleasure excursion seizes the opportunity to hold a business meeting. But on the occasion of an excursion to Sorel by steamer last week—after dinner, too, and in spite of the dancing going on all round them—the members of La Chambre de Commerce de Montreal held a special meeting on board the "Three Rivers." Those present were M. H. Laporte, president, in the chair; Messrs. F. D. Shallow, Charles Desmarteau, Alphonse Racine, Elie Geoffrion, G. Boivin, D. Parizeau, M.L.A.; C. H. Catelli, O. Dufresne, jr., Joseph Fortier, and S. Cote. Amongst other gentlemen present were the Mayor of Montreal, the Mayor of Longueuil, and Mr. Henry Bulmer. The principal busines, of this special meeting was to discuss the building of a home for the Chambre on the lot at the corner of St. James street and St. Lambert hill, fronting 115 feet on St. James street, and 85 feet on St. Lambert hill. The $500 necessary to obtain an option upon the ground was subscribed by those present, and it is considered certain that the Chambre will eventually purchase the ground.

—Now that the duty on bituminous coal going into the United States may be regarded as fixed at 15 cents per ton, some interest has been aroused as to its possible effect upon the Dominion Coal Company, which operates in Cape Breton and in that sort of coal. The Boston *Globe* had an article on the company last week, which denied, on the authority of its treasurer, the statement that the company was organized on the distinct understanding that its future was to depend upon the placing of coal upon the free list. Not only so, but the company is unable to supply the present demands upon it from within the Dominion of Canada. Something like 500,000 tons of the total output of about 1,000,000 tons is being sent to Montreal alone, and the company's agents there would take much more if they could get it. "In fact," says Mr. McLennan, "the business of the company is so prosperous that a small dividend on the common stock is not impossible in the near future."

—The annual statement of the Post Office Savings Bank of Canada for the year ending June 30th shows that the number of offices open at the close of the year was 699, an increase of twenty-six over the previous year. The number of accounts remaining open was 117,020, and the amount standing at the credit of depositors $25,257,868, both being the largest ever known. The average amount at the credit of depositors was $215.84, which is the largest ever known, with one exception, namely, in 1887, when it was $216.26. The total amount deposited during the year was $7,524,286, the largest amount, with the exception of 1893, since 1889. The withdrawals amounted to $7,473,585. The total expense of management was $56,612, which is the smallest amount since 1890. The percentage of cost of management to balance the depositor was 0.23, as compared with 0.25 last year.

—Messrs. James A. Cantlie, F. J. Hart, C. F. Smith, T. J. Drummond, and George Hadrill, from the Montreal Board of Trade; D. G. Thomson (president), R. Peddie, John Baird, A. G. Thomson, James Allen, E. F. Craig, R. M. Esdaile, from the Corn Exchange; L. J. Forget, Gordon Strathy, H. S. Macdougall, J. R. Meeker, and G. W. Hamilton, from the Stock Exchange, were a committee to wait upon the Mayor of Montreal, on Tuesday last, and present a petition, objecting to the proposal to place a tax of $100 a year on brokers and commission merchants. Mayor Villeneuve promised to bring the petition before the council, expressing a hope that justice would be done in the premises.

—A portrait of Mr. Philip Robert Dalrymple McLagan, manager of the North British and Mercantile Insurance Company, appears in the July issue of the *North British Economist*, and forms No. LIX. in the series of portraits and sketches of Scottish bankers, merchants and underwriters issued by that journal in recent years. The picture represents a face not unlike that of the Rev. Wm. Rainsford, late of St. James' Cathedral, Toronto, now of St. George's, New York. A frank face, with a sort of invitation in it, keen eyes, a firm chin, and a wholesome look generally. For the rest, the sketch tells us, Mr. McLagan has a fire insurance strain in his blood, and he is a famous golfer.

—In the August issue, the *Bankers' Magazine* of New York says: "One of the excellent practices of Canadian banks is an annual review of their business at their annual meeting of shareholders. This practice is worthy of imitation. The review is either by the president or general manager, or both officers, and at the conclusion the shareholders are invited to ask such questions as they please." Several pages of the same issue are devoted to remarks made by the president of the Canadian Bank of Commerce, and by the general manager of the Merchants' Bank of Canada, at the meetings of those institutions.

—It is satisfactory to learn that advices from London to the Bank of Montreal are to the effect that the £410,000 worth of 4 per cent. Montreal debentures, which were placed on the London market last week, have been over subscribed for by English investors by £200,000. Some such reception might have been expected in the same quarter for our Toronto 3½ per cent. bonds had they not been discredited in advance through the approval by the Council of a municipal fire insurance scheme. Instead of an over subscription, however, the deputies are offered 90, and are coming indignantly, not to say ingloriously, home.

—We have printed elsewhere the invitation to Boards of Trade in various parts of the United States and Canada to send delegates to attend a convention to be held in Toronto next month on the subject of deepening the waterways of this continent. The Board of Trade has appointed this committee to confer with the city council with respect to the convention: Hugh Blain, S. Caldecott, E. B. Osler, J. L. Spink, D. R. Wilkie, M. McLaughlin, John Donogh, C. Cockshutt and E. Samuel.

LESSONS OF THE RECENT PAST.

A paper with this title was read at the last convention of the Tennessee State Bankers' Association by Herman Justi, president of the First National Bank of Nashville. We copy a part of it from the *Banker's Magazine*:

We speak of the recent past as though all our troubles burst suddenly upon us. Is this true? Are they not rather the penalty required of us for the sins, the blunders and false policies of a decade, or of a generation? We sometimes say of a man that he became suddenly ill, apparently without cause. While it is true that illness may suddenly manifest itself, the man has been out of health without knowing it, or, if knowing it, without concerning himself about it, so that he has gone on doing imprudent things until his physical nature has rebelled, and has laid him prone upon his back. So it was with our recent troubles; regardless of consequences we had been defying certain well established economic laws. It needs no argument to prove that we were unprepared for the storm. Our house, so to speak, was in the greatest disorder, and invited the fierce elements that ultimately overtook us. What happened, therefore, while unexpected, was a natural consequence. So greatly had we abused natural laws for a long time, that even a distinct warning, unless it had come three years ago, would not have enabled us to prevent, in some form, the trouble that finally came.

CO-OPERATION AND MUTUAL HELPFULNESS.

Let us survey the situation in a calm, broad-minded and intelligent spirit. What is our first duty and greatest need? The importance, if not the necessity, of co-operation among the banks of this State, and of the United States, cannot be overestimated. We cannot be blind to the troubles and disasters of last summer, when, in this State, at a most critical moment, each banking institution was forced to depend on its own individual resources. Surely we all know how soon the limit of the individual resources of banks—of even the greatest banks of America or Europe—are reached under the strain and pressure of a great financial crisis. A while ago the Bank of England came to the rescue of the Baring Brothers and so saved Great Britain, and in return the Bank of France went to the relief of the Bank of England to save Europe, and had the banks of New York city stood apart last summer, instead of co-operating and acting in perfect harmony, universal bankruptcy would have ensued.

Are we to profit by the wise example of the Bank of England, of the Bank of France, and of the New York bankers? Shall we confer and co-operate and help each other as they did, or shall we pursue a selfish, niggardly, short-sighted, yea, criminal policy, to the destruction of many interests and the ultimate injury of all? I cannot bring myself to believe that we have fallen so low in the scale of human intelligence, nor can I think that honor and virtue in men have reached so low an ebb. I prefer to think well of all men, and I shall hope with the sad experience now past, but fresh in our minds, we shall act wisely, taking counsel one with another and uniting in a policy of mutual helpfulness.

SAFE BUSINESS MAXIMS IGNORED.

"Be slow and sure" is a safe motto given to us by our fathers, which we should have followed as our guiding star. I once knew a miserly old man in Kentucky who, it is said, made it a rule of life never to accept more than 6 per cent. on money loaned. He might accept less, but never more. There was a time when, to me, and no doubt to tens of thousands of other men, this seemed absurd. He not only observed this rule, but he always insisted on the absolute security of his principal. As to the security of the principal he would take no risk. Every other consideration was subordinated to that of safety. Never to spend more than his income was a religious tenet, and I know positively it was a tenet he kept inviolate.

When this old man died a few years ago, he left a large fortune to a family of boys, who, you may guess, have since spent it. Few tears of sorrow were shed by his kindred or by his friends, although of friends I fear he had almost none, for such men seldom have devoted friends. I do not mention this instance because I approve of the man, but because his experience emphasizes what I am going to say. Whenever we spend more than we make, we get on dangerous ground. This idea need not be elaborated, for we know that debt murders the sleep of honest men. The rule of the old Kentucky miser who refused more than 6 per cent was based upon this sound theory: The larger the interest the greater the risk. The man of means who tries to make his capital earn more than 5 or 6 per cent., is in danger of coming to grief, and the man who has no means, but borrows his capital and tries to realize more than 5 or 6 per cent. net, is almost certain to bring some one else to grief. It is, I believe, a well established principle of finance that in every legitimate business wisely conducted, taking one year with another, there is a reasonable certainty of about 6 per cent. net profit. This would mean that each year a prudent business man would add something to his capital, and so in that proportion increase his income. Whatever, in excess of this, his estate is worth, is merely natural appreciation. Whenever we ignore this rule and try to make money earn a greater yearly average than 6 per cent., we violate a fixed inexorable economic law.

The collapse of the late boom always vividly recalls a picture that appeared a few years ago in one of our illustrated papers. The picture represented a poor fellow who had just awakened from that deep sleep into which drunkards fall after a night's debauch. He was sitting on the edge of his bed and was contemplating, in a hand-glass, his disfigured and court-plastered face. He is represented as musing over his past experiences and present state, and saying: "Well, I have had a hell of a time." So it was with thousands of good men in this great State last summer, when collapse and liquidation were the orders of the day. We awoke from our dreams and exclaimed: "Oh! what a night."

It seems we will not discriminate between the distribution and obliteration of wealth, between investing and wasting. Scattering our means broadcast and building iron furnaces and grand hotels in out-of-the-way places is not distributing wealth, but simply wasting it. Wealth, unwisely used, is a curse. A proper use of our lately dissipated wealth would have fortified us against last summer's panic.

THE BLAME IS OUR OWN.

We lay too many of our troubles upon Congress and upon our State Legislature. I admit that, secondarily, much of the blame belongs there, but primarily the fault is ours. Failing to discharge our duty as American citizens, we complain that our public men are inferior in ability, deficient in statesmanship, and mentally, if not morally, dishonest. If we remain away from the polls or the primaries, if we are silent when we should speak, if we either have no convictions, or having them persist in concealing, stifling or disguising them, we have only ourselves to blame when our laws and our lawmakers are not what they should be. A firm and respectful avowal of conviction is the duty of every citizen who loves good government. If we are indifferent in elections and then expect attention when we are being hurt by adverse legislation, we must blame ourselves alone. Recent monetary legislation shows it is absolutely necessary to keep up the education of the people as to the characteristics of honest money. Each generation must be taught. It is not sufficient to send men to Congress that from time to time they must be instructed what to do. We must send men in whose patriotism, ability and honesty we can put the fullest trust. We must not make our Congressmen agents for a lot of office hunters. Too many Congressmen are mere employment agents for the boys that have been running the machine, and statesmen who refuse to do the bidding of this hungry horde are often retired. We look for too much from legislation We charge it with every mistake of our own, and we look to Congress to make times good and money plentiful. We really make times bad and money scarce by depending too much upon everything else than our own labor, energy and good sense. We lay undue stress on the insufficiency of our laws, when in truth the chief fault lies in our failure to properly enforce the laws we have.

WHAT OUR SCHOOLS MUST TEACH.

Civics must be taught in our schools. In a free country having a population of 60,000,000 it is of the highest importance that our children should be taught their civil duties. Otherwise how can they be intelligent enough to maintain free institutions? A little reading, writing or arithmetic do not make men intelligent voters. Not only must the youth of the land be taught their civil duties by the school, but by the home also, and how can home do its part until we have an educated community—a community of business men in which a knowledge of the principles of good government is universal? Every man may have this knowledge for the asking, and they who have it not neglect their duty to the State, and must bear their share of blame for all prevailing discontent and for whatever disorders this growing discontent produces. We cry for relief from politicians who misrepresent us, but we shall continue to cry in vain until we train our young men in the professions and in the business world to properly discharge the high duties of citizenship in a representative democracy. I would commend to all who now hear or who may hereafter read this paper these suggestive words from the pen of Mr. E. L. Godkin, editor of *The Nation*:

"There is probably nothing from which the public service of the country suffers more today than the silence of its educated class; that is, the small amount of criticism which comes from disinterested and competent sources. It is a very rare thing for an educated man to say anything publicly about the questions of the day. He is absorbed in science, art or literature, in the practice of his profession, or in the conduct of his business; and if he has any interest at all in the questions of the day it is a languid one. He is silent because he has not much care, or because he does not wish to embarrass the administration or 'hurt the party;' or because he does not feel that anything he could say would make much difference."

THE SIN OF EXTRAVAGANCE

One of the besetting sins of the times is extravagance. It has made us reckless, and hence we have lived beyond what our income could afford. The debt-creating habit must be reversed, and the system of paying cash should be forced upon ourselves. The example of our best society is not edifying in this particular. Ostentatious display at our own expense, and if not at our expense, at the expense of others, is too common. We see men who should be concerned chiefly about earning money to pay their honest debts, working and worrying to keep up false appearances in society. Many of these are utterly and hopelessly bankrupt, so far as their creditors are concerned, and yet they continue to ride in fine carriages behind swift trotters, and continue to live in magnificent houses and in princely style.

AMERICAN WATERWAYS.

The following is a copy of the invitation sent out to American and Canadian Boards of Trade by the Toronto city council committee on Deep Waterways, of which Alderman J. E. Thompson is chairman:

For years throughout the West the question of improved water communication with the East has been agitated.

Conventions to further this object have been held at Grand Forks, Detroit, Washington and St. Paul.

A 20-ft. channel to the sea would reduce the freight and increase the price of the products of the soil throughout the whole of the West and Northwest.

The States of North and South Dakota, Minnesota, Wisconsin, Michigan, Illinois, Indiana, Ohio, the Northwest provinces of Canada and Ontario, parts of Kansas, Nebraska and Colorado, are largely interested in this question.

Twenty-six millions of people live in the eight States that border on the Great Lakes, and six millions in adjacent territory depending on them. It is of immense importance to these people to have a 20-ft. channel clear to the Atlantic.

The enhanced value of one year's crop would pay the total cost. In a speech delivered in the Canadian House of Commons, 30th April, 1894, by Mr. Cockburn, of Toronto, in favor of deepening the canals, that gentleman estimated that deep waterways would add $120 to the value of a crop from a 160-acre farm. This is only allowing five cents per bushel, and is well within the mark.

With a 20-ft. channel ocean vessels will be seen in harbors of Toronto, Detroit, Buffalo, Cleveland, Chicago, Duluth, etc., bringing cheap coal, and taking away the products of the forest and field, and the magnificent fleet of steamers now land-locked in the Upper Lakes will have access to the ports of the world.

This is not a local or sectional question; the Western States and Canadian Provinces are equally interested. The Great Lakes and St Lawrence are free without restriction, and the resources of our civilization will doubtless find

some means of making the connecting links on an equitable basis.

On 30th April last, a resolution was introduced in the Canadian Parliament on this subject, showing the lively interest taken in deepning the canals by some of our leading statesmen.

Without formulating any particular policy, a convention will be held at Toronto, Sept. 17th to 20th, 1894, to discuss this great question and the best means of securing these objects.

It is desired that all business interests, irrespective of nationality or politics, be represented.

The board of.....is hereby invited to send delegates to said convention, authorized to speak for them.

A prompt reply will oblige, stating whether your board approves of the objects of the convention, and how many delegates you wish to send. A programme of the proposed proceedings will be forwarded later. The Toronto hotels will grant special rates, and it is expected that the railways will make similar concessions.

J. Enoch Thompson,
Chairman of Committee.

City Hall, Toronto, 4th Aug., 1894

BUSINESS IN THE UNITED STATES.

Dun's Review, August 11th, says: The startling advance in corn discloses a general belief that the injury to this most important crop has been so great as to affect materially the traffic of railroads, the demand for manufactured products, and the cost of meats for the coming year. Unless the markets deceive and are entirely deceived, the country has to face a real calamity in the loss of something like 500,000,000 bushels of corn, and this loss consumers have to share through the advance of fourteen cents in two weeks and nine cents since Friday of last week. Neither official nor unofficial statements as yet preclude the hope that the loss may prove less serious, but at current prices 1,500 million bushels would cost as much as 2,000 million bushels would have cost a fortnight ago. Wheat has risen 3½ cents in the fortnight, and 2½ during the week, although Western receipts have been 5,223,128 bushels, against 3,162,694 last year. Atlantic exports are still about half as large as a year ago, 1,399,485 bushels, against 2,734,784 last year. Pork products are a little stronger, as is natural Cotton has twice risen, and again declined a sixteenth with increasing prospects of a very large yield, closing without change for the week.

Gold exports have practically ceased for a time, with the settlements for most of the 900 million pounds of sugar imported within the past two months, and Treasury officials are more hopeful, counting upon larger receipts on account of whiskey. Low as the gold reserve is, there appears a slight gain, and with cessation of gold exports the improvement should be considerable during the fall. Whether under old or new duties, imports and customs revenue will naturally be large for some time after a decision on the tariff question. There has appeared of late some demand for gold from many interior banks, not in large amounts, but in the aggregate enough to indicate some nervousness in feeling. The volume of commercial loans is increasing, though moderately, but in manufacturing paper less increase appears than might have been expected. The outgo of money to move the crops has hardly made itself felt, and the strengthening of stocks during the week, in spite of crop misfortunes and the disclosures in Atchison, gives some ground for hope that withdrawals of foreign capital may discontinue for the present.

People cannot go naked, even if Congress is slow. Demands for textile goods clearly represent exhaustion of stocks and continuing needs for consumption in the main, though there has sprung up quite a speculative business on the possible failure of tariff legislation. Lower prices in some cotton goods have encouraged larger operations, and the proposed reduction of wages at Fall River is now announced, as yet without clear indication whether it is to be followed by a strike. Woolens for winter go as before, and the opening of spring goods discloses a decline of about 12½ cents in the average from last year's prices, but the goods are not urged by makers nor hungrily sought by buyers. The sales of wool would have been larger, according to reports from the different markets, if there had been sufficient stocks available, but amounted to 7,623,400 lbs. at the three Eastern markets, against 9,220,700 lbs two years ago. Country holders of wool do not at present appear to be anxious to let somebody else speculate on its price, and are said to be keeping back supplies quite generally, although receipts at Chicago were 4,060,051 lbs. for the week, against 1,127,099 for the same week last year.

The volume of domestic business through clearing houses is 4.7 per cent. smaller than a year ago, and 22.8 per cent. smaller than in 1892. The earnings of railroads reported for July are 20.7 per cent. less than last year, with a larger decrease on Granger, other Western, Southwestern and Pacific roads. The failures for the five weeks ending August 1st, showed liabilities of $11,144,713, of which $5,626,594 were of manufacturing and $5,220,247 of trading concerns. The failures during the past week have been 251 in the United States, against 394 last year, and 54 in Canada against 25 last year.

NOTES FROM THE SALMON CANNING INDUSTRY.

After much longing and waiting the salmon in the Fraser have increased in number, and last night the catches were the best of the season so far. The run looks as if it had come to stay.—*Vancouver World*, 2nd inst.

The salmon run on the Fraser continues very bad indeed. The price of fish has risen to 20 cents and the cannery men are feeling very depressed.—*Vancouver News-Advertiser*, 4th inst.

Steveston is a very busy place and it has a large population. Its many canneries are all in full swing and it is estimated that 1,800 boats are engaged fishing at the mouth of the river and in the Gulf. All sorts of habitations have been erected. There are houses of wood, houses of tin and houses of canvas. All nationalities are here living in amity together. There are Chinamen, Japs, Indians, Canadians, Americans and Europeans, old and young, male and female. Excellent order appears to prevail in the community.—*News-Advertiser*.

The pack already up at the Gulf of Georgia cannery is 3,000 cases, at the Steveston cannery 2,700 cases, and at the Guichon cannery, 1,900 cases. The other canneries will doubtless have an equally large pack on hand.—*News-Advertiser*, 5th inst.

It has been a matter of surprise that during the season the highest catches of salmon have been made by Japanese fishermen. This has elicited considerable comment amongst the cannerymen, but when the matter was investigated it was found that there is nothing surprising in the fact at all. The Japanese are indefatigable fishermen and keep their boats and nets at work continually. They work in shifts, a boat taking out the fresh shifts, and being brought back by the others, and also bringing the combined catch of several boats.—*World*.

The salmon catch last evening was good on the average, but nothing exceptional. The last two nights have increased the pack, some of the canneries having 10,000 and 15,000 each The total pack on the river up to Saturday night did not exceed 50,000 cases. Shipments are fairly brisk.—*World*, 7th inst.

The down-river canners had a meeting at Steveston yesterday afternoon to discuss the price to be paid for salmon. While the fish were scarce figures ranging from 15 to 25 cents each were paid for sockeyes, but now that the run is so large the packers decided that the price had to come down. The decision reached was that 8 cents per fish should be paid while the run lasts. Only about two-thirds of the canners are in this arrangement.—*Columbian*, 7th inst.

The salmon catch fell off last night to a considerable extent, but a fair average was obtained. The first big run is over, but the second is close at hand. A great school entered Beachy Bay yesterday, and they ought to reach the Fraser early next week. There is said to be plenty of salmon in the gulf.—*Columbian*, 8th inst

FRUIT PRODUCTION OF THE U. S.

The American Agricultural Department furnishes statistics of fruit production in the United Sates for the latest census year, which it notes to have been less than an average year in its fruit yield. The totals show a production of more than 143,000,000 bushels of apples in forty-eight states and territories. Michigan and Ohio lead with more than 13,000,000 bushels each, and these, with Kentucky, Illinois, Missouri, Indiana, New York and Virginia, contributed more than one-third of the total. The production of peaches was 36¾ million bushels, Georgia and Texas leading on the list with more than 5,000,000 bushels each In pears the production was a little more than 3,000,000 bushels, New York and California leading. The yield of plums and prunes exceeded 500,000 bushels, nearly half of which were grown in California. One million bushels of apricots are reported, nearly all by California. Cherries were grown principally in Indiana, California, Michigan, Ohio, Kansas and Virginia in the order named.

ELECTRIC TREATMENT OF SEAL FUR.

The seal skin, says *Invention*, as it comes from the animal, has interspersed with the soft, downy hairs, a certain proportion of long, stiff hairs, which must be removed. This has hitherto been done by hand, but Mr. Headbalmany, of New York, has now devised an unhairing machine which has greatly reduced the time and labor required as compared with the old hand method. This machine somewhat resembles a cotton gin, and, like the latter, has a rotary brush, but in the place of the saw used in a gin a No. 20 platinum wire, twenty inches long, is employed. This wire is kept red-hot by an electric current supplied from a 20-volt dynamo, the resistance of the hot wire being one ohm and the current twenty amperes.—*Boston Journal of Commerce*.

—The shipments of coal from Scotland for the week ending on Saturday, 28th July, were on the same level as those for the previous three weeks, viz., about 24,000 tons. It does not follow, however, that the bottom has been reached, although the exports have practically been the same for four weeks in succession Stocks are now reduced to a very low ebb, and until the strike is over there will be little or no coal available for export. Compared with the corresponding week of last year, the decrease is again large, viz., 121,842 tons.—*Iron & Steel Traders' Journal*

—The traffic returns of 33 of the principal lines of the United Kingdom for the week ending July 29th show total receipts amounting to £1,648,049, being £59,534 less than for the corresponding week last year; whilst the mileage was 18,522¾, or 134¾ more than for the corresponding week. The aggregate receipts for four weeks to date amount to £6,361,588, a decrease of £48,097 upon those of the corresponding period last year.

—Editor's Son: "Papa, what do the letters 'S-I-N-N-E-D' spell?"

Editor: "Well, my boy, transpose 'em, and they spell the name of the merchant who refuses to advertise 'during the dull season.'"—*Printer's Ink*.

—It is stated that, owing to the dispute in the moulding trade of the North of England, orders for the building of the two German Lloyd steamers that would have come to Tyneside have been placed in the hands of foreign builders.

TWENTY-FIVE YEARS OF TELEGRAPHIC EXPERIENCE.

The present age is one that is remarkable for the breaking of records of many kinds, but in only one case has the necessary time for any performance been suddenly reduced from a matter of months to a matter of a few minutes. It is now twenty-five years since this miracle was effected. Before that time the home-staying Englishman was lucky if he could get an answer to any message, directed to relative or business connection in India, within four months; whereas the Prince of Wales, when attending the celebration of the twenty-fifth anniversary of the Eastern Telegraph Company, on the 20th inst., was able to send congratulatory messages from the Imperial Institute to the Governors of our Eastern and Antipodean colonies and possessions, and to receive replies therefrom within a few minutes of their despatch. We are so used to having the world's history written for us in London almost at the same time that it is being made in any corner of the world, however remote, that the marvels of telegraphy have become a commonplace, and in making use of this means of communication we scarcely give a thought to the vast organizations which enable us to set space at naught

and send our words, quick as lightning, under oceans and across continents.

Figures do not always constitute very interesting reading matter, but the figures quoted by Sir John Pender, M.P., at the dinner which preceded the royal visit to the anniversary fete, may serve to convey some idea of the colossal interests of the telegraphic companies. To-day there are in all 152,000 miles of submarine cable, and over 2,000,000 messages are transmitted annually. The cost of these cables, something like £40,000,000, has been provided mainly by private enterprise, the Governments of various countries having contributed not more than ten per cent. of this vast total between them. And all this linking up of East and West has been accomplished within less than the lifetime of a generation. The first cable to the East was laid down in 1859, down the Red Sea, by the coast of Arabia, and through the Persian Gulf to Kurrachee. This was abandoned after having been in use only a few days. The history of submarine telegraphy is one of repeated triumphs over disheartening failures of this kind. The early misfortunes of the Atlantic cable, and the way in which science and dogged perseverance rose superior to them, constitute a splendid chapter in the story of modern enterprise. It is to men like Cyrus Field, whose courage sufficed to inspire capitalists with confidence to carry on the work, that the civilized world owes the rapid advance of submarine telegraphy. Government subsidies were at first withheld, and never too lavishly bestowed upon the various telegraphic companies. But in 1869, the Eastern Telegraph Company was registered with a capital of £260,000, and its undertakings were immediately and increasingly successful, till at the present day it owns no less than 51,325 miles of cable and has a joint nominal capital of £2,000,000, representing at the market quotations nearly £15,000,000. The system between Great Britain and China was completed twenty-three years ago. A year later the Australian colonies were connected with us by submarine cable. Associated companies have since brought South America into communication with us, and in the last twelve months the Seychelles, Mauritius and Borneo have been added to the list of places served by the vast system of which the Eastern is the premier company. It only remains now to lay a cable in the Pacific Ocean, and the planet will be actually girdled by wire.

Nothing has so much contributed to what has been called the "shrinkage" of the world as telegraphy, and possibly no scientific invention has been so generally useful. As Sir John Pender pointed out, submarine telegraphy has equalized trade throughout the world, and has over and over again prevented diplomatic ruptures. It is impossible to estimate how greatly it contributes to the compactness of the empire. The central Government at home can keep in touch with the most distant dependency, by the agency of the companies' wires, and there is no cause to doubt that the wish expressed through them by the Prince of Wales to the colonial governors will be realized, and that "submarine telegraphy will be found as beneficial in the future as in the past in helping to cement the ties binding the colonies to the mother country." It was only fitting that the anniversary celebration, besides being distinguished by the presence of royalty, should be graced by a representative gathering of men of all professions, for there are few fields of labor in which telegraphy does not render some seemingly indispensable service—"seemingly" indispensable because, now that it has become as familiar a mystery as any of the phenomena of nature, it is hard to imagine how diplomatists could ever have watched Imperial interests, or how war could ever have been conducted without its aid. Its influence upon war, in particular, is of enormous import, and an interesting speculation was that propounded by Lord Wolseley as to what would have been the result of many of the Napoleonic campaigns had the present means of communication existed at the beginning of the century. It was for military purposes that one of the first submarine cables was laid, namely, that between Varna and the Crimea. With its seventy-six cables and its alliance with the Eastern extension, China and Australia Telegraph Companies, the Eastern Telegraph Company is incontestably one of the greatest triumphs of organization and spirited enterprise in existence, and has every reason to be proud of the quarter century that has just elapsed. There are few who do not owe it some debt of gratitude, and few who have not reason to be sincerely grateful to the plucky projectors who, in the early days of submarine telegraphy, sunk their treasure in the sea. As Mr. Bayard, the U.S. Minister, wittily pointed out in his after-dinner oration, Davy Jones' locker has become the safest place for secrets of all kinds to be consigned to. It has also become a very safe bank for untold wealth of capital.—*Hardware Trade Journal*

Town of Rat Portage Debentures.

The Corporation of the Town of Rat Portage are prepared to receive offers for the purchase of Debentures amounting to $3,000, of the Town of Rat Portage for 20 years, payable with interest at five per cent. for additions to the public schools. The Debentures are in terms of the By-Law payable yearly for the period of twenty years.

Offers for these Debentures to be sent to the undersigned on or before the 1st September 1894 and the lowest or any offer not necessarily accepted.

JOHN KERR BRYDON,
Town Clerk.

Dated at the Town of Rat Portage this 8th day of August, 1894.

CITY of KINGSTON DEBENTURES

Sealed Tenders will be received by the undersigned up to 12 o'clock noon on MONDAY, 20th AUGUST 1894, for the purchase of the whole or any portion of the following Debentures, all bearing interest payable half yearly at 4½ per cent per annum:

Debt Arrangement Debentures, $3,400 payable 31st December, 1913; $14,500 payable 31st December 1914; $1,100, payable 31st December, 1915.

Local Improvement Debentures, $16,079.49, payable 1st July, 1914.

The highest or any tender not necessarily accepted.

For further particulars apply to

F. C. IRELAND,
City Treasurer.

MONTREAL MARKETS.

MONTREAL, Aug. 15, 1894.

ASHES.—Receipts continue light and the demand fair. Values slightly advanced. First quality pots bring $4.00 to 4.10 per cental; seconds, $3.70; pearls, $6.50. Shipments are still small.

CEMENTS AND FIREBRICKS.—English Portland is momentarily scarce, but large supplies close at hand prevent any material advance. Some brands of Belgian are also very scarce, and no reputable brands can be had under $1.80 in round lots. A cargo is expected early next week, which will replenish short stocks. We quote English at $1.85 to 2.00, as to lot and brand. Belgian, $1.80 to 1.90. Firebricks, $14 to 20.00 per 1,000.

DAIRY PRODUCE.—The cheese market rules rather quieter this week; the advance which took place last week seems to have checked orders coming to hand, consequently business passing has not been much lighter in volume, still we notice at the several country sale boards that last week's prices have been well maintained, and all offerings appear to have been well cleared up, the larger portion of which has been bought up on speculation for future sale. For export orders have been unusually light, and there have been no large sales to report in this market. The only business passing has been in a small way, finest colored moving at from 9⅜c. to 9⅝c., and French colored at 9c to 9¼c. per pound. In white cheese there have been a few sales at 9¼c. The butter market continues to show a steady to firm tendency, and we notice several large sales of latter part of July and August creamery at 18½ to 19c. Offerings of fresh goods are light, and where quality is attractive and pleasing to buyers, sellers find no difficulty in making our outside quotations. In dairy goods there has been a good jobbing trade passing, the finest Townships going at from 17 to 18c., and Western at from 15½ to 16½c. Receipts are running light, and we hear receivers complaining of the scarcity of real fresh qualities. In medium and low grades the market is ruling very quiet, and there seems to be no outlet just at present for these goods, of which there is a fairly large stock in the several warehouses here. Receipts of eggs show quite an increase, but the stock continues to run stale and old, and receivers find great difficulty in pushing sales for same, as buyers all insist on getting fresh stock from the new crop; the result is, old and mixed stock is a drug in the market, and we hear of sales being made as low down as 7 to 8c., loss off, while market has shown a firmer feeling on strictly fresh new stock, with sales from 11 to 12c. No further improvement is looked for in the market until the present glut of rattlers and old timers is worked off.

DRUGS.—There is little improvement to note. Lots of orders are coming in, but they are all small, and the turnover in the aggregate is still quite moderate. Camphor continues to advance, and in all lines of China and Japanese goods prices are firmer. Payments are being fairly well met.

DRY GOODS.—The general condition of trade for the past week was somewhat better, and as the crop reports from all parts of the country are favorable, the present outlook is much more promising. Harvesting in the North-west and Manitoba is rather better than expected, and this should tend to make money a little easier in those provinces. Trade in the city is rather slack at present, but not more than usual at this season of the year. Payments all round are a little better.

MONTREAL STOCKS OF GRAIN IN STORE.

Barley "	5,181	2,947
Buckwheat "	.....	.....
Total grain	823,616	748,335

GROCERIES.—Trade in this line continues to improve, and the outlook is deemed more favorable. Sugar has advanced slightly, and granulated is now quoted at 4⅜c.; yellows, 3½c. No change in molasses or syrups. Teas are still firm; a number of Japans are announced sold at from 14 to 17c. per lb. London, England, still reports a further advance in Ceylons, and we learn from New York that a large business is being done there and at prices considerably higher for the last ten days. China teas there and leading Pingsueys and Fonesca Oolongs have advanced, for the lower grades, 30 to 35 per cent., and everything points to higher values now that the tariff question has been adjusted. Low grades here are also expected to go up before long. No change in coffees. Rio, 18 to 21c.; Java, 25 to 30c.; Mocha, 26 to 30c.; Jamaica, 19 to 22c. per lb. Salmon, $1.75 to 1.30. Choice lobsters, $6 to 6.50 per case. California loose muscatel raisins still sold at 6½c. per lb.

HIDES AND TALLOW.—Trade continues quiet, and not much improvement is expected this month in the way of sales, but prices in all lines remain firm, and an advance is noted in heavy steers, for which dealers here are now paying 4½c. per lb. Sales of cured to tanners continue at 5½c. No. 1 green hides bought at 3½c. per lb. by dealers, and 4c. for tanners. United States prices still firm at 3¾ to 4½c. Calfskins 5c., lambskins 30 to 35c., and tallow still quiet at 5½c. per lb.

LEATHER.—There is not much improvement in the demand. Hides are firm at recent advance, and there is a firmer feeling in leather. Stocks do not increase, and a brisk trade would cause a shortage in some lines. The American market seems to be improving, and the outlook much better. Prices steady and quoted: Spanish sole B. A. No. 1, 18 to 20c.; do. No. 2 to B. A., 16 to 17c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 15½ to 16½c.; No. 1 slaughter, 18 to 20c.; No. 2 do., 17 to 18c.; American oak sole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do., heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 15c.; do., small, 10 to 12½c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins,

STEAM BOILER & PLATE GLASS INSURANCE CO.

OF CANADA

Head Office, - - - LONDON, Ontario.

THE unexpected generally happens. Have your boiler inspected and insured; it pays to know that you are right. Don't trust to luck. Will your boiler stand the pressure at its weakest point? Can you judge it?

INSPECTION makes you safe; insurance indemnifies you against loss. Have a competent inspector determine what pressure is safe, and the benefit of his advice and inspection.

60 to 70c; colored calf, American, 23 to 27c., Canadian, 19 to 21c., colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 25c., buffed cow, 9 to 11c., extra heavy buff, 12½c.; pebbled cow, 8 to 12c.; polished buff, 9 to 11c., glove grain, 9 to 11c., rough, 16 to 18c.; russet and brille, 40 to 50c.

METALS AND HARDWARE.—Scotch warrants have advanced three pence on the week, being quoted by cable 42s. 3d., but makers' prices are not advanced. Freights are higher now, and it is not probable that lower rates will prevail for the rest of this season. Summerlee pig is still quoted $20, and very little other Scotch iron is available. Domestic pig iron is unchanged at $16.25 to 16.50, and demand is not lively. In other lines of heavy hardware there is little change, but recent cables report a better feeling in England in tinplates and a little advance in prices. We hear of a sale of 100 tons railway cast scrap at $13, which seems an exceptionally low figure. Ingot tin is cabled at £1 15s. higher and excited. The nail makers here have reduced their card prices 15c., the basis now being $1.75 against 1.90 previously. We quote Coltness pig iron, none here; Calder, No. 1, $19.50; Calder No 3, $18.50; Summerlee, $19.50 to 20.00; Eglinton, $18.50; Gartsherrie, none here; Langloan, none here; Carnbroe, $18; Shotts, none here; Middlesboro, No. 3, $17; Siemens, pig, No. 1, $16.25 to 16.50, Ferrona, No. 1, $16.50, machinery scrap, $14.50 to 15.00; common do., $10.00 to 12.00; bar iron, Canadian, $1.70 to 1.75; British, $2.25; best refined, $2.40; Low Moor, $5.25; Canada plates—Blaina, or Garth, $2.15 to 2.10; all polished Canadas, $2.75; Terne roofing plate, 20 x 28, $6.00 to 6.25. Black sheet iron, No. 28, $2.40, No. 26, $2.25, No. 24, $2.10; tin plates—Bradley charcoal, $5.25 to 5.50; charcoal I.C., $3.50; P.D. Crown, $4.00; do. I.X., $4.75 to 5.00; Coke I.C., $2.85 to 3.00; coke wasters, $2.75; galvanized sheets, No. 28, ordinary brands, 4¼ to 4½c.; No. 26, 4c.; No. 24, 3½c., in case lots; Morewood, 5¾ to 6c.; tinned sheets, coke, No. 24, 6 to 6½c.; No. 26, 6¼ to 6¾c.; the usual extra for large sizes. Hoops and bands, per 100 lbs., $2.30 to 2.35. Steel boiler plate, ¼ inch and upwards, $2.10 to 2.15; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.85; heads, $2.85; Russian sheet iron, 10 to 10½c.; lead, per 100 lbs., pig, $2.60 to 2.75; sheet, $4 to 4.25; shot, $6.00 to 6.50; best cast steel, 10½ to 12c.; spring, $2.50; tire, $2.50 to 2.75; sleigh shoe, $2.40; round machinery steel, $3; ingot tin, 17½ to 18c.; bar tin, 25c.; ingot copper, 9½ to 10c.; sheet zinc, $5.00 to 5.25; spelter, $4.50 to 4.75; American do., $4.50 to 4.75 Antimony, 10 to 12c.; bright iron wires, Nos 0 to 8, $2.65 per 100 lbs.; annealed do., $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3½c. Coil chain, ¼ inch, 5c.; ⅜ in., 4½c.; 7-16 in., 4½c., ½ in., 3¾ to 4c., ⅝ in., 3½c., ¾ in., 3½c.; ⅞ in., and upwards.

tinues fair, and prices, with the exception of turpentine and London washed whiting, which have declined a little, remain as before quoted: Turpentine, 45c. per gal. for single barrels; two to four barrels, 44c. Linseed oil, raw, 58c. per gallon; boiled, 56c.; 5 barrel-lots, 1c. less; olive oil, machinery, 90c.; castor, in cases, 6¼ to 6¾c.; tins, 7c.; Nfld. cod, 38 to 40c. per gallon; Gaspe oil, 38c. per gallon; steam refined seal, 42½ to 43c. in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00; No. 1, $4.50; No. 2, $4.25; No. 3, $4.00; dry white lead, 5c.; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50. Window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80.

WOOL.—Since the tariff announcement at Washington trade in the United States has started into fresh activity, and prices there are said to have advanced 10 per cent. No advance has as yet taken place in this market and none is expected for at least a fortnight, but the week's quotations are firmly maintained. London sales report firm prices and the volume of business here is fully up to what it was a week since. Cape sold at 14 to 15½c. per lb., greasy Australian 14½c., B. A. scoured 26 to 32c.; Fleece can still be bought here for 16c.

TORONTO MARKETS.

TORONTO, Aug. 16th, 1894.

BOOTS AND SHOES.—No material improvement in the situation has taken place, although the season is now well advanced. Fall goods are now half up and shipped and operations for the spring trade will begin within six weeks time. There exists a very active demand for some grades of cheap goods, especially for a woman's shoe that can be sold at $1.25 to $2. Manufacturers are not carrying heavy stocks and are evidently cautiously feeling their way as to future operations.

DRUGS.—No material change in the situation has taken place; the trade are only making demands upon stocks for immediate requirements, and the volume of movement in consequence is rather restricted. Values on the local market remain much as reported last week. At a London sale of cocoa butter on Tuesday higher prices were realized. American markets are in an agitated condition as a result of the passing of the tariff bill. The N.Y. *Journal and Bulletin of Commerce* says: "The general market continues quiet, but with tariff matters to one side the probabilities are that an early improvement in the demand will develop, and, with this belief entertained, a cheerful feeling is generally observed. Opium is quiet, with the indications of an easier character. Quinine continues to strengthen. Alcohol has materially advanced. Chlorate of potash is weak and unsettled. Camphor is again higher. Shellac is showing increased strength. Sumac is lower. Conti's white soap is firmer. Ether has advanced.

DRY GOODS.—The civic holiday has served to somewhat restrict trade. Attention is now concentrated in fall business and orders for summer goods are made up only of a few lots to fill out depleted stocks. Travellers are sending in favorable reports from some districts, but from other parts of the province letters are not characterized by hopeful expectations for future operations. Values remain steady, although some changes may result in consequence of the United States tariff settlement.

GRAIN.—Wheat is dull and has gained little or no strength during the lapse of a week; quotations are unchanged, with only the movement of odd cars to millers; new crop wheat is being marketed only at a decline of about 5c. a bush. as compared with the prices of last year. The Manitoba yield of wheat is placed at 16,000,000 bushels, an average of 15 to 16 bushels to the acre. This estimate, which was made by the Department of Agriculture, is unexpectedly low, the decrease being the result of a falling off in the yield of the eastern and south-western districts through lack of rain. Oats are being freely delivered, and this has had the effect of weakening the market; quotations stand at 33 to 34c. There is nothing doing in barley; some improvement in the situation may take place in consequence of the United States tariff provisions, but barley in American markets is low in price, while the quality has of late been greatly improved.

These prices are wholesale by the car-load.

The stocks of grain in store at Port Arthur on Aug. 4th were 1,177,424 bushels. During the week there were received 60,935 bushels, and shipped 164,959 bushels, leaving in store on Aug. 11th, 1,070,400.

GROCERIES.—There are two weeks in the summer when grocers may without serious detriment to their business interests take a holiday, and one of these is the week now drawing to a close. In dried fruits the attention of the trade is turned to the growing crops, which will reach the market in a few weeks time. For sugars there is only a moderate demand. We are now between seasons and no improvement in the demand can be looked for until the larger fruits begin to come in; during the week refiners made an advance of ¼c. in all grades. Reports concerning teas are rather strong and cheerful. Even low grade Japan teas received show good value and are selling at 12 to 13c., with medium grades selling at 16 to 18c. per lb. Cables from England report a stronger market in London in consequence of the Eastern war.

HIDES AND SKINS.—There is a stronger and better feeling in hides; prices remain unaltered, but the situation has gained strength. The *Review* of August 11th says of the Chicago market: "There have been no recent changes in the packer hide market. Undoubtedly the trend of the market is upward. Apart from the natural improvement in condition that comes with summer hides, there are no bull arguments of great value. Any advance not based on the quality of the take-off is predicated upon the scarcity of cattle." The movement in calfskins is strictly limited. To-day, Thursday, skins advanced 5c., and both shearlings and lambskins now stand quoted at 35c; this price is paid only for fresh slaughtered stock. Tallow is rather quiet; no large quantity is offering; dealers are paying 5½c. and selling at 6c per lb.

LEATHER.—Trade is not without favorable features this week. A fair movement is taking place in general lines, but the bulk of the demand is for cheap stock. No. 3 grades and rejects are being bought by houses that have never previously taken them. The jobbing trade keeps up well, and some fairly good parcels are being sold. Reports from Montreal indicate better prospects for fall trade.

PAINTS AND OILS.—During the last several days a decided improvement has taken place in trade. The volume of movement in such lines as prepared paints, dry colors, varnishes, plate and window glass, shows a material increase. House representatives are meeting with good success, and indications point to a fairly good fall trade in general lines.

PROVISIONS.—A moderate trade is doing. Butter remains unchanged; good dairy stock is worth 16 to 17c. and creamery rolls bring 22c; there is an absence of export demand. Cheese is firmer at 10 to 10½c., as a result of stiffening country markets. A firm tone continues to characterize the market in hog products, but there is no further advance in price. Long clear bacon is quoted at 8c., Cumberland cut at 9c., breakfast smoked at 11½c., hams stand quoted at 11½ to 12c. and rolls at 9c. The egg market still remains glutted; the demand is very languid and it is almost impossible to place any large lots.

WOOL.—The interest of the trade has, of course, been centered in the United States tariff issues. While free wool will afford us a larger market for our product, it is not expected that any immediate improvement in values will take place. In one respect a distinct advantage has been gained; with a specific duty it was impossible for American dealers to take our low grades and unwashed wool; for these we now have a market. The new clip has been pretty well marketed, but offerings continue to arrive and are readily taken. There is but little demand from the mills.

BRITISH MARKETS.

Gillespie & Co.'s prices current, dated Liverpool, August 3rd, 1894, say: Sugar.—Raw in better request. Refined rather lower on the month. Rice is a shade dearer at 7s. 9d. to 8s. 3d. per cwt. for fair to good ordinary quality. Chemicals, etc., are very lifeless, and any changes to note in prices are unimportant Cream tartar lower at about 61s. per cwt., c.i.f., to Halifax, N.S. Oils.—In the absence of inquiry there is no change to report in prices of olive oil or palm oil. Castor oil offers at 2d. to 2½d. per lb. for good seconds, from the quay. Freights.—General cargoes extremely scarce, but freights are maintained.

THE GREAT-WEST LIFE ASSURANCE CO.

HEAD OFFICE: WINNIPEG

Subscribed Capital... $400,000 00 Government Deposit... $56,000 00
Paid-up Capital ... ... 100,000 00 Reserve 54,720 00

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

TIMBER AND LUMBER IN BRITAIN.

It appears that the trade in lumber and timber in Britain is still unsatisfactory. Stocks are full and values weak. The arrivals from Canada in July numbered 46 vessels, 44,684 tons, against 53 vessels, 47,550 tons during the corresponding month last year, and the aggregate tonnage to end of July from all places during the three years past has been 187,505 tons, 168,604 tons, and 181,123 tons respectively.

Farnworth & Jardine say: "There is little change in the condition of our market to report. Imports of all articles have been quite sufficient, in some instances too heavy; the deliveries have been fair, but there is no improvement in values, which are difficult to maintain, especially for some of the leading articles. Stocks generally are ample."

We quote further from their 1st August circular:

CANADIAN WOODS.—*Waney and Square:* The arrivals, especially of waney, have been large; the deliveries, however, have been on a free scale, especially of the former. There is no change in values to report, and stocks are quite sufficient. Red Pine has not been imported; the value rules low. Oak has come forward freely, and a fair quantity has gone direct from the quay, chiefly to the large railway companies; prices have ruled steady; the stock of inferior wood is still excessive. Ash has come forward too freely, prices are lower, and the stock too heavy. Elm has been in fair demand; there is no change in value, and the stock is moderate. *Pine Deals.*—The import has again been large, viz., 5,468 standards, against 2,075 standards same month last year; the deliveries have been fair, but the stock is now too heavy, and prices are with difficulty maintained.

NEW BRUNSWICK AND NOVA SCOTIA SPRUCE AND PINE DEALS.—Of spruce deals the import has been 12,746 standards, against 15,105 standards same month 1893, and 10,587 in 1892. The arrivals, especially from St. John, have been chiefly by large steamers, which are difficult to handle owing to the rapid discharge. The deliveries have been fair, but include between 4/5000 standards, which have gone to the Manchester canal, and probably are not all sold. There is little change in value to report, although, if anything, prices are slightly easier. Pine deals—There have been no sales to record.

BIRCH.—Both logs and planks have come forward more moderately, still the stock is so very excessive that no improvement can be expected until this is considerably reduced; recent sales of planks have been at the lowest price ever known.

UNITED STATES OAK.—Two parcels have arrived, and although shippers were prepared to accept reasonable rates, sales could not be effected, and the wood has been stored; there is no improvement in the demand for this article, and the stock is still too heavy. *Oak Planks.*—The import, although less than the same month the previous two years, has still been sufficient in the face of the enormous stock still in hand, and the total import from the beginning of the year up to date is much in excess of the previous year. There is no improvement and prices still rule at very unsatisfactory rates.

PITCH PINE.—The arrivals during the past month have been 8 vessels, 9,370 tons, against 3 vessels, 3,499 tons, during the like time last year. Of Hewn there have been no arrivals; the consumption has been very limited, although there has been rather more enquiry of late. Sawn has been imported very heavily, and whilst the deliveries have been on a large scale, stocks have accumulated, and are far too excessive to expect any early improvement in the present depressed state of the market. Planks and Boards have arrived freely, and this branch of the trade is becoming of increasing importance, but the quality and condition in which they are shipped requires special care.

SEQUOIA (CALIFORNIA REDWOOD).—There have been no arrivals, and the stock is more than ample for the demand, which is of quite a retail character, and prices rule low.

BRITISH COLUMBIA AND OREGON PINE.—There have been no arrivals, and the demand has been very limited; stocks are more than sufficient.

UNITED STATES STAVES have arrived freely; there has been a little more enquiry for Hogshead Staves, but prices are unchanged; stocks all round are too heavy, and values rule low.

BALTIC AND EUROPEAN WOODS.—The arrivals during the past month have been 18 vessels, 10,296 tons, against 19 vessels, 10,938 tons, during the like time last year. *Fir Timber.*—Business in this article has been of a restricted character, and the stock is sufficient. Red and White Deals have arrived moderately, and while the deliveries have been on about the same scale, stocks of all descriptions are sufficient. Flooring Boards also have been fairly active; values are without much change and stocks are fully ample. Masts and Spars have been imported chiefly for mining purposes, and stocks are in dealers' hands.

THE PINEAPPLE CROP.

The pineapple crop of the Florida east coast—not including the Keys—is estimated this year all the way from 40,000 to 55,000 crates. These crates are in size about that of the regulation orange box, but in weight they will average, when filled with "pines," over twice as much. The freight agents figure on about 160 pounds to the crate, or 150 crates to the car. But sometimes nearly 200 crates are stowed away in a car, if cars are scarce. The average number of pineapples to the crate is sixty-four, but the fruit varies in size, some varieties growing very large and heavy. A conservative estimate of this year's crop is about 50,000 crates, or fully 3,200,000 pine apples. Last year's crop was about 35,000 crates, and the largely increased acreage coming into bearing this season led to estimates of the crop early in the season as high as 70,000 crates, or double that of 1893. But of late there has been a scarcity of rain, and in consequence the fruit is late in maturing, and in all probability the size and quality of it will be slightly inferior to last year's. As transportation facilities are better this season than last, the fruit will undoubtedly reach market in better condition.

Heretofore the pineapples of the east coast have netted the growers all the way from 4½ to 6 cents apiece on an average, although some large fancy articles would bring in from 10 to 15 cents each. If this year's crop should net five cents apiece—which now seems altogether probable—this industry would bring at least $160,000 in cash to the east coast for distribution among the growers in sums ranging from $1,000 to $5,000—only a few receiving less than the former amount, or more than the latter.

The marketing season extends over about seven weeks, beginning late in May, and closing about the middle of July. There are some late varieties and some late loads, so that a few straggling shipments continue up into the month of August, and sometimes as late as September.

So great has been the stimulus given to the pineapple industry here during the last three years, that a crop of fully 100,000 crates is expected in 1895. The plantations come into bearing in two years from the planting, and the cost of cultivation is not great.

Some of the pioneer growers here have become rich in the business. It is said that one year's crop, not long ago, brought $18,000 net to Capt. T. E. Richards, of Eden, about three miles north of here. There is no industry in the world which pays better than pineapple-growing on the Indian River, and by the year 1900 it promises to yield an aggregate annual revenue of $5,000,000, according to a correspondent. *Shipping and Commercial List.*

A NEW AND SINGULAR DEPARTURE IN MAKING GLASS.

The new German glass is a new and singular departure in that line, disregarding as it does the ordinary principle that good glass must contain, together with silica and a divalent or trivalent metallic oxide, the oxide of a monovalent metal—an alkali metal or thallium—but while thus free from alkali can be worked before the blowpipe, and has a small coefficient of expansion. The inventor was led to the production of this compound glass by studying the state of strain in ordinary glass vessels and tubes cooled in contact with air. As a hollow glass vessel, cooled in contact with the air, has its outer skin in a state of compression, while the inside is in a state of tension, it is easily damaged on the inside, but is resistent on the outside; a hollow glass vessel, if introduced when cold into warm air, has its outer skin thrown into a state of compression, but if, when it is hot, it is exposed to cold air, its outer skin is thrown into a state of tension—this being the reason why cold air causes glass to crack more readily than hot air does. The inventor succeeded in throwing the outer layer into a permanent state of compression by covering the glass vessel with a thin outer layer of glass which has a small coefficient of expansion. The flasks made of such glass can be filled with boiling aniline and immediately sprinkled on the outside with cold water—glass dishes, too, can be heated over the naked Bunsen flame without cracking. Pressure tubes of this compound glass are also made to meet all the requirements of practice, and have been kept in continuous use on locomotives for five months.—*Boston Journal of Commerce.*

TRADE IN CHINA.

The London *Statist* says: "Trade in China is reported to be generally very active. The silk trade is slack because of the lowness of prices in Europe, but tea is being exported in very large quantities. The crop of superior tea is short this year, and therefore the quantity of the very best kinds available for export is not as large as in many years past. But, on the other hand, there is an almost unlimited supply of other kinds to be drawn upon, and owing to the very low exchange, the silver prices obtained by the Chinese growers are higher than usual. The Chinese, therefore, are hurrying their tea to market in very large quantities. Whether they will be able to recover any of the ground lost in the competition with India and Ceylon remains to be seen. In the first place there is the shortsightedness of the Chinese themselves. They do not take the trouble to consider European tastes, and to produce the kind of teas which Europe insists upon. Besides, they adulterate to an abominable extent. Then, again, there is against the Chinese merchant the maladministration, corruption and exactions of the government. In favor of the Indian and Ceylon grower there is the fact that a tea garden has not to be planted afresh every year like a grain crop. The existing gardens were planted long ago, and the owners will, of course, gather the tea and prepare it for the market, even though the prices obtained may be unprofitable."

FASHIONABLE GLOVES.

The butter-color gloves are the newest and most popular fashion for general wear. They are very pretty and are made to have the appearance of the English walking glove, but are not nearly so heavy, in fact quite light, as they are made of a French skin that is suitable for these warm days. The buff and the neutral colors come in this style, and they all have broad black stitching. They are appropriate for the tailor-made gowns, and wear very well. They are a little higher in price than the ordinary walking glove, as they cost $1.95. The popular glove for the summer is the suede, as it is cooler and absorbs the perspiration, and the warm weather is apt to make the glace kid stiff, although they are worn for travelling and shopping. The chamois glove would be a decided favorite if one was always sure of securing a good cut.—*American Glover.*

INDIAN COTTON INDUSTRY.

The progress of the cotton spinning industry in India appears for some reason to be brought to a standstill. Only five new mills have been erected in the last four years. Before that time the growth was rapid, the number of spindles having increased from 1,654,108 in 1883 to 3,197,740 in 1890. From the latter year, however, up to the close of 1893 the number of spindles had only increased by 180,563, and the number of mills from 125 to 130. It is said that about 121,000 persons were employed in these mills at the close of 1893. No accurate returns as to the amount of capital invested are given, because many of the mills are private establishments which make no report. Three-fourths of the spinning and weaving capacity of the Indian mills is concentrated in the Bombay presidency, with Calcutta and Madras absorbing a large proportion of the remainder.—*Industrial Record.*

—A gold-weighing machine in the Bank of England is so sensitive that a postage stamp dropped on the scale will turn the index on the dial a distance of six inches.

Sun Life Assurance Co. of Canada . . . . . .

Head Office—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

Brains and Capital

In every partnership there are two factors of great importance the managing brain and the capital employed, and if death removes either, the business must suffer. It often happens that the brains belong to one man and the capital to another. If the manager dies the capital is worth less than before; if the capitalist dies and his capital is withdrawn, the manager is crippled. It is clear that each has an insurable interest in the life of the other because the profits of each depend in part upon the life of both. The firm should, therefore, take one of the Unconditional Policies of the Manufacturers Life, which are free from all restrictions as to travel, residence or occupation, and are **absolutely indisputable on any ground whatever after the FIRST YEAR.** Get the rates and all particulars from any of the Company's Agents or from Head Office

DECISIONS IN COMMERCIAL LAW.

CARTER v. HAMILTON.—C. & Co. were assignees for a patent for an article called "The Paragon Black Leaf Check Book," used by shop-keepers to prepare duplicate accounts of sales, and the invention claimed was "in a black leaf check book composed of double leaves, one-half of which are bound together, while the other half fold in as fly leaves, both being perforated across so that they can be readily torn out, the combination of the black leaf bound in the book next the cover, and provided with the tape bound across its end, the said black leaf having the transferring composition on one of its sides only." What was alleged to be new in this patent was the device, by means of the tape across the end of the black leaf, by which it could be folded over without soiling the fingers or causing the leaf to curl up. C. & Co brought an action against H. for infringing this patent, the alleged infringement consisting of a similar device, but with about half an inch of the carbonized leaf free from carbon, the leaf being turned over by means of this margin instead of the tape. The Supreme Court of Canada held, affirming the decision of the Exchequer Court of Canada, that the evidence at the trial showed the device for turning over the black leaf without soiling the fingers to have been used before the patent of C. & Co. was issued, that the tape across the end of the black leaf was the only novel element in the patented article, and that the device used by H. was not an infringement of the patent depending on the tape to render it patentable.

MAYES v. THE QUEEN.—M. contracted with the Dominion Government to build a bridge in connection with a railway under construction in Nova Scotia. The contract called for the use of creosoted pine timber, of which the creosoting could only be done in South Carolina. By one clause in the contract no change could be made in the terms without an Order-in-Council therefor, and by another clause M. was not to bring any suit or proceedings for damages caused by delay. The timber was procured in South Carolina, and M. wrote to the engineer asking inspection. The engineer undertook to send an inspector to South Carolina, but neglected to do so for some weeks, and M. was put to greater expense in transporting it to Nova Scotia by reason of the delay. Having proceeded against the Crown for damages, a demurrer was filed to his petition of right. The Supreme Court of Canada held, affirming the decision of the Exchequer Court, that by the express terms of the contract the Crown was not liable, that the engineer could not bind the Crown by entering into a supplementary contract for inspection, and that M. had by his covenant no cause of action based on delay.

FRANK v. SUN LIFE ASSURANCE CO.—A policy of life insurance contained no clause making it void in case of non-payment of premiums or any note, etc., given for a premium. The first premium was not paid in cash, but the assured signed and gave to the company an agreement in the form of a promissory note payable at a certain time for part, and a like agreement payable at a later period for the other part, each of said documents containing an undertaking by the assured that if it was not paid when due the policy should be void. The assured died after the time for payment of the first agreement, but before the second had matured, and leaving the first unpaid. The Supreme Court of Canada held, affirming the decision of the Court of Appeal for Ontario, that by the failure to pay the part of the premium as agreed by the overdue instrument, the policy was void.

SNETZINGER v. PETERSON.—S. & P. were engaged in business together under a written agreement in the packing and selling of fruit, and a dispute having arisen as to the state of account between them, a third party was chosen to enable them to effect a settlement. S. claimed that such a party was only to go over the accounts and make a statement, while P. contended that the whole matter was left to him as arbitrator. The arbitrator, having gone over the accounts, made out a statement showing $235 to be due to S. Some time after he presented a second statement, showing the amount due to be $286. S. was given a cheque for the latter amount, which he claimed to be only taken on account, and he afterwards brought an action for the winding up of the partnership affairs. The Supreme Court of Canada held, affirming the decision of the Court of Appeal for Ontario, that whether or not there was a submission to arbitration was a question of fact as to which this court would not interfere with the finding of the trial judge, that all matters were submitted, confirmed as it was by the Divisional Court and the Court of Appeal. Held further, that there was a valid award for $235; that having made his award for that amount, the arbitrator was *functus officii*, and the second award was a nullity; and that the Divisional Court was wrong in holding that as P. relied only on the second award, the judgment should be against him on the case as claimed by S.

MONTREAL STREET RAILWAY CO. v. CITY OF MONTREAL.—By a by-law of the city of Montreal a tax of $2.50 was imposed upon each working horse in the city. By section 16 of the appellants' charter it is stipulated that each car employed by the company shall be licensed and numbered, etc., for which the company shall pay "over and above all other taxes the sum of $20 for each two-horse car and $10 for each one-horse car." The Supreme Court of Canada held, affirming the judgment of the court below, that the company are liable for the tax of $2.50 on each and every one of its horses.

ROYAL ELECTRIC CO. v. CITY OF THREE RIVERS.—The Royal Electric Co. having sued the city of Three Rivers for the contract price of the installation of a complete electric plant, which under the terms of the contract was to be put in operation for at least six weeks before payment of the price could be claimed, the court referred the case to experts on the question whether the contract had been substantially fulfilled, and they found that owing to certain defects, the contract had not been satisfactorily completed. The Superior Court adopted the finding of fact of the experts and dismissed the action. The Court of Queen's Bench for Lower Canada (appeal side) on an appeal affirmed the judgment of the Superior Court. On appeal to the Supreme Court of Canada, it was held that where there are concurrent findings of two courts on a question of fact, this court will not interfere unless the findings of fact are conclusively wrong. That when a contract provides that no payment shall be due until the work has been satisfactorily completed, a claim for extras made under the contract will not be exigible prior to the completion of the main contract.

—An Irishman found a sovereign in the street, which proved to be light, and he could only obtain 19s. 3d. for it. Soon after, chance threw another in his way, but Pat exclaimed, "I'll have nothing to do with you for I lost 9d. by the last one I found."—*Exchange.*

ST. THOMAS coal dealers have decided to sell for cash only.

MR. R. POTTER has contracted for lighting the village of Tweed by electricity.

MR. JOHN MACKAY, of Woodstock, left there yesterday for the Old Country, we are told, in the interest of James Hay Co., limited. It is believed that a paying business in furniture can be established in England, and Mr. Mackay proposes to find out if this be true.

LONDON *Foreign and Colonial Importers* says its correspondent in Kingston, Jamaica, writing on the 2d ult., remarks: "Somehow Americans seem to be shouldering out our exporters all round. Canada, however, is making a big fight. Can't you 'wake up' our people? Foreign commerce is our little island's only hope, even more now than in the past."

"A MORE attractive street does not exist in any rural section of our broad Dominion than that made by the merging of the two principal thoroughfares of Cowansville and Sweetsburg into one unbroken mile of thoroughly constructed roadway flanked on either side by the pretty and elegant homesteads of the citizens of the two villages." So says an enthusiastic correspondent of the *News* writing from Cowansville, Que.

Mercantile Summary.

THE Bain Wagon Company, of Woodstock, have sold their factory at that place to John McKellar, of Ingersoll.

IN Winnipeg an early-closing by-law went into effect last week. Employes of jewelry, boot and shoe, grocery and hardware and tailor shops will have freedom after a day's work to enjoy recreation and rest. Naturally they thought it unjust that they should be compelled to work some three hours longer than other citizens. And, adds the *Free Press*, "as soon as some irregularities in the petition for the closing of dry goods stores have been corrected, they, too, will likely be included in a by-law."

A VERY well-known Canadian merchant, Mr. Robert Blackburn, of Ottawa, died in Liverpool, England, the other day. He had been fifty years in Canada, and lived all that time, we believe, in Eastern Ontario. For many years he had a general store in New Edinburgh, opposite Ottawa, and he was also a partner in the woolen mills at that place. More lately he became a partner in the Hawkesbury Lumber Co., and was made vice-president of the Bank of Ottawa, as well as director of various Ottawa concerns. He represented Russell county in Parliament from 1874 to 1878. Mr. Blackburn had reached the age of 66.

Steel Tyres and Steel Tyred Wheels, Axles, Crank Pins, etc.

STEEL CASTINGS of all descriptions a specialty.

The Bell Telephone Company of Canada

C. F. SISE, President.
GEO. W. MOSS, Vice-President.
C. P. SCLATER, Secretary Treas.

Head Office, - - - MONTREAL.

H. C. BAKER, Mgr. Ontario Dept., Hamilton.

THIS Company will sell its instruments at prices ranging from $7 to $25 per set. Its "Standard Bell Telephone Set," protected by registered Trade Mark) designed especially for maintaining a perfect service and used by the Company in connection with its Exchanges, is superior in design and workmanship to any telephone set yet offered for sale.

This Company will arrange to connect places not having telegraphic facilities with the nearest telegraph office, or it will build private lines for firms or individuals, connecting their places of business or residences. It is also prepared to manufacture all kinds of Electrical apparatus.

For particulars apply at the Company's Offices as above.

Sample Room for Exhibition week:

No. 18 Merchants' Building, 50 Bay Street, Toronto.

Mercantile Summary.

MR. JAMES MORRISON, late of the Commercial Bank of Manitoba, is about to open a private bank in Virden.

THE MacLeod Agricultural Society intend holding a large fair about September 21. Races and sports will be associated with the exhibition. The Lieutenant-Governor is expected.

FOUR thousand dollars of county of Lincoln debentures have just been bought by G. A. Stinson. These debentures are issued to rebuild the bridge on Grimsby Road, and we understand the county got a premium for them.

FOR many years W. G. Bowman has had his livery effects at Victoria, B.C., mortgaged, and now the sheriff advertises a sale of his goods. ——After being in the general store business at Northfield, B.C., three years, Janey & Crossen assign. Lack of sufficient capital has always been a source of trouble to them.

THE suspension is announced of the jobbing dry goods firm of Russell, Gardner & Russell at Ottawa. The firm dates from about two years ago, and has been handicapped by limited capital and the unfavorable times. Mr. Peter Larmonth, accountant, is in charge of the business as receiver; a meeting of creditors, most of whom are in Britain, will be held on September 15th. The senior member was formerly a partner in the wholesale dry goods firm of Russell, Seybold & Co., who failed in 1890, Mr. Seybold effecting a settlement and continuing the business as J. A. Seybold & Co.

GWATKIN & SON . . . . .
57 Bay Street
Toronto

LINDSAY'S rate of taxation is 24 mills on the dollar.

NUTMEGS are firm abroad. Pepper is slightly weaker in primary markets.

RICHARD HENRY, boot and shoe merchant, of Wawanesa, Man., has assigned for the benefit of his creditors.

THE Portage la Prairie town council have passed a resolution asking the Dominion Government to place the new post office on a site between the Imperial Bank and the fire hall, which is the centre of the business and population of the town.

MESSRS. MILLER & BARKER are erecting a large addition to their store at MacLeod, and are going into the dry goods business, as well as groceries and liquors. They have secured the services of Mr. Gardner, formerly of the Hudson's Bay Company's service.

IN the same Ottawa letter which brings us news of the death of Robert Blackburn, we are told of the death in Buckingham on Sunday, of paralysis, at the age of 70, of William McClymont, long a resident of Ottawa. He used to be a lumberman on the Ottawa River.

ABOUT a month ago the manager of the Northumberland Paper Co. at Campbellford died. Now it is ascertained that the concern cannot meet its payments, amounting to about $95,000, as they become due. The company has nominal assets of a similar sum. Yesterday a meeting of its creditors was held at the Queen's Hotel in this city.

A GROCER in a small way in Toronto, C. E. Evans, has assigned to E. R. C. Clarkson.——Last week we noted the wretched failure of Nolan & Co., Toronto. Since then the firm have assigned to the principal creditor, who will no doubt wind up the business.——The sheriff has seized a portion of the hotel effects of Henry Lemon in a suit with one of the banks, and sufficient goods will be sold to satisfy its claim.

WILLIAM JAMIESON, formerly a successful hotelkeeper at Magog, Que., and latterly interested in a kindling wood factory at Eastman, is reported insolvent. Liabilities not yet ascertained.——P. E. Beaulieu, general merchant at Ste. Flavie, who assigned last month, is now offering creditors 50 cents on the dollar, on liabilities of about $6,000.——E. Auclair, of St. Vincent de Paul, who also failed several weeks ago, with liabilities of $9,146, is endeavoring to effect a settlement at 25 cents, cash.

THE Parry Sound Railway is to be completed to Long Lake, 120 miles from Ottawa, this fall.

MESSRS. DAN TALMAGE'S SONS & Co., Charleston, telegraph Carolina rice crop movement to date: Receipts, cleaned, 24,500 bbls.; sales, 24,500 bbls. No transactions. New crop growing finely, but late.

J. E. PAINCHAUD & Co., who have had a haberdashery business in the East end, Montreal, for four years, are in embarrassed shape, and a demand of assignment has been made on them. Liabilities are $4,326.

A FIRM of curriers in Quebec, Clement & Co., offers 40 cents on the dollar, liabilities being about $4,000. They failed before in December, 1891, with an indebtedness of $20,000.——G. R. Bolduc & Co., Ottawa, a small concern dealing in cigars and tobaccos, have been closed up by the landlord. They had only been in business about a year and a half.

A CHARGE of obtaining groceries by false pretences has been preferred against Robert Hamilton, at the Toronto Police Court, by Messrs. Eby, Blain & Co. It appears that the defendant stated that he owned a house and lot valued at $4,000, and had book debts worth $3,000, and, upon these representations, he had been given credit to the amount of $1,000. It is now claimed that the statement was false. He has been committed for trial, on his own bail.

IT is not long, probably not more than a year, since M. D. Heath started a small store at Leduc, near Edmonton. Last month his principal creditor took a mortgage on his stock, and now Heath assigns.——Last month Frank Kent retired from the cigar firm of Watson & Kent in Winnipeg, but did not take anything out of the business. Now we hear Watson & Co. assign, and a meeting of the creditors will be held to-day.

A FEW days ago a meeting of creditors of Williams, Greene & Rome Co., shirt manufacturers, Berlin, was held, when a statement was presented showing liabilities of about $125,000, and assets $166,000, leaving a nominal surplus at $41,000. An examination of the assets will be made by the following inspectors: Mr. Kemp, of the Bank of Commerce; M. J. Ewan, of Montreal; Mr. D. Morrice; Mr. W. J. McMaster, of Gordon, Mackay & Co. When this is completed, it is hoped that satisfactory arrangements will be made, and the business, which is understood to be a profitable one, will be continued as before.

A MONTREAL tobacconist of some thirty years standing, with a good record, and generally regarded as being in very fair shape, has surprised his creditors by asking a compromise, and has now assigned on demand. This is Philip Henry, whose liabilities are stated at $9,374.——R. S. Kellie, doing a small suburban tailoring business in Montreal, has made an assignment, and owes about $3,000.——Aimé Turcotte & Co., in the same line of trade, have been asked to assign. They got an extension last spring, which has not afforded the required relief. Liabilities are about $5,500.——J. T. Bolt, a manufacturing jeweller, is proposing a compromise at 33⅓ cents on the dollar, spread over fifteen months. He owes about $6,000.

THE bailiff is in possession of the premises of Robert McKeever, coal and wood dealer in Hamilton, who is reported to have crossed the border, leaving nothing for creditors.——About 1886 Miss Sneyd began business as a milliner at Aylmer, and in January, 1892, moved to Brantford, but did not improve her position. She now writes her creditors, asking for a large rebate on their claims.——An extension of time is asked by Carson Price, general storekeeper at Holland Centre. About fifteen years ago he compromised with creditors, and since that time made considerable money. Even now he shows a good surplus, but it is not available.——Stock is being taken by the creditors of Henry Spafford, grocer at Trenton, who finds that he cannot meet his payments.

WITH but one exception, the failures in this province are small and of little importance. An extension of time is arranged for by Cooney & Son, hotel keepers at Windsor. They claim to have a surplus that will pay their creditors in full.——An assignment is made by Wm. Hinds, confectioner, etc., at Woodstock. He never had much capital.——S. Jarvis retired from the grocery firm of Alford & Jarvis, Niagara Falls, in June, 1893, and started in the same line in another part of the town. Now he finds that he cannot meet his payments, and stock is being taken with the view of arranging a settlement.——Mrs. R. Alt, finding that she cannot make any money as a grocer in Paisley, assigns.

A LETTER from Liverpool, dated 12th inst., appears in the Montreal *Gazette*, giving a blue picture of things in the meat trade. It says:—"The shipments of frozen mutton (and beef) from Australia and New Zealand are about to

be curtailed for the next two months. This has been determined upon by the principal export firms partly on account of the ruinous prices their goods have been sold at here, and partly because the banks of New Zealand have refused to advance any more money on account of meat shipments. * * * The refrigeration chambers at the docks and around Smithfield are all chock-a-block with frozen mutton, and sales are being made at 2 to 2¼d per lb. daily By all accounts it is as bad as the Canadian cattle business, and the sooner the freezing companies shut down or let up the better for all concerned."

THE recent failures in the Maritime Provinces have been few, and the volume of liabilities small. For the week we chronicle the following: J. E. Fortune, of Halifax, who came in from the country to try his fortune in a city shoe business about eighteen months ago, has had to assign. He owes about $2,200, some $1,300 of which is due to one wholesale concern, and is preferred.——A trader in a small way at New Glasgow, named P. Graham, has assigned. Liabilities altogether local.——C. A. B. Purdy, a lumber dealer at Porter's Lake, near Halifax, has turned his estate over to the assignee.——V. Albert, of St. Hilaire, N. B., a hotel-keeper of some years' standing, has gone into insolvency, with debts of about $2,000, and apparent assets only $667. ——J. McKilligan, grocer at Fredericton, is insolvent. He was one of the firm of McKilligan & Young, formed last spring, and recently dissolved.——A. A. Mabee & Co., who have a planing mill at St. John, N.B., are reported in difficulties. The partners have not been agreeing, and the business will have to be wound up by the assignee.

A FAMILIAR face on our business streets for more than a half century was that of W. W. Copp, of the well-known publishing firm of Copp, Clark & Co., limited, who died in Toronto on Tuesday last. At the age of sixteen years the deceased gentleman entered the employ of Mr. Hugh Scobie, the stationer. After Mr. Scobie's death, in 1854, Mr. Copp formed a partnership with Mr. Thomas Maclean and Mr. W. C. Chewett, carrying on a publishing business under the firm name of Maclean & Chewett. In 1862 the style of the firm became Chewett & Co. Three years later the firm was changed again to Copp, Clark & Co., under Mr. Copp's management, until 1885, when a joint stock company was formed, with the deceased as president. Mr. Copp was a man of integrity and public spirit. In the early days of his career he was closely associated with the late Mr. Geo. Laidlaw in the many railway enterprises of the latter that have helped to build up the city of Toronto, and for several years was a director of the Victoria Railway. He was a member of the Toronto Board of Trade, etc. A large number of friends followed his remains to their last resting place in the Necropolis on Wednesday.

Le Courrier de St. Hyacinthe, writing on the repatriation movement, gives figures showing that 126,000 individuals came back to Canada from the United States during 1893. This number, with that of 1892, makes a grand total of 172,410 souls who have again come to their native province. The figures are compiled from Custom House records.

THE Fire Commissioners of Montreal had a long sitting on Wednesday and announce the following about recent fires: The Montreal steam laundry, which was burned on the 16th inst., was proven to be of accidental origin. The loss is $50,000 and the insurance $27,000. Mr. Love, the manager, stated that about two months before the fire he considered the place so well protected that he dropped $14,000 insurance. The John Date fire on Craig street originated in the boiler room The loss, Mr Date says, will be $25,000 on the building and $20,000 on stock. Insurance, $13,000. Another small fire investigated was G. L. Benaud, grocer, 435 Marianne street, caused by rats.

Investments

I have been appointed general agent for the sale in small or large lots, of **High Class Debentures**, which, in consequence of financial depression will be sold to pay the buyer 6½ per cent. The security has been investigated and the bonds recommended by bankers. All these reports and other particulars at my office,

THE SITUATION.

As a result of the test of the cargo of Canadian cattle, in England, all hope of the restoration of the live cattle trade on its old footing is at an end. The evidence of a large number of experts makes it certain that disease not distinguishable from pleuro-pneumonia was found to exist. Seven-eighths of the experts believe that this is the true name of the disease, while one-eighth believe that it is a new disease. The disease being of bacterial origin, the experts say the incubation would take a longer time than is consumed by the Atlantic passage. Unless this fact can be disproved it is no longer possible to deny that the disease exists in Canada. How comes it that our own experts failed to discover it? If they did discover disease, they denied that it was true pleuro-pneumonia and qualified it as "corn-stalk." As a difference of opinion on this point still exists, it is desirable if possible that the doubt should be cleared up. We need not expect that anything which it is possible to do will convince British officials that the disease is other than the majority of the experts declare it to be. But we owe a duty to ourselves to remove the doubt if possible, and still more to fight the disease, whatever be its true name.

Sir Charles Hibbert Tupper's visit to Washington, in connection with the Behring Sea claims under the Paris award, is made unfortunately when the quorum of both Houses has disbanded. Nothing can be done this session, and the claims will have to stand over. If the visit had been made sooner in the session, before the tariff bill was disposed of, it is not probable that the attention of Congress to the claims could have been got. Over the claims themselves no serious difficulty need be anticipated. The amount claimed is not large, being only $425,000, though it was at one time believed at Washington that it would go into the millions. Nineteen vessels were seized illegally, as the Paris tribunal showed, and the damages have been gone over by Secretary Gresham and Sir Julian Pauncefote, the British ambassador at the federal capital. A bill to authorize the payment will have to be passed by Congress. There is no reason to suppose that any opposition to payment exists in either House, or will be developed during the progress of the bill, which cannot be introduced till next session.

No fast line of Canadian steamers to Liverpool via Montreal will be established without strong opposition from existing lines. The Allans have let slip the dogs of war. When they declined to entertain the project of a fast line, they gave evidence that they were sincere in the belief that the project was not one for which a paying basis could be found. It is no reproach to them that protection of their interests required them to oppose a quick line, for whether the proposed new line had a commercial basis or not, it would be highly injurious to them. But the fact of their opposition, though natural, being interested, deprives it of much of its sting. When the Messrs. Allan seek to create terror of the route they themselves have chosen, their usual good judgment for the moment deserts them. It is not their interest to frighten people into seeking another route. Any effect which the decrying of the Canadian route could have would injure all who are interested in the St. Lawrence navigation. Existing lines are entitled to oppose, by every legitimate means, the one projected; and though the Allans are the last people to resort consciously to foul play, they appear to have approached perilously near to the precipice.

Short-lived was the diplomatic advantage which Great Britain obtained in Central Africa. A subsequent turn of the wheel gave the advantage to France, in the form of two treaties, one with Liberia and the other with the Congo Free State. To France is attributed the desire to extend her African territory all the way from Algeria to the Congo. The new deal is described as going far to isolate the British territory of Sierra Leone. The new French acquisition includes the Calvary River, which the imagination of French geographers connects with the Upper Niger, and by which it is dreamed a new route to the interior may be opened. But this connection is so far purely a matter of speculation. The more strength France expends in equatorial Africa, the less she will have for elsewhere. It is inevitable that two nations whose ambition for colonization brings them into close proximity in new countries, should now and again come into collision there. Great Britain is founding a solid empire in South Africa, and it remains to be seen whether France can do as well in Northern or Central Africa. If she goes too far south, she is sure in the end to meet a competition that will prove more than a match for her.

Slowly, but certainly, the mists that hang over the Intercolonial Conference are being dispelled. The colonial department, in Downing street, has taken the opinion of the law officers of the Crown on the effect of the treaties between Great Britain and Germany and Great Britain and Belgium. Their opinion is that these treaties do not prevent England according preferential treatment to the colonies, and that they do not stand in the way of the colonies treating one another preferentially; but that they forbid the colonies to give preference to Great Britain. Canada and Australia, for any effect treaties can exercise, may make any commercial arrangements between one another that they like; Great Britain can prefer these or any other colonies, in her tariff, to foreign nations. Whether she will do so is another matter. If she granted preference to a colony it would be a free gift; she could take nothing in return for it. Whether she will be willing to deal in this one-sided way is the question. She does not want preference from the colonies for herself, and would not likely be willing to give it to Canada or Australia. The opinion of Crown law officers only goes to show what can be done under the treaties. The question of denouncing the treaties is an ultimate resource to which the intercolonial conference looked. This is a question of policy, and so far we have seen no indication that denunciation will be

resorted to. On another question which was before the conference, the statement is made, unofficially, that the Earl of Jersey will favor subsidies for Atlantic and Pacific steamship lines. With the endorsation and aid of the British Government both these projects would be assured. The cable is not mentioned in this connection. Is it to be left to depend on its own merits?

Real light is likely to be thrown on the dark places of the late railway strike by the commission of enquiry which President Cleveland has set on foot. The workmen's side of the story is being heard first. So far the chief enquiry centres around the Pullman works. In providing houses for workmen the Pullman Company, in effect, introduced a new feature of the old discredited system of "truck" pay. A woman who earns $1 a day and is charged $17 a month for her house, pays more than half her income in rent; it is evident that she must be in want of money and other things. The company's side of the story has to be heard in rebuttal. At present it begins to look as if there was something to arbitrate or adjust in some equitable way between the Pullman Company and its workmen.

THE PRESENT CONDITION OF OUR TWEED MANUFACTURE.

An industry which has reached such proportions in Canada as the making of woolen tweeds, one which has given us so much satisfaction in the past and has done so much for our reputation in other countries as manufacturers, is important enough, surely, to demand attention from those who are interested in its welfare. We are told by different persons in more than one city and town, that conditions of manufacture and sale of Canadian tweeds are not at the present time satisfactory. And the tone of the trade, as well as the quality of the product, is being sapped. It appears to be, unfortunately, the case that Canadian manufacturers of tweeds have yielded too much to the pressure brought to bear by the wholesale buyers in reducing prices. The coaxing or the pressure resorted to by wholesale houses, after a good season with a certain line of tweeds, to get a mill to make "the same goods at ten cents less in price," has led to the adulteration of the fabric. The consequence is that qualities have been reduced, thereby seriously affecting the reputation of Canadian tweeds as compared with imported goods. There is, we are told, a feeling throughout the trade generally, nowadays, that to get a good piece of tweed it is necessary to look to imported goods. While we do not admit this, we must express the opinion that if more attention had been paid by Canadian mills to improving designs and keeping abreast of the times in styles and finish, instead of reducing prices and qualities to please grasping jobbers, much better results might have been attained. The best designs have been prostituted by being used for the cheapest class of goods, instead of being reserved for the best qualities, and the result has been that the designs in low priced goods are in many cases ahead of those put into the better class fabrics. It is true that some Canadian mills still continue to produce a good quality of goods, but these, generally, are far behind the demands of the market in their designs, and the quality has therefore to be sacrificed because more attractive designs found in inferior goods are more marketable. Surely in a matter of such vital importance as design no niggardly policy should prevail.

Another matter that militates at times against the sale of Canadian tweeds, especially during a season of depression like the present, is the fact that consumers resort to the use largely of such goods as plain English serges and vicunas, they being more suitable in point of economy for general purpose suits.

Further, the Canadian manufacturer of tweed is at a disadvantage in that the British makers, in their determination to secure all possible trade going, offer either directly or through commission men, their ranges of samples to buyers who are not obliged to place their orders until they have canvassed the retail market and in turn secured their customers, thereby reducing their risk in the matter of carrying stock to a minimum. Besides this it has become a truism that the nearer the market the smaller the profit, which applies to both wholesale and retail men. Consequently a larger profit is confidently asked on imported goods and readily obtained. These latter facts bear more particularly on the wholesale woolen trade. Clothing manufacturers are as a rule compelled to buy Canadian goods on account of their better values, even though their design and finish might be improved, and the fact of their being used so extensively by clothing makers has interfered with the handling of them by the wholesale woolen trade.

These facts are apparent to any shrewd and competent observer; the remedy is a question for careful consideration, and one difficult to solve. One source of remedy does, it is true, suggest itself, the securing of an export trade, are the markets of the United States under the revised tariff, the West Indies and even the United Kingdom, not accessible? For our own market a change certainly needs to be made in the matter of following more closely or else independently rivalling latest designs of the European producers, the *value* of whose goods can undoubtedly be competed against by our Canadian makers. It appears to be one of the anomalies which discredit the distributing trade of this country that for years the complaint has been chronic that there was "no profit in handling Canadian tweeds." In the name of common sense, whose fault was it? The fault of the mills that overproduced, and the houses that over-ordered and then childishly proceeded to undersell each other, jobbing by the hundred or the thousand pieces under cost. And now when the mills, so far as we can make out, are trying to be prudent and economical in their output, they are bullied or wheedled by the middlemen into accepting prices for orders at which they cannot make honest goods.

THE BANK STATEMENT.

We give below a condensation of the figures of the statement of Canadian banks for the month of July, which bears date Ottawa, 20th August. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities, average holdings of specie, and Dominion notes, &c.

Canadian Bank Statement.

LIABILITIES.

	July, 1894.	June, 1894.
Capital authorized	$ 75,458,685	$75,458,685
Capital paid up	62,156,255	62,112,883
Reserve Funds	27,160,750	27,157,706
Notes in circulation	29,801,772	30,254,159
Dominion and Provincial Government deposits	6,470,573	8,529,841
Public deposits on demand	64,950,318	65,006,011
Public deposits after notice	111,633,147	109,924,925
Bank loans or deposits from other banks secured	89,268	116,265
Bank loans or deposits from other banks unsecured	2,705,296	2,352,405
Due other banks in Canada in daily balances	112,521	168,796
Due other banks in foreign countries	127,751	121,213
Due other banks in Great Britain	5,562,778	5,521,705
Other liabilities	263,131	207,285
Total liabilities	$221,716,648	$221,292,707

ASSETS.		
Specie	$ 7,779,735	$ 7,438,513
Dominion notes	15,690,145	14,016,698
Deposits to secure note circulation	1,821,268	1,831,979
Notes and cheques of other banks	6,776,646	6,462,944
Loans to other banks secured	76,557	90,000
Deposits made with other banks	3,339,382	3,287,255
Due from other banks in foreign countries	17,251,515	15,650,822
Due from other banks in Great Britain	3,713,057	3,086,167
Dominion Government debentures or stock	3,133,230	3,157,413
Other securities	19,283,107	19,080,101
Call loans on bonds and stock	14,677,518	14,600,915
	$ 94,542,160	$ 88,702,807
Loans to Dominion and Provincial Governments	190,456	489,722
Current loans and discounts	202,720,760	206,958,912
Due from other banks in Canada in daily exchanges	102,332	228,299
Overdue debts	3,016,800	2,811,395
Real estate	942,359	928,151
Mortgages on real estate sold	623,463	623,800
Bank premises	5,396,612	5,365,188
Other assets	1,570,586	1,413,954
Total assets	$308,105,729	$307,542,429
Average amount of specie held during the month	8,021,844	7,465,560
Average Dominion notes held during the month	14,005,096	13,769,073
Loans to directors or their firms	8,104,682	8,051,337
Greatest amount notes in circulation during month	30,913,384	30,745,831

The statement given above is characterized by much the same features as those remarked in commenting upon the June return. The dulness of trade and the liquidation that is going on in every direction are reflected in the figures of the banks. Midsummer dulness it may truly be called, for every one, in almost any branch of trade, echoes the opinion of his neighbor, that trade is extraordinarily dull, and the results of business as a rule disappointing. This fact, universally appreciated, seems to have brought about a wave of economy and debt-paying. Low prices for nearly all products and reduced profits upon the handling of them induce a reduction of expenses and a husbanding of resources among ourselves. And in the United States, where manufacturer, middleman and artizan are in a worse plight than in Canada, a like tide of retrenchment and prudence is observable among even the most extravagant livers.

The conditions in the grain trade are curious. Prices have reached a depth that people must look back fifty years to equal. And the supply keeps up. Last Saturday's Chicago visible supply of wheat was a million and a half bushels greater than the previous week and six millions greater than a year ago, while the total amount in sight was more largely still in favor of the present year. Sound Ontario wheat has been sold by farmers during the present week at fifty cents per bushel, which represents but a bare profit to the exporter on a basis of 21 shillings per quarter in Liverpool, which is the return obtainable. Peas and Indian corn are bringing more money than wheat, the former commanding 54 cents the bushel. It is to be said, however, that other commodities than those of the farmer are low in price nowadays. The low price of commodities is general and world wide.

There is a shrinkage in current loans and discounts from $206,958,000 to $202,720,000 in the month, say four and a quarter millions, which is to be expected from the shrinkage of business. Perhaps the most noticeable feature of the return is the increase of balances due from abroad, more than two millions. This represents mainly exports of cheese, cattle and timber. And when it is recalled that we were at the same time bringing in gold from New York, it means that we have a still further and desirable realization to make from such assets as these. It might be well, thus early in the banker's year 1894-5, to consider the probability of shrinkage in assets. With such conditions as are already manifest, and the further chance of low values and restricted business for six months to come, it were the part of prudence to be conservative in valuations.

CANADIAN WOOL.

At present the situation in Canadian fleece wool is rather an interesting one. The total clip of our fleece wool for the season now drawing to a close may be placed at something like six millions of pounds. This is an inconsiderable factor in the world's supply, but the amount is larger than that of last year's, and the industry is capable of great development, especially in Manitoba and the Territories. Two firms, one in Toronto, the other in Hamilton, are each credited with holding over 1,000,000 lbs., and are obviously waiting until the United States duties be removed. In addition to the 1894 clip, a considerable amount of last year's clip, probably about 750,000 lbs., remains in the hands of Canadian merchants. The United States has always been the principal foreign purchaser of Canadian fleece wool, and last year that country took from us 1,167,860 lbs. But with a specific duty in force it was impossible for American merchants to buy our low grades and unwashed wool. And if free wool does nothing more, for many merchants are of the opinion that prices will not be advanced, it will form a distinct advantage in giving Canadians a more general market for our different grades.

The clip is now pretty well in the hands of either city or country dealers. Some of the country merchants are inclined to hold stocks and await developments, evidently expecting higher prices. The Canadian mills at this season of the year make but moderate demands upon the stocks of merchants, and in a majority of instances are buying direct from the farmers. It will be at least two months time before the mills can be expected to buy in the market to any considerable extent, and even then the prospects are that through lack of orders their wants will be limited. Any improvement in values must come from outside sources. Prices in the United States are reported to be stiffening. The London market is firmer in feeling, but prices will not be fixed until the next auction sale, which will take place on September 18th.

THE PROPOSED MONTREAL TAXES.

We have been accustomed to hear from Montreal that her citizens, especially those of the commercial class, were quite heavily enough taxed already, judging from the representations made to the Quebec Government as to the share of the whole provincial taxes paid by Montreal. It was therefore with some surprise that it was learned that taxes were to be levied by the city on theatre owners, laundries, bath users, brokers, etc., in addition to those already complained of, and the water rates were to be increased. This necessity arose out of the too great haste made in improving the city, the road and police departments as well as the park and city hall having already exceeded their appropriations for the year, and $200,000 was urgently required. The total appropriations asked for had amounted to $3,447,312, of which sum a million was for interest, $750,000 for roads and police, $300,000 for schools, $550,000 fire, water and light, $400,000 for police and health. A conference was held last week between Ald. Hurteau, chairman of the Finance Committee; Mr. L. J. Ethier, City Attorney; Mr. L. O. David, City Clerk, and Mr. Wm. Robb, City Treasurer, to consider the position. The result was a legal opinion from the city attorneys, that a special tax to meet the deficiencies of the different services this year, would, under the city's present circumstances, be illegal. Thus the dreaded increase of city taxes will not at present be

made, and merchants rejoice thereat. But the city is not in easy financial shape by any means. A large number of the city employes are on the list for dismissal, and a number of the civic services are in danger of being temporarily stopped. Alderman Hurteau proposes that the city borrow temporarily the needed money to tide over the various committees till the end of the year, and then get this loan ratified by the Legislature. The Montreal aldermen have now a warning that it is easier to vote away money than to provide it.

CONSCIENTIOUS LIFE ASSURANCE.

Some good and serious men have dwelt in words as well as by writing upon the duty of a man's insuring his life whenever he has any one dependent upon him—say, a widowed mother, sisters, or a sister's children, any person, indeed, for whose support and comfort he feels responsible. But it is strange that men as a rule do not like to be reminded of this phase of life, or to have life assurance urged upon them from this point of view. The average man cannot be made to believe that his life is in any danger. He thinks other fellows may die and die quickly, but that he is sure to live a long time. As it was put not long since by a writer in *Black and White*, "He considers the funeral of his neighbor an object lesson for the rest of mankind, but is slow to take it home to himself. He is sorry, oh! how sorry, that his neighbor did not protect his family as he should, since he had a good income and could have carried a lot of life insurance without much trouble, but he is loth to think that he himself is in any danger, although he will admit that he does not carry all the life insurance he ought to do. But with him, of course, there is plenty of time. He is not going to die for years. Why! he is more interested in a contract which will pay him, when he is an old man, a considerable sum of money which he can do as he will with. And so it goes."

THE FIRE FIGHTERS' CONVENTION.

Continuing our remarks upon the gathering of chiefs of American and Canadian fire brigades in Montreal last week, we notice that an exhibition of fire-fighting appliances was one of the features of the occasion. There were tests of apparatus on Dominion Square, and along Dorchester street a test of a pump, then exhibits of asbestos clothing, a new engine, new brakes, fire alarms, hose, life-saving nets, in the Victoria Rink; a new fire extension ladder, &c., &c. They go so far as to say that asbestos clothing for firemen is now made quite fireproof, and that one may walk through the flames unhurt with asbestos trousers, jacket, and mask. If this be true, the fact should have an important bearing upon fire fighting, for, if two or three men in each company were clad in asbestos suits, they could carry a water stream into places which could not be approached by the ordinary fireman, and thus might save both property and life.

The reading of papers was proceeded with on Wednesday, 15th inst. A technical paper was read by Mr. Wm. Brophy, of Boston, on "The Transmission of Electric Energy." In Boston, he said, the Bell Telephone Company had commenced to remedy the evils of wires on the earth for self-preservation. The day was coming when they would be able to do away with the trolley. In the ensuing discussion it was shown that the wires in the ground were found to be destroying gas and water pipes, and companies had been allowed to put underground this destructive element. Mr. Damerell suggested a special committee to gather information and prepare diagrams in cities where the trolley and electric wires were in use. This subject was left with Messrs. Brophy, Fleming and Barrett, and the National Board of Underwriters are to be requested to appoint a representative on the committee.

Mr. C. A. Rolph, of Chicago, dealt with "The Progress of Electricity in Municipalities." He described the fire alarm telegraph, which, like Topsy, was not born, but grew. Referring to the police telegraph, which was first inaugurated in Chicago, he asserted that there are over 100 cities in the United States using them with advantage. The telephone was, in his opinion, a good auxiliary to the fire and police departments when in cool hands.

A matter deserving the regard of underwriters and builders, namely, "Slow-burning Mill Construction," was dealt with in a paper by Mr. William McDevitt, inspector of fire patrol, Philadelphia. He declared isolated floors to be a deception. In the opinion of Mr. Damerell architects were to blame who attempted to build slow burning buildings and did not know their business. They should devise means to cut off the draft, and so prevent the flames from spreading. They might also, as a result or outcome of their deliberations, be able to reduce the number of fires by 75 per cent. Improperly constructed buildings were heartily condemned in the course of the discussion.

The next essayist was Mr. Brown Flanders, superintendent fire alarm telegraph, Boston, Mass., who chose for his subject "Dynamo Currents as Applied to Fire Alarms." It dealt largely with tests made by the author. Letters of regret that they could not be present to read papers, as promised, were received from Messrs. Simon Brentano, of New York, and George Dickson, of Toronto. One was read on "The Proper Location of Gas Meters in Buildings," by Superintendent Samuel Abbott, jr., of the Boston Protective Department.

At the morning session on Friday a paper was read on the subject of "Attic Fires" by Chief Heinmiller. Topic No. 8 then came up for consideration, viz., Should not uniform, or at least interchangeable hose couplings, be adopted in cities which are within a radius of 50 miles? Another topic discussed was the duty of cities and towns to place water gauges that the fire department may at all times become familiar with the state of the water pressure, and keep a daily record of the same? This commends itself, surely.

Next came "The service and economy of fire patrols or salvage corps in small cities." The eighth topic enquired, "Should not the size of our hose, nozzles, hydrants and engines be increased to keep pace with the large areas and so-called slow burning construction in vogue in mercantile buildings of the present day?" Finally came topic No. 9: "How best to handle brush and prairie fires that threaten suburban residences beyond the reach of the water service."

On Friday afternoon a short paper was read by Mr. Hill, advocating fire escapes on all buildings, and that none should be exempt on the plea of being fire-proof. The matter was referred to the executive committee. At this session the business preliminary to closing came up. Chief Humphreys, of Pittsburg, submitted a resolution thanking the firemen and citizens for their hospitality in the first gathering the association had held outside the United States. It goes to show what an impression has been made on the association when it takes the extraordinary step of electing Hon. J. A. Chapleau, Lieutenant-Governor of the Province of Quebec, honorary president. In response to the announcement of this, Ald. Stevenson said His Honor had stated that he had never before met such a body of men as the delegates were, and that he would like to be present at their next convention if his public duties would allow and the distance was not too great. Hardly less fond did they show themselves of the big-hearted Colonel, whom

they elected one of the vice-presidents. Moreover, when the secretary presented his annual report, the principal suggestion was found to be that the name of the association should be changed from National to International. No greater compliment, however, was possible to Canadians and to Montreal than to choose Mr. Benoit, chief of the Montreal Brigade, as president of the body for the ensuing year, which was done by a unanimous standing vote. Mr. Hill was re-elected secretary, and Mr. D. C. Larkins treasurer. After applications for the honor of being the place for the next convention had been received from Augusta, Georgia; Little Rock, Arkansas; Kansas City; Portland, Me.; Toronto; and a very eloquent address by the chief from Salt Lake City, the vote was called, and Atlanta won.

MONTREAL TRADE FIGURES.

We present herewith a tabulated statement of the principal items of import at the port of Montreal for last month and July, 1893. The aggregate of dutiable goods brought in shows a shrinkage of some 14 per cent., and the free goods still a greater decline, but the exports were well maintained. The following table compares the classes of imports:—

	1894.	1893.
Total dutiable goods	$1,841,822	$2,135,656
Total free goods	1,332,157	2,233,800
Coin and bullion	665,950	104,810
Grand total	$3,839,929	$4,474,266

Among the free goods the largest item was sugar, $468,123, and next anthracite coal, $164,222. Tea totalled $76,326 and tobacco leaf $74,331. Dyes and chemicals, such as come in free, amounted to $59,752, and crude India rubber or gutta-percha, $75,886. Raw cotton, jute yarn, broom corn, undressed hemp, raw silk, are among items in this list imported for manufacturing purposes. Steel rails appear at something over $89,000.

Turning to the list of dutiable goods imported, as sent us by our correspondent, we find a reduction in almost every item, as compared with the same month of 1893. Dry goods are $130,000 less; metals, $136,000 less; fruits, oils, paints, spirits and wines, drugs, glass—all less. There is an exception in leather and leather goods, however, which show an increase.

DUTIABLE IMPORTS.

	July, 1894.	July, 1893.
Cotton, and manufactures of	$108,324	$125,141
Hats and bonnets	26,624	19,425
Fur, manufactures of	15,079	25,050
Fancy goods	50,107	50,765
Silk, and manufactures of	131,747	131,000
Woolen manufactures	424,634	531,209
Total dry goods	$756,515	$882,619
Brass and manufactures of	7,446	14,776
Copper "	2,980	11,069
Iron and steel "	244,092	362,135
Lead "	11,808	11,695
Metal and composition	4,534	7,030
Total metal goods	$270,860	$406,705
Books and pamphlets	11,674	23,074
Coal, soft	3,772	16,759
Drugs and medicines	30,230	40,634
Earthen and stoneware	15,516	17,388
Fruits and nuts	28,406	46,009
Glass, window and other	40,407	42,885
Jewellery and watches	17,223	19,147
Leather and m'frs of	58,269	46,591
Oils of all kinds	32,082	44,639
Paints and colors	21,143	53,420
Paper and envelopes	24,203	22,990
Spirits and wines	36,062	50,283
Molasses	50,072	12,955
Tobacco and cigars	9,950	11,141
Wood manufactures	10,951	17,418

Exports for the month totalled $5,218,375 in value, all of which were produced in Canada, save the $858,000 worth of American goods brought through Canada for export by the St. Lawrence. This was almost all corn, wheat, flour and cheese. Among the "mining" items are $20,000 worth of Canadian coal, and $12,500 worth of phosphate of lime; the sawn lumber shipments were valued at $561,000, and the square timber at only $13,000. Horned cattle shipped reached the large total of $817,425—pleuro or no pleuro-pneumonia; sheep and horses added another $166,000. Meats made a considerable figure, $193,000; but the big item was cheese, $1,705,645. Wheat, beans, peas and hay made up $400,000. Among manufactures exported the noticeable things were $132,000 worth of leather for Britain, $37,000 worth of metal goods, and $55,000 worth of manufactures of wood. The gold coin shipped ($168,417) was all American.

EXCURSIONS AND DINNERS.

It is undeniable that business in the United States is slack, that many artisans are out of employment, and that merchants, as well as manufacturers, are meanwhile "feeling poor." This, however, would hardly be suspected by any one looking at numbers of guests on the excursion steamers on the great lakes. The Mackinaw route boats are crowded, the steamers from Cleveland or Detroit to the Lake Erie islands get their usual quota, Lake Huron and Lake Superior excursion boats do not lack for passengers. In fact it looks as if it were true, as an American captain phrased it last week. "Those city fellows," said he, "will have their summer holiday trip even if they can't pay their house rent." As if to confirm this we find the new and fast screw steamer "North-West" leaving Buffalo last week for Duluth with passengers whose fares for the up trip alone amounted to $6,000. Then staterooms and meals have to be paid for on board of her, besides. She is a beauty, to be sure, inside and out, resembling in appearance the ocean flyers of the North German Lloyds, but she is very far from cheap. In fact her prices of food on board her have been the subject of complaint, and one can hardly wonder. Here is a specimen of her bill of fare: Soup, 20 to 50c. per plate; fish, 30 to 60c. per portion; entrees, 30c. to $1.10; roast, 30c. to $1; game, 60 to 75c.; vegetables, 15 to 40c.; salads, 15 to 40c.; mayonnaise, 25 to 75c.; cold meat, 25 to 50c.; relishes, 10 to 30c.; cheese, 10 to 25c.; pastry, 15 to 25c.; dessert, 15 to 30c. Thus one could not get a full meal for less than $1.25, and if he went the whole bill his dinner would cost from $3 to $7; wine added, say $5 to $10. This may do for a millionaire at Delmonico's, but it does not do for a summer lake excursionist of the middle class. However, the average American persists in being extravagant, and even hard times cannot cure him of free spending.

THE STANDARD DICTIONARY.

We have too long delayed our intended notice of this work, which will be a welcome one to many.* What strikes one about it, next to the novelty and neatness of the typography, is the distinctly American scheme of spelling adopted in certain words; for example, bromin and bromid for bromine and bromide, among chemical terms; and the no less American sort of pronunciation. The special explanatory note on page xx. tells us that "the scientific alphabet employed to indicate the pronunciation of words was prepared by the American Philological Association," and "an approved phonetic spelling is the result." The pronunciation of the words around and account would in an English dictionary be declared to be as *arownd* and *accownt*, but the Standard gives them as "*araund*, as in thou or bound." But how to pronounce thou or abound? We do not accuse the editors of adopting the Yankeeism of theou, beound or areound exactly, but this "au" business is only a modification of it.

If these were to be considered alternative spellings or pronunciations it would not matter so much, but this, as its name imports, is a "Standard" Dictionary, by which we understand that it aims to set up or at least to represent a standard method of spelling and pronouncing English words. It would be just as correct to take the pronunciation of a Devonshire rustic, of a Yorkshireman, or of an Aberdonian farmer or fisherman, and call that pure English, as to call certain American pronunciations standard English. Noah Webster has much to answer for; his vagaries in lexicography began long since, but they have been added to by others. He wanted, apparently, to found an "American language," the language in which the Emperor of Russia conversed with Cassius M. Clay, a bitter Anglophobe, when the latter was, years ago, American minister to the Russian court, and sent home a bombastic account of his interview.

However, while we cannot agree in such attempts to improve—that is, to Americanize—the English language out of its normal shape and sound, which would be as absurd as to prefer the high-pitched, drawling, nasal speech of a Westerner to the low tone and perfect utterance of an educated Dublin lady, we recognize the great value of the Standard Dictionary as a comprehensive and admirable collection of words, ancient and modern. In the domain of geology, in botany, in zoology, the book is almost as good as a special dictionary; terms used in handicrafts, in commerce, in contracts, are copiously provided, while electrical science, the great special field of development of both European and American in this age, receives so much attention in its pages that, as we are told by the editor, they contain "4,000 terms referable to electri-

*A Standard Dictionary of the English Language, upon original plans, prepared by more than 200 specialists and other scholars. Isaac K. Funk, D.D., editor-in-chief. Vol. I. letters A to L. Funk & Wagnalls Co., New York, London and Toronto.

city or to its multifarious applications." How comprehensive the work is may be judged when we say that while the International edition of Webster's has 125,000 words and the Century Dictionary 225,000 words, the Standard boasts no less than 280,000 words. The compilers quote the racy paragraph of James Russell Lowell as to what a dictionary should *not* be, thus: "A dictionary that should embrace every unusual word, every new compound, every metaphorical turn of meaning to be found in our great writers, would be a compendium of the genius of our authors rather than of our language; and a lexicographer who rakes the second and third rate men for out-of-the-way phrases is doing us no favor. A dictionary is not a drag-net to bring up for us the broken pots and dead kittens, the sewerage of speech as well as its living fishes. Nor do we think it a fair test of such a work that one should seek in it for every odd word that may have tickled his fancy in a favorite author." If, in the present work, Mr. Lowell's suggestions in these respects have been followed, and yet 280,000 words have been brought together, one is tempted to ask anew how many words there are in the language. Of course every new lexicographer is entitled to profit by those who have gone before him, and then, in these modern inventive days, new words as well as things are being brought into existence. Thus, probably, we must expect the latest to be the largest, especially if scientific terms are included. "If a word has two or more meanings," the preface tells us, "the most common meaning has been given first; that is, preference is given to the order of usage over the historical order." Utilitarian this, to be sure. Are history, derivation, association, nowhere in what may be called the valuation of words? If, instead of "A Standard Dictionary of the English Language," this work had been entitled "A Cyclopedia of Words and Latest Terms for a Busy American," it would have well fulfilled its title. Its compilers have chosen for themselves a wide field, and have labored in it with marked ability and no little success. Every page bears witness of methodical research, and the illustrations are no small help to the understanding of the text. The volumes are a marvel at the price, and deserve to find a good market. Still, the publishers must be prepared to hear objections to any attempts to Americanize the English language.

INSURANCE MATTERS.

Referring to the fire at Huntingdon, Que., last week, whereby some buildings owned by Moody & Sons, of Terrebone, were destroyed, a correspondent of the St. John's *News* says: "Something must be done, and that quickly, in procuring more suitable fire apparatus, either in the way of procuring a more suitable engine or the erection of waterworks with the necessary hydrants."

Black and White has a cartoon representing the gods and goddesses up to date, all in the insurance business. The central figure is Jupiter, president of the Ætna, armed with Jove's lightnings; Apollo, with lyre in hand and boys on head, is the manager of the New York Life; Mars, with the sword of war, is represented by the Equitable Life, and to the Mutual Life is given the role of Hercules.

The Ontario Court of Appeal has held, and is sustained by the Supreme Court in its finding, that even where there is no clause in a life policy making it void in case of non-payment of premiums or note given therefor, the fact that a policy-holder died before he paid the whole of a premium, consisting of promissory notes at different dates for the two halves thereof, the policy was void. The deceased had paid one note, but not the other.

On Tuesday evening last the Commodore of the Royal Canadian Yacht Club, Mr. W. H. Beatty, entertained on board the yacht "Oriole" a select party of twenty. The entertainment was given in honor of Sir John Gorst and Mr. Ryan, respectively Chairman of the Board of the British Empire Life, and Manager of that company. The dinner on deck in the harbor was a delightful idea, and the subsequent moonlight sail on Lake Ontario was an experience to be remembered.

DRY GOODS JOTTINGS.

Chenille spots and borders prevail in new veilings.

Actresses are called stars probably because they look best at night.

Messrs. Dupont & Wilson intend enlarging their oil cloth factory in Kingston.

Summer costumes will soon be relegated to the closet if these cool breezes keep on.

A glove one size larger than the hand is economical, comfortable, rational and fashionable.

Prices of American Axminsters have been advanced 3d. a yard by Manchester manufacturers.

Next Monday Toronto millinery openings will be held, while a week later on, September 3rd, the Montreal openings begin. It is our intention to give a full report of the styles displayed in Toronto and Montreal during these weeks.

Straw hats will soon be ruled out. Trade in this line has been only moderately good during the season.

Messrs. W. H. Storey & Son, of the Canada Glove Works, are busy making fall shipments just now. Their output at present is about $30,000 per month.—*Acton Free Press.*

The finance committee of the Quebec city council has recommended that a bonus be granted Mr. Falkenberg, a Manchester manufacturer of waterproof clothing, in the event of his establishing a factory there. The bonus consists of an annual subsidy of $2,500, payable for five years.

The August issue of the *Dry Goods Review* is a special fall trade number and contains some very interesting matter. Articles upon the coming season's millinery, fall dress goods and the fur trade, with a sketch of the travellers of John Macdonald & Co., are the more prominent features of the issue.

Styles of gloves brought out for fall, the *Economist* remarks, are extremely pretty and in modest shades, principally in soft tones of standard colorings. Many of them show four branch heavy embroiderings that are about equally divided between self and black, while buttons and trimmings match the stitchings. In connection with these standard shades, white and pearl-colored gloves figure prominently in a four-button or seven-hook length.

The *Hat Review* says: "Light and dark browns will be in favor for the fall season; these colors are very generally shown. We are quite confident that a derby with distinct taper crown will find marked favor during the fall and winter: such a shape will prove especially attractive to young men—and, as we have previously remarked, young men determine the styles. Make a note of this pointer. There is a tendency toward fuller crowns, and somewhat wider brims in derbys for the fall season."

FOR GROCERS AND PROVISION DEALERS.

The London cheese market, at its meeting on Saturday, adjourned for two weeks.

The potato bug has been doing a great deal of damage to the crop in Cape Breton.

Messrs. Shields and McShae, grocers, of Weidman, Ont., have moved their stock to St. Thomas.

A shipment of fresh Bosnia prunes, sphinx brand, will be received in this market about September 1st.

Messrs. Fader & Co., of Vancouver, B.C., have arranged to make monthly shipments of fish to the Hawaiian Islands.

Toronto merchants are expecting a large movement in sugars during September, in consequence of reports of a large peach crop in the Niagara district.

During the past week Messrs. Titterington & Pay have shipped from the city over 5,000 baskets of various kinds of choice fruits and vegetables.—*St. Catharines Journal.*

One hundred and thirty-five carloads of green fruit from California were disposed of in New York last week. Receipts were the heaviest on record.—*Shipping and Commercial List.*

The wheat crop of Illinois is estimated at 41,315,000 bushels, the largest since 1882. The acreage is 2,071,000, the largest since 1888. The average yield is 20 bushels per acre, the largest ever known.

There is a big blueberry crop this year, and the shipments from Welsford, Gaspereaux and Hoyt Station have been big. From Welsford so far this year 2,200 bushels have been shipped.—*St. John, N.B., Record*, Aug. 18th.

Notwithstanding the dullness in Montreal shipping circles, there were nearly twice the number of sheep shipped last week as there were in all the previous year's shipments. The figures for the week ending August 18th are 6,680; those of last year, 3,700.

The hop crop at the Mission promises to be an extremely large one this season. Hop culture has now passed beyond the experimental stage in this district, and an extensive addition to the acreage of this crop will be put in next spring.—*Vernon, B.C., News.*

The first steamer with new raisins from Denia will sail late this week. Some transactions have been put through at 6c. for layer Valencia and 5½c. for off-stalk, new duty clause. The fact is deserving of the attention of the California combine.—*New York Bulletin and Journal of Commerce.*

Messrs. Hovey Bros., pork packers and curers, who were recently burned out at North Hatley, Que., have been induced to settle at Sherbrooke and have commenced building operations. They expect to have their building ready for occupation about November 1. Operations will be carried on as an incorporated company, with a capital stock of $25,000.

According to a letter received yesterday from Shanghai by Messrs. Perkins, Ince & Co., dated 29th July, prices of green China teas are bound to go higher. The shipments received by that firm *ex* steamship "Empress of India" the first shipment of the season are quite up to previous seasons in quality. In black teas, Moning Congous are also higher, according to same advices.

The London *Grocer* of August 11th reports a dull market for cheese at unchanged rates, including primest new cheddar at 64s. to 66s., Wiltshire loaf at 54s. to 60s., and "culls" at 40s. to 44s. per cwt. In the Canadian and American department also there is nothing to boast of in the shape of more numerous inquiries for cheese having been made since our last report, and operations have been much curtailed

The Cincinnati *Price Current* notes that the average export price of wheat from the United States for the past cereal year was 67.2 cents per bushel, compared with 79.9 for the preceding year, and an annual average of 90 cents for a period of ten years ending with 1893. The average price of flour exported for the year was $4.11 per barrel, compared with $4.54 the preceding year, and an annual average of $4.81 for ten years ending with 1893.

A merchant, who has his office in the Board of Trade building, has just had a remarkable stroke of good luck. Two months ago he brought a cargo of 15,000 bags of sugar from Cuba to New York. The cargo was entered free. The merchant foresaw that a change in the tariff was likely and decided to hold on to his cargo. He has just returned from a trip to New York, and stated to a *Star* reporter to-day that he had an offer of $25,000 clear profit on the transaction. He refused it, however, hoping to make $45,000 once the President signs the new Senate bill which imposes a duty of 40c. on the article.—*Montreal Star.*

There is excitement in the tea market of Montreal. Japans in particular show appreciation and active movement. Offers made to New York of an advance of ½c. to 1c., says our correspondent, have been declined, the replies saying: "Nothing under a cent and a half advance will bring these goods. Cables quote a large advance in cost and exchange, and the market here is exceedingly active, prices taking quite a jump. Japans at from 16c. downward are fully 2 cents advanced." Shipments of Japan are being made from Montreal to St. Louis and St. Paul. China teas, also, are much higher in London, as our market advices show.

According to British Board of Trade returns, the importation of cheese into the United Kingdom during first seven months of year were as follows:

		1894.	1893.	1892.
Holland	cwts.	158,201	149,443	144,577
France	"	29,121	34,584	24,989
Canada	"	376,528	294,619	287,215
United States	"	454,998	418,377	479,367
Other countries	"	73,057	46,748	41,463
Total		1,091,905	943,771	977,611

The movements of tea across the Pacific continue on about schedule time. The "Glencova," from Yokohama for Tacoma, has 38,439 packages tea, including 3,945 packages for New York, 22,352 packages for Chicago, 5,612 packages for Canada and 6,530 packages for other markets in the Atlantic States. The cargo embraces 10,090 packages from Shanghai, 10,720 packages from Hyogo and 17,629 packages from Yokohama. According to San Francisco *Evening Bulletin*, the "Henrietta" left Yokohama July 19th for Vancouver with 2,169 tons tea in transit for Canada and domestic Atlantic markets, *via* the C. P. railway. The "W. F. Babcock" followed with cargo of about similar dimensions.—*N.Y. Journal and Bulletin of Commerce.*

The British Board of Trade returns make the importation of butter into the United Kingdom during first seven months of the year as follows:

		1894.	1893.	1892.
Sweden	cwts.	156,352	161,690	130,034
Denmark	"	670,772	558,494	501,967
Germany	"	105,601	123,264	87,249
Holland	"	85,332	78,333	78,081
France	"	230,142	283,906	323,696
Canada	"	2,179	4,879	4,552
United States	"	27,637	14,758	22,127
Other countries	"	289,428	170,852	111,998
Total		1,567,443	1,396,176	1,259,704

The showing made by Canada is certainly far from encouraging, for we seem to be losing the little trade we once had

—It is rather an unusual occurrence to import coarse lumber from the United States for use in Toronto. Yet such is sometimes done. The joists for a King street warehouse were sawn from Georgia pine, and after the duties are paid upon them here the price will not exceed that charged for the same quality of seasoned lumber in Toronto. In this instance there was occasion for haste, time was of the essence of the contract, and it was found that the joists could be laid down here as quickly as if ordered from the mills to the north of us.

BRITISH COLUMBIA SALMON.

With the arrival of the "Primera" at London, England, on August 13th, the last cargo of British Columbia salmon for the season 1893-4 reached its destination. The "Primera" carried 24,666 cases, valued at $123,350, and had left Victoria on December 17th. The fleet last year, consisting of ten vessels, carried in all to London, Liverpool and Manchester 405,097 cases of canned salmon, having a value of something over $2 000,000. It is, of course, too early in the season to give much information in regard to the 1894-95 fleet. Several vessels, however, which propose to load salmon, are now in Victoria and Vancouver waiting cargoes, and one, the "Clan Robertson," with a registered tonnage of 1,625 tons, will probably carry away from British Columbia the largest cargo in the history of the industry. The German ship "Sirene," 1,437 tons, was the largest vessel of the 1893-94 fleet.

The present season's pack on the northern waters is now over. The fish were coming very slowly and the canneries closed down and paid off their hands. Soon after this had been done the salmon in some streams began to run, but the fish came too late to help the canners. The Naas river canneries are credited with a pack of 20,000 cases, and the run on the Naas is said to have been exceptionally good this year. The pack of the eight canneries on the Skeena river is estimated at 62,500 cases, distributed as follows: Inverness, 8,000; North Pacific, 9,500; Aberdeen, 8,000; Balmoral, 7,000; British America, 7,500; Diamond, 8,000; Royal Canadian, 8,000; Standard, 6,500. The cannery at Lowe Inlet is reported as packing 9,000 cases. Alert Bay cannery has had a poor season, having packed only 2,000 cases, as compared with double that amount a year ago. At River's Inlet, Wannuck has packed 13,000 cases, and the British Columbia canneries 27,000 cases; in 1892 the three canneries of River's Inlet were credited with a pack of only 19,123 cases. This gives a grand total for the northern canneries of 133,500 cases. The results of the season, especially on the Skeena, have been disappointing, as the canners there were prepared for a large pack. The Fraser River pack is still in progress; the season began with very poor runs, but since the second week of August the situation has shown material improvement. Reports differ as to the extent of the pack on the Fraser, some canners claiming that even with good fishing until the close of the season the pack must necessarily be a short one. Advices from other sources, however, indicate that the pack will be up to that of former years. On the 13th inst., it was estimated that 250,000 cases had been packed up to date.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, August 23rd, compared with those of the previous week:

Clearings.	Aug. 23	Aug. 16
Montreal	$10,634,092	$9,373,868
Toronto	5,837,514	4,112,562
Halifax	1,165,908	1,298,980
Winnipeg	634,670	845,280
Hamilton	529,501	535,869
Total	$18,801,685	$16,166,568

Aggregate balances this week, $3,636,988; last week, $2,208,400

—The impost laid on whiskey in the United States will be increased 20 cents per gallon under the new tariff; the rate is to be fixed at $1 10. In view of this fact it is stated that the American Whiskey Trust has borrowed $5,000,000 for the purpose of taking spirits out of bond. Already considerable quantities of spirits have been removed from warehouse, and if the large sum above stated were paid for whiskies bonded at 90 cents the gallon, the Government will be deprived of much revenue which would have gone into its coffers if the plan of the Canadian Government had been adopted. In similar circumstances our people at Ottawa announce the bill by wire the moment it is decided upon, and the new rate is levied forthwith.

—To many it must have seemed like parting with one of the established institutions of Brantford when Mr. Alexander Robertson, who had been at the post for so many years, resigned the charge of the Bank of British North America branch in that city. Mr Robertson had a good record, as well as a long one, and in his retirement from active service will be followed by the kind wishes of many friends. We learn that Mr. Emsley, for many years inspector of the bank, has been appointed manager of the Brantford branch in succession to Mr. Robertson.

—Business at the Granby rubber factory, which has been passing through its midsummer quietude, has resumed its wonted activity, says the Sherbrooke *Gazette*.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending 31st July, 1894.
